I pulled the same stunt at KSTT in Davenport, Iowa. I was PD and was
filling in the Sunday morning shift for one of the jocks and got the
privilege of running the typical Sunday morning crappola. We had an
hispanic show and it was tails out on the reel. I put it on, started it
and potted down the monitor. We were well into the program when I
happened to see the phone flashing. It was a complaint from one of the
listeners. Frankly, I didn't think anybody listened to that half hour.

Thank you Don...that brought back great memories. I had worked at WFYI, WVHC and WLIR on Long Island when I started work at ABC New York in 1962. I started as a Desk Assistant in Radio News on the third floor of the 39West building. Radio Master was on the first floor.

I was in studio 3B with Don Gardiner when he read the flash that JFK was dead. I had handed it to Nick George (who died a few weeks ago) and he gave it to Don.

Martin Block was gone from studio 5B, but his record racks were still on the wall...his office was the WABC News office of Jack Powers. Turntables were also gone...all music and spots were on Cart, from Collins machines. The glass wall had been 'broken'...DJ and engineer were in the same room. The old 5B control room was used for news production. The Lodi, NJ transmitter was remotely controlled from 5B...but there was still someone manning the xmitter, and maintenance was done on Monday mornings from midnight till 5am when the station was dark.

I became a "Sound Effects Artist" in '64 and worked on "Voices in the Headlines" with Fred Foy and George Ansbro instudio 1A; "Flair Reports" with Jim Harriot, Ted Kopple and Charlie Osgood in 4B. I also worked on the last radio drama ever at ABC..."Theater Five". I just bought a CD of "Theater Five" shows on MP3...but the last four minutes (including the credits) were cut off. The engineers on that and many other shows were Neal Pultz and Marty Foglia...Jack McCarthy was the engineering ruler of studio 4B.

Harvey, Drier and Breakfast Club still came from Chicago...Quincy How, John Cameron Swayze, Art Van Horn and Don Gardiner from NY...and Edward P. Morgan from DC.

Staff announcers were Milton Cross, Gilbert Hodges, Dirk Fredericks (ex AD Fred Dirk), Joel Crager, Carl Caruso, Scott Vincent, Bill Brophy, Allan Jeffereys, and many more.

Truly the good old days!

I'm now retired in Peacham, Vermont.

Thanks,
Bob Ring

I'm going to take the guess that it was WLCY. The 3 tower array is next to
Channel 10's studios on Gandy Blvd. Later 1380 became 100,000w Q-105's AM -
broadcasting in Kahn ISB AM Stereo.

Couldn't resist this...

Great stories in this thread. My tape story comes from what was then WTMB-FM in Tomah WI in the early 80's. We had recorded the local high school Christmas concert for playback. Whoever recorded it recorded the choir concert on one side of the tape, then flipped it over and recorded the band on the other side. With every band and choir kid listening, along with their parents, I played it on-air on Christmas Day. Of course, unknown to me, the control room reel-to-reel was set to play all four tracks in one direction. About twenty minutes into the thing, during a beautiful choral rendition of a traditional holiday favorite, the band started playing. Backwards. Frantic, I called the Chief Engineer (a position I would later have there), and he came to the station, walked in the control room, flipped a switch on the front of the tape deck, then walked out muttering something about rookies.

Right you are... The FCC office was in Tampa, the school was in St
Petersburg.
The station with the 3 stick array was actually on the east coast in Cocoa.

And thanks for your memories too.
You might want to head an exit up the highway and visit the studios of WSTJ, a unique collection of equipment from when the station first went on the air (as WTWN), including the original board, and new CD burners and mini disc players. Somehow, it all works. (usually)

Thanks again, to all, for these wonderful memories.

For sale:

(The "Radio Crazy" is back!)

Partial ownership in fulltime 1 KW AM in NE Miss.
Small city of well over 10,000 population. Less than
100 airline miles from Memphis.

Active or inactive investors with at least $10,000 are
welcome. All investors would be on the board with full
voting rights if desired.

The total asking price is $85,000. No real estate is
included. The station is on the air since the 1940s.

AM bashers, please bash elsewhere! Negative nabobs go
elsewhere with your negativity.

I will not be disclosing city of license and/or
callsign to those who will not completely identify
themselves.

Happy new year.

73,

Meyer Gottesman, W6GIV
Macon, GA

If you can stand one more tape tale...in the late 70s WMAL-FM in DC (now MIX107.3) was automated at least half the day.

One announcer, John Lyon, always tried to do something funny on the slate at the top of his talk-tape for the enjoyment of the board op. He was gifted in being able to speak backwards convincingly.

He once slated the tape backwards (and then recorded his straightforward 25hz toned talk-tape). We had a howl when we watched the AM staff engineer assigned to cue the tape on the automation. He would listen to a few seconds, then dutifully fast forward to the other end of the tape and turn it over, which sounded just the same. Took him awhile!

Lyon once made the mistake of burping loudly during his slate. When the tape was later threaded onto the automation's Revox machine, it cued to the burp instead of the first 25hz tone. That was a treat on the air! And all the talk cuts were one cut off in timing until somebody advanced it!

http://www.clearchannel.com/radio/

I said in an earlier post of mine that Clear Channel is trying to trick listeners into thinking they are getting a "local" product. Then I went to CC's website and I see that they do make mention of voice tracking. They also claim to have a live and local sound. Anyone in the Philly area take a listen to 104.5 fm and tell me if it sounds live *or* local.

Sorry if the "Clear Channel is evil" thread is old hat in here . . .

It all depends on what entrepreneurs do with it. So far I wouldn't say it is doing real well. At the risk of using a very tired old phrase, no one seems to be thinking out of the box.

The biggest mistake they make is failing to realize that so-called "Internet radio" isn't radio at all. It is a completely different medium with its own collection of strengths and weaknesses.

It is amusing, however to watch sites pretend to be radio stations.

Generally, you can tell if it is live or robot.

I don't want to give away all my secrets here, but suffice it to say, there
is not too much difference when it comes to who or what presses the buttons.

19. HF Broadcast Transmitter

Newsgroup: rec.radio.broadcasting
Date: 2003-01-03 18:40:09 UTC
From: Philip de Cadenet <Philstheboss@thebbc.fslife.co.uk>
Message-ID: <av4le9$sg1$1@xuxa.iecc.com>
Source record: 8946

I have a request on behalf of a colleague who is looking for an alive or dead HF AM broadcast transmitter. Something in the 1-10Kw average power department and with as wide a frequency coverage as possible. Anything considered, alive or dead. I can arrange collection and shipping from most parts. W.H.Y.? Any bible stations with old stock?

Phil G4ZOW

20. Clark Howard Streams?

Newsgroup: rec.radio.broadcasting
Date: 2003-01-03 18:40:11 UTC
From: km@mathcs.emory.edu
Message-ID: <av4lebsgl1@xuxa.iecc.com>
Source record: 8948

WSB the originating station of the Clark Howard Show, streams
the broadcast using chaincast/streamworks which is not supported
on my platform.

There seem to be a lot of stations carrying his broadcast.
Does anyone know of one that streams it via Realaudio. MP3,
or even a straight windows media?

Also, do any of the affiliates have archives that stream on demand?

Wow, how this discussion brings back memories of the Golden Days of Radio.
I first worked at WNEW on a show called "The High School Hour". It aired
(live, of course) Saturday afternoons at 5 and featured talented students
from NYC area schools. I was the emcee and it was part of my job to pick up
the few 78RPM records played to help fill.
The record were in the next studio where Martin Block hosted "The Make
Believe Ballroom" after the 5-minute news from 5:30 to 5:35. ("news-around
the clock prepared by the Daily News, New York's picture newspaper).Block's
record-guy, Joe Franklin, would find me the records and after our show ended
at 5:29:30 I was rush back to return them to Joe before the Boss got there.
One time I was delayed and I was still where when Block came in. He was
wearing a khaki uniform with a .45 on his hip (apparently he had received
threats and wanted to defend himself). When he found me in his studio he
growled at Joe, "get that goddam kid out of here".
I was required to obtain an AFRA work permit to work at NEW and after a few
weeks I joined the union. (I decided that broadcasting was my future).
It worked out well and after I went from radio to TV in Florida I returned
to the Big Apple in 1964 to become a news anchor at WCBS, WABC and WOR-TV
until I retired and came back to FL in 1987.
This was fun. Maybe I'll write a book.
My Best Wishes to all the old guys..

Radio is free but webcasting is very expensive. Add the recent RIAA
fees and it's unlikely to pay for itself, considering the relatively
small number of people who listen. This is especially true for the mom
and pop stations.

Because of the RIAA and the fact that Yahoo Broadcast wasn't making
money before the fees were added, they dumped the service.

Rich

I guess you haven't been keeping up. Radio may be free, but everyone
(like the RIAA, etc.) has to have an inflated piece of the pie from
anything that has to do with "Internet". Broadcasters have gone back to
what they know: radio.

>What is up with this shit of not streaming radio stations anymore...<

The shit is that streaming is too expensive, and has never earned so much as a dime for any over-the-air broadcaster. Consider the required royalty payments to BMI, ASCAP and SESAC (because the law and the courts say that streaming is a separate public performance from broadcasting even when the two are simulcast), the fact that streaming adds to neither ratings nor the bottom line, the effective prohibition of streaming ads using union talent (because the talent fees for streamed commercials are 300% of those for over-the-air operations, and that adds up quickly), the restrictions of the Digital Millennium Copyright Act that prohibit certain programming practices from being used in streaming, plus the fact that most of the major broadcast-streaming operations have closed up shop. This week, Clear Channel joined Viacom, Entercom and other broadcast groups that have stopped streaming, although I understand some CC stations are still doing it as of this writing.

>the last time I checked radio was free! Right?<

I don't know where you've been, but radio is not free. This has been extensively (and exhaustively) discussed in this forum and others, but since you appear to be a latter-day Rip van Winkle, suffice it to say the web streams have stopped because of demands for various fees by AFTRA (for streaming commercials) and ASCAP/BMI/RIAA for playing music. Since there is no revenue for stations in streaming, few are willing to pay for the privilege of doing it.

Mark Howell

PArts of that system were around right through the 70's.
LOL... In my early days I ran (slept through) Herb Jepko at WVOR. The
audio line feeding the net audio was so bad, a dialup oculd do it
better, even in those days.

Amateur Radio Newsline™ Report 1325 – January 3, 2003

Amateur Radio Newsline report number 1325 with a release date of Friday, January 3, 2003 to follow in 5-4-3-2-1.

The following is a Q-S-T. Ham radio growth resumes in 2002 and a celebration of our radio past. These stories highlight Amateur Radio Newsline report number 1325 coming your way right now.

(Billboard Cart Here)

**

HAM STATS: HAM RADIO GREW IN 2002

Happy New Year and welcome to 2003. We start the year with some good news. Ham radio begaN growing once again 2002. Bill Pasternak, WA6ITF, has the details:

--
That’s right Mert. 2002 was definitely a good year for growth in the United States Amateur Service, and the numbers supplied by Fred Maia, W5YI of the W5YI VEC prove it.

We ended the year 2000 with a total of 681,187 hams licensed by the FCC. A year later, at the end of 2001 we were down to 680,371. A loss of 816. And many feared that the downward spiral would pick up speed in 2002.

Well the pundits were wrong. 2002 was a turn-around year. Not only did the U-S ham radio population increase, its now up to 682,591. A net gain of 2200 and more than offsetting the previous years loss. Not a lot of people, but at least numbers going in the right direction.

And looking at the numbers, the greatest growth came in two licenses. As expected the Technician class continued to expand. Surprise was the Extra. A total of 4082 people either upgraded to the top license or went right to it from ground zero. Either way, the numbers show that there is a lot of interest in the Extra now that the 20 wordd per mintue Morse test has gone away.

The loosers in 2002? The license clssses no longer issued. Tech Plus was down by 45%. Novice class lost 30% and Advanced plunged 20%. But it does not mean that all the holders of these licenses left ham radio. Some probably did, but the majority seemed to have upgraded to higher class licenses with Tech Plus to General leading the way.

For the Amateur Radio Newsline, I’m Bill Pasternak, WA6ITF.
--

What will 2003 hold for ham radio growrth? Good numbers we hope -- but we will have to wait a year and see. (W5YI)

**

CELEBRATING OUR HERITAGE: MARCONI AT 100

Now, for a trip back in time. To an event that would mark the very dawning of the communications revolution. And word of a ham radio special event to celebrate it. Roy Neal, K6DUE has more:

--

LISTEN TO HISTORY. A VOICE FROM RADIO'S PAST…

(Marconi audio)

THAT WAS THE MAN GENERALLY CREDITED WITH INVENTING RADIO AND MAKING THE FIRST WIRELESS TRANSMISSION ACROSS THE ATLANTIC. GUGLIELMO MARCONI…RESEARCHER…INVENTOR…BUSINESMAN…ENTREPENEUR.

THIS YEAR, FRPM THE 11TH TO THE 19TH OF JANUARY, A SPECIAL EVENT AMATUR RADIO STATION WILL BE ON THE AIR, COMMEMORATING THE 100TH ANNIVERSARY OF HIS HISTORIC TRANSMISSION BETWEEN THE UNITED STATES AND GREAT BRITAIN. THAT GROUNDBREAKING BROADCAST TOOK PLACE ON JANUARY 18TH, 1903.

(Spark gap sound)

AND THAT WAS THE SOUND OF RADIO IN THOSE DAYS. RAUCUS. MADE BY A SPARK CONNECTED TO AN ANTENNA. MARCONI USED A 35 KILOWATT ROTARY SPARK TRANSMITTER FROM CAPE COD IN MASSACHUSETTS TO SEND GREETINGS FROM THEN PRESIDENT THEODORE ROOSEVELT TO ENGLAND'S KING EDWARD THE SEVENTH.

NOW, A HUNDRED YEARS LATER, THE MARCONI RADIO CLUB, IN COOPERATION WITH THE MARCONI CAPE COD MEMORIAL RADIO CLUB, WILL USE MODERN MODES OF COMMUNICATION TO CELEBRATE BY TAKING TO THE HAM BANDS. THEY WILL USE THE CALL KM1CC AND OPERATE FROM THE TOWN OF EASTHAM, NOT FAR FROM THE ORIGINAL MARCONI WIRELESS SITE.

THEY PLAN TO USE SSB, CW, FM AND EVEN SEVERAL DIGITAL MODES THROUGH OSCAR SATELLITES. PRESIDENT GEORGE W. BUSH IS EXPECTED TO SEND A COMMEMORATIVE MESSAGE. WORKING WITH ARISS, AMATEUR RADIO ON THE INTERNATIONAL SPACE STATION, STUDENTS AT 3 CAPE COD HIGH SCHOOLS EVEN HOPE TO TALK TO THE ASTRONAUTS AND COSMONAUT ON ORBIT.

FOR HAMS LUCKY ENOUGH TO MAKE CONTACT WITH KM1CC, THERE'S A SPECIAL QSL CARD. TO GET ONE, UNITED STATES STATIONS SHOULD SEND A STAMPED ENVELOPE TO BARBARA DOUGAN, KILO-BRAVO-ONE-GOLF- SIERRA-OSCCAR, 99 MARCONI SITE ROAD, WELLFLEET, MASSACHUSETTS 02667. THOSE OUTSEIDE THE UNITED STATES SHOULD SEND CARDS VIA THE W ONE QSL BUREAU.

AGAIN THE CALL FOR THIS VERY SPECIAL,EVENT WILL BE KM1CC. YOU CAN GET MORE INFORMATION ON THE MARCONI CENTENNIAL ON THE WEB AT THE URL FOUND IN THE PRINT EDITION OF THIS WEEK'S AMATEUR RADIO NEWSLINE REPORT.

FOR THE AMATEUR RADIO NEWSLINE, THIS IS ROY NEAL, K6DUE.

--

A special thank you to the planners of the Marconi 100 celebration for the great press package they supplied. Using the latest computer technology they captured a bit of our radio heritage for all to enjoy in the 21 century. Additional details are on the Marconi Radio Club Web site at http://personal.tmlp.com/k1vv/w1aa/. (Marconi Radio Club)

**

RADIO RULES: FCC SEEKS COMMENTS ON AUTO UPGRADE

Back to the present, an ARRL bulletin says hat the FCC is inviting comments on two Amateur Radio-related petitions for rule making. Both have been put on public notice and are available for review and comment.

In his petition, designated RM-10620, Dale Reich, K8AD, has asked the Commission to automatically upgrade Novice and Advanced license holders to the next license class if the licensee has 20 or more years of operating experience. Among other proposed changes in what he calls a ''merit and service upgrade'' schedule, Reich asks that Novice phone privileges in the 2-meter band be reinstated for those still holding that license.

Reich claims that the proposed changes could augment public service abilities by those receiving the added privileges. The deadline to comment is January 17th. (ARRL)

**

RADIO RULES: FCC SEEKS COMMENTS ON SATELLITE LAUNCH PRE-NOTIFICATION

Also asking for a rules change is AMSAT North America. The ham radio space agency has asked the government to drop its presently required 27-month pre-space notification to the FCC's
International branch for Amateur Satellite launches.

AMSAT feels that a pre-space notification within 30 days of a launch commitment is more than sufficient. Its request has been assigned as RM-10621. This one also carries a January 17th comment cutoff deadline.

**

Break 1

Wishing you a Happy New Year from the United States of America. We are the Amateur Radio Newsline, heard on bulletin stations around the world including our longtime friends in the Holmsburg Amateur Radio Club repeater serving Philadelphia Pennsylvania.

NAMES IN THE NEWS: ART BELL, W6OBB, RETIRES

Art Bell, W6OBB, bid a final farewell to his Coast to Coast A.M. radio show as 2002 gave way to 2003. Over the fifteen years he hosted the show, Bell took it

to the very top of the ratings peak. It was over 450 radio stations in North America, heard world wide over the Internet and had an audience estimated in the 10’s of millions.

Bell had departed the show once before due to a family situation that needed his full time and attention. The show did not do well under the substitute hosts. Bell returned the following year and and rebuilt the program to its powerhouse position on the Premiere Radio Network. Often, after the program, Bell could be found on 75 meters chatting with his friends.

In saying goodbye to his listeners, W6OBB explained that this is not the end of his career in radio. Actually it’s a new beginning.

Bell says that he and his wife have made one of their dreams come true. They built their own radio station – KNYE – located in Pahrump Nevada and its now on the air. Bell says that building KNYE into the station he wants it to become will be the next challenge in his broadcasting career.

Meantime, you can still hear -- and talk to Art Bell, but only if your signal can be heard in Pahrump Nevada. Just listen on or near 3.840 MHz for the call sign W6OBB. If you hear Art, please say hello and you might add -- “...thanks for the ride.” (ARNewsline™)

**

ENFORCEMENT: ANOTHER GRIZZLEY PROBLEM

The FCC’s patience appears to be wearing thin with the license holder and users of a Northern California repeater. This as the agency’s Enforcement Bureau again targets the San Francisco area Grizzley Peak machine. Amateur Radio Newsline’s David Black, KB4KCH, has the rest of the story:

--
When Riley Hollingsworth became the FCC's chief ham radio rules enforcer several years ago, the Grizzzley Peak repeater system was one of the first problems he tackled.

Hollingsworth shut the repeater down until its license holder agreed to setting up around-the-clock control operators. Their duty was to monitor the K7IJ system and to keep watch over its users. Transient operators had to identify at the beginning and end o every transmission. Provisions had to be made so that the FCC could monitor the system from a remote location.

That strategy worked--for a while. At one point, users called the Grizzley Peak repeater a pretty decent machine.

But last April problems started again. That's when the FCC says users began getting out of control. The Commission began receiving reports of unlicensed operators using the repeater. And reports of intentional interference surfaced, along with lengthy and unidentified key-ups. There were also reports of users failing to properly identify and other violations of the Amateur Service rules.

On November 26th, Hollingsworth wrote to system license holder Bruce Wachtell, K7IJ. Hollingsworth's letter reminds Wachtell that he will be held legally accountable for the proper control of his repeater. Hollingsworth tells Wachtell that it's up to him to find ways to ensure that people using the repeater are doing so legally.

And, just as Hollingsworth suggested to Los Angeles repeater operator Wayne Curley, WA6NRB, he suggests that Wachtell lock out violators. Hollingsworth suggests using tone access, or limiting the repeater's operation or any other steps to bring it into compliance. If the users refuse to adhere to the rules and if Wachtell cannot solve the problem, then the repeater must go off the air.

If Wachtell refuses, Hollingsworth's letter outlines what might be ahead: That could include fines, license suspension or even revocation for failure to comply.

And Hollingsworth adds these comments. He tells Wachtell that the decision to operate a repeater is a totally voluntary one. He says a repeater is a convenience in the Amateur Radio Service and that putting one up is not a necessity. In other words, nobody is forcing Wachtell -- or any ham -- to put a repeater on the air and perhaps place his or her license -- on the line.

For the Amateur Radio Newsline, I'm David Black, KB4KCH.

--

No word yet if Wachtell has responded to the FCC. (FCC)

**

ENFORCEMENT: FCC RAIDS NORCAL UNLICENSED BROADCASTER

Still in Northern California, the FCC has raided an unlicensed broadcaster. A station calling itself Berkeley Liberation Radio.

The bust took place on December 11th. That’s when FCC agents, a dozen federal Marshal’s and Oakland Police raided the station’s studio and carted away all broadcast equipment. Reports say that the only one thing left was a copy of the court issued seizure warrant for the radio gear that the government lugged away. (W5YI)

**

ENFORCEMENT: INTERFERENCE BRINGS SUSPENSION

An Ohio ham has agreed to a one-year suspension of his amateur license after being cited by the FCC for deliberate interference. Gary Weiler, KI8DI, agreed to hand in his license for one year rather than face possible fines and license revocation. Weiler was cited for numerous instances of interference on a Cincinnati area repeater. (From FCC release, CQ)

**

ENFORCEMENT: FCC FINES ATT WIRELESS

AT&T Wireless Services has agreed to pay $2 million to settle a probe into possible violations in deploying enhanced 911 service over its network. Last May, the Federal Communications Commission in May accused the company of failing to meet certain deadlines for offering improved location information to more precisely pinpoint the
location of those who dial 911 for help from their mobile telephone. In addition to the $2 million payment, the carrier also agreed to a timeline for deploying location technology in its network, including having compliant technology in at least 1,000 cell sites early this year and increases the service to 8,000 sites by June 30th, 2004. (From FCC release)

**

AMATEUR RADIO HONORS: THE DARA AWARDS

2003 brings with it the opening of the nominating period for several prestigious ham radio awards programs. The most preeminent among these is the Dayton Amateur Radio Club's Radio Amateur of the Year, Special Achievement and Technical achievement awards that will be presented at the Dayton Hamvention next May.

There are three DARA awards given each year. Technical Excellence goes to a ham who has made an outstanding technological advancement in the field of Amateur Radio. The Special Achievement Award honors a ham who has made a singular outstanding contribution to the advancement of the hobby. But the most coveted Dayton award is the Radio Amateur of the Year. It is reserved for the special person who has made a long term commitment to the advancement of amateur radio. A well-rounded individual who continulally contributes to the hobby in some outstanding way.

The deadline to submit is January 30th and there are two ways to ways to file a nomination. You can send it by U-S mail to Hamvention Awards, Post Office Box 964, Dayton Ohio, 45401. Or you can do it on-line by taking your web browser to www.hamvention.org and clicking on Award Nominations. (DARA)

**

AMATEUR RADIO HONORS: THE CQ AMATEUR RADIO HALL OF FAME

Also seeking nominations is the CQ Amateur Radio Hall of Fame. This ongoing program honors those whose technical or other accomplishments have helped to propel Amateur Radio forward, or whose achievements in other areas of life have helped to improve ham radio's reputation simply through association.

Nominations for the award can be made by letter to CQ Amateur Radio Hall of Fame, 25 Newbridge Road, Hicksville New York, 11801. Nominations can also be filed by e-mail to hall-of-fame@cq-amateur-radio.com. And in case you have not yet figured it out, this award is sponsored by our friends over at CQ Magazine. (CQ)

**

BREAK 2

This is ham radio news for today’s radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

HAM HELP: ANTENNASUP.ORG

Do you have some advice for your fellow hams in dealing with local authorities to get an antenna permit? Want a place to share it? Well try a new website called www.antennasup.org.

Its the work of Duane Mantick, WB9OMC, who freely admits that it does get a bit indignant in spots but there is a reason. That being to wake up and shake up a few hams to get them involved in what C-Q Magazine said may be the most serious threat yet to Amateur Radio. The ability to put up a sky hook and get on the air.

Duane adds that the site is still under constuction and that hes waiting for some graphics. He is also working on collecting some more specific URL's to relevant documents for those who drop in for more information.

Again thats www.antennasup.org. Go over and take a look for yourself. (WB9OMC)

**

CONVENTIONS AND HAMFESTS: LIMARC IN FEBRUARY

The Long Island Mobile Amateur Radio Club annual Indoor Winter Hamfest will be held Sunday, February 23rd from 9 A.M. to 1 P.M.. The venue is the Levittown Hall in the town of Hicksville New York not all that far from the offices of C-Q Magazine.

Planners say that in addition to the regular faire, ham radio testing will also be available on site. For more information on this event please take your web browser to www.limarc.org or call the 24-hour info line at 516-520-9311. (LIMARC)

**

SPACE AND SCIENCE: ICESAT TO MEASURE ICE FROM SPACE

NASA scientists hope to get new insight into the future of global ocean levels with the launch of a satellite designed to measure the waxing and waning of the planet's largest ice sheets. The Ice, Cloud and Land Elevation Satellite, or Icesat, is intended to spend a minimum of three years making nonstop measurements of the elevation of the ice sheets that blanket Greenland and Antarctica. That will help answer the question of whether those layers of ice, which are up to two miles thick in places and contain an estimated 8 million cubic miles of fresh water, are growing or shrinking. (NASA)

**

INTERNATIONAL - UK: THE RADIO COMMUNICATIONS FOUNDATION

The Radio Society of Great Britain has announced the establishment of the Radio Communications Foundation. As envisioned. the new foundation will be used by the RSGB to channel all its work in the field of education and training. It will support the promotion of amateur radio to the wider audience in the U-K. The Foundation is being registered as a charity and will operate independently of the normal commercial activities of the RSGB. (RSGB)

**

WRTC2002: THE LAST MEETING AND A NEW VIDEO

December 15th marked a final gathering of the WRTC 2002 Organizing Committee and the World Radiosport Team Championship hosts.

The group met in in Vantaa Finland not far from Helsinki Airport. The main business included delivery of the official report on the games and a handover of the remaining work and accounts to Contest Club of Finland.

The day finished with a screening of the new WRTC video. The show will be made available to the public at a Contest Club of Finland meeting slated for January 17th to the 19th. It is narrated by ESPN Sports Channel commentator Kurt Perry from a script written by WRTC competitor James Brooks, 9V1YC. (OH2BH)

**

DX

In DX, word that F6FXS, will be active from Guadeloupe between February 12th and March 12th. He will operate only CW using a Icom IC-706 into a wire antenna. Search for him in the morning and the evening -- local time -- on 40 through 10 meters. QSL direct or via the bureau. (OPDX)

Also, F5IRO, is expected to be active from Reunion Island through February. Word has it that he will also try to obtain permission to be active from Juan da Nova and Glorioso islands as well. More on this one as information is made available. (OPDX)

**

THAT FINAL ITEM: HAM RADIO’S HEAVY METAL SOUND

And finally this week, the story of ham radio’s heavy metal. No, not the music. Rather the radios that weigh a lot, sound so good and glow in the dark. Here’s Amateur Radio Newsline’s Paul Courson, WA3VJB:

--
Audio only report. Hear it by taking your web browser to www.arnewsline.org and clicking on the newscast number to download the MP3 file.
--

As reported last week, the ARRL in a few weeks plans take up a proposal to establish an A-M endorsement for the popular Worked All States award. The new endorsement would recognize the achievement of exclusively using full carrier Amplitude Modulation in earning the W-A-S certificate. (WA3VJB,

I've been following the streaming thread, and I have a question.

OK, I understand there isn't any revenue in streaming, but isn't there a setup that deals with those concerns? Clear Channel's WAKS and WMVX here in Cleveland just recently *started* streaming. I thought Clear Channel had a big deal with Hiwire.com - Hiwire's hook is that if you stream through them, you don't stream ads, just content, and they insert ads that they sell that are appropriate for the listener's location (and possibly other demographic info). Really, I think it's a good setup. Eliminates the problems of ads being sold by the station and being broadcast in areas where they shouldn't be, and eliminates some other issues too. Has the Clear Channel deal with Hiwire gone south?

Curious,
SJS

I've always maintained that Infinity is less willing to spend money on radio than Clear Channel, and I think I now have proof of that.

Infinity's radio stations here -- two of them, anyhow -- have a free phone number that lets you dial in via cell phone without paying airtime. You dial, for example, *102 from your cell phone to get WDOK/102.1.

In Infinity's case, in Cleveland, *102 must be dialed from a Northcoast PCS cell phone. The station makes a big deal about how it's a free call.

Well, normally when you have a setup like this and the listener doesn't pay airtime for the call, the airtime gets billed back to the radio station.

But with Northcoast PCS, there is no airtime. Northcoast provides flat-rate unlimited local calling for $35 per month, much like its counterparts MetroPCS and Cricket in other parts of the country. So what if it's a free call? On Northcoast, you wouldn't be paying airtime for the call anyhow!

Compare and contrast with WKDD in Akron, which is owned by Clear Channel. Their number #981 is set up on Verizon Wireless's network. I haven't asked, but I'm pretty sure those calls aren't being put through for free. Verizon doesn't do all that much advertising on the station; nor did Airtouch, VZW's predecessor in northeast Ohio, so I would question the value of doing a trade-out.

If you get anybody to use it they're more idiotic than you are. It may happen.
Try WTVN 610's press-release-as-serious-news-feature department.

To get serious coverage you'd need an African-American Ham History, say an 8th day
of Kwanzaa. In fact you've overlooked a great opportunity, now that I think of it,
talk about press release mentality.

Umoja, kujichagulia, ujima, ujamaa, nia, kuumba, imani, and ham radio. Go for it.
This is NPR material.

Or you could try a light touch, and celebrate a hundred years of delusions, still
staying within the press release genre.

The only ham who ever did any good was Jean Shepherd, in tales of listening to
the code as a boy on Indiana nights; he sent once his own call on the kazoo,
just once ``cq de k2ors'' just once, and said ``There, I've sent a message
to hams.'' He had for instance given his home address to every one of them,
back in an age when hams were universally nice guys.

He did not say the PR pap, for instance that hams serve the community or
are really good in disasters by providing communications - I've never seen
this; it seems to me they're always pains in the butt, more so in disasters.

But Shepherd uniquely told people why they might like to be hams, and it wasn't
from importance. And I think he told people why they might like to be hams as a boy
in Indiana at night long ago. The situation is a little different today.

I don't know how press release types get to appoint themselves the voice
of the hobby in any case. Who speaks for the hams who think the PR people
are self-important morons? Me I guess.

The deal with Hiwire isn't free. Clear Channel actually has to pay
Hiwire for its "services". Recently, Clear Channel corporate has
informed the stations that they will be responsible for those charges
out of their own operating budgets. Many stations do not want to take
the bottom-line hit. Others feel that they could make alternate
arrangments that would be cheaper/better than Hiwire.

Hmmm... When did radio become "free"? I guess we have to ignore,
program costs, promotion, utility bills, capitol costs, employees,
services (ie. Marketron, Arbitron, Billboard, etc.) and debt service
on purchasing that license in the first place.

There is a cost per listener that over-the-air radio has and it
is cheaper than uni-cast streamed audio. You can figure it can
be as much as 10 to 1,000 times the cost of over-the-air broadcasting
depending on how you build out your streaming infrastructure and
your over-the-air costs. If you want to cover your costs then it
makes more sense to do what KPIG did and offer the service as a
subscription.

I think CC and others that are pulling stations off the net are a
bit near-sighted as they should be seeing it as a device for promotion
for much the same reason they develop web sites.

The deal with Hiwire (which CC owns a piece of) didn't fall through, but it also didn't address ALL the concerns. Most notably, I suspect that Hiwire doesn't pay the music-performance royalties for its stations, and that's probably what quashed the deal. Reality probably hit the CC finance folks once the royalty bills started rolling in.

Steve....I heard some mention about a year ago, that Clear Channel owns some part of Verizon. This may not be true.....but it would not surprise me at all. I just looked at their site http://www22.verizon.com/?loc=GN and it looks suspiciously like many of the CC pages!

[Moderator's note: nope, Clear Channel Entertainment ownes the venue in Kansas City, and Verizon just apparently purchased naming rights.]

My information, which comes from someone who works for Clear Channel, is that the Hiwire contract has expired.

Most CC stations ceased streaming within the past week, although the decisions are made at the local level and some continue to stream.

I think you missed his point. Nowhere on your website do you indicate
which radio station "The Last Radio Station" is. I believe he meant
broadcast stations that also webcast, not Internet-only "stations."
Reread his message:

Those dial star-something things are, as far as I know, always dealw witht
he cellular company in exchange for the mention on air. They are advertising
deals, generally hated by PDs. Whatever the individual deal done with the
station and the carrier, the thing is commercial.

Nope. It is paid by the carrier. The programming department at the staiton
probably hates the added clutter of the mentions. The sellers probably think
they have invented the promotion strolke of genius of the year, too.

It's actually not a trade. CCU does not really benefit by having a button on
a cell phone service that may only reach 5% to 10% of the market. The
cellular company does benefit, mostly through all the top of mind enhancing
messages all day long.

I know of no cost in radio that is a function of the number of listeners one reaches. The costs of programming, sales, engineering, etc. are much the same whether there are 10,000 people tuned in or 100,000.

Streaming, of course, is a different animal altogether.

You wouldn't necessarily want to do a trade-out with a cash-paying customer. Ideally you would do the trade with a non-advertiser, thereby not reducing revenue.

Then why would CC do a major regional buy (as they have here) with AT&T
Wireless...especially when Verizon is the OTHER legacy cellular carrier
in the region?

The Clear Channel concert venue in Indianapolis has been named "Verizon
Wireless Music Center" for years.
Clear Channel does not own any of Verizon't stock, but they have had
long-term naming contracts for some time.
As for the *981 phone numbers, they are generally provided to the station at
no cost in return for the mention, "or call Star Ninety-Eight One on any
Verizon wireless phone".

Some programming providers charge based upon listenership.

That said, no matter how you slice it, there is a cost-per-listener in
radio. No one ever said that such cost did not go down as the number of
listeners increased.

>I think CC and others that are pulling stations off the net are a bit near-sighted as they should be seeing it as a device for promotion for much the same reason they develop web sites.<

If you think they're so "near-sighted," then *you* offer to pay their streaming bills. A "device for promotion" that costs the price of several limbs of the human body, and that returns not one thin dime from that investment, is doomed before it even gets off the ground. Broadcasters are, first and last, business people...and as a business model, streaming is, right now, a loser.

65. energy 92.7&5 dead but 103.1fm is now the new station

Amateur Radio Newsline™ Report 1327 – January 17, 2003

Amateur Radio Newsline report number 1327 with a release date of Friday, January 17, 2003 to follow in 5-4-3-2-1.

The following is a Q-S-T. Australian telecommunications regulators oppose the Amateur Radio fix for 40 meters and hams on Fiji provide aid in the wake of cyclone Ami. These stories are first on Amateur Radio Newsline report number 1327 coming your way right now!

(Billboard Cart Here)

**

SPECTRUM ISSUES: AUSTRALIAN REGULATORS FAVOR 40 METER STATUS QUO

A disagreement over the future of the 40 meter band between Australia's national amateur radio society and that nations telecommunications regulators. The Australian Communications Authority -- the A.C.A. favors the status quo. The Wireless Institute of Australia says its time for a change. From Brisbane, Q-News Graham Kemp, VK4BB, picks up the story:

--

The 7 MHz issue. Currently A.C.A. is against the motion at WRC 2003 -- which is of course at variance with the current allocation in Australia. At present the A.C.A. are steadfast in their opposition to the motion notwithstanding numerous attempts at lobbying them. The WIA position is in support of the IARU motion and WIA will continue to lobby A.C.A. to support the full 300 kHz allocation at 7 MHz on a world wide basis.

WIA President Ernie has asked: "If anyone can think of any additional justification that we can provide to A.C.A. to make them change their minds please let the A.C.A. Liaison Committee know and we will try and push the matter with A.C.A. again".

--

What impact the A.C.A.'s stand will have on the outcome of WRC 2003 cannot be assessed at this time.

**

RESCUE RADIO: CYCLONE AMI HITS FIJI

A Cyclone named Ami has torn across parts of Fiji, destroying homes and unleashing floods across northern islands. And it appears that once aghain, Amateur Radio has come to the rescue, It all happened on January 14th. Amateur Radio Newsline's Jim Meachen, ZL2BHF, has what we know so far.

--
Packing sustained winds in excess of 90 miles per hour and gusts of 125 miles an hour, the Cyclone Ami whipped up mountainous seas, cut communications and left the tourist hub of Labasa, on the main northern island of Vanua Levu, under four feet of water. All normal lines of communications with Vanua Levu were cut at about 17:00 GMT as the storm approached. Vanua Levu is where a quarter of Fiji's 800,000 people live.

According to news reports, emergency officials did manage to restore partial communications with Labasa and the town of Savusavu late on Tuesday using Amateur Radios circuits. Over them they learned that Labasa was under four feet of water after a nearby river overfload its banks. Also that there had been extensive damage throughout the area.

But even these communications efforts were hampered by extensive flooding. Also, the extent of the involvement of hams is still unclear since news reports did not give the names or call signs of the operators handling the emergency operations.

Here in New Zealand the government has already sent an air force surveillance plane to assess damage. Another aircraft was scheduled to arrive in Fiji the same day and, carrying aid experts and some relief supplies.

For the Amateur Radio Newsline, I’m Jim Meachen, ZL2BHF, reporting from Auckland, New Zealand.

--

The cyclone is the second to hit the South Pacific in as many weeks. Thousands of inhabitants of a remote part of the Solomon Islands chain northwest of Fiji survived powerful Cyclone Zoe, which hammered the area with 190 mph winds.

**

RESCUE RADIO: HAMS AID IN WAKE OF TYPHOON ZOE

And speaking of Cyclone Zoe, ham radio is helping in recovery efforts following that storm after it hit the Solomon Islands a few weeks ago. Jeramy Boot, G4NJH, is in Nottingham England has more:

--

Students and graduates of the Solomon Islands Amateur Radio Training School have been on the air from the capital Honiara in the wake of Cyclone Zoe.

The storm hit the islands of Tikopia and Anuta in the Solomon's remote Temotu Province last week. The amateurs are volunteers at the National Disaster Management Organisation and are providing assistance to the staff of three at NDMO HQ during the current state of disaster in the Solomons.

Using donated equipment received last year fromoverseas amateurs and CB operators, the first on the air was Moffet, H44MD. He was told that three 100-watt HF transceivers were donated by an American amateur and sent by air mail three weeks before the cyclone.

--

As we go to air, reports say that the Solomon Island radio school graduates are still providing post cyclone aid. (GB2RS)

COMMUNICATIONS LAW: BIG BROADCAST TOWER WIN IN NH

Back here in the United States, a big tower case win for a broadcaster could have a trickle-down effedt for ham radio. This, after the New Hampshire Supreme Court has rejectes a city's zoning ordinance limiting the height of new communication towers to 42 feet. It says that regulation conflicts with federal law.

The ruling clears the way for Koor Communication Inc. to obtain local construction permits to begin constructing broadcast towers for WQTH-AM in Lebanon, New Hampshire. According to Radio World Online, Koor Communications first filed for variances to the ordinance in 1999 seeking to construct four antennas to the height of 266 feet in accordance with its FCC license and Construction Permit. The broadcaster's attorneys argued that Lebanon's restrictions effectively prohibited the construction of new radio stations.

Koor Communication lost several lower court decisions. This lead to the appeal to the state's highest court. That court has now said the lower court findings were incorrect and it reversed their rulings. (CGC Commuinicator, RW-ONLINE)

The American Radio Relay League’s Board of Directors is holding its first meeting of 2003 as this newscast goes to air. For a full wrap-up on what actions the Diirectors might take, go to the news pages on the ARRL website. Its easy to find at www.arrl.org. (ARRL)

**

ENFORCEMENT: HAM JAILED FOR SPYING FOLLOW-UP

Two interesting follow-ups to last weeks story on convicted spy Robert Hanssen, K9QVL. The first came in a note from the FCC which takes issue with our account.

It says and we quote: “the assertion that we need a complaint to pull Hansen's ticket or anyone else's ticket is dead wrong.” Endquote.

But thats all the spokesman says. No other information was provided.

The other item is even more interesting. After the story ran, we began getting reports that Hanssen's call had been deleted. We went over and checked the FCC's database. It was still there. It was also on the Buckmaster websire, but ther was a surrprise when you inputted the K9QVL call over on QRZ.com. It came back stating that the K9QVL listing was no longer in the QRZed database. (ARNewsline™)

**

ENFORCEMENT: FCC RESCINDS ND8V WARNING LETTER

The FCC has canceled its recent warning letter issued to Michael Gurnsey, ND8V, and has told the Parchment Michigan ham he can resume operation on the 20 meter band.

As reported last week, the agency's Riley Hollingswoth, K4ZDH, had written a very sternly worded letter to Gurnsey. It stated that it would initiate stern punitive action against him if it received any more complaints that he was appropriating certain frequencies on the 20 meter band. It also told him to stay off 2o meters until the issue could be resolved.

But on January 3rd the Hollingsworth wrote to ND8V once again. This time it told Gurnsey that he could disregard the warning letter and resume 20 meter operation. It also went on to thank him for his cooperation in resolving the matter. No further information was provided by the FCC. (FCC)

**

ENFORCEMENT: NY HAM FACING REVOCATION

The FCC has written to a New York city area ham telling him he may face license revocation proceedings. The Commission's Daryl Duckworth, NN0W, explains:

--
Duckworth: "A Warning Notice and Notice of Intention to Designate a Revocation and Suspension Proceeding was issued to Alexander Sandbrand N2NNU for operation outside of his Technician class priveleges on numerous occasions and after warnings."
--

Sandbrand lives in Yonkers New York. That's a few miles due North of Manhattan. Back on August 17th of 2001 the FCC issued Sabndbrand a first Warning Notice regarding operation outside of his license privileges. The Commission says it now has information indicating that at least nine times since his receipt of that initial warning that Sandbrand operated out of band.

And in a related item, the ARRL Letter reports that Sandbrand called FCC rulers enforcer Riley Hollingsworth after receiving the first Warning Notice. He reportedly complained that it wasn't fair that he had to pass additional examination elements to operate on High Frequency phone. Hollingsworth supposedly told Sandbrand that if he wants to operate on H-F, he has to take the test like everybody else. (FCC, ARRL Letter)

**

RADIO LAW: TEEN ARRESTED AND CHARGED IN DIREC TV CASE

A 19-year-old college has been taken into custody on charges that he pilfered information about a new security system used by satellite broadcaster Direc TV and distributed it over the Internet. FBI agents in Los Angeles say that they arrested Igor Serebryany and have charged him with stealing information related to DirecTV's latest access cards. These are the access cards Direc TV uses to regulate what services its subscribers will receive.

According to several news reports, Serebryany who is identified as a University of Chicago student, allegedly took the information from a Los Angeles area law firm that was doing legal work for Direc TV. He ithen is supposed to have distributed it to web sites dedicated to the hacking of DirecTV's security systems.

According to the criminal complaint against Serebryany, DirecTV spent more than $25 million developing the high security "Period 4" card. This, after the three previous versions had been successfully hacked by pirates. Serebryany faces up to 10 years in prison, a fine, or both, if convicted. (Published news reports)

**

RADIO LAW: FCC SIMPLIFIES FILING PROCEEDURES WITH ECFS EXPRESS

The Federal Communications Commission has launched ECFS Express. This is a simplified version of its Electronic Comment Filing System or ECFS.

According to an FCC news release, ECFS Express is designed specifically with the consumer in mind. The FCC claims that it is easy to use, focuses on topics rather than docket numbers, and requires minimal input by consumers seeking to participate in the Commission’s public rulemaking process. People wishing to comment simply click on a topic, fill in their personal information, write their comments and hit “send.”

To access ECFS Express, users need only click on the “File Comments” logo found on the front page of the FCC’s Web site at www.fcc.gov The original version of the Electronic Comment Filing System, which includes all docketed Commission proceedings is still at the FCC website as well. (FCC)

**

COMMUNICATIONS LAW: A WARNING TO DOMAIN NAME SELLERS

A warning to Internet domain-name sellers. Keep better track of your customers or Congress will be forced to step in.

The warning comes from California Representative Howard Berman. He claims that domain-name sellers have an obligation to keep accurate records of their customers to ensure they can be contacted if they are improperly using trademarked names or engaging in other illegal activity.

According to Berman. Internet users must provide a contact name, address and other information when they buy a domain name. But the Congressman says that few name sellers run checks to make sure that the contact information is

accurate. Berman says that this lax oversight allows scam artists and cybersquatters looking to sell domain names to their rightful owners or others to hide their true identities. This he says, provides a barrier for law-enforcement officials investigating such crimes.

Berman says that he would like to see all the top-level domains start to implement these types of checks on their systems. He also warns that if self regulation does not work that Congress may have to step in. (Published news reports)

THE WAR ON TERRORISM: NYC REBUILDS WITH A NEW TV TOWER IN NEW JERSEY

A broadcast tower almost a half mile high to replace the structure lost when terrorists felled New York's World Trade Center could rise across the Hudson river in New Jersey. This, as an alliance made up of eleven broadcasters release a report as to why they favor proposed site in Bayonne over one in Jersey City. Amateur Radio Newsline's Bruce Tennant, K6PZW, has more:

--
In a 17-page letter to New Jersey's environmental commissioner, the broadcasting alliance says the new tower would restore quality television reception for about three quarters of a million people in the metropolitan area. This is especially important to the regions poor and elderly who cannot afford to pay for cable or satellite reception. And the alliance called the Bayonne site far superior in terms of size, security, environmental concerns, cost and construction timetables.

And the groups president, Edward Grebow said the $200 million project would also be a boon to construction workers in the region. He also noted that the city of Bayonne wants to make the tower a central element in plan to transform the location into an area of offices, homes, stores and marinas. In addition to its television antenna system, the alliance suggests that the structure might also be used for scientific studies. This could include long term investigations into weather, climate and air pollution.

If constructed the new tower would not only become the world's tallest free-standing structure. It would also be the worlds tallest broadcast tower built at near sea level. For the Amateur Radio Newsline, I’m Bruce Tennant, K6PZW, reporting.
--

While New Jersey has the support of the regions broadcasts, other locations are still believed to be under consideration by local politicians and community leaders. (ARNewsline™ from listener reports)

**

EMERGING TECHNOLOGY: GENERATING ELECTRICITY WITH HOT AIR

Meantime, another would-be tallest man-made structure could soon be towering over the Australian outback. This, as part of a plan to capitalize on the global push for greater use of renewable energy.

By 2006, the Australian power company EnviroMission Ltd hopes to build a 3,300 foot high solar tower in southwest New South Wales state. The 200 megawatt solar generating station will cost nearly $563 million dallars to build and will be the width to a football field.

The technology behind its operation is very simple. The sun heats air under the tower’s glass roof. As the hot air rises, a powerful updraft is also created by the tower that allows air to be continually sucked through 32 turbines, which spin to generate power.

EnviroMission hopes to begin construction on the solar tower before the end of the year. It says that it plans on generating enough electricity to supply 200,000 homes around the beginning of 2006.

Currently, the world's tallest free-standing structure is the Canadian National Tower in Toronto. Its about 1650 feet high. (W8HDU)

CHANGING OF THE GUARD: DON MACKAY, ZL3RW - S.K.

The changing of the guard in Amateur Radio continues. This, with word that NZART Honorary Life Member and Past President Don Mackay, ZL3RW has passed away.

MacKay died at his home in Christchurch on January 14th after a long illness. Among his many accomplishments was his work in the introduction of Amateur service repeaters to New Zealand. This, at a time when that nations Post Office was opposed to such operation.

ZL3RW used his experience in emergency communications to sway the agencys decision in favor of permitting repeater operation. For many years it was this aspect of Amateur Radio that ensured their continuation.

Don MacKay is survived by his sister Margaret. A service in celebration of his life was held Saturday January 18th in the city of Christchurch. (NZART)

**

HAM RADIO IN SPACE: NO PACKET TO THE ISS
Packet users are being requested to not send e-mail messages to the all ham crew on board the International Space Station at this time. This, according to the AMSAT News Sercice which reports that they are not answering e-mail, and are realkly not expected to do so in the near future. No specific reason was given, but according to news reopprts the current all ham crew is very busy with many non ham radio related on-orbit duties. (ARISS)
**

HAM RADIO IN SPACE: ISS ALABAMA EXHIBIT FEATURES HAM RADIO
Ham radio will play a part as the City of Mobile, Alabama is hosts a four month exhibit of the International Space Station. This at the new Science Exploreum building.

The exhibit consists of a full scale mockup of the main parts of the ISS along with other aspects of living and working in space. According to N4UXY the Mobile Amateur Radio Club " W4IAX " will host a ham radio station that will attempt to talk to the real space station durinvg the exposition. The club also plans to demonstrate other aspects of the Amateur radio to an expected 80,000 visitors.

The show began on January 9th and ends on April 5th. More information is on the web at www.exploreum.net (N4UXY)
**

CONTESTS: 2003 WINTER 6 METERS CONTEST

The 2003 winter 6 meter contest is will commence at 2300 U-T-C on Friday February 7th and conclude at 03:00 U-T-C on Saturday February 8th. The rules are very simple. Each in-country QSO is worth one point. Out of country contacts score as two points. Hawaii and Alaska count as separate nations in this one.

Scoreing is total Q-S-O points multiuplied by the number of grid squares worked. Entries go by e-mail to w4wrl@aol.com before March 15th. They can also be sent snail-mail to Wayne Lewis, 3338 South Cashur Drive, Florence, South Carolina, 29501. (VHF Reflector)

**

DX

In D-X, PA3GIO will be active as ZK2GI from Niue from about the 18th to 26th of January. He will operate SSB only with 100 watts and a dipole antenna. If you work him, Q-S-L as directed on the air.

Also, KM1E is active from the Bahamas as C6AGN. He’s on 160 through 6 meters from now through the 4th of March.

And lastly, some good news about famed D-X’er Ron Wright ZL1AMO who suffered collapsed lungs in late November. According to Judy Rausch, AA7UC, of the International D-X Network, Wright returned to his home on January 13th to complete his recocery. (AA7UC, INDEXA)

**

THAT FINAL ITEM: CELEBRATING A NEW LICENSE CLASS

And finally, a big success for a big operating event celebrating a new license. That’s the word out of the United Kingdom as reports on the first ever Foundation Class Q-S-O party begin to filter in. Again to England and GB2RS news presenter Jeramy Boot, G4NJH:.

--
The M3 'QSO Party' on 40 metres on the 1st of January was a huge success with hundreds of newly-licensed M3 amateurs and their friends wanting to take part. Richard Jolliffe, G3ZGC, said: "I planned just to join in but when I switched on there were two M3s looking for a net controller. So as one of the Newbury club's Foundation Licence instructors I volunteered.

The pile-up was certainly the largest I have ever heard and I had to go to letters in the suffix and ask for M3 Alfa stations and work through the alphabet. In two hours I worked 112. At least half as many again were 'gotaways'."

Richard added, "What was very noticeable was that the standard of operating was fantastic by the M3s. It was noticeable how appreciative most of them were at having passed their exams. Many messages of thanks were passed to their local clubs. An excellent event."

Douglas Nixon, M3BKC, was one of the numerous Foundation Licensees joining in the fun. He said, "Richard did a splendid job as net controller during the hectic conditions that followed at times during the next two hours. Roger, G4RUW, also from Newbury, took over at 1200, followed by John, G4TSN, from Nottingham. Many thanks to all concerned."

Jeramy Boot, G4NJH
--

Obviously, the concepts behind the U-K Foundation Class license are rock solid and it is most likely the way other nations will go as they seek too increase participation in the hobby. (GB2RS)

69. For sale: Partial interest in class "A" FM in Arkansas.

Newsgroup: rec.radio.broadcasting
Date: 2003-01-19 17:02:19 UTC
From: Meyer Gottesman <wrecktech@yahoo.com>
Message-ID: <b0elmr$i27$1@xuxa.iecc.com>
Source record: 9047

For sale:

The "Radio Crazy" is back but this time with an FM deal!

Partial interest in class "A" FM in Arkansas for sale. (Joint venture).

Active or inactive investors with at least $25,000 each are welcome. All investors would be on the board with full voting rights if desired.

The total asking price is only $195,000 and there IS real estate included. To my knowledge, this is the 2nd cheapest asking price for any commercial FM on the market in the nation!

Station is class "A", 6 KW ERP. Was billing about $12,000 a month in its "heyday". TBA (Formerly called LMA is possible).

Tel: (478)741-1710 in Macon, GA or email of course.

Those interested will get the city of license. It is in N. Arkansas in a beautiful region.

73,

Meyer Gottesman, W6GIV

For sale:

The "Radio Crazy" is back. No "AM bashers" or negative nabobs!

Joint venture. Now come all before the dishonorable Meyer Gottesman and pay tribute. HI!

Partial ownership of 1 KW fulltime AM in small NE Mississippi city for sale.

Active or inactive investors with at least $10,000 are welcome. You can NOT own more than 49 percent. That rule applies to the "Radio Crazy" also!

All investors would be on the board with full voting rights.

The total asking price is $85,00. NO repeat NO real estate is included. You heard it first here, kiddies!

Station is on the air over 50 years. I guess that qualifies it to be called (a) A junk heap? or? (b) A legacy station. Ahhhhhhhhhhh (b) is more politically correct! HI!

Just because I am poor doesn't mean I can't also be stupid!! HI!

Tel: (478)741-1710. Macon, GA. Eastern time.

We will accept funds only from those who have it!

73,

Meyer Gottesman

HI,

I`m looking for information and tips about splitting and combining few power amplifiers in range from 80-120 Mhz. Power is about 300-500W for amplifier.

Input signal from driver stage must be divided to 2, 3 or 5 power amps and than combined again for output to antenna system.

Any information about software, strip-line design or any alternative is welcome.

Thanks in advance..

> the new dance hits radio station. it is even being ran by the same
> guy that did "energy 92.7&5"

Here's a more complete story on the changes at what were Big City's stations as the company slowly sinks in the west:

At the beginning of the month, Big City sold its Latin AC WXXY (Viva 103.1) to Hispanic Broadcasting Company. HBC's operating the station until the sale goes through and has also started simulcasting the station on its WLXX-AM, the former tropical-format station. HBC also owns WOJO (Que Bueno 105.1) and WIND (La Tremenda) in the Chicago market. As indicated, WYXX, the southwest end of the Viva metrocast, was not included.

At the same time, Big City sold its WKIE, WKIF and WDEK stations, the dance music "Energy 92/7 and 5," to SBS. The stations are now carrying a Spanish CHR format called "La Nueva Onda," which must be pleasing the people at WDEK COL DeKalb to no end (but I guess reaches the Rockford market). Meanwhile, WYXX has flipped to dance music until--well, here, according to www.djheadlines.com, are actual liners the station's using:

Streaming until whenever somebody buys us!! - PARRRRRRRTY 103.1

No commercials 'cause we're for sale! PARTY 103.1

PARTY 103.1 - No requests, No DJs, Uh...Just Songs!

And (especially apt considering COL Morris is a rural community):

There's nothing wrong with your cow! Cows milk better with Party 103.1! Mmmooooo...

Could this be the beginning of more marginal clusters being broken up around the country? Stay tuned...

75. Wanted: Sparta A-20B Manual

Easy. You can get more stations with shorter spacing. Didn't happen here because the NAB managed to nix it. It was one of the many elixirs that was going to save AM radio (along with the NRSC mask re-design, AM stereo, and now digital). But broadcasters wanted neither the frequency shake up nor the added competition, so the 9 KHz separation was scuttled.

Sidebar: Broadcasters have never seemed interested in the one thing that would save AM radio.

It is a world standard to use 9 kHz except in the Americas. I don't know when Europe standardized, but by the end of W.W. II stations were on the 9's. In the 70's, I think, they shifted channels but still on the 9 KHz separation.

Australia changed to standardize with SE Asia and to avoid heterodynes form high power stations in the region.

Obviously, 9 kHZ allows more channels on the band... about 12 more in fact.

1975 Geneva agreement, fully in effect by 1979. That agreement also
put Australia on 9 kHz spacing.

The FCC was talking about it but it was scuttled in 1980 or 1981.

>>

Australia and New Zealand were 10 kHz spaced in 1980, but went to 9 kHz shortly thereafter.

Some hetrodyning tests were conducted with KFI/640 and KNX/1070, with their Australian and New Zealand counterparts changing frequency by 1 KHz, and running tests in the mid-pacific.

The results were such that Australasia went with 9 kHz and we stayed with 10 kHz (but at that time many U.S. digitally tuned radios were made with both 10 kHz and 9 kHz), and we expanded the band from 540-1600 upwards. Previously, the band was 550-1500.

Why would anybody, including broadcasters, be interested in saving a particular technology (unless of course they owned an AM station _and_ lacked imagination)? Ah, I recall the days, say about 1966, when CATV (we called it CAT-FIVE) was just getting started, and I was totally uninterested in it. I also recall telling coworkers something like, "If I wanted to distribute programs through wires, I'd join the telephone company." What a visionary I was--not.

That said, what _is_ the one thing that would save AM radio?

Best,

Don Forsling

Problem is a lot of digitally-tuned (particularly the ones used in cars and the cheaper ones sold in drug stores) are not. This would render them useless.

However, these are the same radios that can tune either "even" or "odd" FM frequencies -- e.g.: 97.6, 98.8, 100.4, etc.

There are some radios that can't tune in such FM frequencies. The GM Delco car radios I've seen are guilty of that.

There was a 9 kHz seperation but not on all of the band. On top there
was 8 kHz spacing.
The problem with Europe is a huge demand for frequencies by state owned
broadcasters using immense powers to cover the nations. We also still
have LW which has even larger coverage, and even higher powers (up to
2000 kW) are being used.
In the 1975 Geneva convention it was agreed to change the roster by a
consequent spacing of 9 kHz for all channels on N x 9 kHz, to allow
synhesizer tuners.
This came into effect AFAIR in 1978. In a sort of big bang all
frequencies were shifted by 1 or 2 kHz.
Also Afric has this system, but until this day some stations are on the
"old' frequencies.

As standard-band stations, yes (actually 1941). However,
there were high-fidelity stations in the 1500 to 1600 band,
first on an experimental basis in 1934 and later as full-fledged licensees,

See <http://www.cosmos-monitor.com/hist/kc/w9xby.html> for the
history of one such station.

I've never seen a car radio sold in the USA that could tune the "even"
frequencies. That includes the US "big three", VW, Hyundai, ...

>>

Signed in 1939; took effect in 1941.

The same city channel spacing was also changed from 50 kHz to 40 kHz; 540 kHz was added as a new Canadian clear channel; the U.S. clears on 1460-1490 were moved to 1500-1530; new clears were added on 1540-1580 [*] ; and 1590 and 1600 became new regionals.

All locals on 1500 were moved to 1490; 1460-1480 became regionals.

In general, all stations were changed by either +0 kHz, +10 kHz, +20 kHz, +30 kHz, +40 kHz or -10 kHz in accordance with a "table"; and out of about 860 stations then licenced in the U.S., only about 80, give or take, were changed as exceptions to the "table".

[*] 1540: Bahama Islands Class I-A, U.S. Class I-B; 1550: Canada/Mexico Class I-B; 1560: Cuba Class I-A, U.S. Class I-B; 1570: Mexico Class I-A; 1580: Canada Class I-A.

A SERIOUS revamp of programming and a big marketing push.

We need to shift AM from the jibber-jabber, excessive right-wing talk bastion that it's (mentally) become.

When most people think AM they think: oh it's just talk-talk-talk and religious freaks.

Move it to more middle-of-the road, general entertainment formats appealing to a regional audience (a huge metro area and surrounding suburbs and small towns). A few popular music formats catering to the 20- to 40-something demographics wouldn't hurt.

Sports-talk is OK for one or two signals since it does also encourage younger listeners (and it seems to be a good biller in huge cities - witness WFAN-AM 660/New York).

Also, AM stations should be limited to a few SUPERPOWERED signals in each major city (50 to 100,000 and up). Then widen the bandwith of these existing stations a bit (to help the music formats) - get rid of, or change the NRSC mask?

Most of the tiny daytimers and "local" stations in most large cities are just cluttering the band up and causing more noise. They should be either moved to FM if space permits or the owners should be given tax writeoffs to encourage them to turn these signals off.

Of course, to the consumer it never mattered very much what the spacing
was. It only comes into play in the past twenty years or so (and since
it was a slow development, less than that), as digitally tuned radios
became commonplace. With an analog dial, most people wouldn't notice
that if they moved away from their home country, the stations were
tuned closer together or further apart; it was easy to compensate.
But once digital tuning came into play, that caused problems because
a radio set to one standard did not tune the other standard.

Once digitally tuned radios became common, it probably was too
late for North America to move to a 9KHz standard, even if there
were good reasons for doing so. Making everyone switch radios
would have impossible. If the switch had happened in the days
of analog tuners, it would have been relatively easy, other than
convincing people that they had to retune their radios for
their favorite stations.

I shall be doing some street interviews in the UK next month for possible inclusion in radio program presently under development.

Are there any special legal requirements I need to be aware of. Do I need explicit permission from the interviewee for use of the recording. If so, is it enough to simply ask and have that recorded as part of the interview?

Are there any other things I should consider?

Cheers.

Mike.

Q21. Where can I find more information about antique radios?
Q22. What is the best radio / antenna to get distant OTR stations?
Q23. Is there a group for modern radio drama ("new-time radio")?
Q24. I have only email access to the Net. Can I still get the files at your site?
Q25. I have never heard "Old Time Radio". Can I get an audio sample via Internet?
Q26. I have lots of loose OTR cassettes filling my drawers. Is there a better way to store these things?
Q27. All this new software is a bit difficult for me to use, as I am blind. Can you give me any assistance on how to access your page?
Q28. I am interested in re-creating some OTR drama. Where can I get scripts?
Q29. I can hear what sounds like another program playing in the background on many of my OTR tapes. Is this due to the tuning on the old radio or to the tape recorder that recorded the program?
Q30. Can I chat with other OTR fans on the internet?
Q31. Where can I buy 1970s CBS Radio Mystery Theater programs?
Q32. Is there an internet news group for old time radio?
Q33. OTR network shows were usually heard at\ the same local time, no matter what the time zone. How did they do this?
Q34. I'd like all the information there is about [insert name of OTR show]. Is there a FAQ that covers all the shows ever on the radio?
Q35. Is there any information on OTR conventions?
Q36. Are there any WWW Bulletin Boards where I can post OTR questions and read OTR information?
Q37. I would like to find recordings of [fill in rare OTR show name]. I have seen the show mentioned in Jay Hickerson's book, but haven't seen the show in any of the paper or on-line catalogs. How do I get this show?
Q38. I see a lot of OTR MP3s on the WWW. Are these worth collecting? How about the OTR CD-ROMs being offered on the WWW, are they worth the money?
Q39. Were any of the old-time radio personalities interviewed recently? Where can I find these interviews?
Q40. What MP3 player is best for OTR?
Q41. I keep reading/hearing about the LOC hoarding a bunch of unreleased OTR episodes. Is this true? How can I get them?
Q42. Where can I find OTR to download?
Q43. I bought some CDs with OTR MP3s. Some of the programs sound pretty bad. Why is this, and how can I make them sound better? If I make an audio CD from the MP3s, will it be better?

Q01. What is "OTR"?

A01. OTR is an acronym for "Old Time Radio", a term loosely applied to radio programs broadcast from the dawn of broadcasting to the very early 1960s. Alternate names are "radio nostalgia", "golden age radio", etc. Usually this applies to radio drama, mystery stories, comedy and adventures. Some individuals classify the resurgence of this type of radio programming in the '60s and '70s as "Revival Radio", and similar programming since the '70s as "Modern Radio Drama". Purists even discriminate between the "Golden Age" (late '30s and the decade of the '40s) and the "Silver Age" ('50s). In any case, there are plenty of programs of various types that are enjoyable entertainment. Best of all, they don't require a large screen TV to enjoy 'em -- the "visuals" are provided by the listener's imagination.

Q02. You haven't mentioned OTR music, why not?

A02. There was a good deal of big band, bluegrass, country and other music broadcast during this era. For some reason, there seems to be more current interest in the dramas rather than in the music. You will find much more discussion about this topic in alt.music.big-band or the various news groups specializing in music of various types. Bluegrass fans might enjoy the Old Time Music on the Radio WWW pages. (They happen to use the same acronym, "OTR", but are not affiliated with The Original Old-Time Radio (OTR) pages). In addition, there is a Big Band and Other OTR Music BBS at www.old-time.com/otrbbss.html

---

Q03. Where can I buy recordings of old radio shows?

A03. There are several individuals and companies willing to sell tapes and CDs of OTR programs. A partial list can be obtained from the www.old-time.com site. Many public libraries have a small stock for perusal as well. Some vendors and collectors even have their own WWW pages.

Q04. Which vendors have (lower prices) (higher quality) (faster response)?

A04. Prices, quality and service differ somewhat among all vendors. Check with other OTR fans to learn of their experiences, then check with potential vendors.

Audio quality is an important consideration when purchasing recorded tapes. As yet, there is no "standardized" description of sound quality. Jim Widner and other OTR collectors have suggested various metrics to describe the quality of OTR recordings. Discussion of these standardized descriptors is summarized at the www.old-time.com site

---

Q05. Are OTR shows rebroadcast? If so, where and when?

A05. Yes, several AM and FM radio stations, satellite feeds, a shortwave station, and at least one Public Access TV station rebroadcast OTR. Check the Old-Time WWW page for current info. If you learn of other sources, leave a note!

For AM listening, try the National Radio Club's AM Radio Log, 17th Edition: Complete Listing of U.S. and Canada AM Radio Stations (Mannsville, N.Y.: NRC, 1997). All AM stations carrying things like "Old Time Radio" are listed with the format code NOS (Nostalgia), and there are lots of other codes. [Order from NRC Publications, Box 164, Mannsville NY 13661-0164 USA. Price is: $22.95 post paid]

For FM listening, try Bruce F. Elving's FM Atlas (Esko, MN: FM Atlas Pub., 1993). Alongside lists, this has maps of your area and its stations as well. [Order from Bruce Elving, PO Box 336, Esko MN 55733-0336. Price Range: $11.00 + approx. $1.00 s/h]

The M Street Radio Directory, M Street at +1 615-251-1525 voice, or +1 615-251-8798 FAX. The address is M Street Corp., PO Box 23150 Nashville, TN 37202 The price for the 8th edition is $65.00 plus S&H

Q06. I remember a great show called (x). When was it aired?

A06. If the show was heard nationwide, look through the program databases / logs at the Old-Time site or at Jerry Haendiges' site (see answer A14 below). If the show was only on local radio, you will have more difficulty in finding an answer. Checking with your local radio stations is probably the best bet.

Q07. Are there any books about OTR?

A07. Yes, there are many books related to OTR. See the www.old-time.com site for a bibliography of several hundred books. There is also a page where you can read or enter critiques or reviews of various books on OTR.

Jim Widner and Everett L. Slosman left this address for a bookstore specializing in OTR books:

Rainy Day Books
P.O. Box 775, Rt. 119
Fitzwilliam, NH 03447
(603)585-3448

Bob Crump reminded us that most good used book stores will do a nationwide search for a title, if given enough time. Henry Brugsch related a good experience with the following on-line bookstore:

Acorn Books acornbks@netcom.com

There are also several "book finding" services that will help obtain old/out of print books for a fee.

Q08. Does anybody trade tapes of OTR shows?

A08. Yes. Check with the various on-line OTR services. Leave a note in the OTR Digest, alt.radio.oldtime, or Ray Plumlee's OTR Traders BBS at http://otr-trader.com/ Remember to observe copyright laws!

Q09. What's this stuff about Copyright?

A9. The copyrights on some OTR shows have expired. Several copyrights have been renewed, and some may have fallen under "common law" copyright (even though they were not originally copyrighted). 1970s era Berne Convention agreements further cloud the issue for non-lawyers. See the Old-Time WWW site for the latest "common sense" and legal citations.

A concise answer was given by 'A. Joseph Ross' (lawyer@world.std.com) (used with his permission):

Just to get a little perspective in this
controversy, copyrights do expire. Under the old
copyright law, a copyright was good for 28 years
from the date of first publication, renewable for
another 28 years, for a total of 56. Under the 1976
act, those copyrights were extended to 75 years,
provided they were renewed. Copyrights under the new
law, which took effect on 1 January 1978, are good
for the life of the author plus 50 years. Copyrights
on anonymous works, works made for hire, etc. are
good for 75 years after first publication.

So, since otr has just barely been around for 75
years, little or none of it is in the public domain
yet by reason of having been around for a long time.
The question of what constitutes publication, and
the fact that sound recordings could not be
independently copyrighted until the new law took
effect add additional complications.

Q10. How can I get my local radio or TV station to broadcast OTR programming?

A10. Call the station and tell them of the many people who like to listen to OTR. Suggest this programming will increase the number of listeners and help buy things from their advertisers.

Shawn Fulper-Smith (shawnf@cc1.uca.edu), a managing director of a non-commercial station, tells us:

The days of radio being ruled by the artisans is over, and
for some time now it has been in the hands of people who
only look at the bottom line, so to reach them you must
talk through public radio pledges, or through sponsors

on commercial stations.

Don Fisher (dfisher@sover.net) has been successful in getting his local Public Access TV station to rebroadcast OTR. In fact, Don is the MC of the program. Contact him for hints on how to get your Public Access TV station to do something similar.

Elizabeth McLeod (lizmcl@midcoast.com), who has spent more than 15 years working in local radio, gave the following advice:

I can tell you that one phone call from a listener means absolutely nothing to a program director. PD's are totally under the thumbs of their General Managers -- and GMs, in turn, base their decisions EXCLUSIVELY on sales issues. It doesn't matter how many people want to hear something -- if the GM doesn't think he can sell it, if the GM doesn't think it'll bring hard cash into the station, it won't get on the air. Period.

The only reason a commercial station exists is to make money for its owners. ALL decisions at the station, be they about programming or anything else, are made with this in mind.

Don't bother to approach the station itself, APPROACH THE STATION'S ADVERTISERS!!!

Listen to the station and figure out who its biggest sponsors are. Generally, they'll be local banks, car dealers, insurance agencies, and appliance retailers. Do you know anyone connected with these advertisers? Then approach these people. Tell them you've heard their ads on such and such a station, and that you think a lot of people would be interested in hearing OTR, and that advertising on an OTR series might be a good strategy. And get your friends to do the same. And be persistent! In other words, SELL THEM ON THE IDEA!

You need to keep in mind that some types of stations are more likely to air OTR than others. If your local station is has a firmly-defined format, you are probably "S-O-L," as the saying goes. They won't break format, no matter what. On the other hand, if you have a local non-commercial community-type station, way up on the left side of the FM dial, you may have a very good chance of success.

Q11. I have some old transcriptions and tapes, how can I make them sound better?

A11. You might try using a good equalizer and/or digital signal processing (DSP) unit between the playback and recording devices. Some people have mentioned that the Radio Shack DSP unit does a fair job. There are also other, more expensive DSP units available from Ham radio stores and audio stores. Some subscribers have attested to the efficacy of the Timewave brand of DSP units.

There are several computer programs available to convert analog sounds (as on a tape) to a digital format (e.g. WAV file). Some of these computer programs also have noise reduction, filtering and enhancement capabilities. In many cases, application of digital technology will improve the sound of a noisy or deteriorating analog tape. There is a problem, however, if the digitized rendition is re-recorded to tape, and subsequently re-digitized for further treatment. Since digitization is a sampling technique, sampling a sample can result in extremely degraded sound patterns.

A very nice program that will convert analog material to digital format is Audiotools by Andrew Fish. For more information on this software, visit the Audiotools BBS at www.old-time.com/otrbbss.html or Andrew's site at http://www.unrelatedinventions.com/Audiotools/

From: hhoward@mindspring.com (Henry Howard)

For cassette machines (and reel to reels for that matter) occasionally take a "Y" cord and connect the output of your cassette player to both "sides" of the "Y". Plug the combined side of the "Y" into your stereo. If the sound is mush(ier) than what you hear normally, you have a head alignment problem (assuming that the tape you are listening to was properly aligned.)

From: Ron_B._Hare@livewire.com (Ron B. Hare)

Dolby HX on the recording deck makes an audible difference. Other audio optimization features are of negligible value for OTR. Dolby HX also requires no playback decoder.

[Dolby HX uses or "preserves" the Dolby noise reduction method of the master tape when duplicating - ed.]

Q12. Are there any OTR clubs near me?

A12. Check the club listings in the Old-Time WWW page, and leave a note in one of the on-line OTR groups asking about local clubs for your area. If you find a club that is not listed at www.old-time.com, ask a club officer to send a note to the webmaster with particulars about the club.

Q13. I have some OTR tapes of the same program, but their dates are different. Why?

A13. Sometimes broadcasts are dated according to their original broadcast date, and sometimes according to a date on which they have been rebroadcast. For instance, the Armed Forces Radio Service rebroadcast many Mutual Radio transcriptions at a later date. Your tape may be of one of these later dates. Alternately, somebody might have made a mis-typopgoof.

Finally, some shows -were- broadcast more than once, and sometimes on different programs! For instance, a few Suspense shows were re-scripted / re-cast for Escape. You might also find similarities between certain SF shows as done on X Minus 1 and Dimension X.

Q14. Is there any place where I can get a complete listing of all the episodes in a particular program series?

A14. Some on-line OTR collectors have contributed Program Logs for several well-known series. The logs are available at www.old-time.com/otrlogs/ . While you are logged in at that site, check the "Humongous OTR Database" (a database of contributed catalogs and libraries), which is searchable with your WWW browser.

The "logs and publications" entry at the Old-Time WWW site gives names and addresses of several vendors of these items (thanks to RadioJoe5@aol.com (Joe Coleman) and others).

Jerry Haendiges maintains a VERY complete set of OTR program logs, at his Vintage Radio Place: (http://www.otrsite.com/radiolog)

Jay Hickerson maintains several logs and lists, as well as -Hello Again-, an OTR newsletter. Jay is the author of The Ultimate History of Network Radio Programming and Guide to All Circulating Shows. You can see more info at http://www.old-time.com/sponsors/hickerson.html

Jay's address is:

Jay Hickerson JayHick@aol.com
Box 4321
Hamden, CT 06514
(203) 248-2887 FAX (203) 281-1322

Q15. Is there any place where I can get a written synopsis of the plots or themes of OTR programs?

A15. Again, some vendors include this information with their catalogs. If you would like to contribute your interpretations of OTR plots or themes, send them to the on-line OTR services or to webmaster@old-time.com for inclusion in one of the databases.

Jim Widner and others have contributed some synopses / introductions to various programs. They are on file at http://www.otr.com and http://www.old-time.com.

Also check Frank Passage's logs at the old-time WWW site; most contain a short synopsis of the program.

Many of Jerry Haendiges' logs contain excellent summaries of not only the program series, but of each episode as well.

Many of the local and national OTR clubs maintain informational libraries with this material.

Q16. Is there a World Wide Web page (URL) that I can access for more information?

A16. Yes, there are several WWW sites. Each site contains different information, so you might want to visit them all. The major OTR WWW sites all have links or pointers to each other, so you can explore many topical areas within old time radio. Good places to start exploring are:
www.old-time.com
or www.otr.com
or www.otrsite.com

An excellent database of OTR-related WWW sites, with an explanation of the contents of each is at
www.otr.com/cgi-bin/cgiwrap/otr/db.cgi?uid=default

Q17. Is there an email newsletter on OTR? How do I subscribe to it?

A17. Several newsletters currently exist. Here his how to get the best:

The Old-Time Radio Digest (AKA "Internet OTR Digest") is a very popular and freely available electronic newsletter, delivered nightly. Its purpose is to foster general discussions about the hobby of collecting, preserving and listening to OTR. To subscribe, send an email

TO: old.time.radio-request@oldradio.net
SUBJECT: subscribe
(The body of the message is ignored)

Q18. What ever happened to the person that played [insert character] on [insert name of show]?

A18. Check the "Personality Pages" at www.old-time.com for home pages of several well-known OTR personalities. Also check the Where Are They Now pages at www.440int.com.

Q19. What is the best way to archive OTR programs?

A19. The most popular way seemed to be reel-reel tapes, using each of the four tracks to record monophonically. Modern reel machines are in

the > $2,000 range, and used open reel machines are becoming harder to find.

Purists claim open reel tapes are best stored "tails out", in which the tape is played (not fast-forwarded) onto the take-up reel. This method of storage makes "print through" of the magnetic sound image a little less noticeable because the "echo" will come before the louder sound that caused it, and be somewhat masked by the louder sound.

Cassettes are generally fine for portability / ease of use / exchange, but they suffer from several problems when used as a long-term storage medium. These problems include "overwinding" and splitting of the tape at the leader. Because of their thinner track width and slower speed (1 7/8 IPS), the density of the information is greater than with wider and faster (3 3/4 IPS or 7 1/2 IPS) reel tapes. This leads to a greater loss of signal (particularly high frequencies) over time.

The Hi-Fi VHS tape is gaining in popularity because of its six-hour storage capability and relatively robust mechanical construction. "Hi-Fi" decks need no video signal to synch the systems, and can thus record audio without an accompanying video signal. One T-120 Stereo Hi-Fi VHS cassette can easily hold 12 hours of OTR audio (recorded monophonically on the right and left channels independently). If the linear track can be accessed independently, this will add six more hours of recording time. There is very little fidelity loss when using this medium to duplicate programs.

Conrad Trautmann (CONRADTRAUT@delphi.com) left this note in response to a query about finding used reel-reel machines:

You can also call Harris/Allied used equipment division at 1-800-622-0022 or call Radio World magazine at 703-998-7600 for subscription information. Radio World is an industry trade and has used equipment listings in the classifieds once a month.

(Jim Blackie [jblackie@aol.com] indicates that the Harris/Allied number has changed to: 1-800-300-0733.)

From: andy@vintagebroadcasts.com (Andy Blatt)

I wholeheartedly recommend Play It Again, Sam of Lakewood, Ohio. They also sell used Pioneer reel decks with a warranty and accept major credit cards for repair or used machines. The address is 12611 Madison Avenue in Lakewood, Ohio 44107. The phone number (no answering machine, no fax machine) is 216-228-7330. As far as pitch control cassette decks, Marantz offers several one of which is the three-head portable PMD-430.

[Play It Again Sam has a WWW page at www.playitagainsam.com - ed]

Richard Novak (rnovak@ix.netcom.com) wrote this informative note on using Hi-Fi VHS as an archival medium:

To clear up any misunderstandings concerning VHS HiFi machines and their ability to record audio, I offer the following..

It should be understood that what distinguishes a HiFi machine from a linear machine is that the audio track is recorded helically (diagonally) on the tape along with the video track. On linear machines the audio is recorded at the upper edge of the tape (and a control track at the lower edge, if anyone wonders what the extra head is for.)

On a HiFi VHS the audio is not recorded as an analog signal as would be the case with linear recording. Instead the analog audio signal frequency-modulates a carrier which is then recorded between the video tracks. A duplicate signal is also recorded linearly to maintain compatibility with linear VCRs. The FM signal recorded on the HiFi track should not be confused with FM radio broadcasts. One of my customers thought the FM switch on his HiFi was for recording FM from the radio. Today's machines no longer use the label "FM", instead use "HiFi". Less confusing.

The sound recorded from FM radio broadcasts (or any other source) onto HiFi VCRs is virtually indistinguishable from the source. The material can be dubbed to cassette with no generation loss.

There is no difference in audio quality using either six hour or two hour mode.

It is true that at slower speeds the diagonal tracks are closer together. This does degrade the video signal as anyone knows who has compared six hour video with two hour video. But does not degrade the FM carrier with the audio track.

The tape writing speed of the audio track in HiFi mode is the same regardless of linear speed. This is because the head speed remains constant and is independent of the linear tape speed.

Worked it out once and it is around seven meters per second. Whatever it is, it's a whole bunch faster than 7 1/2 inches per second. If anyone really wants to know the writing speed, it is the circumference of the upper cylinder (or video head) multiplied by the rotational speed which is 30 revolutions per second, or 1800 revolutions per minute. (Two heads 180 degrees apart at thirty rps results in 60 frames per second.)

Who cares how it works.. The point is that VHS HiFi is the best and cheapest medium around for recording masters. But

not for archiving. Most experts still agree that reel to reel is the best and most reliable method of archiving. (Sticky shed syndrome from the 70s notwithstanding.)

Although Bob Burnham does not like dubbing (two-well) cassette decks for producing highest-quality cassette tapes, he does have a few recommendations:

One of the BEST dubbing decks (if you must use one) is made by Denon. Both sides can record at the same time and both sides have pitch control, and both sides have separate output jacks for connecting to other equipment.... almost like TWO (click) TWO (click) TWO DECKS in one. Tascam (Teac's pro division) also recently introduced their model 303 double deck. If it's anything like the 202 MKII, it's probably not worth it. You pay a high price for the name, but still basically consumer grade inside and lots of plastic. Denon is better.

I mentioned Kingdom Tapes in Mansfield, PA as a good source for cassette copiers, and equipment servicing. All the duplicators I have in use today came from this company. They have all the major brands (plus their own house brand), also tape decks, blank cassettes, etc. Great service (same day usually available). They'll beat anyone's price on cassette dubbers. 800-788-1122. Fax is 717-662-3875.

Bob Burnham / BRC Productions / P.O. Box 2645 / Livonia, MI 48151 platecap@gatecom.com / platecap@eworld.com

Several hobbyists are now investigating the utility of using CD-ROM or MiniDisks for archival purposes. CD-ROMs can hold hundreds of hours of program material, but at the cost of time-consuming conversion from analog to digital representations. Selection of appropriate encoding and compression technologies is extremely important to prevent digital artifacts. MP3 (MPEG III) compression seems to be more favored than is RealAudio(R) compression.

Q20. My old reels squeak. Why does this happen, and can I fix it?

A20. There are at least two causes for "squeaky reels" on a reel-reel tape recorder. (1) The tape edge may be rubbing against the rim of a distorted take-up reel, or (2) the oxide may be sticking to your erase (or other) heads. If the former, the least frustrating alternative is probably a new take-up reel. If the latter, Fred Korb left this note:

If you have any squeaky reels that you would like to recover, I will be glad to send you more information on how to do it. Just send me a stamped self addressed # 10 envelope and I will respond. Send your request

to: Fred Korb, c/o Oldtime Radio Collectors and
Traders Society, 725 Cardigan Court, Naperville,
Illinois 60565-1202. I am willing to help you preserve
the sounds of radio days gone by.

[Editor's note: Fred's method consists of a kit by which a
lubricating film can be automatically applied to the tape as it is
played. I tried it. Although temporary, it does indeed work! I'd
recommend it for those squeaky tapes that you wish to re-record onto
newer reels.]

Richard Fish (lodeston@bluemarble.net) also left this helpful info
about an alternative method:

HYRDROLYZATION is the culprit. The tape material -- the
backing, or the binder compound used to stick the magnetic
particles to the plastic backing -- has absorbed water
from the air. The water molecules actually make the tape
expand a bit, so it doesn't fit the machined tape-guides
properly anymore; and they can interfere with the
lubrication impregnated into the tape; and it is theorized
they can even interfere with the polished smoothness of
the tape surface.

WHY SOME TAPES AND NOT OTHERS? It depends on the
formulation of the plastic backing and binder. In the
mid-70s, both 3M (Scotch) and Ampex, the two major tape
manufacturers, started experimenting with their formulas.
They thought they were introducing major improvements,
but instead created a tape much more prone to
hydrolization than anything had ever been. The problem
did not show up for years, and the formulas did not get
corrected until sometime in the mid-'80s. Theoretically
any tape could get hydrolyzed over a long period of time,
especially if stored in a high-humidity situation, but in
practice most squeaky tapes were made (roughly speaking)
between 1975 and 1985.

WHAT'S THE FIX? Tom Lopez at ZBS (the most prolific and
entreprenurially successful producer of radio drama in
the US today) gave me his formula and I've done it many
times now and it works:

Bake the tapes in a convection oven for 8 hours at 130
degrees Fahrenheit. It is entirely possible to bake a
tape twice if the first time doesn't do the trick. You
get about a three-week "window", sez Tom, before the tape
starts to re-absorb water. So the best deal is to bake
the tape and immediately make a copy. But if you forget
to do it and it re-hydrolyzes, you can bake it again.

Q21. Where can I find more information about antique radios?

A21. An excellent place for discussions about antique radios, phonographs and accessories is the rec.antiques.radio+phono news group, created by Bill Robie. A pointer to his FAQ may also be found at http://www.old-time.com. Basically, r.a.r+p

- Is a *discussion* group, rather than a sales group (see r.a.m) - Focuses on radios, phonos, and related materials made before the 60s - Avoids "ham" radio gear (the Boat Anchors group covers that) - Has a -very- comprehensive FAQ that new folks should read

The University of Maryland has a WWW site entitled "Broadcast Pioneers' Library". This is an excellent resource for the serious / professional researcher. It can be accessed through the old-time WWW site, or directly via the URL: http://www.lib.umd.edu/UMCP/LAB/

Additional sites with pictures of old radios or other hardware resources may also be found at http://www.old-time.com

---

Q22. What is the best radio / antenna to get distant OTR stations?

A22. Several readers have been acclaiming the GE SuperRadio III as an excellent choice for picking up distant AM stations that carry OTR programming. Although the tuning dial has notoriously poor calibration, the sensitivity and selectivity seem superior to other radios.

Some readers have had good success with the Select-A-Tenna antenna advertised in several magazines, and the Grove Catalog. The S-A-T seems to be rather directional, and may eliminate off-axis interference.

Ham Radio magazines sometimes carry information about small loop antennas for AM DX-ing. Some pointers to instructions on how to build them are at http://www.old-time.com. Also, Dan Hughes (dan@soltec.net) left this note:

Several years ago one of the electronic magazines ran
plans with dimensions and number of turns, etc to build
one of these antennas. I have built several and I'm no
mechanic. If you (or anyone else reading this) would
like a copy of the article and plans, visit my website
at http://members.soltec.net/~dan

If you are interested in AM Broadcast Band reception, and technical articles related thereto, send a SASE to the following address for their product catalog:

National Radio Club
Publications Center
PO Box 164

Mannsville, NY 13667-0164

(The National Radio Club also has a WWW page, at www.nrcdxas.org/)

Q23. Is there a group for modern radio drama ("new-time radio")?

A23. There are several USENET groups whose charters include modern drama. Check the lists on your local Internet provider to see which are available to you.

Here is a list of some of the WWW sites for modern audio drama:

Jim French Productions (Imagination Theatre):
http://jimfrenchproductions.com/
Atlanta Radio Theatre Company:
http://www.artc.org
ZBS Media:
http://www.zbs.org/zbs.html
LodesTone Productions:
http://www.bluemarble.net/lodeston/lode.html
Midwest Radio Theatre Workshop:
http://www.mrtw.org/mrtw

Q24. I have only email access to the Net. Can I still get the files at your site?

A24. Maybe. WWW pages can be retrieved by email. Get the following file for more information:

Accessing The Internet By E-Mail
Doctor Bob's Guide to Offline Internet Access

This document is now available from several automated mail servers.
To get the latest edition, send e-mail to one of the addresses below.

To: mail-server@rtfm.mit.edu (for US, Canada & South America)
Enter only this line in the BODY of the note:
send usenet/news.answers/internet-services/access-via-email

To: mailbase@mailbase.ac.uk (for Europe, Asia, etc.)
Enter only this line in the BODY of the note:
send lis-iis e-access-inet.txt

Since the OTR FAQ is an "official" FAQ, a copy of it is stored at MIT, and is available from the MIT mailserver. For more info on how to get files by email from MIT, send a message

help
end

Q25. I have never heard "Old Time Radio". Can I get an audio sample
via Internet?

A25. Yes, if you have a suitable WWW browser and sound card. Connect
to any of the WWW sites mentioned above, and follow the pointers to
their audio clips and / or soundbytes. Many of the soundbytes can be
downloaded, and played on your computer's sound card, others will
play "realtime" through your multimedia system. There is also a news
group, alt.binaries.sounds.radio.oldtime, that tries to transfer OTR
shows (news groups are notoriously inefficient at transferring large
binary files, however).

You can select from many moderate-length soundbytes at Jerry
Haendiges' Preview Listening Lounge at
www.otrsite.com/ra/preview.html

Q26. I have lots of loose OTR cassettes filling my drawers. Is there
a better way to store these things?

A26. Collectors with lots of cassettes seem to use just about
everything from "underbed cardboard storage boxes" to old soft drink
cases. If you want your collection to have a more "professional"
look, here is a note from Ron_B._Hare@livewire.com (Ron B. Hare)

You almost need to buy cassette albums from
specialty suppliers. Radio Shack used to carry a
small line of these and charged too much. We are in
the recording studio business, and receive catalogs
from several sources. The one I like best has
some of the lowest prices and unhesitatingly deals
with individuals and will take your credit card
number over the phone for instant shipment (in
contrast to some who require account setup, purchase
orders, prepayment, cash and other nuisances).

They have two catalogs: one for audio and one for
video. Cassette albums are available in a large
number of different styles, sizes and capacities.
The 8-cassette albums I use are CPCN.4+4M/WHT in
white and CPCN.4+4M/RBLU in royal blue. Outside
dimensions are 9 7/8 x 7 x 1 1/4 wide, so they fit
well on a bookshelf. This model also seems to cost
less per cassette than any of the other models,
though logic might lead you to the conclusion that
the larger capacity ones would cost less.
[Polyline has a website at www.polylinecorp.com, and their new
address and phone number are:

Polyline Corporation
1401 Estes Ave.
Elk Grove Village, IL 60007]

Q27. All this new software is a bit difficult for me to use, as I am blind. Can you give me any assistance on how to read your page?

A27. Yes. Although my WWW page is best viewed with Netscape or Microsoft Explorer, most pages render well with LYNX and associated reader software.

Blind visitors who depend on DOS-based software to access the net, or who use a reading program to audibly display their computer's output might be interested in a program called "Nettamer". The Nettamer home page is at www.nettamer.net/

Q28. I am interested in re-creating some OTR drama. Where can I get scripts?

A28. Check your local or national OTR clubs. Many have a "print library" that includes scripts. You can also point your browser at the University of Maryland's script page, at www.lib.umd.edu/UMCP/LAB/scripts.html

Jack French (OTRpiano@erols.com) said:

One excellent source is the book. "One Hundred Non-Royalty Radio Plays" compiled by William Kozlenko, Greenberg Publ of NYC 1941. It's certainly out of print now, but many libraries would have a copy. I bought mine at a used book store a few years ago. The 100 radio plays in the book include adventure, mystery, fantasy, comedy and historical. Most were originally produced on educational stations in the 30s. Authors include Saroyan, Julian, and Liss.

Larry Groebe, of the Generic Radio Workshop, has several pages dedicated to on-line OTR scripts at http://www.genericradio.com
---

Q29. I can hear what sounds like another program playing in the background on many of my OTR tapes. Is this due to the tuning on the old radio or to the tape recorder that recorded the program?

A29. In addition to the old radio being mistuned, similar problems can be caused by one or more of the tape recorders used before you received your copy of the program. Print-through has already been mentioned in Q & A 19. Bob Burnham has a nice explanation of two more problems: crosstalk and channel leakage.

Crosstalk and Channel Leakage are 2 different things. OTR collectors seem to have the most problem with channel leakage.

When you hear another program faintly playing in the
background in normal direction, this is usually Channel
Leakage. This is a leftover problem from the 1970s &
early '80s when most collectors traded on open reel
tapes which were quarter-track mono -- there were
different (separate) programs on left & right channels.
This allowed 6 hours of shows to be placed on one reel.
Unfortunately, many collectors would duplicate L & R
shows simultaneously. Depending on the quality of the
equipment (and its condition) it was common for one
program to bleed into the opposite channel...especially
if the collector was careless and allowed over-modulation.

Crosstalk results when a tape is recorded (or played
back) on a machine with mis-aligned tape heads. It can
also occur when trying to record over a 1/2 track
recording with a 1/4 track machine with dirty or
mis-aligned erase head. You usually will hear another
program playing IN REVERSE in the background.

HOW TO PREVENT CHANNEL LEAKAGE AND CROSSTALK...

If duplicating quarter track reels, copy ONE channel or
track at a time. As for crosstalk, make certain your
machines are kept in proper alignment. Use a high quality
BULK ERASER if you re-use old tapes... this is especially
true for those who use reels.

Sorry, there is NOTHING you can do to remove these flaws
once they are there.

Q30. Can I chat with other OTR fans on the internet?

A30. Yes. Lois Culver (lois@chatlink.com) and other OTR fans meet
every Thursday at 8:00 PM Eastern time, on Channel #OldRadio, on the
StarLink-IRC. If you are unfamiliar with Internet Relay Chat, please
get software and instructions from your favorite Internet Service
Provider or shareware/freeware software site, or connect to
www.old-time.com/irc.html for basic instructions.

Q31. I'm looking for copies of old "CBS Mystery Theatre" radio
programs, primarily from the 1970s era. Does anyone know where I can
call or write to obtain such items? I'd like to purchase a complete
set if possible.

A31. Jack French (OTRpiano@erols.com) left the following information:

You most certainly do not want a complete set of this
series, because you couldn't afford it. There were 2,970
shows aired so even if you could find them for a buck an
episode, you'd have to cough up three Gs. The series ran
from 1-6-74 to 12-31-82 and since it came so late in

radio history, every episode was recorded by somebody.
All episodes are still copyrighted, and CBS enforces
their copyrights. Therefore no dealer is going to list
them, and collectors are reluctant to sell or rent them.
Your only hope is to find some way to get copies in a
fashion not in violation of copyright law.

Editor's note: By my count, there were about 1400 different CBSRMT
shows. The rest may be duplicates.

Q32. Is there an internet news group for old time radio?

A32. Yes. alt.radio.oldtime is available via some news servers. Since
many news servers ignore alt.groups, you may need to contact your ISP
to get that news group listed locally. See
www.old-time.com/newsgroups.html for more information. Also try
www.groups.google.com to sample some of the messages.

Q33. OTR network shows were usually heard at the same local time, no
matter what the time zone. How did they do this?

A33. Two ways: Many networks used telephone lines to carry the show
from the studio to transmitter sites. The show was done live at least
twice - once for the East coast, once for the West. After Bing Crosby
spearheaded the introduction of recorded shows (about 1948), the East
coast show was recorded for later telephone transmission to the West
coast.

Q34. I'd like all the information there is about [insert name of OTR
show]. Is there a FAQ that covers all the shows ever on the radio?

A34. No. There are many books (Remember them? They have words printed
on pieces of processed dead tree) written about what we now call
"OTR". See answers A7 and A37. If you would like to contribute an
original article about one or more facets of OTR, many of the
webmasters of on-line OTR sites would be happy to consider archiving
it.

Q35. Is there any information on OTR conventions?

A35. Yes. There are several. Here are some of the larger ones:
* Annual OTR and Nostalgia Convention in Cincinnati, OH (April)
* Radio Classics Live, Brockton MA (May)
* Annual Lum and Abner Society Convention (June)
* REPS Radio Showcase (June)
* Friends of Old-Time Radio (October)
* SPERDVAC (November)

See the convention page at www.old-time.com for specific dates and contact person info.

Q36. Are there any WWW Bulletin Boards where I can post OTR questions and read OTR information?

A36. Yes. Try Old Time Radio Bulletin Boards at www.old-time.com/otrbbss.html. That page contains a list of several old-time radio oriented WWW bulletin boards. You can also access OTR message boards at http://www.lofcom.com/nostalgia/phorums/

Q37. I would like to find recordings of [fill in rare OTR show name]. I have seen the show mentioned in Jay Hickerson's book, but haven't seen the show in any of the paper or on-line catalogs. How do I get this show?

A37. Jack French, an expert on old-time radio and editor of Radio Recall, gives us this information:

There's good news and bad news....the good news is if Jay's compendium says they are in circulation, somebody has them. The bad news is there is no guarantee you'll find them. Let's start at the beginning. If they're in Jay's book, and there is either the initials of a dealer, log preparer, or collector with that entry, the assumption is that person has some or maybe most. If the entry is devoid of such, we push on. Few dealers list rare shows in catalogs since so few people want to buy them. Generally the catalog represents a small part of a dealer's or collector's total holdings. There are at least forty OTR dealers in the country so you can contact each one with a specific inquiry. Most collectors belong to at least one OTR club. There are about 20 clubs. Most will publish your request in their newsletter for little or no cost. Most of the members of OTR clubs are not on-line so this is the only way to reach them. There are over 25 state and college archives that may have the shows. Most have no catalog but will answer any reasonable inquiry. Contact them all. All of the contact addresses for OTR clubs, pubs, dealers, and archives are contained in NARA OTR Source List. Contact me separately if you're interested in this low-cost research aid.

Q38. I see a lot of OTR MP3s on the WWW. Are these worth collecting? How about the OTR CD-ROMs being offered on the WWW, are they worth the money?

A38. Just as with home made recordings of any type, the quality of OTR MP3s varies considerably. Some of the online MP3s may have been

converted from low sample rate RealAudio(tm) files, others might have been "ripped" from low-generation masters. Most CD-ROMs for sale on the WWW were recorded using these varying-quality MP3s. In other words, the MP3s in themselves are "collectable" only for the enjoyment one might get from listening or further trading. They have little intrinsic value, and are of unknown quality. It might help to associate your estimate of quality with the provider's name, to attempt to predict quality and avoid long downloads of poorly prepared material.

Another point to remember - some OTR is still under copyright protection. Please observe applicable copyright laws.

Q39. Were any of the old-time radio personalities interviewed recently? Where can I find these interviews?

A39. A large number of OTR personalities were interviewed by the author John Dunning. Stewart Wright, Editor of the RHAC Newsletter gave us the following information. (You can learn more about RHAC by checking their page at http://www.old-time.com/sponsors/rhac.html)

The Radio Historical Association of Colorado (RHAC) has tapes of many OTR personalities interviews that were conducted by John Dunning in the 1980's. Several Radio personalities such as Elliot Lewis were interviewed more than once. The following is a fairly complete list of the Dunning interviews in the RHAC library.

Steve Allen, Elvia Allman, Eve Arden, Hy Averback, Parley Baer, Parley Baer and Georgia Ellis, Parley Baer and Sam Edwards, Parley Baer and Whitfield Conner, Bill Baldwin, George Balzer, Harry Bartell, Andre Baruch and Bea Wain, Court Benson & Grace Matthews, Bernice Berwin, Mel Blanc, Ray Bradbury, Curley Bradley, Frank Bresee, Candy Candido, Hal Cantor, Charles Collingwood, Whitfield Conner & Haila Stodd, Whitfield Conner and Parley Baer, Whitfield Conner and Virginia Greeg, Norman Corwin, Mary Jane Croft, D Day Program J Macvane & Lar, Dennis Day, Rosemary De Camp, John Dehner, Kenny Delmar, Jerry Devine, Howard Duff and Dick Joy, Richard Durham, Ruth Duskin Feldman, Sam Edwards, Sam Edwards and Janet Waldo, Alice Faye, George Fenneman, Morton Fine, Al Flanagan and Dick Mcdaniel, Paul Frees, Fred Friendly, Alice Frost, Art Gilmore, Roberta Goodwin (Bob Bailey's Daughter), Gale Gordon, Virginia Gregg, Virginia Gregg and Whitfield Conner, Phil Harris, Clarence Hartzell, Dennis Horseford, John Houseman, Bill Idelson, Raymond Johnson, Jack Johnstone, Jim Jordan, Dick Joy, Roland Kibbee, Sheldon Leonard, Phil Leslie, Larry Lesueur, Elliot Lewis, John Macvane, Fletcher Markle, Fletcher Markle, Grace Matthews & Court Benson, Dick McDaniel and Al Flanagan, Dick McDaniels and Pete Smythe, Marvin Miller, Shirley Mitchell, Carlton E Morris, Morris Kaplan, Frank Nelson, E Jack Neuman, Nelson Olmstead, Vic Perrin, Michael Raffetto, William N Robson, Eric Sevareid, Anne Seymour, William

L. Shirer, Penny Singleton, Pete Smythe Collegiate Band, Olan Soule, Berne Surrey, Glenhall Taylor, Irene Tedrow, Cliff Thorsness, Les Tremayne, Lurene Tuttle, Veola Vonn, Janet Waldo, Gertrude Warner, Peggy Webber, Anne Whitfield, and Dr. Paul Winchell.

The Radio Enthusiasts of Puget Sound (REPS) also has interview tapes of many Old-Time Radio personalities. Most of these interviews have been conducted in the 1990's. Personalities include:

John Archer, Harry Bartell, Frank Buxton, Chris Conrad (Son of William Conrad), William Conrad, William Conrad & George Walsh, Stewart Conway, Norman Corwin, Sam Edwards, Herb Ellis, Charlie Flynn, Jim French, Sandra Gould, Burl Ives, Peggy Jordan (Granddaughter of Jim & Marian Jordan), Merrill Mael, Jo Anna March, Les Tremayne, Janet Waldo, Anne Whitfield Phillips, Rhoda Williams, and Douglas Young.

The REPS web site is located at:
http://www.homestead.com/repsonline/index.html

Yesterday USA on the Internet is doing a series of live interviews with OTR personalities about one every two weeks. They start at approximately 8 PM (ET) on alternate Sundays and are about 1 hour in length. The interviews are conducted by John or Larry Gassman. So far they have done Harry Bartell, Herb Ellis, and Conrad Binyon. Listeners can call in questions.

You can find out more information on upcoming interviews by going to the YUSA Home page at http://www.yesterdayusa.com/

Q40. What MP3 player is best for OTR?

A40. MP3s can be played on most computers, memory (RAM)-based players, hard-drive players, and CD-ROM based players. Each player has advantages and disadvantages. A chart comparing various CD-ROM players for OTR playback suitability is at www.old-time.com

---

Q41. I keep reading/hearing about the LOC hoarding a bunch of unreleased OTR episodes. Is this true? How can I get them?

A41. The Library of Congress (LOC) does indeed store copies of many old-time radio shows. Any qualified person can access this material, or even get copies. There are, however, some restrictions on its use. Elizabeth McLeod (lizmcl@midcoast.com), who has done much research in the area, gives us this information:

LOC material may be listened to at no charge at the Library's Recorded Sound Reference Center by "qualified researchers" working on a project intended for public distribution -- from a full length book to an article for your local OTR newsletter.

You cannot, however, make copies of the material due to the contractural and copyright restrictions which the Library is required by law to observe. (While the LOC preserves and houses the material, it doesn't own it.)

It is possible, though, to obtain copies of the material from the LOC by going thru a process which is neither fast nor inexpensive. But if you have the patience and are willing to spend the money for material you can't get any other way, here is what you do:

1. Locate the specific item in the LOC's SONIC database, accessible from the Recorded Sound Reference Center Homepage, http://lcweb.loc.gov/rr/record/

2. Make note of the LOC Call Number and description of the item you need.

3. Phone, fax, or email the Recorded Sound Reference Center with the items you are requesting -- contact information is available on site. The Reference Librarian who handles these things is Brian Cornell.

4. The Library staff will determine what legal permissions will be required in order to copy the items you want, and will contact you with the names and addresses of the people who must be approached in order to get these clearances. If the item is from the NBC Collection, you will need to clear rights with their Intellectual Property Department in New York. Additional clearances may be required if the program is under a separate copyright.

5. You must write to the people specified and ask permission to have a copy made. It's a good idea to specify why you need the copy -- and don't just say "because Joe Blow is my favorite radio comedian." If you don't have a professional-sounding reason, make one up.

6. Wait to hear back from the Legal Entities. If you've written to NBC Intellectual Property, you will get a letter back from them in about four weeks. Two copies of a legal contract will be enclosed, specifying what you may and may not do with the recording. Sign both copies, and send one of them back to NBC.

7. NBC will advise the LOC that it has granted permission, and in about three weeks you will get back a requisition form from the Library's Phonoduplication Lab. You'll need to check it over, sign where specified, and send one copy back to them with your check for the lab fee -- which starts at $86 per hour, not including the cost of tape stock. Then, fax the other copy of the form, and a photocopy of your check to the lab, and they'll begin processing your duplication request. (Yes, the fee is outrageous -- but there are worse places to spend your money

than with the entity which has done more for the physical
preservation of broadcasting history than any other organization
in the United States....)

8. In about four weeks, FedEx will deliver your tape. Needless
to say, you may not make any commercial use of the
recording in whole or in part -- and you had to sign a contract
to that effect in order to get access to it. Commercial
permissions are a whole separate case.

Like I said, this is not for everyone -- but if you're working
on a serious project, it can be a valuable resource for getting
access to material that simply isn't available anywhere else and
which is unlikely ever to be released on the commercial market.

Elizabeth

Q42. Where can I find OTR to download?

A42. The number and location of FTP sites that provide OTR changes
more rapidly than does this FAQ. Your best bet is to check the
backissues of the various alt.binaries.sound(s).radio.oldtime groups
on USENET.

Hint: point your browser to www.groups.google.com and try your search
from there

Q43. I bought some CDs with OTR MP3s. Some of the programs sound
pretty bad. Why is this, and how can I make them sound better? If I
make an audio CD from the MP3s, will it be better?

A43. Wow. The answer to that question could fill a whole FAQ by
itself. I'll try to keep it short.

Poor-sounding audio can be due to several causes. The audio on the
tape from which the MP3 was made could have been poor, or the person
that converted the analog audio to digital audio could have done a
bad job. The statement: "remastered to digital audio" doesn't mean
much, if the person doing the remastering does not pay attention to
enhancing the source material.

MP3 and other digital compression techniques are lossy. That means
the encoding process throws away data in order to make the file
smaller. Although digital copies may not have noticeable loss,
re-encoding, or encoding in a different digital format will lose even
more data. Example: If somebody took a 32/22 MP3 and encoded it as a
64/44, it would sound no better than the 32/22, since data was lost
in the original encode. Similarly, making a 128/44 MP3 out of an old,
high-compression RealAudio(R) file would not improve the sound. The
advantage to the higher bitrate is the possibility that the new
encode will play in a larger number of MP3 players.

Some people record their RAs or MP3s onto cassette, and then trade the cassettes. At some time in the future, somebody else might try making an MP3 from the cassette. This analog - digital - analog - digital conversion results in a very quick deterioration of the sound because of the lossy compression I mentioned before. The new encode is a "sample of a sample". The sound deteriorates much more rapidly than does the "generation loss" experienced when duplicating tapes.

How can one tell if an MP3 was originally made with a high bitrate, or merely upsampled to a high bitrate? Listen to it, and compare it with a low bitrate sample. After all, the objective is to get as good an audio rendition as possible.

NOTE: URLs mentioned in this FAQ may have changed. For the latest information, point your browser to www.old-time.com, or join one of the internet mailgroups mentioned above. Email addresses listed here may have changed as well.

I am interested in starting a cable-provided radio service in town via possibly renting or otherwise working out something with the local "community" TV channel which is often nothing more than scrolling announcements.

Does anyone have any experience with this and what type of equipment it requires?

Many thanks,
Luke

103. KNEW San Francisco changing?

Newsgroup: rec.radio.broadcasting

Word is going around that KNEW (CNet radio) in San Francisco is going to be changing.

Word at Desmond Crisis' fan site is that CNet will become a radio-on-demand web service, and maybe still on XM, but without any live hosts, and no more 910-AM.

Does anyone here have more detailed information?

Thanks.

Those 20- to 40-somethings grew up listening to FM for their music,
if they listened to radio for music at all. The common belief is
that music just doesn't sound good on AMs, plus you have static
(something that can never be eliminated completely on AM, as
Major Armstrong found out oh-so-many decades ago, and if anything,
static sources are even more numerous these days).

If you give them the same music on AM that they can find on FM,
there's no good reason for them to switch. Even if you give them
something "different", something compelling that they can't find
elsewhere (and, with music tastes being so fragmented, you're
only likely to get a small slice of the pie at best), they still
might tune away (or, more likely, go right to CD) at the first
hint of static.

You've got to be kidding. Right?
In a large city there's no space for another FM station. If there were the AM daytimer would have already applied for it and moved to FM.
As for 9 kHz spacing in the U. S. I do remember that it was nixed due to the existing (at that time) base of digital tuners which were set up for 10 kHz spacing only.

Chuck

That jibber-jabber, excessive right-wing talk is about the only thing that
is keeping AM radio alive these days.
If you look at the #1 AM station in each market (both ratings and billing),
you'll usually find the station at the top of the heap is the one running
Rush or Sean Hannity or one of the 'right-wingers'.
I can't stand to listen to Rush Limbaugh but you have to respect what he did
for AM radio.
What kind of programming would you use to replace this 'jiber-jabber'?

> at that time many U.S. digitally tuned radios were made with both 10 kHz and
> 9 kHz

A friend of mine has an early '80s receiver with digital tuning that uses 9 and 10 kHz channel spacing *simultaneously*. As far as I know it is a regular U.S. model tuner, that was designed this way. As it scans the dial, it will stop on a station and then decide which frequency step is more appropriate -- and not necessarily the "correct" frequency! For example, it will stop on a local station that broadcasts on 710 kHz, and after flipping back and forth between 710 and 711 kHz a few times (as you can see happening on the LED display), it will "settle" on 711 kHz because this provides slightly better treble response.

It's an odd animal to be sure, and may either just be a really weird design, or may have been purposely designed to support simultaneous 9 and 10 kHz AM channel spacing in the event that North America did make the transition to 9 kHz spacing.

109. BBC Radio 1 VERY RARE Crew Jacket For Sale

Newsgroup: rec.radio.broadcasting
Date: 2003-01-25 22:28:48 UTC

Hi

I am currently selling a BBC Radio 1 FM crew jacket. It is from the early 90's era of Radio 1. It is extremely rare for these to come up for sale to the public, they are usually only owned by DJs and key staff at Radio 1.

If you're interested in owning this highly collectable piece of Radio 1 history, please see my E-Bay auction at:

http://cgi.ebay.co.uk/ws/eBayISAPI.dll?ViewItem&category=132&item=2155358171

If you have any questions, please e-mail me at radio1dude@hotmail.com

Cheers!

Hi Pat.

I'm also looking elsewhere for this info and if I turn anything up
I'll mail the info to you.

I'll be using DAT for the interviews. I don't see any real reason why
MD cannot be used. Especially if you're using an external preamp. Ask
your engineer what the "mights" are exactly and come back here for a
second opinion.

Cheers.

Mike.

CNET was leasing the station from Clear Channel. That deal ends Jan.
31st. CNET, in case you haven't followed the company, has been in
serious cutback mode lately. Clear Channel is saying it hasn't
decided what to do with KNEW yet, and may use it to simulcast other
properties for a while until it does. Everything else is speculation.

RESCUE RADIO: HAMS HELP IN FIRE COMMUNICATIONS IN VK3 WIKLDFIRE

Hams in down-under are hard at work assisting in emergency communications as widfire rage in several Australian states. Q-News Graham Kemp, VK4BB, is in Brisbane with the latest:

--
Audio report only. No text. Hear it at www.arnewsline.org
--

(Q-News)

**

RESCUE RADIO: REPEATER APPEARS LOST IN VK1 WILDFIRE

Meantime there is some good news regarding hams living in and around the city of Canberra. They are all reportedly O-K, but one of their local repeaters may have been lost in a widlfire thats has been sweeping the area. Phil Longworth VK1ZPL who is the WICEN Coordinator Canberra:

--

Longworth: "We have a couple of repeaters around town. One which is actually located at the NASA site down at Cape Mc Villa. We haven't heard it since Saturday. The scouts cannot get close to there because they have lost a lot of infrastructure. So we are assuming that we have probably suffered some damage."

--

The repeater being referred to is VK1RAC. So far radio operators have not been called in the Canberra area because there have be no major failures in the nations telecommunications system. But hams are standing by even though they may have to do without one major repeater.

(Q-News)

**

RESCUE RADIO: US HAMS NOT NEEDED IN MEXICAN QUAKE

Mexico's telecommunications system is working properly following a major earthquake and communications assistance from the United States is not needed. The quake hit in Nortth-West Mexicio. It registered 7.6 on the Richter scale, toppled dozens of homes, killed at least 24 people and injuring at about 175. And while telephone service in several remote areas was knocked out for a time, the Mexican government got it quickly restored. Also, Mexico's own ham radio community has decasdes of experience making outside aid not necessary in many cases.

Here in the United States, Gordon West, WB6NOA, has been monitoring the situation from his home in Costa Mesa Claifornia. Thats about 150 miles North of where the quake hit. And hes been taklking to hams in the area and confirms that United States hams going to assist are just not needed:

--

West: "In communiocating with the maritime mobile operators near Manzinello Mexico, many ofd the mariners rowed ashore and asked whether or not their ham radio gear on 40 meters might help relay messages back to the U.S.A. The villagers on shore evidently indicated that their communications were still up, and, that while they apreciated the boaters going ashore to ask for relays, none were needed.

The mariners did indicate that they felt a slight tidal movement. That was reported the following morning on many of the Baja maritime mobile nets."

--

West says that immediately after the quake hit he began monitoring the various frequencies known to be usaed by Mexican hams for emergencies on 40 and 75 meters. West says that not a signal on the air indicated any apparent need for mutual communications aid from the United States. Don. (ARNewsline™)

SPECTRUM ALLOCATIONS: FCC ON WRC-03 PROPOSALS

Back here in the U-S, an ARRL Bulletin says that the FCC is seeking comments on draft recommendations the World Radiocommunication Conference Advisory Committee adopted January 8th. Amateur Radio Newsline's Ken Locke, N8PJN, has more details:

--

The FCC's International Bureau says that based on its initial review of the recommendations, it tentatively concludes that it can generally

support the proposals recommended by the W-R-C 03 Advisory Committee. And if adopted, United States delegations will use the proposals at bilateral, regional and international meetings.

One agenda item of interest to hams involves examining the adequacy of the frequency allocations for High Frequency broadcasting in the vicinity of 4 to 10 MHz. The FCC also has draft proposals developed by Executive Branch agencies, and the agency is requesting comments on those as well.

The Public Notice was released January 15th. The deadline for comments is January 31st. Complete texts of draft proposals are available via the FCC's WRC 03 Web site. You reach it from a link at www.fcc.gov.

For the Amateur Radio Newsline, I'm Ken Locke, N8PJN.

--

Comments may be filed via e-mail to wrc03@fcc.gov. You can also submit them by mail the Office of the Secretary, Federal Communications Commission, 445 12th Street, SW, Washington, DC 20554. (ARRL)

EMERGING TECHNOLOGY: PLC MAY BE COMING TO THE USA

P-L-C could be coming to the United States -- but not right away. This according to a top official at the FCC. Amateur Radio Newsline's Bruce Tennant, K6PZW, is here with the details:

--

P-L-C stands for Powerline Communications and the idea is to use the same wires that bring electricity to your home as a pathway for high-speed Internet access. And as previously reported, in nations where P-L-C has been evaluated or approved it has caused moderate to severe degradation to a good portion of the electromagnetic spectrum. In fact,. several nations have decided against implementing P-L-C even though it holds the promise of becoming a less expensive alternative to cable modems and D-S-L telephone lines as a way to get broadband service.

And the FCC appears to be optimistic about P-L-C. On Wednesday January 15th, Edmond Thomas, chief of the Federal Communications Commission's Office of Engineering and Technology said companies developing the

technology have overcome many hurdles in the past year.

The FCC has been studying P-L-C technology for several months and Thomas says that the agency will pay more attention to it this year. He notes that there are no regulations that prohibit the technology, but the agency is concerned that Internet data transmissions carried over power lines could radiate signals inside and outside the home that could cause interference.

And Thomas indicates that the widespread introduction of Powerline Communications wont happen very soon. He says that the FCC wants to be certain P-L-C is not going to cause problems to your TV. And that's certainly good news for all communications services including Amateur Radio.

Reporting from Los Angeles, I'm Bruce Tennant, K6PZW.

--

Obviously this is an emerging technology that can impact negatively on ham radio and will have to be watched. (Published reports)

**

ENFORCEMENT: FCC CANCELS EXPERIMENTAL LICENSE WC2XZV

The FCC has cancelled an experimental license to California company because the agency says its being used for other purposes. According to the CGC Communicator, the FCC cancelled experimental authorization of WC2XZV after Enforcement Bureau monitoring confirmed the operation.

In a short letter dated January 17th, the Commission stated that the California station's emissions were not in compliance with the terms of its experimental radio license. But a story on recnet.com says a lot more. It says that that there were published reports of an alleged pirate station operating in the Antelope Valley area prior to the experimental license grant. The station was operating on 104.7 MHz and identifying as Frequency Radio with its website at www.1047.fm A check of the website makes no mention of the experimental license or the FCC action to cancel it. Acopy of the FCC's letter is posted in cyberspace at www.recnet.com/fcc/wc2xzv_cancel.pdf (CGC Communicator)

**
NAMES IN THE NEWS: MITNICK FREE TO REJOIN THE WWW

Former computer hacker Kevin David Mitnick, N6NHG, has completed his probation and is now free to once again use a computer and surf the web. After being released from prison three years ago on probation, the Mitnick had been barred from contact with computers until last year. He was not allowed to access the Internet until this his probation ended Monday January 20th.

But simply roaming the web may not what Mitnick has in mind. Since his release he has turned his efforts to becoming a consultant on computer

and Internet security issues. He hosted a radio program on Los Angeles talk station KFI, has written a book and has even testified before a congressional committee on ways to make computing more secure.

Only a few weeks ago the FCC agreed to permit him to renew his Amateur Radio license. The Administrative Law Judge hearing the case said that Mitnick was rehabilitated and would likely adhere to all of the agency's rules. And in a recent interview with the Los Angeles Times newspaper, Mitnick said - quote : "The truth is, I learned my lesson."

Kevin Mitnick, N6NHG, also learned a lot about computers and the world-wide-web from his days of hacking. Now he appears to want to use this knowledge for the benefit of all in society. (ARNewline™ from published news stories)

PROMOTING THE HOBBY: "AMATEUR RADIO TODAY" - THE VIDEO

The most trusted man in America has lent his name and callsign in support of the hobby. This as retired CBS newsman Walter Cronkite, KB2GSD, tells the story of hobby's public service efforts to the non-ham public in a new ARRL produced video titled Amateur Radio Today.

Cronkite narrates the program from his office in New York City from a script developed by Alan Kaul, W6RCL. Kaul is the West Coast Producer of NBC Nightly News and a former anchor here on Amateur Radio Newsline.

Amateur Radio Today was directed by Dave Bell, W6AQ, who is responsible for many ham radio films including the all-time classic "The Hams Wide World." Bell, Kaul, Bill Baker, W1BKR, of PBS and Bill Pasternak, WA6ITF served the co-producers. The show was edited at Suite Sixteen Post in Burbank California with Keith Glispie, WA6TFD, at the controls of the all digital Quantel Edit Box. But its really Walter Cronkite that takes you on a fast-paced six minute trip into the very soul of ham radio.

The only legitimate authorized source of Amateur Radio Today is the American Radio Relay League which holds the copyright. It will be available on video CD in the very near future and -- eventually -- VHS tape. Visit www.arrl.org/catalog and order item number 8861 (ARRL, ARNewsline™)

**

HAM RADIO VIDEO: WRTC 2002 VIDEO NOW AVAILABLE

Another video is aleady being called the best ham radio sports show ever to hit the street. This with the announcement that the official video of the Amateur Radio Olympics 2002 is now available on DVD and VHS.

The world premier was held in Helsinki Finland on January 18th before an overflow crowd at the Contest Club Finland meeting. Unlike previous

ham radio videos, this one is produced from a 100% "pro-sports" perspective.

In order to capture as much of the action as possible, three camera crews taped as many teams and events as they could during the actual 24 hour competition. Supporting all this great footage are high-end 3D graphics, scoreboards, top-ten boxes, team profiles, and everything else that you might expect when watching a professional sports event on television. And the production is even narrated by one of ESPN's top sportscasters

The program's total running time is 60 minutes. The DVD version contains lots of extra features like full score breakdowns for each team, continental line-ups, competitor rulebook, and even all the past W-R-T-C scores dating back to 1990.

If you've ever wanted to watch the worlds top radiosports teams in action, now is your chance. Copies are available for a nominal fee from the website: http://home1.pacific.net.sg/~jamesb (WRTC)

**

RESCUE RADIO: FISHING BOAT CREW DISAPPEARS BUT CELL PHONE TURNS UP IN INDONESIA

A strange story from Taipei. A mobile telephone belonging to the missing chief engineer of a ship found abandoned off Australia has been used to make more than 80 calls from Indonesia. Australian police said they are baffled by the discovery of a fishing boat full of rotting fish and its lifeboats in tact, but no crew. News reports say that the boat was found drifting off the remote northwest Australian coast. The phone calls from Indonesia add to the mystery of what happened to the missing crew. (PacificRimOnline)

**

COMMUNICATIONS MAGAZINES: POPTRONICS CEASES PUBLIC ATION

Popular Electronics -- better known as Poptronics Magazine is the latest hobby electronics publication to fail. This with the announcement that its publisher Gernsback Publications is no longer in operation.

Gernsback was in the publishing business for 94 years. The January 2003 issue was the last. Negotiations are reportedly under way to provide an alternative publication to Popular Electronics current subscribers. (W8HDU)

**

HAM LICENSING HELP: OH-KY-IN OFFERING HAM CLASSES

If you live in Ohio, Kentucky or Indiana and have a friend wanting to become a ham, this is for you. The OH-KY-IN Amateur Radio Society will offer ham radio license classes in the Cincinnati, Ohio area. Training

is scheduled to begin on Thursday evening, February 20th.. Training will cover Technician through Extra grades along with Morse instruction to 5 words per minute. At the conclusion of the ten week course, Amateur exams will be offered. More information is in cyberspace at www.ohkyin.com. (OK-KY-IN release)

**

WITH THE HANDI HAMS: THE CALIFORNIA CAMP

The Handi Hams California Radio Camp is the week of March 2 through 9th. This years special guest speakers include Bob Zeida N1BLF, Gordon West WB6NOA and Bill Pasternak WA6ITF.

Also, those of you contacting camp special event station W0EQO will be eligable for a special QSL. More information about the camp and the station is on the web at www.handiham.org (HandiHams)

CONVENTIONS AMD HAMFESTS: THE MIAMI TROPICAL HAMBOREE

The 2003 convention seasons gets off to a bang the 1st weekend in February. Thats when the 43rd annual Tropical Hamboree and ARRL Florida State Convention will be held in at the Fair Expo Center in Miami Florida.

The Tropical Hamboree is truly a fun filled convention with loads of new and used radio gear for sale along with a host of terrific programs and top notch speakers.

The hours of operation are 9 am to 5 pm Saturday February 1st and 9 am to 4 pm on Sunday the 2nd. For everything you might want to know about this years Tropical Hamboree take your web browswer over to www.hamboree.org (Tropical Hamboree)

**

HAM RADIO ASSISTS: THE MIAMI MARATHON

Another activity scheduled for the same weekend in the same place is the 2003 Miami Marathon. Sponsored by Toyota and The National Diabeties Association, the Miami Marathon is a 26 mile foot race starting at the famed Coconut Grove, across Biscayne Bay, to Miami Beach and back again

to Miami.

The date for this event is Sunday February 2nd. Ben Nemser WA4DZS, owner of Nemal International Electronics is coordinating the amateur radio communications. His assistant, all the way from New York City is none other than that well-known 'marathon man', and former ARRL 1st Vice President Steve Mendelsohn, W2ML.

With two major events involving ham radio the same weekend, its going to be a major challenge for the South Florida ham community. Its also looks to be a very memorable weekend in Miami as well. (Tropical Hamboree)

**

TECHNOLOGY: EIGHTY ONE MILLION PEOPLE WATCH FREE TV

According to the National Association of Broadcasters, approximately eighty-one million television sets in the U.S. receive programming exclusively from free, over-the-air TV stations. In comments filed with the Federal Communications Commission, the NAB noted that while the total number of television sets in the U.S. is 267 million that more than three out of every ten TV sets relies exclusively on "free TV" for programming. This means that the TV set is not hooked up to cable, satellite or any other subscription TV service.

Other figures noted by the NAB say that twenty-five percent of all cable and satellite homes have at least one TV set in the household that receives signals solely from free TV. Also, 24 percent of African-American and 32 percent of Hispanic households rely exclusively on free TV for their television viewing.

The National Association of Broadcasters analysis was provided to the FCC as part of the Commission's "Annual Assessment of the Status of Competition in the Market for the Delivery of Video Programming." The N-A-B says that its comments demonstrate the considerable extent to which consumers still depend on over-the-air broadcast television signals. (NAB)

**

INTERNATIONAL - IARU

On the international scene, the Radio Society of Great Britain passes along word that the national amateur radio societies of Cameroon and Macau have been admitted to the International Amateur Radio Union. A-R-T-J in Cameroon was formed in 1998 and has 14 members, seven of whom are licensed. Macau's ARM was founded in 1992 and now has 85 members. Both societies were inducted as of last December the 9th. (RSGB)

**

ON THE AIR: AO-40 QSO PARTY

The operating period for the first AO-40 QSO Party has been extended to 4 days in order to give more operating windows to Amateur stations world wide. The QSO Party will begin at 0000 UTC on the 24th of January and conclude at 2400 UTC on January 27th. Currently stations from over 30 countries have indicated their intention to participate in this years event. (ANS)

**

DX

In DX, a team of operators that includes SM0BSO, SM0LQB and SM1TDE will operate from the QTH of JW5E on Spetsbergen between February 24th and March 1st. Look for them on 160 through 2 meters running CW, SSB, RTTY as well as SSTV and other soundcard modes. QSL to each operators home call direct or via the bureau. (GB2RS)

**

THAT FINAL ITEM: SPANNING THE ATLANTIC

And finally this week, the story of history being celebrated. Of the earliest days of radio being commemorated by the people of the 21st century. And those who were there said it was like the past catching up with the future on a cold day at Cape Cod Massachusetts.

The event was the 100th celebration of the first ever radio transmission from the United States being received in Europe. It was made by radio pioneer Guglielmo Marconi in 1903. And it was his daughter, Princess Elettra Marconi, who lent her voice to begin the 100th anniversary celebration of the first trans-atlantic radio message. A message that probably sounded something like this:

--
Audio Here
--

That sound was supplied by Bob Doherty, K1VV. He along with members of the Marconi Radio Club and Marconi Cape Cod Memorial Radio Club were the people behind KM1CC. That was the on-the-air celebration of the two club's namesake making the first wireless transmission to Europe. And quite an affair it was.

Princess Elettera Marconi began the festivities in a brief contact with Ken Bowersox, KD5KBP. That's Commander Ken Bowersox on board the International Space Station. A bit later, Bowersox spoke with Cape Cod area school children who asked questions about life on-orbit. Both contacts were made possible by ARISS -- Amateur Radio on board the International Space Station.

The January 18, 1903 contact by Guglielmo Marconi used an early form of hand sent code to span the Atlantic. A short time later Marconi predicted that mans voice would eventually span the globe using wireless. Now, precisely a hundred years later on a frigid January 18, 2003. Marconi's daughter returned to near the scene of that first

contact and got to speak to a man in space. If he were alive today, Guglielmo Marconi would justly be proud. (K1VV)

113. Old-Time Radio on WorldSpace

Newsgroup: rec.radio.broadcasting
Date: 2003-02-07 22:53:37 UTC
From: hgbrice@e-garfield.com
Message-ID: <b21ddh$eb2$1@xuxa.iecc.com>
Source record: 8990

Hi everyone,

If you live anywhere within the shaded area here: -

http://www.worldspace.com/technology/coveragemaps/afristar.html

Or here: -

http://www.worldspace.com/technology/coveragemaps/asiastar.html

Please read on.

WorldSpace is a portable satellite radio network covering all the areas you have just seen. For more information about WorldSpace, go to: - http://www.worldspace.com .

Yesterday USA is a 24 hour radio station broadcasting old-time radio and music. I have recently been in contact with YUSA's founder Bill Bragg. He has recently been in contact with the folks at WorldSpace. There is now a high possibility that Yesterday USA will soon be carried on WorldSpace, however, Bill says that it would be really useful if anyone who is interested in hearing Yesterday USA in their country on WorldSpace to email him at bill @ yesterdayusa.com , saying something like: - "Yes, I would like to receive Yesterday USA via satellite
in my Country".

If you have never heard Yesterday USA, go to http://www.yesterdayusa.com , and listen live online.

Remember, your imput could be very important, so please email Bill and let him know that you would like Yesterday USA on WorldSpace. Again, that email address is bill @ yesterdayusa.com (please remove the spaces before and after the @ symbol. I just did this to save Bill from too much spamming).

Thanks in advance,
Henry

115. Testers for Radio Station Auction site.

Newsgroup: rec.radio.broadcasting
Date: 2003-02-07 22:53:40 UTC
From: gkinney@vfastlink.com
Message-ID: <b21ddk$ec8$1@xuxa.iecc.com>
Source record: 9000

We are in need of some testers for a broadcasting site that we just posted. The site is an auction related site that is specific to radio broadcasting equipment. At the moment no billing or any fees of any kind are being enforced.

What we need, is to have several professionals that are familiar with auction activity and broadcast equipment to post real radio station items for sale. If you actually sell them then good for you!

The site in question is located at http://www.radiofeedback.net. Please understand this is not a cheap ploy for advertising, we just need real professionals like you to give it a try and notify us via email of any problems or suggestions. Our email is webmaster@radiofeedback.net.

For you beta testers; we will grant free auction listings for the first 90 Days of operation. We will need to limit the "FREE" listers to 10 for now (sorry). Prior to going "Live" we will notify you via email of when the 90 day countdown will begin. So be sure to send us an email and let us know that you are willing to participate.

Under no circumstances will we use your email for anything more than this beta project. (You will be removed from our beta records when the testing is complete.)

Thank you for your time and attention.
(No need to add to this thread unless you feel the need.)

116. Re: AM Tuning steps (9 vs. 10khz)

"WBRW" <wbrw@radiomailbox.com> wrote in message
news:b0v32u$m14$1@xuxa.iecc.com...
| > at that time many U.S. digitally tuned radios were made with both 10 kHz
and
| > 9 kHz
|
| A friend of mine has an early '80s receiver with digital tuning that
| uses 9 and 10 kHz channel spacing *simultaneously*. As far as I know
| it is a regular U.S. model tuner, that was designed this way. As it
| scans the dial, it will stop on a station and then decide which
| frequency step is more appropriate -- and not necessarily the
| "correct" frequency! For example, it will stop on a local station
| that broadcasts on 710 kHz, and after flipping back and forth between
| 710 and 711 kHz a few times (as you can see happening on the LED
| display), it will "settle" on 711 kHz because this provides slightly
| better treble response.
|
| It's an odd animal to be sure, and may either just be a really weird
| design, or may have been purposely designed to support simultaneous 9
| and 10 kHz AM channel spacing in the event that North America did make
| the transition to 9 kHz spacing.

The old factory analog scan radios used to do something similar. They would go past the station and then go backward to lock on the station. Most of the time they would only do it once.

The scan on FM radios, after they went digital, never worked much better. My first digital with a scan worked poorly in New Jersey. I thought it was because of all the short spacing. For example, if it was going down, it would lock onto WIFI/WXTU at 92.5. Then you would push the button again to stop on WOBM at 92.7. This was in areas that the 92.5 station was not listenable. Later, when I moved to Florida, when short spacing wasn't the problem it was up north, I realized the radios just had the scan as a selling point and another button to confuse the kids who were buying them.

My name is Val Davis. Some of you know me.

I have done mornings from Maine to Texas and everywhere in between.
I used to voice for ABC Television both nationally and locally in Houston.
I was also the voice of the ABC Classic Rock Format for a few years.

I am from the same town as Rush Limbaugh and started at the same station
Rush started at (KGMO) in Cape Girardeau, MO. That is where my similarity
to Mr. Limbaugh ends.

I will be hosting a talk radio program call "The Show". We expect to be
picked up by I.E. America Radio Network in the next 30-45 days.

If your station is looking for an alternative to the "right wing dominated public
discussion", I encourage you to contact me at

vdavis@nerds.com

Additionally, if your station is looking for some good Liners or Spot Production,
I am also available. You can visit http://www.productionroom.com for more info.
My prices are posted and I will offer a 25% discount to readers of rec.radio.broadcasting.

Look forward to hearing from some of you.

Sincerely,

Val Davis
vald@productionroom.com

30! How you get away with 30? I worked at a non-com in the late 60's early 70's and we had to log transmitter readings every 15 minutes.

I hated taking the readings as those were the days you were required to tap the meters and record any differences between taped and untapped readings. Remember that part of the regs? That old 10-watt box was so badly wired that you could hear the tapping sound over the air.

Several services.

Live365.com is one that comes to mind, I know someone who is doing that now (rather successfully). He has a niche market, and is attracting advertisers in sufficient volume to support his efforts.

Saly, it seems they'll be signing off from live shows at the end of this week.

I just looked at RobBlack.com, which has details of his search for the next gig (good luck Rob, we've all been there!).

They've been running promos talking-up the sign-up service for the past month or so - now we know why. However, they haven't said anything yet on the air about the current service closing.

A great shame, because I'm only an intermediate computer user, and still found it a great listen.

Too much of a niche-y format though, judging by the endless PSA's appearing in ad breaks.

Good luck anyway to all those they're letting go.

Did the engineer tell you why minidisc would require processing? At
WOR we converted the news department to minidisc and didn't use
anything other than the overall processing of the station's audio.

We used minidiscs on the WOR Radio Network for refeeds, again without
processing them. Now the refeeds are done from the Enco digital audio
system. At the time I left, minidiscs were still run, synchronized
with the Enco, as emergency backups.

At the last network I ran we used minidiscs for all sorts of things,
without processing.

My choice for field interviews would be a professional minidisc
recorder. Don't use DAT. After a while you'll find tracking from
machine to machine to be a problem.

I honestly don't know about the equipment required - I wouldn't think it would be much, you would have your own studio and could even pump the signal on some service like Live365 and have the cable op pick it up.

On the other hand - we did discuss this path with our local cable company several years ago - and determined that it was cost-prohibitive. If you are using it for commercial content.

KNEW is no longer carrying CNET radio, and is playing
a "change of format" recording saying "the talk begins
on Monday at 6AM". Perhaps a new talk format.

As far as the old format is concerned: good riddance.
I would have liked a high tech format, but this one
was cluttered with endless commercials and promos,
chit chat, happy talk and off-topic stuff. I never
understood the idea of David Lawrence in Washington,
instead of broadcasting from Silicon Valley. It has
died a well deserved death. A much better format was
the cable show "the screen savers"; unfortunately, our
cable system doesn't carry it.

Here in Canada, we simply tell the interviewee that we're looking for
opinions to use on a radio program.
If they decline, we move on to the next "victim" :)
I find minidisc is fine for on air use.
We use it regularly for news gathering here but you're better off
getting one of the pro versions, such as the Marantz model.
We record in mono using an EV 635a.
Good results!
However, you may want to find out what your end user prefers for
playback and work in that model.
Marantz also makes a flash card recorder which looks similar to the
minidisc model.
Both are easily dumped into a computer for editing and playback.

KGO (AM) in San Francisco is the undisputed #1 station in the market. It has none of the hosts mentioned in this thread. In fact, it only has two nationally sydicated hosts (Dean Edell, which is done from the KGO studios, and Bob Brinker). All the rest of the time is done by local talent, none of which can hardly be classified as "right wing".

> What kind of programming would you use to replace this 'jiber-jabber'?

One might ask KGO.

Well, yes and no.
Likely, that settle out has to do with the audio being tilted positive
at the transmitter. Long story.

Just wondering if anyone has any good tips for a budget broadcast mixer for a small news room?
There is currently a D&R budget desk installed but I'm not happy with it. All the inputs are unbalanced and the telco channels do not have individual cleen feed (mix minus) outputs.
I'm currently looking at the Soundcraft RM100/105 type desk but any other suggestions would be very welcome.

Cheers...

Audiohead...

This radio might do search in 1 kHz steps.
In Europe LW receivers also do this to facilitate reception of 177 en
183 kHz, two channels (or better a split for 180) that are apart from
the 9 kHz spacing system.

What about the LPB Blue 5C? It's only US$1,300.

According to the website http://www.lpbinc.com it's got the following:

.. RJ-45 Ethernet Cat-5 Connectivity
.. 2 Independent Headphone Amps
.. Heavy Duty Mil-Spec Switches
.. Mono Telephone Buss
.. Input Follow Muting
.. 10 Stereo inputs
.. Stereo Cue Buss
.. 5 Stereo Channels
.. Stereo Program Buss
.. Input Follow Remote Starts
.. 13" x 16" Footprint Fits Any Studio
.. Switches Rated to 5 Million Operations
.. Transformer Balancing For RF Immunity

> collectable radio in some of these areas.

I collect old radios.

Old radios in Colombia (at least in the city of Cali) are very hard to find. They die, they get repaired, they die again...they eventually get trashed when they get too expensive to repair.

My cousin had a huge Colombian-made Sharp tube TV console set. When it One taxi driver there who drove me whome with one of my finds (too big to take on the city bus) told me he used to have an old tube radio - but he sold it and traded it for a modern stereo with cassette player.

Cheap no-name transistorized electric radios (like medium sized portables, boomboxes and clock radios) can be bought from street vendors and any numerous medium-to-large sized discount store. They pick up a few of the higher-powered local top-40 FM stations and that's good enough for most people.

I bought two such generic Chinese-made animals myself when I visited back in 1994 and still have them. You want even cheaper, buy a pocket walk-man style radio. :)

During my last trip to Cali (in 2001), I brought back a couple of old radios from the 1950s - a large Grundig and a smaller British-made Philco....in good, easily repairable shape.

Although I did pay a bit more than I would have wanted for the Grundig since I bought it at an antique store (US$90 in 2001 money - for a radio with no FM band) - the Philco was US$12 in 2001 money.

Of course, Cali is a major metropolitan area, very similar to New York City where you can also find such cut-rate cheap stuff easily. Things might be different in small remote towns (just like here in the USA) where you're not close to any stores.

In New York, you can't go a block without finding a dollar store, and most of these do sell radios (not at a dollar, of course).

A lot of people don't have money to pay the rent but they sure manage to put themselves badly in hock to buy that new colour TV or fancy stereo with the huge speakers. It's messed up priorities. :-/

Seems a few Japanese companies in the 60's churned out a basic pill-shaped dual crystal microphone that looks almost like a miniature version of the RCA 77 series ribbon microphone. Names like Calrad, Argonne, Fentone, etc.

Anyway, I think at the time they were sold the going price was somewhere around $10-$15. In recent years, these microphones (both in used and NIB condition) have appeared on eBay and have sold at prices ranging from $50 to $200. In the last few months, a couple of eBay sellers started selling quite a number of these NIB (uncovered a hidden cache?) and all kinds of people have emerged from the vast Internet to bid on them, forcing the average price to close at around $125.

Are these microphones worth that kind of money? I've heard varying opinions on their sound quality ranging from "junk" to "not bad." Seems to me that if there is any value to them, it's that they are yet another fading token of a 60's item made (partially) of bakelite. Are they only appreciating in price out of ignorance to any audio value?

Any opinions or comments?

144. WANTED: Bob Wilson (Bruins radio) tribute from years ago on tape

Newsgroup: rec.radio.broadcasting

One of the local Boston radio stations did a tribute to Bob Wilson, longtime Bruins radio play-by-play man....it was at least an hour long, maybe more....does anyone have it on tape? Know where to get a copy of it it, etc? I have MUCH to trade, including many old Bruins games on video (vhs or DVD).....
PLEASE E-MAIL YOUR REPLY......THANKS

Go here: http://www.dixonsystems.com/Aboutus.htm

I had ten of these in my last five station newsroom.
They're widely used in Canada and the US.
So far, no one has managed to break one and they're simple to use.

Well, maybe some people like 'em.

I had one, back in the day, sold by Radio Shack; it had the tinniest tone imaginable, like any crystal mike. No bass.

If somebody thinks it's worth $200, I suppose I'm no-one to say different. I'd rather buy an EV 635A or AT 802 or the like.

If David were to have moved to Silicon Valley would he, suddenly, be more computer literate than he is now? It seems to me Bill Gates made a serious mistake by ignoring Washington until he couldn't avoid it. There are many decisions made and issues debated in Washington that have serious impacts on Silicon Valley.

Having someone like David close to those issues seemed like a smart move to me.

As a youngster in the late 50s and early 60s, I used to "hang around" the two local AM stations that were within walking distance of my home. KOOS-AM/250 Watts on 1230 KCs was the night time preference because it had Top-40 programming in the evening. (At the tender age of 15 - with a special work permit from the State of Oregon - I worked there for two weeks as a summer replacement night-time DJ.) The other station was KYNG-AM/1000 Watts Daytime Only on 1430 KCs. (That callsign went someplace else, and it is now a "High School" radio station under the call sign KMHS, I believe.)

Now that the nostalgia is out of the way, on with the "intermittent audio" yarn.

For most of the day on Sundays, KYNG played either religious music or other pretty mild stuff, instrumentals, big bands, etc. The station owner came in and was the "DJ" from sun-up, until mid afternoon, when a graduate of the Don Martin School of Broadcasting would pop in and the tempo of the music would elevate at tad, until they went off the air at sun-down. One Sunday, I happened to visit early in the day and was sitting around watching and chatting with the station owner during the music. During one of his breaks, commercial, news, something vocal (senility is a terrible thing), the Vu Meter needle just started taking a nap over on the far left pin. He was familiar with the symptom, which had existed since the station was moved from a hotel room, to a suite of offices over one of the local bakeries. He proceeded to strike the console (a Gates "Yard") at a certain predetermined spot - looking for some reaction. After the first couple "thumps" he started to say "Damn!" each time his hand made contact with the console. Apparently, he was not watching as carefully as he should and for three blows, the needle peaked - something had gone out. Within seconds, the phone lines lit up and the owner got to apologize one by one to almost the entire population of that small town (an exaggeration for impact purposes only). At his next break he made an on-air apology, but continued to field a few more calls. I took that opportunity to smile weakly, wave, and quietly slip out the door.

I'm sure there was a lesson to be learned there someplace.

Exactly. Other than editing the cuts, there was no processing beyond
the processors in the audio chain to the transmitter.

Amateur Radio Newsline™ Report 1330 - February 7, 2003

++
+++

A NOTE ABOUT WHAT YOU ARE ABOUT TO READ

For those of you who only know of the Amateur Radio Newsline (tm) as a text newsletter we would strongly urge you to listen to the audio version this week. Our service is best described as "audio intensive" and all Amateur Radio Newsline (tm) scripts are specifically written for the "spoken word." Because of this there is no way to convey in print the emotion of what you "hear" when you listen rather than read.

Candidly, you are really missing what Amateur Radio Newsline is really all about by only reading it. The newscast is recorded each week by professional broadcasters and is available for private listening or rebroadcast over your repeater. Two methods of delivery are available: FTP downloadable MP3 files or dial-in telephone.

Please visit our website at http://www.arnewsline.org for a list of telephone numbers (you have to pay your own long distance charges) and links to our voice newscast. Free FTP Downloads are available at our site by clicking on the newscast number at the top of the page.

Amateur Radio Newsline report number 1330 with a release date of Friday, February 7 2003 to follow in 5-4-3-2-1.

The following is a Q-S-T. The space shuttle Columbia falls from the sky and all on-board are lost. Three were radio amateurs. More on the tragedy and the search for answers comes your way right now:

(Billboard Cart Here)

**

HAM RADIO IN SPACE: HAM RADIO OPERATORS LOST IN COLUMBIA TRAGEDY

Three ham radio operators were among the seven member crew of the space shuttle Columbia who were killed when the orbiter broke up during re-entry over Texas on Saturday February 1st. Amateur Radio Nesline's Norm Seeley, KI7UP, has the details:

--
President Bush Audio: Audio only report. Hear it at
http://www.arnewsline.org
--

Those were the words of President George W. Bush expressing the grief of the world on learning that that the spaceship Columbia had fallen from the sky. That it's crew of seven astronasuts was lost.

On board was a 7 member crew that included three ham radio operators. Killed in there tragedy were Mission Commander Rick Husband, and Pilot William McCool. Also lost were Mission Specialists Michael Anderson, David Brown KC5ZTC, Laurel Clark, KC5ZSU, Kalpana Chawla, KD5ESI and Israeli Payload Specialist Ilan Ramon. Ramon was a well-known Israeli Air Force pilot became the first man from his country to fly in space.

Columbia was at an altitude of about 203,000 feet over north-central Texas and traveling at 12,500 mph, when Mission Control lost all contact and tracking data. It was about 9 a.m Eastern time. That was almost the same moment when residents in the Dallas area reported hearing a gigantic sonic boom. The loudest anyone had ever heard. Witnesses who looked up reported seeing a bright flash followed by smoke plumes streaking across the sky. Several people grabbed their home video cameras and caught the tragedy. Tape shows debris appearing to break off into separate balls of light and falling back to Earth.

What actually happened is still very much unclear. The shuttle is essentially a glider during the hour-long decent from orbit. It is covered by some 20,000 thermal tiles to protect against temperatures as high as 3,000 degrees.

The space agency is already looking at a liftoff incident where a part of the center fuel tank's foam insulation broke away and impacted one of the Columbia's wings. NASA saus that just before it disintegrated Columbia experienced an abnormal rise in temperature and wind resistance. That forced the shuttle's automatic pilot to make rapid changes to its flight path. Some experts say that this is possible evidence that some heat-protection tiles were missing or damaged.

Administration officials said there was no immediate indication of terrorism but accounts from those on the ground have lead to speculation of a explosion somewhere on board the orbiter. Others say the abnormally high sound level was the result of multiple pieces of Columbia all breaking the sound barrier at slightly different times and creating an ongoing sonic boom.

Debris from Columbia fell along Northern Texas and into Louisiana. NASA declared an emergency after losing contact with the crew and sent search teams to the Dallas-Fort Worth area. It also warned people to stay well clear of any debris field they might encounter because of chemical contamination from the very toxic fuel. But that was easier said than done. Residents of the town of Nacogdoches say they found bits of metal strewn all across the city and a local dentist reported that a metal

bracket about a foot long crashed through his office roof.

STS-107 was NASA's 144th shuttle mission.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP.

--

On January 28th, 1986, the space shuttle Challenger exploded shortly after liftoff but in 42 years of U.S. human space flight, there had never been an accident during the descent to Earth or landing until now. NASA has grounded all of its space shuttles, but there's no word yet that the Columbia tragedy will affect the current Expedition 7 crew's future aboard the International Space Station. (ARNewsline™ from published news reports)

**

HAM RADIO IN SPACE: TEXAS HAMS ASSIST IN SHUTTLE DEBRIS HUNT

Amateur Radio played a signifigant role in the debris recovery efforts after Columbia broke up over Texas. Amateur Radio Newsline's David Black, KB4KCH, has that part of the story.

--
A family member gets a close-up view to the tragedy. One of the Columbia's heat protective tiles was found near my nephew's college dorm in north central Texas. My newphew took a picture of it, which you can see on the Amateur Radio Newsline website. While the tile survived re-entry, the Columbia did not.

Within hours of the accident, Amateur Radio Emergency Service volunteers with the Nacogdoches Amateur Radio Club began helping Emergency Management officials and NASA teams in locating and cataloging debris falling from the shuttle.

Tim Lewallen, KD5ING, is the Public Information Officer for the Nacogdoches Amateur Radio Club. He says the hams worked in tandem with students from a local college's Geographical Information Systems lab. Together, they surveyed the city and county looking for shuttle debris. When any was located it was photographed and its exact position determined using a G-P-S. The data was later downloaded into a database that will be superimposed over terrain maps. Local officials say debris was found in nearly 2,000 sites, including some 1,200 places in Nacogdoches County.

As we go to air, well over 12,000 pieces of Columbia had been found, from as far west as New Mexico eastward into Louisiana. NASA hopes the position of the debris field will give it some insight into what caused Columbia to disintegrate.

Reporting for the Amateur Radio Newsline, I',m David Black, KB4KCH.

--

Lewallan says that the entire effort was coordinated by the ARES group. He adds that ARES volunteers were also directed to coordinates given by NASA that the space agency believed might contain missing parts of the Columbia. The recovery and cataloging effort went on for several days. (Nacogdoches Amateur Radio Club via KD5ING)

**

HAM RADIO IN SPACE: AMSAT MOURNS COLUMBIA LOSS

Its no secret that Amateur Radio and the space program have had a very close association since the very first Orbiting Satellite Carrying Amateur Radio or OSCAR was launched back on December 12th 1961. It was carried into space by a United States built Thor Agena launch vehicle from Vandenberg Air Force Base in California. OSCAR 1 was a tiny 4.5 kg package that made only 312 orbits before re-entering the Earths atmosphere. But it set the stage for four decades of ham radio in space. A lot of it took place from the space shuttles including Columbia. In fact it was from Columbia that ham radio's first man in space, Owen Garriott, W5LFL, talked to a senator and a king:

--
Audio only. Hear it in the audio version at http://www.arnewsline.org
--

And so it was when news of the Columbia's demise began to settle in that the representatives of AMSAT groups from around the world began paying their respects. Perhapps none was more poignant than the words of AMSAT North America President Robin Haighton, VE3FRH. His statement is read by Amateur Radio Newsline's Newsline's Henry Feinberg, K2SSQ:

--

"It is with great sadness that I have learnt of the Columbia disaster. AMSAT has always been a strong supporter of the Shuttle program and of ARISS. We have had many interactions with the astronauts who have fearlessly ridden the shuttle into space. Currently several are AMSAT members and supporters.

On this sad occasion on behalf of the Board of Directors, Officers and Members of AMSAT, I wish to send our deep sympathy to the families, relatives and friends of those who undertook this Columbia mission. Their understanding of the risks taken on this and other missions did not prevent them from performing at the highest level, and, unfortunately paying the ultimate price.

To our friends at NASA, we at AMSAT send our understanding and our sympathy,
knowing that the exploration of space and carrying out important experiments
for the benefit of humanity will continue to be your mission."

--

AMSAT France, AMSAT Germany, AMSAT Itlaly, AMSAT Sri Lanka and other AMSAT groups the world over also offered words of condolence an consolation.

Frank H. Bauer, KA3HDO, the Chairman of ARISS International issued a statement that read in part -- and we quote: "This is a difficult time for all of us. Let's work together to keep the torch of space travel alive in the hearts and spirits of humans worldwide. And most importantly, please keep the astronauts, their family and friends in your thoughts and prayers." (AMSAT-NA, ARISS, others)

**

Break 1

>From the United States of America, we are the Amateur Radio Newsline, heard on bulletin stations around the world including the W4BBB Radio Amateurs Club of Knoxville repeater serving Knoxville Tennessee.

(5 sec pause here)

**
RESCUE RADIO: TENNESSEE HAMS HELP AFTER TORNADO

The January 8th issue of the Knoxville News-Sentinel tells the story of Sheila Tailent, KB4G, and how she came to the rescue after a tornado ripped through Morgan County Tennessee. Tailent is the state ARES coordinator realized a need to provide reliable communications following the storm. Thanks to her efforts, within 15 minutes after the twister struck hams with emergency communications gear were on their way.

According to the News-Sentinel, for the next 48 hours ham radio volunteers relayed communications among police departments, firefighters, rescue squads, demolition units, repair crews the Red Cross and many others. The article says that dozens of radio amateurs worked around the clock with many taking vacation days from work and donating the time to the community.

The newspaper says that a conservative estimate of the value of the communications provided free of charge by hams to Morgan County could be upward of $80,000. (W5YI Report)

**

RESCUE RADIO: BE PREPARED - PART 2

The Columbia tragedy and the Morgan County tornado are two incidents that again bring home just how important it is for ham radio operators to be prepared. The ARES members in Nacogdoches Texas had no idea that their training would involve them in trying to find out why a space shuttle fell from the sky. But thats excatly the role that they played -- and continue to play.

Last Week, Lloyd Colston, KC5FM, was here to explain the importance of emergency preparedness. Now says Colston, its time for some personal

preparations:

--
Audio only report. Hear it at http://www.arnewsline.org
--

Lloyd Colston, KC5FM, is with the Mayes County Emergency Management in Pryor Oklahoma. He will be back from time to time with other tips on how hams can be ready for any emergency that may come their way. (KC5FM)

**

RADIO LAW: FCC AND NTIA TO IMPROVE FREQUENCY COORDINATION

The FCC and the Commerce Department's National Telecommunications and Information Administration have signed a new Memorandum of Understanding on spectrum coordination. According to the C-G-C Communicator, the agreement calls for the FCC to responsible for non-federal frequency users such as broadcast, commercial, public safety and even Amateur Radio. The N-T-I-A will hold responsibility for all federal government users. The full document is on line at http://hraunfoss.fcc.gov/edocs_public/attachmatch/DOC-230835A1.doc (CGC Communicator)

**

SPECTRUM ISSUES: FCC REALLOCATES SPECTRUM FOR NEW WIRELESS SERVICES

Also from the C-G-C Communicator word that the FCC has reallocated 30 megahertz of spectrum from the 2 GHz Mobile Satellite Service to fixed and mobile services. The purpose is to provide frequencies for a variety of new wireless applications. The Commission is seeking comments on potential uses of an additional 15 megahertz of spectrum previously identified for new wireless services. It also wants comments on increased flexibility in the Unlicensed Personal Communications Service band. This too is on the web. You will find it at: http://hraunfoss.fcc.gov/edocs_public/attachmatch/DOC-230754A1.doc (CGC Communicator)

**

CONVENTIONS AND HAMFESTS: SUPERFEST 2003

A-E-S has gotten it's Superfest 2003 registration form online. The Superfest takes place April 4th and 5th at Amateur Electronic Supply in Milwaukee. To register take your web browser to www.aesham.com and take the link to the Superfest menu. If you need help or have any questions, please contact Molly Schreiber at A-E-S. Her e-mail is molly@aesham.com (AES)

HAMFESTS AND CONVENTIONS: RADIOFEST IN SEASIDE CALIFORNIA

The Naval Postgraduate School Amateur Radio Club will host RadioFest 2003 on Saturday, February 22nd. This is a West Coast hamfest and will be held at the General Stilwell Community Center in Seaside, California. The show includes a flea market, vendor booths, demonstrations, license exams, door prizes and more. Among the forum presenters scheduled are Leslie Ragghianti from the 911 Emergency Communications Center, Jeff Orr, K-G-6-K-C-O, discussing "Echo Link" along with Don Carlson , KQ6FM, and Glenn Thomas, WB6W discussing ARES. Sound interesting? For more information go to the web at www.radiofest.org (W6FVI)

**

RADIO MEETINGS: SCADS IN SEAL BEACH CALIFORNIA

Also in the Golden State the Southern California Area DXer's shortwave listeners monthly meeting takes place on Saturday February 15th from noon to 4:00 p.m. Pacific time. The venue is the F&M Bank Community Room in Seal Beach California. This months subject is Radio Communication Listening Worldwide. For more information e-mail Bill Fisher at billfishernow@netzero.net (SCADS)

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**
THE FUTURE: HOW TO MAKE HAM RADIO MORE KID FRIENDLY

"How to Make Ham Radio More Kid Friendly" is the topic that Amateur Radio Newsline has chosen for this years Ham Radio Town Meeting and we are looking for some younger hams who might want to take part.

The Town Meeting is held each May at the Dayton Hamvention. This years Hamvention theme is the "Year of the Young" and planners tell us that the three day show will focus on the young ham and on bringing 12 to 18 year olds into amateur radio.

Its no secret that recruiting youngsters into the hobby is getting harder and harder. Keeping most of them is all but impossible. There is organized sports. There are those numerous after school activities. And lets not forget the lure of the World Wide Web with its license free ham-radio like chat rooms. All of this makes it a real challenge to get youngsters licensed and keep them interested.

Obviously the old ways of recruiting young people no longer work. So we are going to take two hours and give you the chance to come up with some new ways.

If you are a young ham planning to attend Hamvention 2003 and would like 10 minutes to present your ideas, drop us an e-mail. We will go through what you send us and some of you might be invited to be a part of our all-star panel.

The best way to contact us is by e-mail. Mark your note Town Meeting and send it to newsline@arnewsline.org. (ARNewsline™)

ON THE WEB: REPEATER LINKING POWERPOINT PRESENTATION

If you are into repeater linking, this one is for you. Kevin Custer, W3KKC, reports over the VHF Reflector on a new Repeater Linking presentation using Microsoft's Power Point Presentation format. It was produced by Douglas Otoupal, N5HYD, is 131 kilobytes in and available at http://www.repeater-builder.com/rbtip/pdfindex.html. (VHF Reflector)

**

INTERNATIONAL - GREECE: NEW VHF/UHF ONLY LICENSE CLASS

The V-H-F Reflector says that Greece now has its own, entry level VHF only license. The new ticket use the prefix SW1 through SW9 with priveleges on 2 meters and above. SV1 through SV9 prefixes indicate Greek stations that have full High Frequency operating privileges. (VHF REflector)

**

INTERNATIONAL - GERMANY: DEUTSCHE WELLE DROPPING NORTH AMERICAN SERVICE

Germany's premiere shortwave station says that transmissions to North America will soon cease. This with confirmation by Margot Forbes of the broadcaster Deutsche Welle that it will be terminating the long running service at the end of March.

Up until now, there have been several claims made by various sources that Deutsche Welle would be shutting down its broadcasts to North America this spring. The station would not deny or confirm this directly until now.

According to Forbes, the stations budget has been slashed time and time again by the German Government. Forbes says that maintaining shortwave transmissions are particularly expensive and the decision has been made to cancel operation on some frequencies. This includes the very popular transmissions to North America

Forbes says that there are no plans yet for a replacement service. but says there is the possibility of somthing being worked out using satellite delivery or over the Internet. (shortwavedxing.com)

**

PROPAGATION: SA 100 MICROWATT 7 MHZ BEACON HERARD IN USA

And a possible record for a high frequency beacon transmitter. Over the last 4 months, an extremely low power beacon transmitter has been operating from the QTH of ZS1J at Plettenberg Bay, South Africa. The measured power output of the 7.029 MHz transmissions is 100 microwatts and reception reports from all over South Africa, up to 1100 kilometers, have been received. But the big surpriose came on Tuesday January 29th. Bill Diggens, WA8LXJ, in West Union Ohio made a positive identification of the beacon transmiutter.

Diggens gave it a Readability 2, Signal strength 1 and tone T 9. He also made a tape recording of the signal received and played it back to amazed South African amateurs on the daily, split frequency net. A newt that can be found 7.095 and 7.177 MHz in the 40 meter band. (ZS6AKV)

**

DX

In DX, PS7AB says that Mexiana Island will be on the air May 21st through the 25th. Five operators will activate Mexiana on 40 through 10 meters on SSB only. Mexiana is considered the most wanted Islands on the Air group in all of South America. More information is on the web at http://www.mexianaisland2003.hpg.com.br (Press release)

**

THAT FINAL ITEM: HAM RADIO AND THE SPACESHIP COLUMBIA

And finally this week, we like many other Amateur Radio operators around the world felt a special loss following the Columbia space shuttle disaster. As we already mentioned, three of the astronauts on board were licensed Amateur Radio operators. And Amateur Radio has had close ties to the space program, to the astronauts, and to the ill-fated Columbia since the very early days of shuttle flights.

It was on board the Columbia during the STS-9 mission in November of 1983 that Dr. Owen Garriott, W5LFL, became the first person ever to operate a ham radio station from space. In case you have forgotten, this is how that historic contact sounded:

--
Audio only. Hear it in the audio version at http://www.arnewsline.org

--

That QSO marked the first time that astronauts could communicate directly with people on Earth. And they did it without going through the normal NASA's communications channels.

In 1990, NASA, the ARRL and AMSAT formed SAREX -- The Shuttle Amateur Radio Experiment. This was a program to schedule regular contacts between school students and the astronauts on-orbit using Amateur Radio. Astronauts were encouraged to obtain Amateur Radio licenses. Many did and they used them to talk with kids in schools the world over. A lot of those contacts took place from the mid-deck of the spaceship

Columbia.

--
Audio only. Hear it in the audio version at http://www.arnewsline.org
--

In addition to the SAREX contacts, astronauts were encouraged to spend some of their free time making random contacts with hams on Earth. Open contacts they were called and they became a new form of radiosport. A kind of contest with radio amateurs everywhere vying to be the first in the city or neighborhood to talk to a ham radio operator in space.

Then Russia entered the realm of ham radio on-orbit. Amateur Radio gear was installed on its MIR space station and talking with cosmonauts soon became almost commonplace. Who can forget British astronaut Helen Sharman when she visited the MIR and took to the airwaves using ham radio.

--
Audio only. Hear it in the audio version at http://www.arnewsline.org
--

SAREX has now given weay to ARISS -- Amateur Radio on the International Space Station. But it all had to have a beginning and from its earliest days on-orbit until it disintegrated in the sky above Texas the space ship Columbia and ham radio have shared history together. Now the Columbia is now gone, but the world of Amateur Radio will never, ever forget it or the seven human beings who were on it when it met its firey demise. (From the combined thoughts of the worlds radio amateurs as posted to various Internet remailers, by e-mail and numerous other sources.)

***

>I worked at a non-com in the late 60's early 70's and we had to log transmitter readings every 15 minutes.<

That might have been a rule at your station, but it was not an FCC rule. During that time the FCC mandated readings every 30 minutes.

Tapping the meter panel or recording the difference between tapped and untapped meter readings was not mandated either, unless not tapping it resulted in faulty readings. I dare say, however, that if an FCC RI saw an operator tapping a meter, he might well have asked "why hasn't that been logged and fixed?"

The one meter-reading bugaboo which used to trap a lot of operators was the requirement to take any reading that was affected by modulation without modulation. Some stations had an audio-short button, which would remove modulation as long as you held it down, so that you could get a proper reading. Most that I know of made the operator wait for a silent period in the programming.

Neotek Esprit for broadcast and television production.

48 Mono mic/line inputs modules. (8 with sub/group summing amp)
Inputs: eligible 2 mic and 2 line.
Eq: 4-band paramatric, fixed and sweep HI-pass.
Aux: 6 mono and 1 stereo.
8 bus/group assignment and 2 stereo bus.
Pre/post PFL, direct out with level, mix minus, insertion point in/out
and pre/post eq switches.

8 Stereo line input modules.
Inputs: eligible 4 stereo line.
Eq: fixed 4-band and fixed HI-pass.
Aux: 6 mono and 2 stereo.
8 bus/group assigment and 2 stereo bus.
Pre/post PFL, direct out with level, mix minus, insertion point in/out
and pre/post eq switches.

56 Fader modules with 100 mm. conductive plastic fader,
4 mute groups and solo in-place.

3 Master faders for A/B stereo buss and main program out.

Advanced talkback system with auto and return talkback functions.

Safety and on-air facilities for live broadcast production work.

40 segment VU/PPM bargraph on every input modules, 40 segm. VU/PPM for
mix A/B stereo out and
NTP 177-800 PPM bargraph, needle VU and phase meter for program stereo
outputs.

Internal patchbay with total 1024 Bantam metal patch holes.

Frame 3.790 mm. long with 19" space in centre for communications and
script/manus space.

Dual power supply

All in and outputs are electronically balanced.

All interconnection trough 120 pin Elco/Edac connectors.

The console is 9 year old and are in extremely good condition, the
finish as new.

Price intication
SKR 250.000
EUR 27.000

USD 27.000
GBP 17.000

Packing and freight charges I not including.
The console is located in Sweden.

Thanks for the replies! :-)

I guess here in The Philippines we have an interesting combination where we use North American odd-numbered tuning for FM (but using 50 microsecond pre/de-emphasis) and 9khz tuning for AM. As an aside, The Philippines may turn out to be the next country after the US to use IBOC for digital broadcasts (which i hope doesn't happen)

Sorry...I just had to let off steam. All my life ALL entertainment, news, commentary, and societal decrees have come from the east coast. The word "live" is always followed by "except on the west coast". "Join so and so for live chat on the Internet after the show (except on the west coast)."

Presidential addresses are given at five PM when all of us lefties are stuck in freeway traffic, but when New Yorkers are comfortably seated in front of prime time TV. Oh, and at eight o'clock our time, we get to watch an old movie...after all, if the New Yorkers missed the prime time show, we can't see it either.

Got a talkshow? Even if it is about high tech, Washington is the center of the universe. Silicon Valley (where I live) doesn't mean squat. I can see why the Federal government acts as though the west coast doesn't exist: the media doesn't recognize it. If California fell off the continent tomorrow, I doubt anyone in the heartland would even bother to throw us a rope. (That became VERY evident during our energy crisis.)

OK...I feel better now. I'll go back to quietly watching my tape-delayed everything. And I need to get my tax return mailed. At least Washington remembers the money we send in every year even if we don't get anything back in return.

Continue to enjoy our wine, movies, technology, and our bountiful harvest, by all means. Best wishes from the colony of California.

[Grumble]

Pro machines are usually built to higher specifications and with better materials than the consumer stuff that is built down to a price. They're also built to withstand the knocking around given by news gatherers, etc.

That's not always the case...though.

I feel your pain. When I lived in San Diego I resented the network
news local cut-ins by a Los Angeles anchor if a story had changed in
the 3 hours since the Eastern feed.

Imagine how irritated I was when I spent time in Homer, Alaska and
watched Johnny Carson at 6:30 or so (forgotten the actual difference).
Carson with the sun shining just wasn't the same. Since the sun shined
until midnight not much was the same. In the Winter watching 2PM
programming in the dark was eerie, too.

Be comforted in knowing that all the taped sitcoms have a "live" West
Coast" feed so you can see "Moisha" at the same clock setting as the
East. Just don't accept phone calls from East Coast friends who can
tell you what the outcome of The Bachelor is.

The strangest thing for me was living in Dallas where there was a
constant crawl on screen warning of a tornado watch/warning or severe
thunderstorm warning. It was enough to cause a Yankee from Boston to
lose bladder control. I had an MGB that was low to the ground. Dallas
thunderstorms raised the water level within minutes nearly to my door.

At ABC Radio we had 3 separate commercial feeds so an advertiser could
run his spot at the same time across the country (except mountain),
regardless of the programming.

You see, we make allowances for the West Coast.

You do have an advantage, though. Your tax return is due 3 hours later
than ours.

Well, not much has changed there, apparently. Back in 1954, my father was doing field service for some military project at Sheppard AFB (near Wichita Falls). I remember the constant tornado watch/warnings. Back then, there weren't any crawls. They threw a slide up and announced it, interrupting the programs. The programs were also frequently interrupted with slides that read "Trouble on the Cable". They weren't talking about CATV, but rather the telephone lines that delivered the programs to the affiliates.

The rains? Yes, indeed. And don't forget the icky red mud. It was there I saw my first scorpion. While Texas gets its network programming in synchronization with the east coast, that is not enough to make me want to move...to Texas, anyway.

So you DO admit it exists, after all! Well, I suppose I could move to the east coast...but then I realized that I was enjoying shirt-sleve weather today (as usual). I guess I'll just have to keep sacrificing and suffering with network television on the forgotten coast.

I need a scematic for Alesis studio 32 mixer

the unit oscillates when you first turn it
on in the LR monitor output section for about 30 minutes then quiets down.
Then throughout the day it will either go silent for a second or chirp --
what a pisser !

Just as bad are the parts and tech support
who dont answer email - A phone call says they cant sellthe schematic . Keep
that in mind when you buy something for your stations .

Hello
I taped a radio show back in 1984 on cheap tape
(yes heck there is such a thing as cheap tape) eg. Radio Shack Concertmate
tape. NEVER archive using odd brand tapes!

19 years later (last week) I played it back and the tape had too much
tension on one side and even when
taken out of the case and respooled in another cassette it had a chipmunk
effect every other second. It seemed to play smoothly despite the tension.

Is there an audio program that can eliminate this. I have CoolEdit but
having to adjust tempo 1350 times (on a 45 min per side tape) is ridiculous
if it can be done automatically.

Thanks
Ken

Hello!!

I�ve been looking for information about the kinds of radio audience measurement,
untill the moment i just have found the arbitron�s method.

I desperately need this info, becuase i�m doing a research of this subject to obtain my master degree. (any journal you can suggest me wold be great)

Any info would be useful

Thank You

Albert esquivel U.A.E.M. Mexico City

Alesis wants $100 bucks for a schematic !!!!

Service manuals are $100 + shipping. You are also required to sign a
non-disclosure agreement. Unfortunately, they are not available in PDF
format. I only have Xeroxed copies.

I wrote back and said something obscene
Well, unfortunately Sir, the sale of Service Manuals is directed towards
service centers who would be profiting on the repair of several units. For
someone who wants to repair a single unit, it is certainly not cost
effective.Which is why you should send the unit to a repair facility capable
of repairing your Studio 32.

Sorry for the inconvenience.

Subject: Re:service manual

Get Real Paul
I dont know of any broadcast engineer
that would pay $100 for a service manual . or for that matter buy or
recommend that we buy any more of
that brand . We could fill up the rack with a mackie mixer

There is no "height" limitation for your antenna, and 30 seconds of effort
on your part with any search engine is all you need to figure out the
maximum
LENGTH of your antenna, as well as the maximum driving power. The Part 15
rules, easily accessible on the FCC website, explain all of this in detail,
assuming you're capable of digesting all that "hard legal talk".

The limitations on power and antenna construction are unlikely to result in
useful range of more than 1/2 mile. But being the hardcore radio pirate
that
you are, you're probably not interested in strictly adhering to these rules.

#hamradio called. They have a bucket of punctuation and a cluebat for you.

Amateur Radio Newsline™ Report 1331 - February 14, 2003

Amateur Radio Newsline report number 1331 with a release date of Friday, February 14 2003 to follow in 5-4-3-2-1.

The following is a Q-S-T.

The terrorism warning level goes up in the United States and ham radio operators should be prepared. The details on Amateur Radio Newsline report number 1331 coming your way right now.

(Billboard Cart Here)

**

THE WAR ON TERROR: NATION GOES COLOR ORANGE: HAMS SHOULD BE ALERT

Homeland Security Secretary Tom Ridge says every American must be vigilant. This as the Bush administration raises the nations terror alert from Code Yellow to Code Orange and says this represents the most significant warning since the Sept. 11, 2001 attacks. Among those best equipped to assist the nation in fighting terror are its ham radio operators. Amateur Radio Newsline's David Black, KB4KCH takes a look at how hams can prepare themselves and how they can help:

--
The government isn't minimizing the threat. Officials expects more attacks against the United States and its allies in coming days. The only thing they can't do is predict when and where an attack will occur.

Federal officials recommended that Americans should take basic disaster preparation steps. This includes maintaining a three day stockpile of food and water. They also recommended obtaining duct tape and plastic sheeting to seal a house in the event of a chemical or biological attack or disaster. They also say to have some sort of emergency radio receiver. One that can operate for days without being plugged into a power outlet is best. This will be the primary way the government talks to you should the unthinkable happen.

How can ham radio operators help? Start by making sure that your ham gear works. Especially your hand held and mobile radios. If you only have one battery pack for your H-T, go out and buy one or two more. Or even better, get a case that lets you use alkaline batteries that are widely available. If the power goes out, you can't recharge Ni-Cads or NiM-H cells. But you can operate for a number of hours with Alkaline batteries. So have several sets of these on hand -- at least enough to get you through 72 hours of non-stop operation.

If you are a trained communicator active with an ARES or other emergency communications group, be sure to let the chain of command know where you will be. Give them a list of phone numbers where you can be reached 24 hours a day -- 7 days a week. Better yet, get a pager and give its number only to the person who will be calling you. That way if that pager goes
off, you know it's for real.

What about looking out for terrorism in your own community? Do it. Observe and report.

If you see something that looks out of the ordinary or suspicious, call the police. Remember that old adage about better to be safe than sorry. While it's not likely you'll encounter a real live terrorist cell, it's not out of the question, either. And that's where your radio, your local repeater and its autopatch come in.

Even if you don't own a cellular telephone, your hand held or mobile radio is your emergency lifeline. If you have access to an autopatch equipped repeater its a lot better than a cell phone. Cellular phones are known for not being reliable in many areas. With a ham repeater, if you can hear it, the chances are it will hear you. And even if there's no autopatch, another amateur can relay your message to authorities.

What about on the air? What are the chances that a terrorist cell might take to the airwaves on your favorite band? Not very likely but again not impossible, either. Terrorists tend to try to blend in with the background. Setting up a communications network on even an underutilized band like 6 meters would be like waiving a red flag in front of a bull. Hams are very protective of their spectrum and are not afraid to go after those on a band illegally.

It's far more likely that a terror group would set up shop on license free public frequencies than on 2 meter F-M or 20 meter sideband. And it's a pretty good guess that government monitors are keeping a close ear on F-R-S, MURS, Class D CB and the frequencies nearby to each service.

What if you hear something that seems suspicious? There are three letters to remember: F-B-I. The agency set up a website and dial-in tip line immediately following the September 11th attacks. Both are still in service.

The website U-R-L is www1.ifccfbi.gov and it puts you only a link away from filing a report. Just click on the words "Report Terrorist Activity."

And this word to hams who have never handled emergency communications. If you hear a net going on, don't break in to ask if you can help. The chances are that you cannot. You can do more good by listening and learning procedures. Better yet, go to the ARRL's website and sign up for one of their Emergency Communications Training Classes. With the stark new reality of terrorism on our homeland soil, it should be incumbent on every ham regardless of age or license class to become

skilled in emergency communications techniques. It might be you who's called on to save a life.

For the Amateur Radio Newsline, I'm David Black, KB4KCH, in Birmingham, Alabama.

--

The bottom line. As the Office of Homeland Security has said, every American must be vigilant. In retrospect, all of our lives could depend on it. Hams can sign up for emergency communications training at the ARRL website -- www.arrl.org. (ARNewsline™)

**

ENFORCEMENT: HAM FINED $12000 FOR MULTIPLE VIOLATIONS

A ham has been fined $12,000 for violation of the Amateur Service Rules. We have this report:.

--

Its one of the largest fines ever assessed for ham radio rules violations and its been handed to Scott E. Kamm, the license holder of amateur radio station N0UGN. And it comes after the Federal Communications Commission finds Kamm apparently responsible for causing intentional interference, broadcasting music and failing to identify with his station by its FCC assigned call.

Kamm's story goes back to December 9, 2002. In response to complaints of continuing interference on 146 point 31 MHz, an agent of the Commission's Kansas City Field Office began monitoring. At approximately 7:00 P.M., the agent observed a very strong signal on the frequency. It was reportedly made up of music, sound effects and unmodulated carriers. No station identification was transmitted. More important. These transmissions were interfering with existing communications that were in progress between other amateur stations.

Using radio direction finding the agent determined the source of these interfering signal to be Kamm's residence in near-by Waterbury, Nebraska. The FCC says that Kamm has two addresses that they know of. One in Sioux City, Iowa and the other in Waterbury where they traced the interference as coming from.

The scenario repeated itself a day later on December 10th. This time the agent entered the premises and inspected Kamm's station. The agent found an amateur radio transmitter capable of operating on 146.31 MHz but Kamm stated that no transmissions were made from his station. That he used the radio to receive only. Kamm also asserted that no one else operated the station.

But the FCC is not buying that story. It says that the Amateur Service Rules state that no ham shall willfully or maliciously interfere with -- or cause interference to -- any other radio communication or signal.

Also amateur stations are prohibited from transmitting music using and that they must identify at the end of each communication or at least every 10 minutes.

And, based on the evidence before it, the FCC says that it finds that Scott E. Kamm did willfully and repeatedly violate the Amateur Service Rules by causing intentional interference, broadcasting music and failing to identify. He is being fined $7000 for the interference, $4000 for transmitting the music and $1000 for failing to identify.

In Blair Alper, KA9SEQ, reporting for the Amateur Radio Newsline.

--

Kamm was given the customary thirty days to pay up or file an appeal. (FCC)

(5 sec pause here)

**

ENFORCEMENT: UNLICENSED RADIO BROADCASTER SENTENCED TO 18 MONTHS PROBATION

The FCC has announced that Benjamin Leroy Carter has been sentenced to 18 months probation. This, following his conviction on seven counts of unlicensed radio operation.

The conviction and subsequent sentencing is the result of an investigation that began in February of 1999. The Commission's Tampa Florida Office says that it received complaints from residents and broadcasters in the Orlando, Florida area of interference to the reception of licensed radio broadcast stations. Carter, who also went by the name of Malik Copafeel Abdul, pled guilty to seven counts of unlicensed radio operation in November of 2002. He also agreed to forfeit all equipment used in connection with the station.

The FCC says that 4 months of the sentence will be served as home confinement. In addition, Carter will be required to perform 50 hours of community service. Its all in cyberspace at http://hraunfoss.fcc.gov/edocs_public/attachmatch/DOC-231068A1.doc (FCC, CGC Communicator)

**

RESCUE RADIO: NEW CLASS OF FIELD DAY STATION

Amateur Radio's premiere emergency preparedness operating event is changing. This with word that the annual ARRL Field Day will gain another entry class for 2003.

Called Class F, these will be Amateur Radio stations which are set up and operate from emergency operations centers, or EOC's. ARRL says that the change renews the emphasis of Field Day's 1933 origins as an emergency preparedness exercise as opposed to a routine contest. (ARRL)

**

RESCUE RADIO: A NEW CB SIDEBAND EMERGENCY CHANNEL

Doug Schwinn N0LAY, reports over the QRZ.com website that the Michiana Emergency Monitoring Group is promoting an iniative to have C-B channel 39 designated as an additional frequency to be used and monitored during emergencies. This in addition to the existing C-B channel 9.

The reason? Schwinn, who also holds the call KDZ0430 says that he joined in the effort because of the mountainous region of Colorado where he lives. He says that he would likely be heard using lower sideband on C-B Channel 39 than A-M on Channel 9 during an emergency situation. He also notes that a spokesperson for the group stated in an article in Popular Communications that this is part of an effort to restore and legitimize the Citizen Band Service. (N0LAY via Internet)

**

RESCUE RADIO: HAM RADIO ASSISTANCE IN COLUMBIA DEBRIS RECOVERY ENDS

Ham radio communications assistance in finding parts from the fallen space shuttle Columbia has wound down. According to several Internet reports, February 12th was the last day hams were to be called out to provide communications in the recovery effort.

During the height of the recovery, activities being conducted over the W5NAC repeater in Nacogdoches Texas could be monitored using Echolink's EDU_NET conference. Rick Hambly, W2GPS, says that there was a very active effort by RACES and SKYWARN to aid NASA and government agencies like the FBI with the identification, G-P-S location, cataloging and recovery of space shuttle Columbia components.

As previously reported, the Columbia was at 203,000 feet when it disintegrated plummeted back to Earth. All seven Astronauts on board were killed. Three of the 7 were licensed radio amateurs but no ham radio gear was carried on that ill-fated flight. (VHF Reflector, W2GPS, others)

**

REMEMBERING COLUMBIA: HAM CREATES ON-LINE MEMORIAL

A former Amateur Radio Newsline Young Ham of the Year ward recipient has created a lasting Internet tribute to the space shuttle Columbia.

The memorial website was created by Kevin Boudreaux, N5XMH, of Orlando Florida. Boudreaux, who grew up just outside New Orleans was the recipient of our 1993 "Young Ham of the Year Award" for his organizing Amateur Radio emergency communications following a devastating hurricane.

Today Boudreaux is a Manager with the Hilton Hotels and a professional website designer. He tells Amateur Radio Newsline that he was so personally touched by the Columbia tragedy that he created this memorial website to the shuttle and its crew.

The webpages he has created are filled with facts about the orbiter and its mission along with photos and short biographies of its STS-107 crew. Kevin also provides links to other Columbia memorial websites along with the complete statement of President George W. Bush when he sadly went on the air to let the world know that the Columbia was lost.

Kevin was only 14 when he went out to help his community in time of disaster. He was 15 when he received the "Young Ham of the Year Award" and his dedication has never stopped.

You can view his web tribute to the fallen Columbia and its crew at www.sscolumbiamemorial.com or www.columbia7memorial.com (ARNewsline™)

**

RADIO LAW: ALLEGED PAY TV INFO THIEF PLEADS NOT GUILTY

A 19-year-old University of Chicago student has pleaded not guuilty to federal charges of stealing plans for security systems used by satellite broadcaster Direc TV and distributing them freely on the Internet. Igor Serebryany is accused of stealing information related to Direc TV's latest access cards and then posting the priporotity information to websites dedicated to the hacking of the companys security systems

As previously reported, the theft allegedly took place while Serebryany was working at the Los Angeles office of a law firm that represents Direc TV. He was indicted by a federal grand jury last month on three felony counts of theft of trade secrets and faces a maximum sentence of 10 years in prison if convicted on all charges. (Published news reports)

CONVENTIONS AND HAMNFESTS: CHARLOTTE NC IN MARCH

March 8th and 9th are the dates of this years Charlotte North Carolina Hamfest and Computer Fair. The venue is the Charlotte Merchandise Mart on Independence Blvd. Doors open 8:30 a.m. both days with talk in on the 145.29 Mhz repeater. This years featured forum speaker is FCC chief rules enforcer Riley Hollingsworth, K4ZDH. More information is in cyberspace at www.w4bfb.org/Hamfest.html (Press release)

**
RESCUE RADIO: HAM RADIO IN TV DOCUMENTARY

Ham radio is part of a soon to be shown documentary produced for the Discovery Channel. Joe Moell, K0OV, has the details:

--
Members of the Hospital Disaster Support Communications System of Orange County, California have been included in tapeings for a new documentary series on the Discovery Channel. "Critical Rescue," a series of programs featuring rescue workers and those who support them, made its debut on February 6.

A team from New Dominion Pictures spent a half-day with HDSCS last August. They interviewed founder and leader April Moell, WA6OPS, and taped reenactments of ham communications that took place on April 23, 2002. On that day, hams were awaiting their assignments for one of the four large-scale disaster drills in Orange County each year. At 8:10 AM, a 6000-ton mile-long freight train struck a standing Metrolink double-decker commuter train at a crossing in Placentia, causing three deaths and over 200 injuries. The drill was immediately cancelled, and as rescuers converged on the train crash scene, area hospitals braced for the wounded passengers.

As Net Control, WA6OPS quickly deployed hams to the 14 hospitals most likely to receive victims. There they handled countless messages, verifying victim dispatch and patient counts, providing information for inquiring victim families, and communicating with hams supporting the Red Cross. Within some hospitals, HDSCS provided direct links to handle messages between triage areas, Emergency Departments, and Command Posts.

Additional HDSCS operators participating in the reenactments were Sam Creason K6EW, Cheryl Simpson KD6MWZ, Ralph Swanson WB6JBI, and David Mofford W7KTS. It is not known how much of the HDSCS footage will appear in the edited program.

>From southern California, this is Joe Moell K-zero-Oscar-Victor for Amateur Radio Newsline.

--

Again, "Fateful Journey" will air 8 and 11 PM Eastern and Pacific times on Thursday February 20th, and again at 2 PM Eastern and Pacific on Saturday February 22nd. (ARNewsline™, K0OV)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

ARRL PACIFIC DIVISION DIRECTOR JIM MAXWELL, W6CF, SK

ARRL Pacific Division Director Jim Maxwell, W6CF, has died. The 69 year old Maxewll passed away on Thursday February 6th at his home in Redwood Estates, California. The cause of his death has not been announced.

Maxwell, who became a Director in January 2000, joined the ARRL Board in 1994 after being elected Pacific Division Vice Director. He also served as an ARRL Emergency Coordinator from October 1991 to March 1999.

An avid DXer, Jim Maxwell belonged to mumerous DX clubs, contest clubs and organizations. This included the famed Northern California Contest Club. He also served as a member of the ARRL DX Advisory Committee from April 1988 through 1994 and was an accredited Volunteer Examiner.

Professionally, Maxwell held doctoral degrees in aeronautical engineering and biomechanics. He retired from the Lockheed Missiles and Space Corporation as a technical consultant in 1992 and from Scitor Corporation in 1998.

Pacific Division Vice Director Bob Vallio, W6RGG, takes over immediately as Director. ARRL President Jim Haynie, W5JBP, will appoint a new Vice Director in the coming days. Maxwell previously held the call W6CUF. (ARRL)

**

HAM RADIO IN SPACE: ISS PACKET RETURN DELAYED FURTHER

When will the packet system on the International space station come back on? Nobody is quite sure but ARISS International Chairman Frank Bauer, KA3HDO says that his group has been working with its colleagues in NASA and Russia's Energia to get it operational again. Unfortunately, so far they have only been successful in getting it turned on for about one orbit.

Bauer says that several factors are impeding the packet startup. First, the progress vehicle docked with ISS and the crew is currently unpacking and stowing about a ton of supplies and equipment. Also, the crew is working with their mission control counterparts on schedule changes that have occurred due to the Columbia accident.

Given these items its apparent that this crew is not as engaged in ham radio the way the last ISS Expedition crew was. And because of this the packet system may be off for a bit longer. (ANS)

**

CONTESTING: ARRL SAYS BEACONET IS OK

ARRL Contest Branch Manager Dan Henderson, N1ND, says that BEACONet does not violate any contesting rules. According to Henderson, after additional review the ARRL has come to believe that BEACONet is similar to an automated CQ'ing system. That it only facilitates the

solicitation of contacts and as such it seems to comply with the letter and spirit of the contest rules. (VHF Reflector)

**

DX

In DX we take to the sky this week. This with word that Wayne Estes, W9AE, plans to operate the Amsat Oscar 40 satellite as FG slash W9AE from the island of Guadeloupe. The tentative plan is for Wayne to start operation at 2300 U-T-C on February 21, 22, 25, and 26 for windows to the Americas and the Pacific. Also listen for him on Sunday February 23 from 1500 to 2000 UTC for a satellite window to Europe and central Asia. Exact operating times will depend on the RUDAK schedule and Wayne's vacation activities. If you work him, QSL to Wayne Estes, 18673 W. Meadow Lane, Mundelein IL 60060, U.S.A. (ANS)

And Hagal International reports that Israeli amateur operator Dov Gavish, 4Z4DX is the first ham in the world to completely confirm DXCC using electronic QSL's. Although still not recognised by the DXCC, electronic QSL'ing is gaining ground in the DX community. (Hagal International)

Also, the ARRL's new Logbook of the World secure electronic contact-confirmation system took a major leap toward public release in January. This, with several weeks of limited tesrting of the concept. (ARRL)

**

THAT FINAL ITEM: TURN AROUND IS FAIR PLAY

And finally this week, we have all heard the expression "turn around is fair play. And one person who has just found that out is former computer hacker turned on-line security expert Kevin Mitnick, N6NHG. That's because Mitnick's new company website has been -- well -- hacked. Amateur Radio Newsline's Bruce Tennant, K6PZW, has the rest of the story:

--

The ham who holds the honor of being the world's best-known computer hacker suffered the indignity of having hackers break into his new security consulting company's Web site -- twice. But news reports say that Kevin Mitnick, N6NHG, simply shrugged off the incidents as amusing and not serious enough for him to call authorities to investigate.

As I said, two electronic break-in's have taken place. The first was on January 30th. In that one a hacker calling himself "BugBear" added a page to Mitnick's corporate website that read "Welcome back to freedom, Mr. Kevin." This is probably a reference to Mitnick's probation which ended ten days earlier on January 20th. During his probation Mitnick was barred from accessing the Internet and this hack may have been more of a welcome home -- in this case -- home being the World Wide Web.

The latest incident took place over the weekend of February 8th and 9th and was more of an on-line job application than a hack. In this case a hacker in Texas broke in and asked Mitnick to hire him as the company's security officer.

Mitnick says that the hackers apparently exploited separate flaws in Microsoft's Internet server software. He says that the person responsible for the company's Web site failed to install patches available from Microsoft.

In neither instance did hackers vandalize the Website. One said in e-mail that he didn't do damage out of respect for Mitnick.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

Mitnick's new organization is called Defensive Thinking and is located in Los Angeles. A company spokesman said that no customer information was released nor was there any danger of information being compromised. (Published news stories)

183. Listener's Initiative for Radio Austria International

Newsgroup: rec.radio.broadcasting
Date: 2003-02-16 22:40:25 UTC
From: Willi Passmann <dj6jz@compuserve.de>
Message-ID: <b2p40p$6g5$1@xuxa.iecc.com>
Source record: 8808

The Austrian government ceased financing "Radio Austria International" (ROI) at the end of 2001 and left it up to the discretion of the Austrian public broadcaster, the ORF, to provide an international service at its own expense. The ORF does not regard such a service as part of its core obligations and points to its own financial constraints.

European listeners' associations are making an appeal to the ORF's executive body, the "Stiftungsrat" or board of trustees, to ensure the continuation of ROI. At the same time the members of the Stiftungsrat were asked to make their decision public.

Letters were sent to every member of the board; you can read the text as well as the result of the poll on www.radio-portal.org (links have been established on the English and German start pages).

Answers are expected to arrive not before next week, though.

Regards,

Willi Passmann, DJ6JZ

Hi,
I'm looking any jocks who may have worked at KEYN-AM/FM and KLEO-AM between 1967 and 1968. I'm writing my Master's Thesis and I would be interested in talking to about Top 40 radio in Wichita, KS at that time.
Thanks.
Marla

185. Need Airchecks of Tri-cities, Washington, Stations & Pittsburgh, PA

Newsgroup: rec.radio.broadcasting

From: tomlacko@yahoo.com
Message-ID: <b2p40r$6h1$1@xuxa.iecc.com>
Source record: 8812

Hi,

If you have any airchecks from the Tri-cities, Washington, from the 60s and 70s, please email me. I'd love to know what you have. Any stations and formats would be fine: KALE, KORD, KOTY, KONA, KIOK, etc. Also would like airchecks of Pittsburgh, PA., from the 70s too.

If you've got 'em, drop me a line.

Tom Lacko, tomlacko@yahoo.com

We signed on a new Docket 80/90 station a few years ago and we stunted by
playing Rolf Harris' "Tie Me Kangaroo Down Sport"
24 hours a day for 9 consecutive days.
We only intended to do it for a couple of days, but something happened to
cause us to keep stunting (I don't even remember what it was).
Needless to say even thinking about that song makes me want to puke.
```

KKBB is now "The Groove" old school oldies.

[Moderator's Note: Woo, Jammin' Oldies, huh? I liked the format, but I understand it wasn't very popular in most markets. Was dropped here in favor of an active-rock(ish) format. Is it like Jammin' Oldies or am I reading too much into the station's name?]

So far it seems to be very similar, although with a somewhat wider playlist. The target is Hispanic adults 25-54. (The Bakersfield market is 35.5% Hispanic). This music does very well with older Hispanics. IMHO what killed "Jammin' Oldies" was the extremely narrow playlist which burned out rather quickly. Here "Jammin' Oldies" was also on a rimshot signal that did not have good coverage in the heavily Hispanic parts of town. We'll see what happens this time around. KKBB so far is playing from the 60's to the 80's, although I must confess I haven't listened much. Ratings-wise it couldn't do much worse than it was doing as a classic rock satellite repeater.

I think it's safe to say that it's "Jammin' Oldies" under a slightly
different name. 100000watts.com has the format as "rhythmic oldies,"
which is the generic term for "Jammin' Oldies" (I preferred "urban
oldies" myself).

New KKBB web site is still under construction, but they're probably
running jockless anyway.

I am looking for a walkman size (small/portable) AM/FM/TV digital tuner, with memory that has good sensitivity and selectivity.

Most importantly it needs a sleep timer or auto shut-off feature (some used to turn off after an hour when no buttons were pushed).

Can somone please share their experiences with something like this? I have checked on-line (bestbuy and circuit city) and Sony makes some nice small radio tuners but alas with no auto shut off timers.

Thanks!

Just the name of the LA4 gives it away: it is a leveling amplifier, not an instantaneous peak limiter.

I think AIWA has a few with sleep timers. Or at least they had. While
the quality of the tuner is good, they leave off one important thing:

A local/DX switch on FM...to attenuate strong signals if you're in an area
where there's lots of overload (such as around the Empire State Building
in New York).

That's pretty ambitious. 300' is more like it. Back in the 80's,
I had a Part 15 setup. I think I could be heard maybe two or three
houses down the street.

> What is the max hight a antenna be for part 15 am and what
> type antenna do most use.

What ever it is, the max *length* of the antenna + feedline is
10 feet (3 meters).

> Where can I get info a seting up a part 15
> am station and what is the best place to buy a part 15 am equipment.

Do a google search on "part 15" am radio (mind the quotes), you'll
find lots of stuff.

Here's a couple to get you started:

Right before the fall book in '99 we changed the format of our "Lite Rock" to "Jammin' Hits" in Biloxi/Gulfport Ms. Our launch promotion was fairly unique. We purchased about 5 yodeling CD's and produced some very professional ID's and Liners for

"The All New Yodel 96.7 FM" "You spoke, we listened... You wanted it, now here it is ALL YODEL, ALL THE TIME" "Little old lady whoo? Yodel 96.7" We did this for 72 straight hours from 5pm Friday til 5pm Monday (as first diaries were still in the mail) with the liners changing on Monday morning to "The New Station you've all been waiting for will be here this afternoon at 5" Did a one hour kickoff show with all of the talent and the top 15 "Jammin' Hits" then had our official launch on Tuesday morning with my show.

The funniest things about this format change/launch were by the time we suffered thru the weekend, we knew the yodels by heart, and the conversation I had with "The Yodeling Cowboy" trying to convince him to overnight his 3 CD collection to us. He actually couldn't believe that any radio station would be in dire need of his CD's and questioned me repeatedly about why we needed his stuff...

well in a BIG CITY (ny, la, chicago, etc.) forget it there are so many big stations that if you try 100mw you will be drowned out, but in suburban and rural settings you will get excellent range with little effort.
the guy in Vacaville,Ca., uses a optimized antenna system with loading/matching networks (built in to the hamiltons, lpb, etc.) and he set 5 of them up in a phased array 1/8 wave apart (clustering) and on a car radio he gets city grade signal out to 3 mi. in some directions. and a local AM picks up their signal and for 2 hours a week rebroadcasts their station. this is the exception my experience has been about a mile range on a car radio about a half mile on a table top radio. there are about 100-150 P15AM'ers FM'ers across the country and they are thriving passing FCC inspections, etc. so with a little engineering you can have a good sounding AM or FM station with decent range.

Do not listen to these morons. I have personally spoke with P15AM'ers who have been investaged by the FCC and found to be legal. these stations have a range of .5-3mi. this comes direct from FCC Feild offices, Whip and mast installs are LEGAL (especially if your states building codes require grounding), Loading coils are LEGAL they count 10ft from where wire exits box to tip of antenna(Feild agents have specifically said it does not matter what it is electrically) as far as whip and mast again one FCC agent told an aquaintance that he could not put his tx up unless it was grounded. given this it is possible to get 20uV/m @ 1 mi. or more. one ingenius fellow used 5 hamiltons in and array pattern and linked/phased together(and yes FCC looked at it and found it to be legal) and got 3mi. with a city grade signal. as for you HUFFY and BIASCOMMS you know what you are talking about as far as theory, etc., but you are too set on pirate activity to help anyone who want's to do a legal indevor(i don't know why), but why don't you try helping these people instead of discouraging them. Isn't that what these groups are for? if you need help go to the following http://www.communityradiousa.com from there you will find all the info you could ever crave, want, need, etc.

Since you never know from day to day who owns the rights to a song
you'd best assume there will be licensing fees. It's the radio
station's responsibility to pay the fee.

The cost of the time for the show should include the cost of the fees.
The brokered show should provide the station (if it's Talk or pay for
play) with the list of songs played so the station can report it if
they don't have a blanket license.

Rich

Could you point us to the case numbers so we can look them up? The FCC
does everything in writing, you know. I think I would believe FCC
documentation before I would accept the word of folks who are desperate
to justify and legitimize their activities. I'm sure those who might be
at risk of FCC action might wish to hear from a more credible source as
well.

Third-party "I have a friend who personally..." has led to a lot of
urban legend.

Since you never know from day to day who owns the rights to a song
you'd best assume there will be licensing fees. It's the radio
station's responsibility to pay the fee.

The cost of the time for the show should include the cost of the fees.
The brokered show should provide the station (if it's Talk or pay for
play) with the list of songs played so the station can report it if
they don't have a blanket license.

208. EAS Unit Recommendations

Newsgroup: rec.radio.broadcasting
Date: 2003-02-21 22:01:34 UTC
From: theodric@mit.edu
Message-ID: <b367ju$d5a$1@xuxa.iecc.com>

Hi folks,

Any recommendations on a good EAS unit for an FM radio station?

We bought a TFT EAS911 unit many years ago when EAS was first implemented. The damn thing has never worked right. TFT has provided some firware updates and has suggested some modifications (cutting traces on the motherboard, replacing capacitors, etc.), but the thing still occasionally loses its memory and it more often than not fails to automatically forward monthly tests and actual emergency alerts.

So if anyone has installed an EAS unit that meets the FCC's requirements for a National Non-Participating (NNP) FM station, and which has worked fairly well over the years, please let me know.

Thanks in advance,

Ted Young
WMBR 88.1 FM at MIT

209. Re: Anybody had 1mile or more range with part 15 am setup

Newsgroup: rec.radio.broadcasting

A number of years ago, I was involved in a business that provided part 15 AM devices for businesses. One installation was located on top of a 5 story racetrack and casino building in Altoona, Iowa on what was probably a metal roof and the unit was well grounded. It was a commercial 100mw unit with a 10 ft whip and the audio remoted from inside the building. It was operated at 1610 before the expanded band had any occupants.

It covered a one to two mile radius very well and was actually heard (very noisy but in the background) about 15 miles away in West Des Moines. It's amazing what a well elevated, well grounded installation will do on a clear frequency. The problem is, there are now no clear frequencies.

At the same location, we also had an identical unit on 1560Khz (to cover people whose radios didn't go up to 1620). It barely covered the parking lot. Again, the key is a clear frequency.

>if anyone has installed an EAS unit that meets the FCC's requirements for a National Non-Participating (NNP) FM station, and which has worked fairly well over the years, please let me know.<

At one end of the EAS equipment spectrum, you have the Sage ENDEC, which is the priciest one on the market, but which has everything you need (except monitor radios) built into it. You don't need anything else for it to do its job. It's sold exclusively by Harris. The only issue I've ever had with one is its wall-wart power supply, which tends to burn up prematurely because its components weren't properly chosen. Replacing it with a heftier one cures the problem.

At the other end, you have the Holly-Anne...a bare-bones EAS box which has no front-panel controls at all, and which requires a PC to program. It's cheap, but a PIA to program and use.

In between are the Burk and Gorman-Redlich boxes. I have no experience with the Burk, but the G-R is an OK box...a bit of a pain to use, but not nearly as bad as the Holly-Anne. Some of the G-R's functions are only programmable with a PC, but the RWT and RMT can be done from its front panel.

JMO, of course.

Yes, by all means, go to that site, if you want to burst out into hysterical laughter. Never in my life have I seen such a collection of gossip, quarter-truths, urban legends and outright lies perpetrated in the name of "community radio." The FCC petition for a new broadcast band was particularly amusing...a so-called petition not including a single word of justification for what's proposed, but instead containing a political screed against conditions beyond the ability of the FCC to remedy.

But, thanks....I needed something to laugh about.

If it's not administered by any of the groups who do that sort of thing, you
have to work directly with the copyright holder, get their permission and
negotiate a fee. This would be very rare though.

Man, my sentiments exactly. I put our EAS-911 units on their own UPS to try to avoid the obnoxious memory lapses that have afflicted all three boxes since new.

I NEVER know when some simple chore is going to be botched by lost settings. It always seems to be the one-button forwarding and one-button RWT functions, rather than wholesale memory loss. That fact can't be explained by blaming capacitor/circuit trace/voltage regulation issues.

Now we're under more pressure to put wildly ill-advised Amber alerts on the air with the same technology and we get the same indefensible results. Ugh.

Amateur Radio Newsline™ Report 1332 – February 21, 2003

Amateur Radio Newsline report number 1332 with a release date of Friday, February 21 2003 to follow in 5-4-3-2-1.

The following is a Q-S-T. Snow causes outages in the East and ham radio comes to the reascue. Hear the details on Amateur Radio Newsline™ report number 1332 coming your way right now.

(Billboard Cart Here)

**

RESCUE RADIO: THE NORTH-EASTER OF 2003

Snow plowing crews struggled to clear roads and airport runways on Tuesday February 18th. This after one of the worst storms in decades buried parts of the United States eastern states in 2 to 4 feet of snow. And in some areas ham radio was called out as we hear in this report:

--
Snowdrifts were piled high from the Ohio Valley to New England, mudslides and floods wreaked havoc in the southern Appalachians, and layers of ice snapped trees and power lines. At least 47 deaths had been blamed on the storm since it charged out of the mid-West Plains states over the previous weekend. Schools were closed from West Virginia to Connecticut and more than 250,000 homes and businesses lost power and telephone service. Enter ham radio.

During the height of the storm on the 17th, two communications emergencies were declared by the Federal Communications Commission in conjunction with the ARRL. The first was in Virginia to protect amateur emergency communications on 3.947 and 7.243 Mhz -- plus or minus 3 Khz. Also included were 145.430 MHz and 146.880 MHz repeaters in Richmond, the 147.360 MHz machine near Chesterfield and the 146.760 Mhz repeater serving Williamsburg at times when each was handling emergency traffic. It was only in effect for a few hours and terminated at 19:00 hours UTC the same day.

The second communications emergency was declared for Kentucky. Former ARRL President George Wilson, W4OYI, lives in the city of Owensboro. He says that his area recieved about 2 inches of glare ice and quite a bit of sleet on top of it.

But the big problem was in Fayetteville near the city of Lexington. Again the problem was mainly ice related and radio amateurs were ordered to keep from using repeaters on 146.760 Mhz, 147.165 and 444.125, MHz unless they were specifically taking part in the handling of emergency traffic

Further to the North, Bob Josuwait, WA3PZO tells ARNewsline™ that Montgomery County in suburban Philadelphia Pennsylvania had about 20 inches of snow. Montgomery County RACES was activated at 1800 on Sunday, February 16 th.

Bob Lees, W3ZQN, is Montgomery County RACES Radio Officer. He reports that members with four wheel drive vehicles were told to help, as possible, by providing transportation for essential hospital and nursing home workers within the county.

The Radio Officer sent an alert via the pagers carried by over 50 members, convened a net on the county two meter repeater and began making phone calls to determine specific needs.
RACES responded or attempted to respond to 17 different requests for transportation services until about 10 P.M. local on February 17th. A total of 21 people were transported by six different drivers in their personal vehicles. Each vehicle was in constant contact with net control by radio as they traveled.

Lees says that six hams acted as net control stations from their homes. Another 14 who did not have four wheel drive vehicles checked into a net called at noon on February 17th. Each operator indicated that they were monitoring and could possibly help in other jobs if requested. In all it was a good job done by RACES and ARES in the face of one of the worst North-Easter’s of the past hundred years.

For the Amateur Radio Newsline, I’m Blair Alper, KA9SEQ.
--

For the region as a whole, it was the worst snowstorm since the blizzard of 1996. In that one at least 80 deaths were blamed on the weather.
(ARNewsline™, ARRL, WA3PZO, W4OYI, VHF Reflector, Repeater Owners Remailer, published news reports.)

**

INTRUDERS: DRUG RUNNERS ALONG THE VK COASTLINE

What appear to be illegal drug runners have taken to the ham bands along the Australian coastline. Q-News Graham Kemp, VK4BB and Chris Wright, VK2UW, have the latest details:

--

“14.044 daily at 08:30 U-S-B are "Big Voice" -- must be thee HQ Stn.. and "Low Voice" Supply Boat ?? On the 23rd January "Big Voice" was joined by another Big Voice -- signal 59+ -- also in the same direction...

The N.T.News carried an article about the "roadside drug distribution points in Western Australia. Maybe these two 'Big Voices' are running the distribution points and the 'smaller Voice' keeps up the supply to the Distributors ??

There was a video report on Darwin TV picturing an 'abandoned' Chinese Fishing Boat along the West Aust. Coast tied up to the Shore. No Crew and No Cargo. And there are some Indonesian Voices 'Hopping' in on the Frequency when it is not in use. Maybe they have a part to play in the business?

If my bearing of 250 degrees and VK6XW bearing of 360 degrees were used, they would cross in the vicinity of Broome.
--

According to Q-News, Australian hams are being encouraged to report anything they hear to the nations Intruder Watch Coordinator. (Q-News)

**

HAM RADIO IN SPACE: JAPAN ARISS CONTACT TO THE ISS

Ham radio contacts with the International Space Station continue. One of the latest took place on Tuesday February 18th when 8N3HES at the Hirano Elementary School in Kobe Japan succeeded in connecting its students with the ISS crew using Amateur Radio curcuits. One of the first questions answered had to do with ecology. How do you dump your garbage in space?

--
CONTACT AUDIO
--

That recording was made by JN1GKZ and you can only hear the I-S-S side of the contact. And some of the questions brought more information than many needed to know like when one student asked: “How do you take a bath in space?

--
CONTACT AUDIO HERE
--

This is the 3rd ARISS School contact with a school in Japan. To see a list of questions and herar all of the answers you only need to take your web browser over to the JN1GKZ website. You will find it at:
http://www.qsl.net/jn1gkz/sound/ariss/8n3hes.htm (ARNewsline™ with sound from JN1GKZ))

ENFORCEMENT: PIRATES CANNOT EVER HOLD RADIO LICENSES

Pirate radio operators cannot ever get licenses to operate a legitimate radio station. So says a court of appeals. Amateur Radio Newsline’s Ken Locke, N8PJN, has more:

--

A United States appeals court has upheld as constitutional a law that bans a pirate broadcaster from ever obtaining a license for a low-power FM radio

station. In fact, it bars a current or former pirate broadcaster from even being involved with a station.

In its action, the full court reversed a ruling last year by a three-judge panel of a court that had struck the law down. By a 7 to 1 vote it ruled the law and the government regulations implementing it do not violate free speech rights under the First Amendment.

Back in 2001 Congress mandated that the FCC adopt rules to ban anyone who had been a pirate broadcaster or currently was broadcasting illegally from obtaining a license for a new low-power station. The appeals court appears to have taken this one step further in banning any affiliation bu current or former pirates with a legitimate FCC licensed broadcast operation.

For the Amateur Radio Newsline, I'm Ken Locke, N8PJN, reporting.

--

Thanks Ken. (FCC)

**

ENFORCEMENT: NO TWO METER SETS FOR HUNTING SEASON

The FCC has written to the manager of a Radio Shack store to warn against selling ham gear to unlicensed persons.

The letter went to Dennis Wilfong who manages the Radio Shack at the Valley point Shopping Center in Elkins West Virginia. In it the FCC says that it has information indicating that numerous individuals are purchasing Amateur radio Service Two-Meter radio units from that store for use during hunting season and the purchasers are using them without the required license.

But thats not all. The FCC says that those purchasing the radios are either not being told that the units require a license, or are being misinformed as to the licensing requirements.

The FCC tells Wilfong that he should advise purchasers of Amateur Radio transmitting equipment that unlicensed radio operation is a violation of Section 301 of the Communications Act. That using the transceivers without first obtaining an Amateur Service license may result in a monetary fine of $7,500 to $10,000. (FCC)

**

ENFORCEMENT: FLORIDA UPGRADE SET ASIDE

John S. Gregory, W3ATE, of Lake Worth Florida has had his General class upgrade set aside. This, based on complaints about the operation of his station on frequencies not authorized by his Technician class license.

According to the FCC, at various times in 2002 Gregory apparently checked into a net on 14.300 Mhz while still a Technician class license holder. He was issued two warning letters but the FCC says that both were returned as unclaimed. (FCC, W5YI Report)

**

ENFORCEMENT: FCC ISSUES A RASH OF FINES

Hams are not the only ones hearing from the FCC. The Commission is continuing to flex its enforcement muscle by issuing a number of monetary forfeitures. Here are some recent examples courtesy of the CGC Communicator:

How about $2,500 to a telephone company for failing to exhibit prescribed tower painting. Or $4,000 to a CATV operator for failing to retransmit the EAS required monthly test.

But those are small in compariason to a $10,000 fine issued to a communications operator for failing to exhibit prescribed obstruction lighting on its antenna structure. Another $10,000 was issued to to an FM pirate while a $15,000 fine was issued to to an AM radio station for failing to maintain operational E-A-S equipment, and for failing to enclose the station's antenna tower within an effective locked fence. The whole story is in cyberspacve at http://www.fcc.gov/Daily_Releases/Daily_Digest/2003/dd030204.ht (CGC Communicator)

**

RADIO POLITICS: ARRL TRYING AGAIN WITH SPECTRUM PROTECTION ACT

If at first you don’t succeed, try try again may be an old addage, but it applies in the case of te 2003 Amateur Radio Spectrum Protection Act. This is a bill that has been introduced in the US House of Representatives by Michael Bilirakis of Florida.

According to the ARRL. Bilirakis filed the latest version of the bill, HR 713, on February 12th. It has been referred to the House Committee on Energy and Commerce. Like its predecessor, HR 713 is aimed at ensuring the availability of spectrum to Amateur Radio operators. It would protect existing Amateur Radio spectrum against reallocations to or sharing with other services unless the FCC provides equivalent replacement spectrum elsewhere.

The previous version of the Spectrum Protection Act attracted more than 50 cosponsors. An effort will be made to encourage additional House members to sign onto HR 713 as cosponsors. Additional details are on the web at www.arrl.org. (ARRL)

**

RADIO LAW: HAM PETITIONS TO KEEP EQUIPMENT ASALES DATE ON FILE

Dale Reich, K8AD, of Seville Ohio, has petitioned the FCC to require sellers of two-way voice or data equipment to keep on file a buyer's name, address, telephone number and any future information. This, when selling a radio that required licensing under the current FCC rules.

Accordiong to an ARRL bulletin, the information collected would remain private, available only to the FCC or law enforcement. Reich said in his petition that any retail vendor would be able to ask local police for an investigation if the retailer suspected the radios were not going to be used in compliance with the

law.

Included in the petition is a requirement for "ownership and license tagging" for gear operating under Parts 5, 15, 18, 74, 80, 90, 95 and 97. In his petition, Reich said such tagging used to be an FCC requirement and that his proposed change was a needed tool for local law enforcement.

The full text of Reich's petitions is available on the FCC Web site. Search for petition number RM-1064. Comments are due no later than February 28th. (K8AD, ARRL Letter)

HAM RADIO ENTERTAINMENT: WRTC 2002 VIDEO NOW AVAILABLE IN THE USA

The World Radiosport Team Championship 2002 video had its United States premiere on Wednesday, February 5th. This, before a standing-room-only crowd in Washington state hosted by the Western Washington DX Club.

With photography by James Brooks, 9V1YC, and Dave Bell, W6AQ, the video covers WRTC 2002 from the perspective of a professional sporting event. The show begins with the arrival of competitors from more than 30 countries. It then takes the viewer behind the scenes for the various pre-competition activities and into the actual competition.

The video is available on VHS tape and DVD with extra material on the DVD. You can place your order on-line at http://home1.pacific.net.sg/~jamesb (WRTC)

**

CONVENTIONS AND CONFERENCES: SEVHFS IN HUNTSVILLE IN APRIL

If you have been trying to register on-line for the upcoming Southeastern VHF Society conference and getting a reply of no such website, try again. It will work the way its supposed to.

The problem was caused by an Internet Service Provider outage at the most inoportune time. The repair: Everything was moved to different server but that took a few days to accomplish. And now that its all back up and collecting bits and bytes in cyberspace, you will want to visit www.sevhfs.org for the latest conference update. This includes word that Steve Kostro, N2CEI of Down East Microwave Incorporated will be hosdting a surface mount soldering class on the opening Friday morning of the gathering.

The when and the where? This is the 7th Annual Southeastern VHF Conference. It is slated for April 25th and 26th at the Huntsville Marriott in Huntsville, Alabama. For further information and to register, visit that now up and running website at www.sevhfs.org. (SEVHFS)

**

BREAK 2

This is ham radio news for today’s radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our

RESCUE RADIO: THIS IS HDSCS

Last week Amateur Radio Newsline’s Joe Moell, K0OV told you that members of the Hospital Disaster Support Communications System of Orange County, California had been included in a new documentary series on the Discovery Channel. The show is called "Critical Rescue" and it aired on Thursday February 20th and on Saturday February 22nd. But what is the the Hospital Disaster Support Communications System or HDSCS and how does it work? Back with the answers is Joe Moell, K0OV:

--

HDSCS is a specialty group of ARES. It was formed in 1979 with the specific mission of providing backup communications that are critical to patient care. Since then, HDSCS has responded in 75 communications emergencies, ranging from single-hospital telephone system failures to area-wide disasters.

For its service, HDSCS has received awards and commendations from many hospitals and agencies, including FEMA. The most recent is the National Certificate of Merit from ARRL, awarded at the Board of Directors meeting in January 2003.

>From southern California, this is Joe Moell K-zero-Oscar-Victor for Amateur Radio Newsline.

--

For more about the Hospital Disaster Support Communications System of Orange County, California and information about how hams can best support hospitals, point your Web browser to www.hdscs.org. (ARNewsline™)

EMERGING TECHNOLOGY: RC-110 REPEATER CONTROLLER GOES OPEN SOURCE

How would you like to be able to customize a repeater controller your way? Well, according to Ken Arck, AH6LE, There has been considerable interest from folks wanting to customize their RC-110 repeater controllers. So Arck, who is both president and CTO of Arcom Communications says that he has decided to make the source code available to any ham who wishes to take a stab at 'hacking' it for their own use.

Writing to the Repeater Owners Reflector, Arck says that as far as he knows, no other repeater controller offers this open source archecture. Of course there are certain conditions, but they're pretty straightforward.

If you are interested in getting the source code, Arck says that you simply need to join RC-110 mail list. To do this send an e-mail to

rc110-subscribe@yahoogroups.com. The source is available in the files section of the list. More information is at Ken’s website – www.ah6le.net (Repeter Owners Remailer)

**

INTERNATIONAL – UK: REPEATER STOLEN

A repeater in the United Kingdom is off the air due to theft. According to the RSGB, the GB3NC two meter repeater and its site companion the GB3MCB 1296 MHz beacon have not been heard since someone made off with the equipment. Both were co-located in Cornwall and the RSGB says that its not known if either will ever come back on the air. (RSGB)

**

INTERNATIONAL: YUGOSLAVIA: THE NEW NATION OF SERBIA-MONTENEGRO

Yugoslavia has become Serbia-Montenegro. This, after Yugoslavia's parliament voted to formally abolish that nation and replace it with a new country called Serbia-Montenegro.

According to the ARRL Letter, the new arrangement will have little immediate impact on Amateur Radio. For D-X-C-C purposes, Serbia and Montenegro will be considered a single entity, at least for the time being. Also, amateurs there are expected to continue using Y-U and Y-T prefixes. (ARRL)

**

CONTESTING:: UT5UDX ON THE MOVE

Ukrainian international football player Sergei Rebrov, UT5UDX, who moved to England in a multi-million-dollar deal in 2000, has moved again. This time to Turkish side Fenerbahçe.

Word is that Rebrov has signed an 18-month loan deal with the Turkish club on January 28th. The Turkish club now has the right to buy him at the end of the loan period.

Rebrov is a High Frequency contest operator. He and has been very active as M0SDX from his home in the U-K and from other locations in the British Isles over the last two years. He is reportedly now in the process of obtaining a Turkish callsign. (RSGB)

**

DX

In D-X, GB2RS says that a group of Swedish amateurs will be active as JW slash SM0BSO, JW slash SM0LQB and JW slash SM1TDE from Svalbard through the 23rd of March. Activity will be on 160 through 6 meters on CW, SSB, RTTY and other digital modes. Q-S-L this one as directed on the air. (GB2RS)

And F5PAC is returning to Panama from the 23rd of February until the 24th of March. He will also operate from several Islands on the Air groups including

from the 25th to 27th of February. You can fopllow his exploits on the web at www.qsl.net/f5pac (Via e-mail)

**

THAT FINAL ITEM: EXTENDING MORE THAN A WELCOME

And finally this week, the story of a ham radio dream thats about to come true. Its also the story of what Amateur Radio is all about. Bruce Tennant, K6PZW, has the details:

--
Audio story only. Hear it at http://www.arnewsline.org
--

And after that, what else is there to say? (K6PZW)

Since I've never stuck my head into an operating microwave oven I'm
not sure what that heat might feel like. It's such a shame we've lost
Rod Serling and that Art Bell has retired from radio. Both would find
this stuff great fodder for their shows. I think Art fills in when
George Noory is on vacation. You might try and catch him. Only Art has
the talent to handle this stuff and do it credit.

The next time one of our TV stations has a Twilight Zone marathon I'll
watch, as I usually do. I'm pretty sure he's done an episode that
sounds much like this. We might find important clues there.

In the meantime, an inexpensive way to shield yourself from these
microwaves is a metal (not plastic) collendar placed on your head. If
you still find the heat getting through, I'd recommend a double wrap
of Reynolds Wrap to reinforce the shield. Make sure the little feet on
the collendar stick out through the Reynolds Wrap to act as a sort of
lightning rods. That's very important.

>I advise all people believing in
>aliens or people talking with aliens to start a war of defiance of the

Does it have to be now? I'd much rather wait until we've concluded our wars with Iraq, North Korea, Pakistan, Al Queida, New Jersey, the Duchy of Grand Fenwick and France before we start another one with "reality operators" we can't identify, though I believe I had a warm spell in my head that told me they're somewhere in Tonga trying to buy satellite parking space. George W. might be able to spare a tank or two just to be prepared.

>In reality, if aliens ultimately did visit Earth, they would need food and
>resources and parts to fix their ships and everyone would know of the
>glorious moment in time when they came

Not true. If Gaffo and Tom are correct, the 12 evil controllers of the media would have prevented the information from getting out so they could run a few extra commercials and play music mixes neither of them like. The only unadulturated sources of news are the LPFM operators who can actually come up with the $800 a month to run their stations. Doesn't look good.

I'd comment on the rest of your "War and Peace" length post but I have to get back to helping control the media from my secret "corporate radio" command post. Since we run 24/7 tjhere's no rest for the weary. I consult all 12 and most of the other companies that own stations and have to make sure they don't stray and, accidentally, do good.

Mr. Shampoo, I have a friend named Daly Conditioner who might, for a price, do some investigative work. It's a shame Alex Dreier died some years ago. He'd be a reporter who would take on this story like static cling. If the signals havent already been named I vote for "Permanent Waves" and I want credit. I know that Hertz, but fair is fair.

In other words, it is about kids playing with toys. It is a shame that these folks cannot channel their attention and efforts to REAL community radio...the kind that serves a community with new and different programming provided by a panoply of programmers, artists, and musicians.

You don't know how frustrating it is for a struggling community station that has been serving its community for over thirty years to search for volunteers and talent to contribute to a really worthwhile effort, while in the meantime, there is no end of little wannabees who cannot see any farther than playing with toy stations in their bedrooms.

Where are all these people when we're looking for help?

Good morning!

This weekend I've been ironing out some technical issues regarding crossposting into other groups on posts to rec.radio.broadcasting.

You should no longer have any trouble doing so.

I post batches of newsgroup submissions manually and keep an eye on what's going through and what's not, and I think I've fixed all of the newsgroups we were having problems with, including ba.broadcast and alt.radio.pirate. However, I will continue to keep an eye on things just in case.

Ladies, gentlemen and Meyer Gottesmann, ;)

On March 4th, 2003 I will be leaving the comfortable, seasonably frigid environs of Northeast Ohio in order to endure the searing heat of the Mojave Desert, where my mother-in-law claims it's cold if the temp drops below 65.

I'm going to visit all of the new family members I seem to have acquired when I got married last year, and to seek out job opportunities and/or contracts on the Left Coast.

It will be a working vacation for me, and I will be on the Internet for at least 20-30 hours that week, including most of the day on March 4th. During that time, I will be processing your RRB submissions and forwarding them on to the newsgroup.

The only day I will be completely out of commission is March 11th, the day I fly back, where I will spend pretty much the entire day on a plane. (I'm not leaving Ohio until relatively late on the 4th.) I'm also told that I'm going to Disneyland, so I may not end up posting anything that day. :P

I will, of course, still be accessible via e-mail.

FYI.

BTW, we have a layover in Minneapolis. Can anyone point me to a good source for Vikings gear at the airport? (Al?)

Cheers,

Ye Olde Newsgroupe Moderator

It's a very funny site. I particularly enjoyed the thread about hum at
the fringes of the signal. Someone suggested that the power supply has
to be free of ripple (electronic, not booze). It would seem to me that
a noisy power supply would make the signal noisy at all distances, not
just on the fringes. My guess is the guy has high voltage power lines
where he's testing.

Help Need Abbott and Costello Nov 04 1943 Radio Show Season Premiere OTR

Help, I'm looking for Abbott and Costello Nov 04 1943 Radio Show.
It was the Season Premiere that was broadcasted live the same day
Lou's son drowns. Bud gave a heartfelt speech at the show's close.

I've checked the usual places on the internet but only found the
following shows for 1943 at several OTR sites.

43-01-14 Hunting Guide with Claire Trevor - 29:12
43-03-16 At the Circus with Alan Hale - 29:05
43-11-18 Nylon Stockings with Lucille Ball - 29:43
43-11-25 Costello's Pet Turkey with Jane Wyman - 27:00
43-12-02 Trip to Palm Springs with Veronica Lake - 29:43
43-12-09 English Butler with Arthur Treacher - 29:35
43-12-16 The Wild West with Lynn Bari - 28:36
43-12-30 The Lawyer with Bert Gordon - 29:15

I'm would like to find the show 43-11-04 "Abbott & Costello
Season Premiere". It may have also been rebroadcasted on another
date.

I also heard there is a show where Lou has a show talking about
his son but I don't have a time or date.

Please email or post any info that you have.

No, there is actually some theoretical substance to that issue. Ripple in the transmitter power supply would create asychronous AM noise on the carrier. In a receiver that had a solid signal, this would be a non-issue due to limiting in the receiver's IF stages. In a fringe reception situation, the IF would be unable to clip off the AM component and that noise would be passed to the FM discriminator. Some FM detectors are better than others at rejecting AM noise, but the fact is that AM noise on an FM carrier may become apparent when the signal strength drops below full receiver limiting.

But I agree: in addition to high voltage power lines overhead, most of those folks have bats in their belfries.

Hi,

For years my brother and I have referred to the name "Hartley Benson" to denote a certain type of rich, nose-in-the-air person because we remember a character with that name in an old time radio show. I've done loads of searches with different spelling but can't come up with anything.

Does anyone out there remember the character and can tell me what show he was in or (what would be wonderful) to hear an old show the character was in.

Pardon me, but the title of this thread includes the letters "am". You and
I both know that AM receivers don't have limiting in their IF.

Sorry. When talking about toy radio stations, I naturally assume FM. I
can't imagine that any of these wanabees would bother with AM. And I'm
used to seeing "AM", not "am".

Yes, if you're talking about an *FM* transmitter. The person who started that thread was referring to an *AM* transmitter.

I suspect you and I know what's wrong with it, but the children with the toys are obviously the experts, so let them figure it out.

Absolutely right. I had no thought that we were talking about Amplitude
Modulation. That means the article in question is indeed complete
technical nonsense.

WOW...with over 100 posts in this thread do "old DJs" deserve their
own Google listing or at least a web page to hang out in?

I started at the CBS affiliate WGBI AM/FM and WDAU-TV in Scranton, PA
back in the early 60s while going to college. The stories in this
thread are full of memories for me. I still dream about those FCC
readings; especially when you add the regular broadcast log AND the
occasional ASCAP survey of the records you played. I never worked
with an engineer - did all my shows from the board. But my day
included preparing and doing the 7pm and 11pm TV weather and "after
the movie" on-camera cut'n'read news. And I also had a late night
radio show down the hall.

My occasional nightmares include being on the "throne" down the hall,
alone in the station when the red light and buzzer in the hallway goes
off telling you there has been at least 15 seconds of dead air. Then
there was the young couple who called to request "Tenderly" and nine
months later calling to tell me they named the baby after me. Or I
recall the terror of seeing my "old timer" mentor at the station get
his finger caught during a live aluminum window commercial. Another
nightmare for me was not remembering to tape the network feed of a
show that was to play the next day and forgetting this while you were
doing your own live show.

Oh well, thanks for letting me vent and letting me know that we could
organize our own convention of "old DJs" by sending invitations to
everyone in this thread. Anyone know if there is a web page for us
relics from the Golden Age of Radio - - - when it was a
hell-of-a-lotta FUN?

Thanks all,

Paul Lowry

>months later calling to tell me they named the baby after me.

I was on KOSI, Denver, in the '50's when it was the first rock-and roller. One weekend went to see a girlfriend in Goodland, Kansas, right across the state line, and she introduced me to a teenage girl who worked at the same newspaper she did.

The girl said nothing, but turned bright red and literally ran away.

Later she admitted to my friend that she and her boyfriend regularly listened to me in the car when they were.... Remember this was about 1957. She said she realized that it was foolish because I had no way of knowing.... Which made her doubly embarrassed.

Ted Cooper
(---as I was on KOSI. The station owned the names.)

Couple more possibles: assuming there really is a hum on the main
signal, he may not be hearing it due to the thing being near full
reduction in the first stage.

Also, given a lot of AM rec'rs have a high-pass filter just past the
detector stage,(usually to limit the phase induced distortion caused
by motion of the radio relative to the signal, etc) or else the
amp/speaker simply doesn't respond down that low... either of these
situations would also account of the hum only being on the edges; At
the edges you pick up more of the harmonic, which, by the fact it's
twice the original hum freq, would get by the filter.

Here, too. It doesn't lose its mind nearly as often with the UPS, but I
think I can still remember which menu items the "one-button" functions
are... (and yes, it's interesting that those seem to be the only
settings that are lost - I can't remember last time I've had to set the
clock...)

We have the scrolling remote sign. It was a huge pain when it was first
installed - and when we installed the Amber firmware in the 911, it lost
its mind too. I just about lost *my* mind trying to get it working again.

Luckily all we do is log and initiate RWT and relay RMT - Amber isn't
yet established in Nashville. I wish y'all hadn't reminded me that
someday soon, it will be...

Hello,
My name is Paul and I run the Joe Franklin Fan Club. Some of you might remember Joe's TV show that ran for 40 years. He still has a radio show on WOR 710AM in NY Saturday night at midnight until 5AM Sunday. I am a personal friend of Joe's and appear on his show regularly. I wanted to invite all that are interested to join this great, fun club. You will find oldtime songs, plenty of links to fun and interesting websites, photo's, and a sneek preview of each week's show. All free of charge. Joe is very thrilled about this club and every Saturday I show him anything I've added to the website. So feel free to check out this nice tribute to Mr. Memory Lane.

Unfortunately, here in the land of the free, radio isn't free on the net, as has been pointed out here. However, outside the U. S., in Canada and Great Britain for instance, there's some streaming happening. A sight called Mike's Radio world is one of the best refernces for who is streaming, and he does keep the listings pretty current. I don't have the URL handy but it shows up readily in search engines.

Peace,

Larry

For sale:

The "Radio Crazy" is back!

Partial interest in fulltime 1 KW AM radio station in Western Kentucky. On the air since the 50s of the last century.

No real estate is included. You heard it first here, kiddies!

Joint venture. Active/inactive investors with at least $15,000 each are welcome. All investors would be on the board with full voting rights if desired.

This is a wonderful city and I will disclose more only to qualified and ready investors who fully identify themselves. The full price is expected to be at least $100,000 including all the technical gear except the tower which is leased. Additionally we get the FCC license, callsign and goodwill. We will have to find and build new studios.

I am a semi-retired broadcast engineer. My last job in radio was Chief Engineer for a 5 KW fulltime AM in New York City. I think that gives me the right to call myself "Diplomat with Portfolio" eh? HI HI!

Tel: (478)741-1710 or email.

Steve, have you ever downloaded from alt.binaries.sound.radio.oldtime
or alt.binaries.sounds.radio.oldtime or
alt.binaries.sounds.radio.oldtime.highspeed newsgroups?

There are thousands of radio shows per month to download for free.
They are in MP3 format, usually very low bitrates (32Kbps), but they
sound as good as the original transcription they came from.

Give it a listen. I probably have 300,000 here....(c;
Newsgroups are loaded with things to listen to and collect!

Amateur Radio Newsline™ Report 1333 – February 28, 2003

Amateur Radio Newsline™ report number 1333 with a release date of Friday, February 28 2003 to follow in 5-4-3-2-1.

The following is a Q-S-T. An amazing feat. Alaska to the United Kingdom using one watt on 136 Khz. Find out who did it and how on Amateur Radio Newsline™ report number 1333 coming your way right now.

(Billboard Cart Here)

**

RADIO RECORDS: UK TO ALASKA ON 136 KHZ

Reaching Alaska from the United Kingdom using just one watt ERP is quite a feat for any band, but Laurie Mayhead, G3AQC, has just achieved this on the 136 kHz band. And in doing so he has set a new record. RSGB Newsreader Jeramy Boot, G4NJH, has the story:

--
In the early hours of the 15th of February he transmitted to KL1X in Anchorage, and just before UK dawn at 0615 his callsign was clearly identified. G3AQC was using QRSS - very slow CW - with a 60-second dot period. The distance was 7278 kilometres, a record for one watt ERP on 136kHz.

Last year G3AQC became the first person to cross the Atlantic on the 73kHz band. KL1X is perhaps better known to UK amateurs as Laurence Howell, GM4DMA. Laurence said, "What is more surprising than the distance is that the path is notoriously poor between south-east Alaska, on the east coast of the Pacific, and Europe.

The signal would theoretically go on a great circle route to nearly 80 degrees north, over the northern Canadian Arctic, northern Greenland, east of Iceland, Glasgow, then over the UK to the South Coast - across and through the Auroral oval. There are some thoughts that the actual path might have gone round or even under the Auroral zone as no Auroral Doppler was seen on the received signal."
--

A lot of research and preparation work was carried out by G3NYK, G3LDO, W3EEE and W4DEX. This pre-planning is probably in good part responsible for helping to set this new work 136 kHz record. (GB2RS)

**

ON THE AIR: THE 5 MHZ EXPERIMENT - AN UPDATE

Also from the United Kingdom comes word that progress is being made with the analysis and future direction of the 5 MHz band experiment. This, following a meeting between members of the 5 MHz Working Group and experts from the Rutherford Appleton Laboratory. As a result, work is now under way to convert contact logs to a computer readable form with analysis results by April.

The meeting also looked a the fundamentals of the 5 MHZ experiment and came up with a number of suggestions of ways of improving how it should be conducted in the future. These ideas will require further development and consideration by the full 5 MHZ Experiment Working Group. It is hoped that this experiment and others conducted around the world could eventually lead to a new ham radio band. (RSGB)

**

RADIO RULES: ARRL CONCERNED ON PROPOSED 70CM CHANGES

Back on this side of the Atlantic the ARRL says that its concerned about two FCC proposed actions. Its says that both could negatively affect Amateur Radio and it has made its position known in comments filed to the FCC.

Of the two proposals, the one with greatest impact comes from the National Telecommunications and Information Administration. It would greatly increase the geographical area in New Mexico and western Texas where amateurs in the 70 cm band would be limited to 50 Watts peak envelope power to protect military radiolocation operations.

The ARRL says that there are 67 Amateur repeater in the proposed area. It says that most of these are far beyond line-of-sight paths to any military facilities. So the League has asked the FCC and NTIA to cooperatively evaluate the proposed restrictionton to determine whether it is overly broad. The ARRL adds that weak-signal operations in the region could also affected.

The other propsal comes from the National Weather Service. It wants to deploy wind-profiler radars in the 448 to 450 MHz segment of the 70 centimeter band. Here, the League says that it understands that the National Weather Service would notify ARRL of their locations as selected. The League notes that amateur repeaters are incumbent in the band at this time. It suggests that the National Weather Service select sites that minimize the effect on repeaters in that part of the band. (ARRL)

**

Break 1

>From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the WR4AMS repeater system serving all of Eastern Kentucky.

**

ENFORCEMENT: HAM TURNS IN LICENSE FOR RUNNING UNLICENSED BROADCAST STATION

A Berkley Michigan ham radio operator has turned in his ticket after the FCC finds he has operated an unlicensed radio station. The Commission's Daryl Duckworth, NNZ0W, explains:

--
Duckworth: "The Enforcement Bureau has issued a Notice to Thomas Brothers KI8BE, acknowledging the cancellation of his amateur license as a result of a finding by the Detroit office that he operated an unlicensed FM station."
--

The action rescinding Brother's ham radio license is the result of monitoring and direction finding by the Detroit Field Office. It established that Brothers operated an unlicensed FM radio station from his home in 2001. In addition to canceling his current ham radio license the Commission is prohibiting Brothers from applying for a new one until December 5th, 2007. (FCC. RAIN)

**

ENFORCEMENT: STILL MORE FINES

Hams are not the only ones feeling the sting of Uncle Sam. In fact, the FCC is continuing its enforcement activities in all of the services it oversees. Roy Neal, K6DUE, has the details on what they are doing outside of the world of Amateur Radio:

--
The CGC Communicator reports that a$ 5,000 Notice of Apparent Liability -- better known as a fine -- has been issued to an AM radio station. This, for failing to maintain a record of the its efficiency factor that is used to determine its actual operating power. The station was also dinged for operating in excess of 105% of its authorized power,

Another A-M broadcast station has been socked for $10,000. This, for failing to register its antenna structure and failing to maintain a presence at its main studio during its normal business hours.

But the big one -- a fine of $20,000 went to a company for operation of radio transmission equipment without the required Commission authorization. It was also cited for use of a radio frequency device that failed to comply with Commission regulations.

This is just a sample of the non-ham radio enforcement the regulatory agency has been involved with. In all, its been a pretty busy time for the protecxtors of the airwaves at the FCC.

For the Amateur Radio Newsline™, I'm Roy Neal, K6DUE.
--

The details on all of these actions are on the FCC's website. You can read the details at http://www.fcc.gov/Daily_Releases/Daily_Digest/2003/dd030206.html (CGC Communicator, FCC)

**

ENFORCEMENT: UK MAN CONVICTED OF SELLING ILLEGAL CCTV GEAR

Meantime, across the Atlantic a British electronics supplier has been convicted of selling Closed Circuit TV transmitters that operated illegally in an amateur radio band. According to Jim Merachen, ZL2BHF, the British might say what he did just isn’t cricket.

--
The United Kingdom’s Radiocommunications Agency says that David Burrows plead guilty on February 10th in Newark Magistrates' Court to two charges of selling non compliant radio apparatus. The prosecution by the Radiocommunications Agency followed a complaint about interference from a licensed U-K radio amateur in May 2002.

The source of the interference was identified as an illegal Closed Circuit TV transmitter installed at a farm in Lincolnshire. The Radiocommunications Agency says that the tranasmitters had been bought from David Burrows's company valled A-E-R-C.

Inspectors searched the company's premises last July. At that time they seized a number of television transmission modules capable of illegal operation on amateur frequencies. The company website had claimed the surveillance equipment was exempt from the need to obtain a U- K licence.

Burrows, of Newark England, was sentenced to serve 60 hours of community service and ordered to pay 300 Pounds in court costs. Also, the equipment seized from Burrows business was ordered forfeitted to the government.

For the Amateur Radio Newsline™, I’m Jim Meachen, ZL2BHF.
--

It appears as if the Radiocommunications Agency may be using the Burrows case to send a message to others thinking of selling similar equipment by calling it ham radio gear. (GB2RS)

**

RADIO LAW: NY STATE HAMS TRY AGAIN TO GET ANTENNA PREEMPTION

For the third year in a row, Amateur Radio antenna legislation has been introduced in the New York Legislature. If approved and signed by Governor George Pataki, it would prevent passage of any zoning ordinance that would prohibit or -- effectively prohibit -- the construction of an antenna support structure by a federally licensed Amateur Radio operator.

But theres more. The ARRL Letter says that municipal ordinances in New York State that impact the placement, screening or height of antenna support structures would have to reasonably accommodate amateur radio antennas and impose the minimum regulation necessary. It would also prohibit municipalities from passing laws or ordinances to restrict antenna support structure height to less than 95 feet above ground level or restrict the number of antenna support structures. The legislation also would require municipalities to adhere to the provisions of PRB-1.

Last year's bill passed in the State Senate but died in the Assembly's Rules Committee. (ARRL)

**

THE WAR AGASINST TERRORIOSM: FREE EMERGENCY NOTIFICATION ALERTS

Even though the government says that it may downgrade the national terrorism alert back to Code Yellow, the Emergency E-mail & Wireless Network says that it is increasing its efforts to encourage everyone to sign up for its free Homeland Security notices. This by e-mail and wireless device. You can sign up for the messaging notifications at www.emergencyemail.org

The Emergency E-mail & Wireless Network is the largest public service notification network and a provider of e-mail notification and wireless messaging services to government, the private sector and non-profit organizations. The organization serves over 3160 local areas in all 50 U. S. States. Its website is located in cyberspace at www.911message.com. (EEWN)

**

THE WAR ON TERROR: THE FIRST RESPONDER

The latest terror alert has law enforcement agencies on guard and preparing for the worst. And after September 11, 2001, emergency crews are better prepared for disasters, thanks to new technology. Amateur Radio Newsline’s Bruce Tennant, K6PZW, tells us about First Responder:

--
One major problem on September 11th 2001 was communications between emergency crews. Most could not talk to one another because they were all using different types of radios, in different services and on different frequencies. In fact, the only group with common communications channels in the days immediately following the 911 terror attacks were the ham radio operators who had their own gear and volunteered to assist.

But that all could soon change thanks to a a new mobile command center built into a Sports UtilityVehicle and dubbed First Responder by its designer Raytheon.

While the exact information on how it works has not been made public, First Responder is designed to allow emergency crews to communicate on the same radio channel anywhere, anytime - even if phone and power lines are down. In addition to normal two-way radios, the design includes satellite phones, a mapping system, hacker-proof computers and infrared cameras. Just about any type of communications you can imagine except for ham radio and C-B.

Raytheon says that it developed First Responder to improve homeland security. It will also soon be equipped to detect biological and chemical agents as well as providing inter-service communications.

For the Amateur Radio Newsline™, I’m bruce Tennant, K6PZW, reporting.
--

According to news reports, the first, First Responder is already in use in the Los Angeles California area, but more of these S-U-V's may soon be seen nationwide. This, thanks to new federal legislation that could release billions of dollars in Homeland Security funding. (Published news reports)

**

WITH THE HANDI HAMS: A-R-T FOR THE BLIND

A descriptive audio version of the new ARRL video "Amateur Radio Today" will soon be available for the visually impaired from the Handi Hams. According to Pat Tice, WA0TDA, the ARRL has agreed to let the Handi Hamd reproduce a special version of the show in audio for its members with disabilities who cannot use regular video.

Tice says that the audio only version will contain added dialogue to describe the action that would be on-screen in the original version. No date for when this special version of Amateur Radio Today will be available, but you will have to be a Handi Hams member to be eligable to receive a copy. You can join by calling the toll free Hamdi Ham membership line at 1-866-HANDIHAM. For those who perfer numbers, thats 1-866-426-3442. (HandiHams)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

COLUMBIA DISASTER: NASA SEEKS HELP FROM SKY WATCHERS

NASA is still seeking help from the American public to supply video and still images of the Space Shuttle Columbia on its return flight to Earth. The agency says that while there has been a great public response, more material will help the investigation of the Columbia accident.

Anyone who may have video or stills of Columbia's entry path are encouraged to send it to investigators. You can mail videotapes to the NASA Johnson Space Center, Mail Code JA17, 2101 NASA Road 1, Houston, Texas 77058. Email digital images to columbiaimages@nasa.gov

NASA adds that videotapes and photos can be returned upon request and the materials will not be released to the media without the submitter's permission. For more information call the Johnson Space Center Emergency Operations Center at area code 281-483-3388. (NASA)

**

VOLUNTEER NEEDED: AMSAT SATELLITE REPORT NEEDS NEW EDITOR

AMSAT says that it s looking for a new Editor for its Weekly Satellite Report. If you are interested in volunteering to help your fellow satellite operators stay abreast of the latest status of the ham-sats, please e-mail n1jez@amsat.org (AMSAT-NA)

**

CONVENTIONS AND HAMFESTS: CHARLESTON W VA IN MARCH

Between 600 and 700 Amateur Radio Operators are expected to gather on Saturday, March 15th, for the 19th Annual Charleston Area Hamfest and Computer Show. The venue for this one is the Coonskin Armory, on Coonskin Drive in Charleston. The event is a giant flea market of new and used amateur radio, computer and related gear.

Representatives of Governor Bob Wise will be present, along with people the Board of Public Works. Also, the states Office of Emergency Services will have their Mobile Command Center on display. And for those want to get into the hobby or upgrade, ham radio testing will be availabe.

The Charleston Area Hamfest, which is open to the public draws attendees from West Virginia, Ohio, and Kentucky. It runs from 9 AM to 3 PM with an entry fee of only $5.00. For more information on the Charleston Hamfest, e-mail n8tmw@arrl.net or call 304-965-5349 during normal business hours Eastern time. (N8TMW)

**

INTERNATIONAL – BAHAMAS: 6 METER BEACON MOVED

On the international scene, Steve Rutlidge reports that his C6AFP beacon is back on the air from grid square FL16. The beacon, which operates on 50. 062 MHz was moved from Great Abaco Island to Green Turtle Cay. The distance is about five miles and the grid square in the same. The beacon is now operating from the home of C6AGN. (VHF Reflector)

**

INTERNATIONAL – FINLAND: BEACON STOLEN

Users of the five-band Northern California D-X Foundation beacon network may have noticed the absence in recent weeks of transmissions from the Finnish OH2B beacon. The reason? The transmitter hass been stolen. The good news -- the beacon is expected to resume transmissions in the European spring. No other transmitters in the word-wide NCDXF beacon string have been affected. (RSGB)

**

INTERNATIONAL - SINGAPORE: NEW FREQUENCIES FOR HAMS

And word that Singapore’s telecommunications regulators have approved several UHF spot frequencies for Amateurs to operate. They are 433.425 , 433.450 and 438.450 MHz, and a maximum of 5 watts effective radiated is permitted. (Q-News)

**

DX

In D-X, Q-News reports that the Air Force has closed down Johnston Island and demolition will start shortly on the remaining buildings. There will be probably DXpeditions to the island later but not under the call of KJ6BZ. The good news is that the history of the Johnston Island Amateur Radio Club will be held in the Air Force archives. (Q-News)

The ARRL DXCC Desk has announced that the VKZ0MQI Macquairie Island operation from January 1, 2002 through March 15, 2003 has been authorized for DXCC credit. Also approved the 3C2MV Equatorial Guinea DXpedition from November 11 through December 12, 2002. (ARRL)

**

THAT FINAL ITEM: HAPPY RETIREMENT TO N6AWE

Before we go, a word of congratulations to Amateur Radio Newsline's own Mert Garlick, N6AWE, on his retirement from Fox Television's KTTV in Los Angeles. Mert started with the station back in October of 1966 when it was still a part of Metromedia. Over the years he has done every job a broadcast engineer can perform at a television station. From manning the transmitter atop Mt. Wilson to microwaving signals back from the scene of a breaking news story to covering the annual Tournament of Roses Parade in Pasadena -- Mert Garlick, N6AWE, has done it all -- and a lot more.

Now its time for him to travel other roads and Mert tells us that retirement will not really slow him down. Instead it will give him a lot more time to pursue his other interests which include genealogy and of coarse Amateur Radio. And you will still be heraring him regularly, right here, on these weekly Amateur Radio Newsline reports.

So before we sign off, please join us in wishing one of the nicest people in ham radio -- Mert Garlick, N6AWE -- many happy and fulfilling years of retirement. And don't be surprised if you run into him more regularly on the air. (ARNewsline™)

**

NEWSCAST CLOSE

With thanks to Alan Labs, Amateur News Weekly, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB and Australia's Q-News, that's all from the Amateur Radio Newsline™. Our e-mail address is newsline@arnewsline.org. More information is available at Amateur Radio Newsline's™ only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), P.O. Box 660937, Arcadia, California 91066.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Norm Seeley, KI7UP, saying 73 and we thank you for listening." Amateur Radio Newsline™ is Copyright 2002. All rights reserved.

283. For sale: Partial ownership of AM radio station in West Virginia.

Newsgroup: rec.radio.broadcasting
Date: 2003-03-05 15:59:34 UTC
From: Meyer Gottesman <wrecktech@yahoo.com>
Message-ID: <b456t7bnj1@xuxa.iecc.com>
Source record: 8760

For sale:

The "Radio Crazy" is back!

Partial ownership of AM radio station in West Virginia
next to the Ohio border.

Home included in the sale with a basement. This serves
as the studios. Transmitter site is leased and is
adjacent at $350.00 per month. The home has been
appraised at a value of at least $52,000. Almost the
asking price for the station! This is the only AM
station in the community and the FM is moving out.

Daytimer, 1 KW with 500 watt PSA and some night power
sufficient to cover city of license.

Active or inactive investors for our joint venture
with at least $10,000 each are welcome. All investors
would be on the board with full voting rights if
desired.

Please, no "AM bashers" or "negative nabobs"!!

Full disclosure only to those completely identifying
themselves.

The "Radio Crazy" is a semi-retired broadcast engineer
and a ham since 1950. Not THAT crazy! HI!

Tel: (478)741-1710.

Last but not least. I am NOT a broker, agent, shill or
owner in any way of this station. In other words, I
have "no ax to grind" !!!

73,

Meyer Gottesman, W6GIV
Macon, GA
aka "The Radio Crazy" aka "Meyer, the animal".

Larry and I have posted back and forth in other newsgroups, but I
believe he's new here. ("Here" being rec.radio.broadcasting, which I
moderate.)

I think his problem is that he's not aware of what's typically posted
here. In the spirit of the late Bill Pfeiffer (the original moderator
of RRB) I try to let as much through to the newsgroup as possible.
Stuff that's obviously flamebait or off-topic isn't passed through,
and stuff that's obviously spam isn't passed through, but this post
from Mr. Holt wasn't spam as far as I'm concerned. FS/FA posts are
okay too, though I am pretty strict on what I'll allow to get by me.

It's my fault. I've been meaning to post an RRB charter for the
regulars to review and critique. It's been on my To-Do list just this
side of forever.

1985? By then their influence was probably waning. Their impact was
in the late 1960s and 1970s.

Dear Mr. Cheese: (LOL!)

Thanks for your interest. I am not a crook. Richard Nixon once said that too! (grin!) Actually I am a semi-retired broadcast engineer. I am not an agent, broker, shill, owner or part owner of said station!

I am in WV now visiting with the owner and have seen the station. It is very nice with excellent coverage for the power. It has a 24 hour license tho the night power is lowered from 1 KW to 20 watts. Enuff to cover city of license, however.

Please call me if you wish. (478)741-1710. I will be back to my apt. in Macon, GA Sat. AM so anytime after, say, 6 PM Sat. will do.

I do want to participate so if you intend to only buy 100 percent or nothing at all, it is nothing at all, with all due respect.

Cordially,

Meyer Gottesman

He has stated several times that if you are a serious investor, such information will be provided via email, but just posting jabs on the NG will result in nothing. I'd be willing to bet that if you emailed Meyer as a serious investor, he would quickly and willingly answer any and all of your questions.

Steve Holt replied

> OK, no probs. BTW is there a FAQ for this group?

Ummmm... No. :>

The reason is because the vast majority of people who post at all are
regulars. I could cook something up and post it along with the charter.

I accept that he is looking for protection with regard to his business plans. NO PROBLEM.

HOWEVER, this is a legitimate question. Certainly we should not expect our moderator to investigate his past. Ditto we should have an idea of who he is. I suspect there is a fair amount of resources on this group. Some which MAY be inclined to chase a few of this guy's proposals. (Otherwise he would not be here.)

I know he was involved in the Blue Lake CA AM construction permit and I see it was sold for a tidy profit. So all can not be bad. Anyone (Especially you) have any other details? I know there were offerings in Missouri, Pennsylvania, Oklahoma and Kentucky (I think).

'Da Cheese.

Prior to 1985, there was at least one other rock station with a City grade
signal.
Over the years the swinging door consisted of stations such as WOR-FM,
WPIX-FM, WPLJ, WQIV, and WAPP.
WXRK debut the day of Live-Aid in July 1985. But there was about 6 months
before that WNEW -FM was the only rock station in town.
The idea was that Metromedia cared more about the AM and TV stations and
paging systems during that time as FM, in NYC, was not as popular.

I'd be willing to bet that if you emailed Meyer as a serious investor, he would quickly and willingly answer any and all of your questions.
>>

Or even a serious (and courteous) inquirer, not necessarily as a serious investor.

Besides, a little sleuthing on one's part will usually turn up the precise identity of the property which Meyer was referring to in the abstract.

312. Partial interest in West Virginia fulltime AM for sale.

Newsgroup: rec.radio.broadcasting
Date: 2003-03-09 17:49:50 UTC
From: Meyer Gottesman <wrecktech@yahoo.com>
Message-ID: <b4furu$f5e$1@xuxa.iecc.com>
Source record: 8789

For sale:

Part interest in AM radio station for sale. Joint venture. WMOV radio, Ravenswood, WV next to the Ohio border. Only station in county. 1360 KHz, non-directional. 1 KW days, 500 watts PSA and 20 watts at night. Covers city of license at night.

Real estate IS included. Home, aprox. 100 ft. tower and 4 "dishes". Two 1 KW xmtrs (Gates) tube type and one 30 watt LPB solid state night transmitter set at 20 watts nominal output. PC automation. Tower site is adjacent and leased at $350.00 per month.

Active or inactive investors with at least $10,000 each are welcome. PLEASE! No "AM bashers" or negative nabobs. (I don't know what a "nabob" is either! HI!)

I am not a crook! I am also NOT an agent, broker, shill, owner or part owner of WMOV. I am a semi-retired broadcast engineer and Advanced class ham. Last job in radio (2001) was Chief Engineer for a 5 KW fulltime AM in New York City. Does that make me "Diplomat with Portfolio" ? Maybe.

Those who still think I am a crook need know that in 1972 I worked for the US Dept. of Defense as a civilian and held a secret level security clearance. I have worked for two major airlines. (PanAm in 1960 and TWA in 1968). 'nuff said?

I was the past President and founder of non-commercial KPOO FM, San Francisco, CA. It is on the air since 1973. Probably the zaniest non-comm FM in America!

My BIO was listed in "Who's Who in Entertainment".

Tel: (478)741-1710 in Macon, GA.

PLEASE DO NOT contact WMOV directly!! The seller will not allow you to do an "end run" and I would not want to deal anyway with those with such a glaring lack of ethics and fair play!

73,

Meyer Gottesman, W6GIV
aka "The Radio Crazy" aka "Meyer, the animal"

Amateur Radio Newsline™ Report 1334 – March 7, 2003

Amateur Radio Newsline report number 1334 with a release date of Friday, March 7 2003 to follow in 5-4-3-2-1.

The following is a Q-S-T.

A national ham radio socierty on the brink of faiulure and how ham radio will survive in space while the shuttles are grounded. These stories are first on Amateur Radio Newsline report number 1334 coming your way right now.

(Billboard Cart Here)

**

INTERNATIONAL: COLOMBIAS NATIONAL AMATEUR RADIO SOCIETY SAVED BY A MIRACLE

Colombia’s national Amateur Radio Society has received a reprieve from extinction. At least a temporary one. We have this in-depth look at what happened and whats being done to save the L-C-R-A.

--

Colombia’s national ham radio society remains on the brink of being dissolved and you may soon hear very few of that nations hams on the air. This, according to Fred Laun, K3ZO in a report that originally appeared in a number of D-X newsletters. The reason? The economy.

According to Laun, his old friend Beto Rojas, HK3DDD, in Bogota informed him that postal rates in Colombia were doubled as of January 1st. That it now costs the equivalent of $2.00 U-S to send a letter to the United States. And as a result Colombian hams would have to pay the equivalent of 13 cents per QSL to send outgoing cards through the bureau.

That 13 cent fee would not be to bad except for the fact that the bureau probably won't be available much longer. This, because the Colombian I-A-R-U member society -- the Liga Colombiana de Radioaficionados -- L-C-R-A -- was to meet on Saturday, March 1st to dissolve itself. The problem is that L-C-R-A membership is down. It now only has 200 paid members. It also had the equivalent of 8000 United States dollars in debt. It’s leaders felt that it could no longer stay in business.

But says Laun, a miracle actually happened. At the meeting one of the members donated $7000 to pay off most of the current debt. So, L-C-R-A will continue to operate as Colombia’s national society for at least the next three months. During that time the leadership will try to figure out what went wrong and see if they can get the organization back on an even keel.

In a note to Amateur Radio Newsline, Laun says that several Colombian hams were apparently moved by the messages they received from around the world and have vowed to try to rescue their almost 70 year old society from the brink of oblivion. Even so, HK3DDD tells Laun that many Colombian hams have stopped calling C-Q and some have even terminated all high frequency operations. This is because they can no longer afford to handle the economic consequences of the demand for QSL cards.

Also says HK3DDD, some Colombian DXers who are still on the air are simply listening, searching and pouncing on rare ones these days. Instead of being the DX, they are selectively looking for new countries for themselves.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP .

--

The bottom line to all of this? H-K prefix hams may soon become very rare on the H-F ands and those whom you work may never be able to QSL. (K3ZO)

**

RADIO RULES: WRC-03 GETS US POSITION

The U. S. Department of State has forwarded several agenda items to Geneva as being this nations opening position at the 2003 World Radiocommunictions Conference. The most important of these relate to International Radio Regulation s-25 and its sub-parts. Included in the initial United States position is rewording S 25 subpart 1 to give member nations more authority to determine the points of communication of the amateur stations it has licensed. The suggested modifuication reads that administrators shall verify the technical and operational qualifications of any person wishing to operate an Amateur station.

The United States is also proposing to eliminate regulation 25.5. This is the rule that mandates Morse Code peoficiency examinations for all candidates for an Amateur license with high frequency operating priveleges. The United States says that its time to remove the Morse testing requirement and leave the decision as whether or not to test for code up to individual I-T-U mermber nations. (W5YI)

**

HAM RADIO IN SPACE: CREW OF 2 TO THE ISS

It will be a two man crew rather than a three man crew on the International Space Station until the U-S Space Shuttle flies again. But ham radio will remain on the air from the I-S-S as the investigation in the Columbia tragedy continues. Amateur Radio Newsline's Roy Neal, K6DUE, has more:

--

NASA'S WORST NIGHTMARE BECAME REALITY WHEN AN ORBITTING SPACE SHUTTLE BLEW UP, KILLING ALL SEVEN ABOARD AND PUTTING UNITED STATES SPACE ACTIVITY OH HOLD FOR AN INDEFINITE FUTURE. NOW, OUT OF THE DEBRIS, INVESTIGATION AND SORROW, NASA HAS BEGUN TO REORGANIZE.

ADMINISTRATOR SEAN O'KEEFE HAS TOLD A CONGRESSIONAL PANEL THAT AN AGREEMENT HAS BEEN REACHED WITH THE INTERNATIONAL PARTNERS. THE INTERNATIONAL SPACE STATION WILL CONTINUE IN ORBIT FOR AT LEAST THE NEXT 18 MONTHS.

THE TWO ASTRONAUTS AND ONE COSMONAUT ON BOARD WILL BE BROUGHT BACK TO EARTH IN LATE APRIL OR EARLY MAY ABOARD THE SOYUZ SPACE SHIP THAT'S DOCKED AT THE STATION. THEY WILL BE REPLACED BY A NEW CREW OF ONLY 2 PEOPLE, ONE ASTRONAUT AND ONE COSMONAUT, PROBABLY ED LU AND YURI MALENCHENKO, WHO ARE NOW IN TRAINING AT RUSSIA'S STAR CITY. THEY WILL KEEP THE STATION OPERATIONAL, EVE N PLAN TO TALK TO ONE OR TWO SCHOOLS ON EARTH EVERY WEEK. FUTURE CREWS WILL COPNSIST OF TWO PEOPLE FOR THE TIME BEING.

RUSSIAN PROGRESS SPACECRAFT WILL BE USED TO FERRY SUPPLIES, SOYUZ WILL CARRY PASSENGERS. ONCE NASA HAS FIGURED OUT WHAT CAUSED THE SHUTTLE COLUMBIA TO DISINTIGRATE, THEY HOPE TO FIX AND FLY THE THREE REMAINING SPACE SHUTTLES. THE BOEING COMPANY HAS BEEN ASKED TO GO TO WORK ON A NEW CARRIER TO AUGMENT THE SHUTTLE FLEET.

RUSSIA HAS AGREED TO ACCELERATE THE DELIVERY OF 2 PROGRESS RE-SUPPLY VEHICLES FOR A TOTAL FLEET OF FOUR THIS YEAR AND FIVE IN 2004 AND THERE IS TALK OF AUGMENTING THE SOYUZ FLEET.

EXISTING HAM RADIO EQUIPMENT ON BOARD SHOULD KEEP THE STATION ON THE AIR. OTHER EQUIPMENT MAY BE SENT UP IF NEEDED. THE SPACE AGENCIES HAVE COMMITED TO STAYING IN SPACE WHILE THEY MAP A FUTURE AND HAM RADIO IS AN INTEGRAL PART OF THAT ORBITING STATION.

FOR THE AMATEUR RADIO NEWSLINE, ROY NEAL, K6DUE.

--

NASA says that having only two people aboard the I-S-S will help extend supplies while the shuttle fleet remains grounded. (NASA, ARNewsline™)

RESCUE RADIO: METRO-COMM AND THE NORTH-EAST BLIZZARD

A follow-up to our recent coverage of the severe weather that has blanketed the North-East in recent weeks. Steve Bromhead, KB2TRZ, reports that the Metro-Comm linked repeater system did yomens duty during last months blizzard.

According to Steve, their Snow Watch Net was activated for 42 consecutive hours handling storm related traffic for 12 counties in New York, New Jersey, Pennsylvania and Delaware. This included 10 formal messages to the National Weather Service office in My. Holly New Jersey.

Steve says that Metro-Comm is a linked repeater system covering Binginghamton, New York to Ocean City, New Jersey. The system has machines on 144, 220, 432, and 1296 MHz as well as a packet BBS. (KB2TRZ)

THE VEC SYSTEM: QPC RELEASES DRAFT GENERAL CLASS SYLLABUS

You have the answers. They have the questions. So says the Question Pool Committee of the National Conference of Volunteer Examiner Coordinators.

The Q-P-C has just released a draft syllabus for the new Element 3 General class Question Pool. This is the syllabus will be used when developing the new General class question pool that will become effective July 1, 2004.

This draft syllabus is available for download at www.arrl.org/arrlvec/pools.html. The public is invited to comment on this syllabus, as well as to suggest questions for consideration in the next General Pool.

The Question Pool Committe says that all responses must be received prior to July 15, 2003. Please direct your comments to the following people:
Scotty Neustadter, W4WW, Chair QPC email: W4WW@arrl.net
Bart Jahnke, W9JJ, Member QPC email: vec@arrl.org
Fred Maia, W5YI, Member QPC email: w5yi@w5yi.org
John Johnston, W3BE, Member QPC email: johnston.john1@worldnet.att.net (NCVEC)

**

ENFORCEMENT: NO RULES BROKEN

A ham accused of running a telephone call-in program on 75 meters has been cleared of any wrong doing. Amateur Radio Newsline’s Bruce Tennant, K6PZW has good news for one California ham:

--
Back on October 15, 2002, the FCC wrote to James S. Watkins, KI6GU, of Burbank California. This, regarding complaints that his station was involved in a telephone call-in like program on 3.830 MHz on August 16th and 24th.

The complaints alleged that Watkins had operated the call-in show using reverse phone patch. Copies were provided to him and the FCC requested additional information from Watkins in regard to that operation.

Watkins provided the requested information in a response dated last November 12th. Following a thorough review the FCC now says that that there were no violations of Commission rules since licensed operators were in control of the station during all transmissions. As a result the inquiry is closed and no enforcement action is deemed to be necessary.

For the Amateur Radio Newsline, I’m Bruce Tennant, K7PZW, in Los Angeles.

--

The FCC also thanked Watkins for what it termed as his quick reply and his cooperation. (FCC)

**

ENFORCEMENT: WARNING LERTTER FOR ALLEGED KEY-DOWN

A Michigan ham has recieved a Warning Notice from the FCC. This time the letter went to to George Albrecht, N8PGB, of Lansing , and says that the FCC is in posession of information alleging that Albrecht's station was the source of deliberate interference to the W8LCC repeater system on 442.025 Mhz.

The notice says that the interference took the form of unidentified transmissions and keying down to cause sound effects from a link to 52.525 Mhz. In its note the FCC warned all Albrecht of the possibility of fines and revocation proceedings against him if the alleged problems continue. (FCC)

**

ENFORCEMENT: NY CAR SERVICE FINED FOR UNLICENSED OPERATION

International Car Service, Inc. of Brooklyn, New York has been fined $10,000. This, for operating of unlicensed radio transmitters on 33.20 Mhz.

The original forfeiture order was issued on October 22, 2002 by the District Director of the Commission's New York Field Office. International Car Service never filed a response to the N-A-L. Based on the information before the Commission, the fine has been affirmed and International has been ordered to pay. (FCC)

**

ENFORCEMENT: HACKER SENTENCED

A federal judge has ruled that a California man who quit his job to work for a competitor and used his old computer password to snoop on his former employer must pay $21,600 and serve five years probation. The sentence comes after the San Dimas man pleaded guilty in September of 2002 to one count of illegally obtaining information from a protected computer

Until February of last year, the man reportedly worked for a contractor specializing in large retail buildings. After leaving that job to work for a competitor, the man admitted that he used a password to access its computer system more than 20 times. (Published reports)

**

FM AND REPEATERS: REPEATERLINK.ORG WANTS YOU

Hams and repeater owner operators interested in connecting their system to another cirty or another nation now have a new resource. Its in cyberspace at www.repeaterlink.org and once there you will find a growing list of who'se repeater is linked to where and how its being done.

repeaterlink.org is the work of Jim Willmore, KC9BIX. He says over several Internet remailers that his site is unique in that it lets you to search for

repeater systems that connect two different cities together or linked systems that have repeater in a specific city. It also allows hams who own a repeater system to log in and maintain your own system information in real time.

According to Willmore, repeaterLink.org is totally independant and supported by the ham radio community. It does not buy data from the FCC or the ARRL, but rather relies on the architects and engineers who own the repeater networks to register their own systems.

Again, that site is www.repeaterlink.org. If you have any questions about the site, email Jim at kc9bix@repeaterlink.org (KC9BIX)

**

HAM RADIO HONORS: NAB ENGINEERING ACHIEVEMENT AWARD WINNERS ANNOUNCED

The National Association of Broadcasters has honored a ham radio oprtator with one of its two, 2003 Engineering Achievement Awards for Radio and Television.

John Reiser, WQ4L, the retired Senior Broadcast Engineer of the FCC International Bureau, will receive the award for Radio. Robert Eckert, Branch Chief - Electromagnetic Compatibility Division, Technical Analysis Branch of the FCC's Office of Engineering and Technology, will receive the award for TV.

The Engineering Achievement Awards for Radio and Television will be presented at NAB's Technology Luncheon on April 9th. The NAB annual convention takes place April 5 - 10 at the Las Vegas Convention Center. The Amasteur Radio Reception is Wednesday April 9th from 6 to 8 P.M. right next door at the Las Vegas Hilton Hotel. The complete details are in cyberspace at www.nab.org/newsroom/pressrel/n2003/c2603.htm) (CGC)

**

CONVENTIONS AND HAMFESTS: THE ZL TECHNOLOGY CONVENTION

No plans for this springs Easter holiday? Well think down-under as in Hamilton New Zealand because that’s where this years Technology Convention will take place. The dates are April 19th and 20th at the Hamilton Astronomical Society meeting facility.

This years Technology Convention will be hosted by the Hamilton Amateur Radio Club. Plans for the event call for presentations on such subjects as microwave equipment construction, homebrew test equipment, APRS, 10 GHz ATV, plus others state of the art Amateur radio disciplines. And if the weather permits, some viewing of the Southern Hemisphere’s night sky from the facility’s optical telescope may be included.

Want to find out more? You can write to the New Zealand Technology Convention 2003, PO Box 606 Hamilton New Zealand. Or better yet send an e-mail to Gavin Petrie at gavinwp@ihug.co.nz. (NZART)

**

HAMFESTS AND CONVENTIONS: WEAK SIGNAL BANQUET IN DAYTON OHIO

Here in the United States tickets are now on sale for the 11th Weak Signal Banquet slated for on Friday night May 16th in Dayton Ohio. This is one of the largest gatherings of V-H-F weak signal enthusiasts held anywhere in the United States and is timed to coincide with the Dayton Hamvention. Cost is $35 per person and only 125 people can be accommodated. For information and reservation information take your web browser to www.wa8wzg.com and click on Dayton Banquet 2003. (WA8WZG)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

TRAVEL WARNING: DX'ERS ADVISED TO USE CARRY-ON LUGGAGE ONLY

If you are planning a D-Xpedition, you might want to think in terms of smaller being better. This following reports of vandalism to the luggage of a recent DXpedition by none other than those highly trained security folks at Seattle Washington's Sea-Tac Airport. Amateur Radio Newsline's Jim Meachen, ZL2BHF, in Auckland New Zealand reports on what happened to a bunch of DXpedition operators who were headed home:

--
When the D-Xpedition group returning from the recent AH3D operation reached Seattle for their connection to Copenhagen Denmark, all their Samsonite case's locks were been broken by the Sea-Tac Airport security people who just had to take a peek inside. The checking was done in a secure area of the Seattle airport. As most seasoned travelers know, security is supposed to find the passengers to get the keys to luggage that they want to inspect. In this case security simply broke into them, resulting in damage to the luggage and some rather messy repacking.

As a result of this experience, D-X'er Martti Laine, OH2BH, says he will be going hand carried from now on. When he operates the ARRL SSB Contest from the Canary Islands as EA8BH it will be using the new Yaesu FT-897. This is a radio that weighs in at only 8 and 1/2 pounds and can be toted along in the passanger cabin with him.

Laine says that EA8BH will be on the air on all bands using the new Yaesu radio. He adds that the QSL for this operation will feature information on this new, compact DXpedition, approach.

>From down-under I'm Jim Meachen, ZL2BHF, for the Amateur Radio Newsline.

--

Several D-X publications quote Laine as saying that during these turbulent times it is advantageous to have all your equipment hand carried. He says that such rigs as the FT-897 and the FinnFet FF-1001 solid-state kilowatt will all fit into a small airline hand-carry bag. Laine adds that if you work him, QSL direct to OH2BH. (OPDX, others)

**

ON THE AIR: CELEBRATING THE FIRST NATIONAL WILDLIFE REFUGE

Meanwhile, closer to home, the Vero Beach Amateur Radio Club as announced a special evebt operation for March 15th and 16th. From 1400 to 2100 UTC both dats the club will operate station W4OT to celebrate the 100th Anniversary of the nation's first National Wildlife Refuge on Pelican Island. Suggested frequencies are 14.290, 21.360 and 28.390 Mhz. If you make contact QSL to P O Box 2082, Vero Beach Florida. The zipcode is 32961. (VBARC)

**

INTERNATIONAL - UK: THE RADIO COMMUNICATIONS FOUNDATION

The Radio Society of Great Britain has announced the launch of the Radio Communications Foundation. As envisioned. the new foundation will be used by the RSGB to channel all its work in the field of education and training. It will support the promotion of amateur radio to a wider audience in the U-K. The Foundation is being registered as a charity and will operate independently of the normal commercial activities of the RSGB. (GB2RS)

**

INTERNATIONAL - GERMANY: NOMINATIONS SOUGHT FOR THE HORKHEIMER PRIZE

The German national ham radio society -- the DARC -- is seeking nominations for the 3003 Horkheimer Prize. The award is named after Rudolf Horkheimer was one of the first radio amateurs in Germany. Its awarded annually by the DARC for contributions to amateur radio, its further development, and the goals of the society.

According to DARC, the prize can be awarded to one or more persons or institutions. Any member of an amateur radio society in the IARU is entitled to field a nomination and self-nominations are also allowed.

The 2003 prize will be awarded during the Ham Radio 2003 fair in Friedrichshafen. Nominations must be submitted by March 31st to DARC, Lindenallee 4, 34225 Baunatal, Germany. (GB2RS)

**

THE WORLD ABOVE 50 MHZ: QSOP PARTY HONOR ROLLS POSTED

Back here in the U-S-A, Tim Marek, K7XC, says over the W6YX VHF Reflector that the V-H-F Q-S-O Party Honor Rolls through September 2002 have been updated and posted to his website. The U-R-L is a bit complex to read, so look for them in the print edition of this week’s Amateur Radio Newsline report. You can find it http://k7xc.tripod.com/VHF_Records/index.html (K7XC)

**

DX

In D-X word that G3TBK, is returning to work in St. Vincent and will be active again as J88DR until the 10th of April. He will be on all bands from 80 through 10 meters. mostly CW. There may also be a possibility of some operation on 160 metres if he can find sufficient space for an antenna. All QSLs go to G3TBK, either via the bureau or direct. (RSGB)

And FO5RK reports that he is planning to be active again from Rapa Island through March 20th. Rapa Island is located in the Australs group, which counts as a separate DXCC entity from French Polynesia. QSL this one as directed on the air. (OPDX)

**

THAT FINAL ITEM: W2NSD ADVISES ON THE WAR ON TERRORISM

And finally this week a word on how to win the War on Terrorism without firing very many shots. It comes in some advice from 73 Magazine's Wayne Green, W2NSD. And as we hear from Blair Alper, KA9SEQ, Green has some rather interesting albeit offbeat ideas -- all using radio:

--

Writing in his March editorial, the prolific W-2-Never-Die quotes a rather strange idea he says comes from Newsmax.com. Its a story recommending that Israel set up narrow passages at every checkpoint with sandbags to absord any explosions. Then use UHF transmitters to detonate any explosives that a terrorist may be trying to sneak in. That says Green would get rid of a lot of suicide bombers in short order.

But Green takes it a lot futher. He suggests that the United States adopt a psychological approach to fighting terrorists. He says that we should set up a series of radio and television broadcasts in the Arabic language. He says that the programs would be made up of psychics supposedly interviewing dead suicide bombers who are screaming that they are roasting in hell and not enjoying the after-life that they were promised. The psychics would also claim that God is furious with them and has put a curse on their families.

Would it work? On this one we won't even venture a guess. But 73's Green does add this comment. He says that it is far better to outsmart enemies than to try to outfight them. It's cheaper, says W2NSD, and that it saves lives.

For the Amateur Radio Newsline, I'm Blair Alper, KA9SEQ.

--

Green also has some advice for the United States military on how not to fight a war with Iraq. That one you really have to read for yourself. You will find that information on page 4 of the March 2003 issue of 73. (73 Magazine)

314. Radio Station with Heart 99.7 KYYS

Newsgroup: rec.radio.broadcasting
Date: 2003-03-09 21:11:00 UTC
From: cars4christmas@yahoo.com
Message-ID: <b4gal4jjf1@xuxa.iecc.com>
Source record: 8791

Cars 4 Christmas meets a Radio Station with Heart in Kansas City

In 1999 Radio station 99.7 KYYS was approached by Cars 4 Christmas founder Terry Franz, to help the Kansas City project grow and he was greeted with open arms. Cars 4 Christmas is a not for profit organization that provides free basic transportation to less fortunate individuals that are unable to obtain it on their own. Recipients have included a young mother with a 2 year old child with heart problems walking a hour in the cold morning to get to a bus stop to get the child to daycare and her to her job, A man caring for a premature baby on oxygen and a feeding tube that was riding the bus in a emergency to get his child to Childrens Mercy Hospital, and a disabled Desert Storm Veteran with his family living on disability and unable to afford a car to get to doctor appointments.

Morning show hosts Max, Tanna ,& Moffit putting their hearts in the project, asked listeners to donate vehicles and had people submit stories on why they or someone they knew needed a free vehicle. The vehicles donated were not the newest or fanciest vehicles but were checked to be mechanically sound and safety inspected by the Cars 4 Christmas organization. They read recipient stories daily on the air calling it the Twelve days of Christmas then called them to say they would receive a car on Christmas Eve morning. Listeners called and offered money for gas , insurance or whatever else might be needed. Some in tears after hearing the stories , unable to make a donation but calling to say how proud they were to be KY listeners.

Recipients didnt care how new the car was as it wasnt about winning a prize, it was about freedom, the freedom to get to the doctor, store or get to a job across town, get to town if you live in a rural area or live where public transportation is poor. Since 1999 they have helped give over a hundred vehicles to people in the community and if you wonder if there is a need for such a project, they receive over 2000 requests a year in Kansas City alone.

I work with other radio stations but the key to our success as been the personal efforts of Max , Tanna, & Moffit , Franz stated at a recent interview. Some DJs think it is just a great radio promotion giving away cars at Christmas but they dont have the heart these guys do.

Franz added a story about Tanna Guthrie; Our Christmas eve give away was over and it was Jan 5th , Tanna called me and said she never does this but she saw a woman walking in the snow with groceries about 9:00 at night and stopped to offer her a ride. During the ride she learn the woman had recently gotten herself out of a homeless shelter and

was living on disability income. She was hoping to save some money to get a vehicle so she could get out of the cold walking everywhere but mostly so she could visit her daughter and grandchildren about 40 miles away. Tanna called me late that night and asked if we could help this lady. A few days later we gave her a 1992 cavalier and she thought an angel had given her a ride and answered her prayers. There was no television cameras, mentions on the radio, or newpaper articles, and I dont think the lady knew Tanna was a radio personality but she is an angel. They do this because they know they are making a difference in the community. In fact, I have never mentioned this story to anyone until now Franz added.

A radio station with a heart does not say enough, if arbitron ratings measured DJs by what they did in the community these guys would go off the chart. Last Christmas Eve 25 area Car dealers , repair shops, parts stores, gas stations joined the program. Local TV stations joined the live remote with Max Floyd, Tanna Guthrie, and Larry Moffit, to pass out keys to the cars on live TV news shows. Truly a community effort, even local law enforcement was there to install donated child safety seats and listeners brought presents to put in the vehicles.

Cars 4 Christmas was also active in Junction City, Kansas and has hopes of expanding to Springfield, St. Louis and Columbia in 2003 and looking for more radio stations with a heart. For information see www.cars4christmas.org

It has happened here again in the northeast. NYC now has TWO hip-hop stations(97.1 & 105.1FM), FOUR "pop-40" stations(95.5, 100.3, 106.1 just east, on the Island, and the latest casualty, "Where rock once lived", FM102.7!!). New York is also served by TWO modern rocks(92.3 and 92.7 - again from the Island).

In contrast, New York is covered by ZERO country stations(the last, FM107.1, went Latino in 2001), and only ONE Classic Rock(104.3 - the ex-classical station).

How I'd love to go back in time the 70s-80s, and tell folks all this, that hip-hop actually is the mainstream of our culture. I'd probably either get shot or sent to Bellvue - but there it is, like it is.

Sad - what I'd do to be in a parking lot, ordering a burger and shake from an ENGLISH-speaking drive-up, and hear a rusty old CHEVY pickup - not some tricked out, farty sounding rice suckin' 92 Acura!! - blasting Van Halen(Lee Roth mind you), Bryan Adams, or some good ole' Zeppelin.

I don't understand why people like Chris can't grasp that others might like music that they don't. Personally, I am extremely picky about what I'll listen to WRT hip-hop but some of it is really good and, believe it or not, takes more than two brain cells to enjoy. (Arrested Development and A Tribe Called Quest, for example.) I'll even listen to stuff like Ludacris that has no redeeming social value whatsoever if the beats and the rhymes are good enough (and their lyrics are pretty good). Not all rap artists write songs about how many people they shot this morning.

BTW, I am watching this thread very carefully. I'm concerned that it is going to descend into a flame war. Everyone's done a great job of avoiding the personal attacks so far; please keep it civil. Thanks.

Are you kidding?

Each of the companies you mentioned is either nothing but:

a) a jukebox (DMX)
b) filled with lame programming/soundbytes that repeat over and over
and over (XM)
c) voice-tracked boringness (Sirius)

To return to decent music/radio, you would have to invent a time
machine. Live, interesting choices simply don't exist in most areas
from any source. Some Internet radio maybe, but generally, it too is
focused too much on repeating programs, or jukebox styled radio.

I've tried all of the above mentioned. You just can't pay any amount
to get the quality of programming you could for free even as late as
the mid 1990s in most areas.

I don't know why there is so much denial about what was essentially
the nuts n' bolts of American culture from basically the '50s up
untill the late '80s or so. To consider it "KKK" culture is (sorry)
ludicrous, and beyond that, at least to my knowledge weren't trying to
rewrite the English language:

Ludacris, Mystikal, 50(pron. "fitty"cent)Cent - fer cryin' out loud!
My kids will NOT become a part of THAT culture.

I will admit I do like some rap - as long as it's more than 20 years
old. But I will always remain partial to those parts of our culture
that to me remain as iconic of it as the good ole' American flag.
Which I assure you will never be waved over Bush's 51st state!

-ChrisCoaster
"Awhh you should've seen what I tore in half with the front end of my

[Chris]
> I don't know why there is so much denial about what was essentially
> the nuts n' bolts of American culture from basically the '50s up
> untill the late '80s or so. To consider it "KKK" culture is (sorry)
> ludicrous, and beyond that, at least to my knowledge weren't trying to
> rewrite the English language:

No one is telling you you have to like
{insert-specific-music-genre-here}.

No one is denying that certain things happened between the 50s and the
80s, although your comment about "KKK culture" seems to imply you
think everything that happened back then was ok. (I'm not saying
that's the way you feel. I'm saying that's what it might look like to
some people.)

All *I* personally am saying is... hold on for a second. Let me tell
you a quick story:

If you visit Google Groups and search for posts of mine from a few
years ago, you'll notice comments about Cleveland's WENZ-FM switching
from modern rock to urban, with an emphasis on rap and current R&B.

There were a couple people who were really pissed off about that flip!

But the fact of the matter is that the majority of residents of the
city of Cleveland (and a number of suburbs) are African-American and
Hispanic. Radio One very likely bought the station because they saw a
huge market not being served, and wanted to make money; programming to
the people who make up most of the population of Cleveland is *what
they do.*

I was very sad to see 107.9 the End shuttered. But the fact is that it
never made money. Beasley(sp?), Ardman and Clear Channel, the three
companies that owned the station between 1992 and 1999, had other
properties too. In fact, Clear Channel (at the time) owned WNCX-FM,
which was a big money-maker... classic rock and oldies have always
played well in this market, and in addition, WNCX has Howard Stern in
the morning and he was *hot* back then.

When Clear Channel bought Jacor, which already had five stations in Cleveland, they dumped WNCX to Infinity, and suddenly had two other properties (WENZ and WERE 1300) that were poor performers. Both stations were sold to Radio One, which also picked up adult urban WZAK 93.1 and "Solid Gold Soul" WJMO 1490.

I mean, I can't stand the homogenization that pervades radio these days -- and wasn't that the original point of this thread? -- but on the other hand, I don't expect any radio station owner to hold on to a money-loser, either.

> I will admit I do like some rap - as long as it's more than 20 years
> old.

You really ought to get yourself an Arrested Development CD.
"3 years, 5 months and 2 Days in the Life of..." was their breakthrough album. It RAWKS. I think you'll be pleasantly surprised. Speech, one of the members of AD, has a new solo album and a website (speechmusic.com). He mentions on the website that the band also has a new album. Look into it.

No I don't kid around. I listen and grab cut's off DMX and Sirius. The closer it is to a Juke Box, the more I like it. I would agree that both Sirius and XM should shitcan the stupid soundbites and useless announcers that step on the intro and outros of some songs. DMX provides the best service. Wall to wall music with no annoying interruptions.

I vote for the Sangean DT-200V. It meets all your requirements to the
tee that you mention. I've owned them for years and would never use
anything else.

They are available from the C Crane Company (www.ccrane.com) and run
$65. But it's well worth the price.

For sale:

The "Radio Crazy" is back! Partial ownership of
fulltime 1 KW AM radio station for sale. Joint
venture.

In S. Georgia in very nice community of about 5,000
population. Only AM in community. Near much larger
city. NO real estate included. Studio/transmitter site
combined and leased at $400.00/month.

Active or inactive investors with at least $10,000 are
welcome. PLEASE! No "AM bashers" or "negative nabobs"
(I don't know what a nabob is, either! HI!)

Tel: (478)741-1710 in Macon, GA.

I am NOT an agent, broker, shill, owner or part owner
of this station. You heard it first here, kiddies!

I am not a crook! In fact I am former Chief Engineer
for a 5 KW fulltime AM in New York City.

73,

Meyer Gottesman, W6GIV

I have heard a lot of modern rap - most of it by accident - blaring
out of car windows, over the PA in record stores, surfing the cable,
including AD that you mentioned. I'm simply not impressed, even
though I will admit the beat can be quite catching.

Nor do I condone *everything* that went on in American culture 20 to
50 years ago. I simply mourn the loss of everything CULTURAL - that
is, our music, movies, even the English language to some point - over
that period.

Doesn't it piss you off when you go into a retail establishment,
particularly one where you must order something, only to have to
repeat the order 2 or 3 times? Past that, the counter help then needs
to go in back, ask their supe or boss to come out to clarify to them
what you are asking for.

Why? Because even in the business world(not limited btw to those
"glass towers") in this country knowing English is not even a
REQUIREMENT to get a ferakin' job!! Call me a racist if you want,
flame me, I don't care - but your native tongue, whatever it may be,
is your own business - AT HOME.

In the American business world, from the CEO's corner office down to
the individual cleaning the toilets at X-Mart, English is the spoken
language. It is the language when you are asking directions in the
store. It is the language when you request the concierge to call a

taxi to your hotel.

And...

It is the language used to alert a passing "clerk" that there is a suspicious looking person or sign of smoke in a place of business, where seconds make the difference between an arrest or a mass shooting, or between an extinguished dumpster fire or the loss of dozens of lives.

These people are coming to OUR shores to find a better life, jobs, education. They therefore should be required to learn OUR language and USE it while they are here.

Now come on Scott Muni, play me some rock n' roll!

-ChrisCoaster

Amateur Radio Newsline™ Report 1335 – March 14, 2003

Amateur Radio Newsline report number 1335 with a release date of Friday, March 14 2003 to follow in 5-4-3-2-1.

The following is a Q-S-T. The FCC has a new tool to keep people honest and the ARRL tries again in Congress. These stories are first on Amateur Radio Newsline report number 1335 coming your way right now.

(Billboard Cart Here)

**

RADIO RULES: FCC SAYS YOU HAVE TO TELL THE TRUTH

If you have to contact the FCC, be sure to tell the truth. This is because the Commission has revised its own rules to strengthen the requirements for the submission of truthful statements to the agency. Amateur Radio Newsline's Bruce Tennant, K6PZW, tells you who is affected and what it all means:

--
As amended, section 1.17 of the Commission's Rules prohibits written and oral statements of fact that are intentionally incorrect or misleading. It also prohibits written statements of fact that are made without a reasonable basis for believing that the statement is correct and not misleading.

In requiring that submitters of written statements in fact-based adjudications and investigations have a reasonable basis to believe that what they say is correct and not misleading, the Commission is imposing on the submitters a duty of due diligence. This includes the obligation to take appropriate affirmative steps to determine the truthfulness of what is being submitted.

The now revised section 1.17 broadens the category of persons subject to its requirements to include any applicant for, or holder of, any Commission authorization. Also subject is any person performing without Commission authorization an activity that requires Commission authorization; any recipient of a Commission citation or letter of inquiry, or any person subject to a Commission or staff investigation

Others covered include those in a proceeding to amend the FM or Television Table of Allotments, any person filing an expression of interest, and, to the extent not already covered, any cable operator or common carrier.

Perhaps the most interesting of these is any person performing without Commission authorization an activity that requires Commission authorization. That's a fancy, legalese way of saying bootleggers. And its telling bootleggers that lying to the Commission can bring with it some pretty hefty penalties. Consequences far more severe than just the act of unlicensed

operation, itself.

The amended rule applies to all investigatory and adjudicatory matters. It does not apply to declaratory ruling or to rulemaking proceedings except for expressions of interest in proceedings to amend the FM or Television Table of Allotments, and tariff proceedings. Attorneys and engineers acting in their representational capacities are not covered by the amended rule.

Simply stated, almost everyone is now subject to the revised and enhanced section 1.17 FCC rule. This includes all of us with Amateur Radio Service callsaigns attached to our names.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, reporting.

--

The FCC claims that this new rule is a clearer, more comprehensive, and more focused articulation of the standards for truthful statements than the old rule. The Commission also said that it will enhance the effectiveness of its enforcement efforts. You can read it all at: http://hraunfoss.fcc.gov/edocs_public/attachmatch/DOC-231908A1.doc and at http://hraunfoss.fcc.gov/edocs_public/attachmatch/FCC-03-45A1.doc (FCC)

**

RADIO RULES: FCC TO CONSIDER RECEIVER STANDARDS

The FCC has decided to consider on an item that it has been extremely reluctant to act on in the past. That being the setting of interference immunity performance specifications for receivers.

Specifically, the FCC says that it will consider a Notice of Inquiry concerning the possibility of incorporating receiver interference immunity performance specifications into its spectrum policy on a broader basis.

It all falls under MM Docket No. 00-39. Its titled Interference Immunity Performance Specifications for Radio Receivers; Review of the Commission's Rules and Policies Affecting the Conversion to Digital Television. You can read more on the web at the U-R-L appearing in the print edition of this weeks Amateur Radio Newsline report. Its all in cyberspace at http://hraunfoss.fcc.gov/edocs_public/attachmatch/DOC-231820A1.doc (CGC)

**

RADIO POLITICS: AR SPECTRUM PROTECTION ACT IN BOTH HOUSES

The ARRL Letter reports that the Amateur Radio Spectrum Protection Act of 2003 now has been introduced in both chambers of Congress. Idaho Senator Michael Crapo introduced the Senate version of the bill, S 537, on March 6. Its original cosponsors were Senators Daniel Akaka and Larry Craig. Florida Representative Michael Bilirakis put the latest House version of the bill, HR 713, into the legislative hopper on February 12th.

HR 713 and S 537 are twin ARRL initiatives aimed at ensuring the availability of spectrum to Amateur Radio operators. The legislation would protect existing

Amateur Radio spectrum against reallocations to -- or sharing with -- other services unless the FCC provides equivalent replacement spectrum elsewhere.

The Amateur Radio Spectrum Protection Act legislation has already been introduced twice before Congress. League President Jim Haynie, W5JBP, believes this third time could be the proverbial charm. (ARRL)

HIGH TECH SHOWDOWN: IRAQ MAY TRY TO JAM SATS

I'm Blair Alper, KA9SEQ, with this late breaking story.

If Iraq could tries to jam U.S. military satellites during a possible invasion, it will be in for quite a surprise. This, according to a Pentagon official who hints that the United States already has countermeasures in place.

News reports say that Iraq is reportedly seeking ways to jam the Global Positioning Satellites that would be used to help guide so-called smart bombs. But Brigadier General Franklin Blaisdell who is the Air Force's space operations director says it really can’t be done these days. He says that any enemy that would depend on G-P-S jammers for their livelihood is in grave trouble.

Blaisdell says that, as it did during the 1991 Persian Gulf War, the Defense Department is buying access to commercial communications satellites. This, to help provide the massive bandwidth needed to connect all the high-tech gear a modern army uses. He adds that the military also successfully launched a broadband communications satellite on Monday the 10th.

For the Amateur Radio Newsline, Im Blair Alper, KA9SEQ, reporting.

**

RESCUE RADIO: HAM RADIO ASSISTANCE REQUESTED IN MA. PLANE CRASH

Ham radio was called out on March 3rd to help locate a missing aircracft. Amateur Radio Newsline’s Norm Seeley, KI7UP, has the rest of the story:

--
John Spencer, WA1NTI, was listening to his radio club’s 146.91 MHz repeater in the Pittsfiels Massachusetts area early on Monday morning March 3rd. That’s when John Lindley, WA1ZHM , put out a call looking for hams who could assist in locating a downed aircraft.

According to information provided by Arthur Rowe, N1ORC, Lindley said it was the Massachusetts State Police who requested radio amateurs assist in the search. In fact it was about 4 a.m. when a Lieutenant from the State Police Task Force came knocking on WA1ZHM's door. At the time the location of the aircraft was unknown and there was a wide search area to cover. The police told Lindley that the agency needed people with radio knowledge and equipment who could help triangulate the location.

Spencer says that the operators who could help out were told to report to the Sheffield Massachusetts Police Department. There they were briefed and shown an area of Beartown State Forest where the crash site was believed to be. The hams were tasked with listening for the airplanes 121.5 MHz Emergency Locator Transmitter and trying to T-hunt its exact location.

Gary Kleinerman, K1SXA, was put in charge of the group of seven hams. The downed aircraft was located by a Search and Rescue helicopter about 3 miles in from where Kleinerman and Spencer had been assigned to search. The chopper pilot also saw that there was at least one survivor.

Due to terrain, another heavy-duty rescue helicopter was called in from Albany New York to help rescue three boys who survived the crash. Unfortunately rescuers found the boys parents and two of their siblings were dead at the scene.

And even though the ham radio operators were not the first to find the downed aircraft, those involved in organizing the search and rescue effort thought enough of the skill of radio amateurs to have them take part. That's why they knocked on WA1ZHM's door in the middle of the night.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP.
--

The three hour rescue involved police, fire and E-M-S from Massachusetts and New York. Volunteer manpower for the search came from Massachustts and Connecticut. (N1ORC)

**

ENFORCEMENT: NO AUTOMATIC CONTROL FOR YOU

On the enforcement scene, the FCC told David Price, WA6FUL, that he may not operate his repeaters under automatic control. This, while the enforcement Bureau reviews allegations of rules violations.

In a letter to Price from the FCC's Riley Hollingsworth, the Redwood City California ham was informed that these include charges of failure to identify and transmitting false call signs. Price was also warned that continued violations could lead to a fine or license revocation proceedings filed against him. (FCC)

**

ENFORCEMENT: DOJ SEIZES WEB SITE DOMAIN USED FOR ILLEGAL ACTIVITY

Sellers of allegedly illegal FM transmitters might want to take heed. Bob Gonsett's CGC Communicator reports that the government has seized a web site used to sell chips designed to circumvent electronic copyright protection. And now a Washington Post news story quotes government officials as indicatinfg that this move could be a harbinger of other such enforcement actions. Its all on-line in cyberspace at http://www.washingtonpost.com/wp-dyn/articles/A7996-2003Feb26.html (CGC)

**

RADIO RULES: FCC ADJUSTS ALLOCATIONS BELOW 28 MHZ

Also from the CGC Communicator comes word that the FCC has amended various parts of its rules. This, to implement the decisions from the World Radiocommunication Conferences regarding various frequency bands below 28 MHz.

Affected spectrum and users include the expand A M Broadcast Band, International Broadcast Stations, the Amateur Service, and continued use of 26.110, 26.130, 26.150 and 26.170 MHz by Broadcast Auxiliary Remote Pickup stations. There appeared to be no earthshaking items affecting the Amateur Radio Service. Its too is in cyberspace at http://hraunfoss.fcc.gov/edocs_public/attachmatch/FCC-03-39A1.doc (CGC)

**

NAMES IN THE NEWS: N1WRY BIKES THE SOUTH-EAST

Jason Baack, N1WRY, says that he will be looking for a few good contacts. This, as he bikes across the South-Eastern United States over the next few months.

The SERA Repeater Journal says that Baack will be riding through Georgia and Florida during March as part of his 400 mile trek. His bicycle is equipped with VHF FM and High Frequency SSB gear. For more information please drop by Jason's website at www.n1rwy.com (Repeater Journal)

**

HAMVENTION 2003: N8IGS REPLACES KB8OUO AS GENERAL CHAIRMAN

With only 10 weeks till the doors open on Hamvention 2003, Pat Neff, N8IGS, has swapped places with Jim Trangenstein, KB8OUO, and become the event's General Chairman. According to sources close to Hamvention, Trangenstein stepped down because he had changed jobs. This left him little time to full-fill the obligations of the Hamvention's General Chairman's post. Neff says that plans for Hamvention are on-target:

--
Pat Neff, N8IGS: "We are planning on having a great 52nd show and see interest picking up as we get closer to Hamvention 2003. And, we continue to look at ways to inprove the show and make it the Amateur Radio event that every ham should experience at least once in their lifetime."
--

Hamvention 2003 is slated for May 16th through the 18th at its longtime home at the Hara Arena in Dayton Ohio. More information is on the web at www. hamvention.org (ARNewsline™)

**

HAMVENTION 2003: 11TH ANNUAL CONTEST DINNER

Tickets are now on sale for the 11th Annual Dayton Contest Dinner. According to this years Master of Ceremonies is Tim Duffy, K3LR, this years gathnering will be held on Saturday night, May 17th, at 6:30 PM at the Crowne Plaza Hotel on 5th and Jefferson Streets in downtown Dayton. Rich Strand, KL7RA, is scheduled to be the after dinner speaker and the 2003 Contest Hall of Fame inductees will be formally announced by the CQ WorldWide Contest Director Bob Cox, K3EST.

All dinner ticket orders are handled exclusively by Craig Clark, K1QX at the Radio Bookstore up in Ringe New Hampshire. You can place your order Monday through Friday from 10 AM to 6 PM eastern by calling 1-800-457-7373. International orders must use the comopany's 603-899-6957 direct dial line. For more information please visit www.radio-ware.com on the World Wide Web (K3LR)

**

BREAK 2

HAM RADIO IN SPACE: NASA ANNOUNCES PLANS FOR OSP

In his report last week on the future of ham radio in space Roy Neal, K6DUE, mentioned the possibility of a new vehicle to augment the space shuttle fleet. Roy is back this week with more on that part of the story:

--
Audio report only. Hear it at www.arnewsline.org
--

According to Space Daily, the Orbital Space Plane will be launched using a rocket booster and will land much like an airplane. (ARNewsline™ from news reports)

**

HAM RADIO IN SPACE: HAPPY BIRTHDAY AO-11

The OSCAR-11 ham radio satellite celebrated its 19th birthday on March 9th. Almost two decades old, this amazing bird continues to output consistent

signals on its 145.826 and 2401.5 MHz. beacons. It also achieved a remarkable 100,000 orbits on October 31st, 2002. (ANS)

**

NEW FRONTIERS: THE DCC WANTS YOUR PAPERS

Technical papers are being solicited for presentation at the 22nd Annual ARRL and TAPR Digital Communications Conference. The gathering is slated for Hartford, Connecticut, from September 19th to the 21st.

These papers will also be published in the Conference Proceedings published by the ARRL. Presentation by the author at the conference is not required for publication. Information on paper submission guidelines are available on-line at www.tapr.org/dcc.

Submission of papers is due by August 5th, 2003 and should be sent to Maty Weinberg, ARRL Headquarters, 225 Main Street, Newington, Connecticut 06111 or by e-mail to maty@arrl.org (WB8IMY, VHF Reflector)

INTERNATIONAL - AUSTRALIA: THE MORSECODIANS RADIO SHOW

Mark Titterington, W1EOF, says over the web that ABC Australia has a radio program available about the early history of the telegraph called "The MoreseCodians." The program traces the electric telegraph from its invention in 1832 by Samuel Morse until it became obsolete in V-K land in the early 1960s when the last line ceased to function in Australia.

The show’s full summary can be found by taking your web browser to www.abc.net.au/rn/history/hindsight, click on more summeries and then scrolling down to the link "MorseCodians." W1EOF says that he is making arrangements to make the program audio available on the hamnutz.com website. He also plans to distribute it on CD for those that don't have a fast enough internet connection. His e-mail is w1eof@hamnutz.com. (W1EOF)

**

INTERNATIONAL - WORLDWIDE: RADIOMINISTRIES.ORG

Radioministries.org is a new website dedicated to assisting missionaries in remote regions with the communications through Amateur Radio. According to the groups Director, Scott Thile, K4SET, many missionary and relief groups are working in areas without access to land based phones, cell phones, or the Internet. These groups must find alternative ways to communicate within the group, and with family, friends and supporters back home.

Thile says that only a small number can afford satellite telephone service. Others must rely on alternate channels including ham radio.

K4SET hopes the new website will be of assistance to those in the missionary field. For more information visit http:// radioministries.org. You can contact Thile by e-mail to k4set@radioministries.org (K4SET)

**

DX

In D-X, Peter McKay, G3WQU, who has been active for a couple of years as CN2PM and S07PM from Morocco and the Western Sahara, will be moving to East Timor at the end of March. He operates almost exclusively CW. Look for him operating with a 4 W prefix from his next Q-T-H. (GB2RS)

Also, DL2GAC, who has been active from several Papua New Guinea island groups as P29VMS, has moved on to the Solomon Islands. He plans to be active as H44MS until mid-April. (GB2RS)

And the Balkan Contest Club LZ1KZA will operate with the special event callsign LZ125O through the 31st of March. This to commemorate the 125th anniversary of the liberation of Bulgaria. Activity is on CW, SSB and RTTY on all the HF bands. (Via e-mail)

**

THAT FINAL ITEM: A MILESTONE FOR SETI@HOME

And finally this week a story about a screen saver that is close to the hearts of many radio amateurs. Amateur Radio Newline's Henry Feinberg, K2SSQ, is here with the latest on a project called seti@home:

--
After what adds up to more than a million years of computation by well over 4 million computers networked worldwide, the SETI@home screensaver that crunches data in search of intelligent signals from space has produced a list of candidate radio sources that deserve a second look. And in a few days the scientists behind the project will use a giant radio telescope to take a second look based on this data.

SETI@home is a more than the usual screen saver. Its actually a very high tech data processing program disguised as a screen saver. It springs into action after a computer is idle for a given length of time. Its purpose is to analyze radio telescope data downloaded to the machine over the Internet, search for strong or unusual signals from space and file a report back.

Many hams world-wide have embraced SETI@home and have it running around the clock on their P-C's. They are the first to tell you that that the project is in keeping with the spirit of Amateur Radio itself.

Now, three members of the SETI@home team will head to Puerto Rico to use the giant radio telescope at Arecibo to revisit up to 150 places in the cosmos. These places in space have been identified as the source of possible signals from intelligent civilizations based on data already processed.

The candidates for that second look are particularly strong signals or ones that have been observed in the same spot more than once. Some of them five or six times. SETI@home project coordinators say that limited analysis of the signals will be done while the team collects the new data. This will permit the observations to be halted and repeated if -- by chance -- a very strong signal reappears.

For the Amateur Radio Newsline, I’m Henry Feinberg, K2SSQ
--

SETI@home users could find out the results of the re-observations within two to three months. More on SETI@home in next weeks Amateur Radio Newsline report. (W6RCL, Published Reports)

As much as I would like to do a whole dissertation, let me provide the simple response:

In every wave of immigrating where the immigrants were not born English speakers, it takes a generation to become bilingual. The original immigrants, in their vast and extreme majority, never become proficient in English. While they may be somewhat functional, they are not bilingual or assimilated. The first generation is bilingual and multicultural; the second generation is usually pretty assimilated.

Learning a language as an adult is extremely hard for most humans. Language learning ability is impaired upon entering adolescence, and pretty limited by adulthood.

Anecdote: New York had an Italian language station more than 50 years after the last significant immigration of Italians to the USA; Chicago still has 5 or 6 stations fulltime or part-time in Polish.

In the Four Corners area, there are several all-Navajo stations. And the Navajos have been here longer than the rest of us.

There is nothing wrong with being bilingual or a polyglot. In fact, it improves cogitative skills and the ability to reason.

You don't have much of a sense of humor, do you? Or political awareness,
either.

Puerto Rico has had non-binding referendums now four times do determine if
it becomes state #51.

In the pecking order, it's chances are considerably better than those of
Iraq.

I do have to ask: what is "McFly" a reference to? Some TV show?

Don't tell them that or you'll find them off to buy every CD these groups ever made. Kids love to irritate their parents. If I were you, I'd tell them you hate Kenny G and would never allow such pablum in your home. Their Kenny G collection will bloom.

If they talk about getting something pierced all you have to do is say that's a great idea and offer to go with them for a piercing of your own. You'll quickly find them filling existing piercing holes with super glue.

You're so much fun to irritate that I only regret I'm not one of your kids.

the fire this time special tues march 18 12-3 pm EST

this tuesday, march 18 from 12-3 pm on wcbn there will be a feature on the album "the fire this time," an audio documentary on the gulf war that features an electronic music soundtrack (featuring orbital, aphex twin, etc.), a multitude of field recordings and other audio sources (speeches, interviews, news broadcasts) and commentary on us relations with iraq. the cd documents the circumstances around the first gulf war and its aftermath, focusing on the mainstream media's portrayal of the war.

the show will feature a lengthy interview with grant wakefield, who produced the documentary, and deals with the current impending war with iraq and the international peace movement that has emerged in response to it. there will also be other music and audio dealing with iraq and the anti-war movement.

the cd will be released domestically on march 18 and is available at www.firethistime.org which also features a complete transcript of the cd and a multitude of other related information.

tune in to wcbn at 88.3 fm or wcbn.org on tuesday march 18 from 12-3 pm EST

WCBN - 30 Years of Freeing Your Mind - Listen to us online!

WCBN is the University of Michigan student-run community freeform radio station in Ann Arbor, Michigan. We broadcast at 200 watts to the University and its surrounding communities from the basement of the Student Activities Building in downtown treetown. We have been broadcasting a genre-less overview of music, news, and public affairs for 30 years.

WCBN's musical format is freeform, with some specialty shows. Freeform involves all different kinds of music, including jazz, reggae, blues, hip-hop, country, rock, and just about everything else under the sun. Instead of telling our DJs what to play, we allow them to select their own recordings from our vast and unique library. It is their responsibility to mix together many different kinds of music in an intelligent fashion, and show links between musical genres.

Click here to listen to our live WCBN-FM Ann Arbor broadcast!

> REQUIREMENT to get a ferakin' job!! Call me a racist if you want,
> flame me, I don't care - but your native tongue, whatever it may be,
> is your own business - AT HOME.

And exactly WTF does this have to do with music, or radio?

Alright, I agree that there are a lot of people who play their music
too loud. As long as they are *not* doing that, I can't see where it's
OK to insist that *other people* not listen to it. That's the whole
point of my replies, and each time I say something you use it as a
launching point for you to get on your soapbox. And you still haven't
answered my question, so at this point I can only assume it's because
you don't *have* a good answer.

> These people are coming to OUR shores to find a better life, jobs,
> education. They therefore should be required to learn OUR language
> and USE it while they are here.

Nice. Now, can you answer my question? I'm not calling you names. I'm
asking you a question. *A* *single* question, which you refuse to
answer. I am wondering why I even bother wasting keystrokes asking it.

Cut to the chase. Answer the question, leave the politics out of it.
One or two sentences is all that's needed. Why do you have such a
boner about people listening to music you don't like, even if they are
not listening in a manner that is intrusive to others?

To me, , 53 to late 50's. Remember, top 40 existed before rock n roll. KOWH in Omaha had 30 shares in 1953 with their Top 40 format (ref; Sept 1953 editions of Broadcasting Magazine).

Learning English as a second language is supposedly much harder. I
know (well, used to know :) Hebrew and French, and I am going to be
taking Spanish classes in a few months. None of those languages has
the large number of exceptions to common rules that English has.

Some maintain that English at a basic level is easy; speaking it to
perfection is impossible for even native speakers.

Good luck with the Spanish classes. If you do well, you can watch the soaps
on Univision.

Pitfalls in English for second-language speakers include idioms and syntax. This is frequently observed by native English speakers who drop in on English classes in foreign countries. No matter how up-to-date the institution teaching the classes, their use of idioms is almost always hopelessly out of date.

This contributes to the "Engrish" phenomenon: hilarious misapplication of English grammar rules combined with distorted colloquial diction, frequently seen in Japan...but visible throughout the non-English-speaking world.

Good move! Country music fans are well known for their patriotism and high rates of military service histories. What the DC's did in London was an incside to Texas, the Commander-in-Chief and all those that have or are serving. Did they have the right to say it? Yes. The same way radio and the fans have a right to toss their CD's away. The backtracking the DC's are trying to do now is disgraceful and shows just how vapid and shallow they really are. Let them take the fall and pay the price for now. Country music fans are also good people with forgiving souls. Maybe the DC's should cut short their money grubbing tour of Europe and do some free shows for the men and women proudly serving around the world on ships, military bases and foreward areas in the Middle East, Let them look at those faces and see how it makes them feel. Let them see who really deserve hero worship and allegience. These young people that willingly put themselves in harms way, far from their families and friends, risking death itself so that others that live under the oppressive thumb of an arrogant and murderous dictator can breath free.

I was under the impression that the military was fighting for all the good things the US stands for. One of which is freedom of speech. Doesn't it make their efforts less valiant when we then censor those who exercise the rights these men and women fought for? A real patriot would fight to keep them on the air.

We could do what Saddam would do and execute them.

I absolutely agree. It must also be said that speaking one's mind
carries consequences. One is perfectly entitled to walk up to his boss
and tell him what he thinks, but he also has to be prepared to join the
unemployment lines.

Same with entertainment types. Their job is to entertain the public.
Also, they have every right to speak their minds. What they don't get is
the guarantee that they will be immune from reaction from either those
providing them with a microphone or those who are entertained. If fans
turn against a performer for his views, that is a consequence the
performer will have to bear. If that impacts his marketability, then he
may also have to endure having his platform removed as well.

We all have the right to speak out in this country, but none of us
(performers included) is guaranteed access to a printing press or a
recording or network microphone.

> We could do what Saddam would do and execute them.

That is a bit extreme. I think losing one's job-related podium might be
sufficient.

Joe McCarthy had the solution. No censorship, just an invitation to appear
at the highly publicized un-American Activities Committee hearings. A number
of people found other lines of employment.

Yeah, that's probably why McCarthy died a penniless drunk, in disgrace and censured by his colleagues, who had finally had enough of his violations of rights guaranteed by the Constitution.

And before 27 people jump down my throat, comparing McCarthy to Bush is like comparing apples to vacuum cleaners.

What a dumb, knee-jerk reaction. I admired the Dixie Chicks for saying what they believed. Fans who don't agree and want to stop buying their songs are certainly welcome. But for a station or network to ban their songs denies those who agree with the Dixie Chicks, or those who don't care what they said, the enjoyment of their songs.

This is not what America is about.

The .1% who react create an entertainment for the 99.9% who listen, just like talk shows. Even your reaction is part of the entertainment. All bases are covered in advance in this story. DJ's pile on to be part of the story. It's better than dropping turkeys.

The trick is to find stories that have legs, which is mostly trite stereotypical stuff.

The test of a sense of humor for the Dixie Chicks is to make a country song out of it, dog died, truck broke down, unfaithful boyfriend, and career blows up at the hands of your moron audience.

Country music programmers are under tremendous pressure from angry listeners upset with the Chicks. The outpouring is really overwhelming -- to the point that it cannot be ignored.

Whether or not the appropriate response is a ban, can be debated. But some response is required. What Natalie Maines said was extremely offensive to the Chicks' core audience.

The station I work for is NOT one of the country stations that has tried to make hay out of this by pulling stupid stunts like bulldozing piles of Dixie Chicks CD's. We've tried to play it even-handedly and relatively low-key, and keep the on-air discussions relatively civil. We are owned by an artist and we treat artists with respect. Still, our e-mails and calls are running overwhelmingly in favor of banning the Chicks from the air, and the volume is unprecedented. We're hearing -- loud and clear -- that most of our folks don't want to hear the Dixie Chicks on the radio any more -- certainly not now, although attitudes may mellow over time. But the apology Natalie Maines released made things worse because it sounds like it was written by a lawyer.

It's really rather sad. This could be serious career damage for these very talented young women. And many of the victims in this are people like songwriters, radio stations, retailers and concert promoters who had nothing to do with the remark about Bush, but are likely to take some sort of economic hit for it anyway. But that's free enterprise.

Disclaimer -- I have no role whatsoever in deciding what music our station plays or doesn't play -- that's somebody else's job. I'm just explaining what we and other country stations are facing.

Freedom includes a radio station's right to play or not play songs as they
choose. We as indivduals have the right to censor whomever we want,
government does not.

Umm...The radio stations have a right to program what they feel their audiences want. THAT is what America is about. If you want to enjoy their songs, you can switch stations, or heaven forbid, go to Wal-Mart and buy their CD's.

That's a different story, entirely. When an overwhelming response from listeners says we don't want to hear them, a station has to take note.

>The station I work for is NOT one of the country stations that has

That's a station I'd listen to because it responds and acts thoughtfully and I can believe what it does is perceived to be either in my best interest or responding to the will of its audience when that will becomes obvious.

Perhaps, but notice *your* post is the first to have done so ;-) .

OK, so which performers can we think of who stuck their foot in it on a
political matter and lost airplay as a result? Two that come to my mind are
Sinead O'Connor and Holly Dunn. Those careers didn't really bounce back, but
they were nowhere near Dixie Chick level anyway.

I have yet to forgive the Chicks for Goodbye Earl, a song which celebrated
two women who murder someone for his crime after they've determined that going
through legal process would be too risky or cumbersome.

Hmm. I've been telling people that for years, though I believe
censoring personalities and artists for their opinions violates the
spirit of the First Amendment. If it's driven by listener response,
that's one thing. If it's a corporate decision designed to feed on
controversy the corporation no longer has a legitimate standing to
protest any attempt by the government to do the same thing.

Rich

This is silly, Rich. The First Amendment assures speech is free only
from government censorship. Companies and individuals are free to censor
themselves, which is what happened here. That's a free market at work.

Why don't we just stop playing Barbra Streisand records? ...or stop
watching THE WEST WING? It's all rediculous.

GELLER MEDIA INTERNATIONAL NEWSLETTER
SPRING 2003=20

KEEPING IT POWERFUL

DO YOUR SHOW ON THE AIR, NOT IN THE HALL!
It happened again last week. I'm standing in the hallway of a station,=20
overhearing a morning team talking, laughing, enjoying themselves,, and=20
having fun. THEN moments later, ON THE RADIO I am absolutely BAFFLED at=20
what happens -- They turn on the microphone...and the genuine stuff that was=
=20
going on in the hallway STOPS...

And NOW, "RADIO PRESENTING" BEGINS. OK, while they do sound slick, well=20
produced and very professional, employing excellent skill and training on=20
air, something is missing. It's fake. Manufactured. They are employing=20
craft, not art. =20

What happened to that real feeling, moments ago, of real people just being=20
together? Talking, laughing. Issues of the day, being genuine, EXPERIENCING=
=20
REAL LIFE. That thing I just heard you do two minutes ago in the HALL. =20

All great presenters on air elicit the same response in the audience. =20
Listeners say: "Although we've never met, I feel like I know this person whe=
n=20
I hear him/her on the air..." The audience feels that they could go out and=
=20
have a meal at this person's home and feel totally comfortable with him or=20
her. A total stranger, but someone they feel they know, someone on air who=
=20
has allowed the audience "in." =20

Telling the truth, a key element in powerful radio, also translates into=20
being genuine and authentic on the air. That is what powerful radio is=20
about. It works when it is real...Not these fake plastic conversations, tha=
t=20
sound manufactured, or forced to fill the time, but rather people who=20
communicate and make you feel like you know them, and that they'd have this=20
conversation ON or OFF the radio. That's when a show is in REAL power...and=
=20
it's so rare. =20
```

The closer it is to real life, a conversation around the breakfast table or=20
in the car between friends, and the less it sounds like: "and now, another=20
topic manufactured for your Radio Listening on My Radio Show..." the more=20
powerful it is.

Listeners come to radio for lots of reasons, they want to be entertained,=20
informed, inspired, and connected to other people. In these times with talk=
=20
of war, terrorism and fear looming, what people are concerned and talking=20
about outside the on air booth is powerful and real and some of that should=20
be coming through the airwaves as well.=20

So, at the risk of hammering home what you already know... it's time to=20
remember some of the basics:

1) Talk to ONE PERSON. Not "all those listeners out there in radioland..."=20=
=20
NOTE: If you are part of a team show...put an extra chair at the console or=20
table...that's your listener. Now genuinely include and involve that=20
listener.

2) Who are you? Do we know you from your show? Show Prep from your life. =20
Use your own experiences, things you've overheard, observed, or have had=20
happen to you or someone you know. Don't depend on guests or show prep=20
services or become completely dependent on the newspaper. =20

Audiences can get information from many places now. The only thing they=20
cannot get elsewhere is YOU. If you do something that offers authentic self=
=20
revelation each show and allow the audience to get to know who you are, it=20
works. (Remember though, it's never about YOU, it's always about the=20
listener, but the personal is universal and if you focus the topic in an=20
engaging way, using your truth and the power of storytelling, it will work.)

SUGGESTION: Try talking about things on the radio because you care about=20
them, things you'd talk about anyway, even if you did NOT have a radio show.=
=20
Do not feel obligated to talk about things just because they are in the=20
front of the newspaper. If you genuinely care about a topic, have thought i=
t=20
through and have a real opinion or position on it, it will work better. Whe=
n=20
in doubt, leave it out.

3) Use visuals. Describe details. I just heard American newsman and=20
commentator Paul Harvey talk about the R&R Talk conference he'd attended in=20
Los Angeles. At the very end, he not only gratefully acknowledged the=20
organizers for inviting him to Los Angeles and presenting him with an award,=
=20
but he also thanked them for giving him a "romantic weekend" at a hotel with=
=20
his wife of some 50 years, a room overlooking the ocean -- his words: "Thank=
=20

you for the Polynesian moonlight through a venetian blind... "

If you can give your listener a movie in the mind..it will always work. Use=
=20
the language to create pictures...it is powerful.

4) Finally, relax. If you relax, the natural moments of humour will come. =20
If a performance is too tight, or formatted, or rehearsed or if you are=20
nervous, it will never work as well. When you make a listener laugh, it's=20
like handing him or her a chunk of solid gold... and our research shows if=20
you make them laugh, often you 'buy" more time spent listening to you...in=20
hopes you'll make them laugh again!

NAB/RTNDA
If you are planning to be in Las Vegas next month to attend the NAB/RTNDA,=20
please find me and say hello...I will be hosting a panel on April 7th at 2:1=
5=20
PM in the Hilton, on Powerful AIrchecking Techniques. =20

PRODUCER'S WORKSHOP 2003 set for October 11, 2003

SAVE THE DATEl Come if you can. Mark the date for the 2003 10th Annual=20
Geller Media International Producer's Workshop! This unique one day seminar=
=20
is geared for managers, programmers, on air talent and producers! =20
It takes place on Saturday, October 11th, 2003 at the Cornell Club in New=20
York. You must pre-register and can do so from the website =20
www.gellermedia.com or contact us and we will fax you a registration form. =20
Cost $189 includes luncheon and a copy of The Powerful Radio Workbook...

Don't miss this unique day in New York! Take your opportunity to network,=20
meet and share ideas with broadcasters from around the world! GROW YOUR SHOW=
,=20
job search, network and meet top producers from TV & Radio, all formats, fro=
m=20
all over the world. Plus GREAT Seminar sessions, idea swap, plus learn=20
techniques that work to make it powerful=E2=80=A6 from an amazing slate of s=
peakers=20
and workshop leaders! =20

I would have thought Natalie Maines of all people would know that
ideas and opinions are much easier to take in song than spoken. I'm
surprised she didn't express them that way in the first place. Then
we wouldn't be discussing this silly behavior by ABC.

Remember k.d.lang? She was actually starting to be accepted in the
country western world, even though she was gay....

Then she got onto a vocal anti-meat-eating platform ("Meat Stinks", etc.)
which made all the cattle ranchers angry. Suddenly, she wasn't being
played on too many C&W stations anymore....

>from government censorship. Companies and individuals are free to censor
>themselves, which is what happened here. That's a free market at work.

I've been telling Talk Show hosts this for years when they complained that their First Amendment rights were being violated - that they were being censored by management. While the "official" prohibition is on the government, I think most Americans see the spirit of it as much broader.

Are we willing to ban every artist who says or sings something we don't like? Sounds like the death of Hip Hop. What would happen if Eminem or 50Cent had done the same thing? How many stations would stop playing them and how many listeners would complain to either force stations to drop them or object to banning them? My guess is that Hip Hop listeners would object to banning. They're used to artists speaking their minds.

Is there more free speech in Hip Hop than in Country?

It'll be interesting to watch how many Hip Hop artists release songs commenting on the war and how many of them get banned. I'll bet there are artists all over this country recording such songs as we type.

Source record: 8614

I just updated my Iraq War information pages at www.MilAirComms.com
This includes military frequencies and SWL freqs and schedules.

Just copies KOL Israel's news broadcast at 1730 UTC on 17545 (excellent signal into Daytona Beach, FL). KOL Israel is reporting that they feel very strong that the war will begin VERY shortly after the 8 PM EST deadline. They feel strong that the war will begin in the early morning hours (local Israel time) as well as they have a strong feeling that Iraq will launch an attack on Israel in the early morning hours as well.

I'm sure the next few days/weeks are going to be busy on the airwaves..

393. Boycott Hiphop CD

Newsgroup: rec.radio.broadcasting
Date: 2003-03-20 12:42:57 UTC
From: a online hiphop <jharri7602@attbi.com>
Message-ID: <b5cd0hnc1@xuxa.iecc.com>
Source record: 8622

[Moderator's note: Wasn't sure whether or not to post this. Might be relevant in light of the Dixie Chicks thread!]

We are a concerned citizens group and we are asking you to Boycott a California hiphop

group with a CD called "OUT THA TRUNK" because we feel their lyrics have gone too

far.They have a huge web following but I wont mention

the web site because I don\'t want to draw it any attention. We were sucessful from getting

OUT THA TRUNK removed from the shelves of the

Warehouse Chain. Also because of me the

FYE chain is not accepting the CD. We are trying to get the CD off the shelves at the

Rasputin Chain but have been uncessful. However they

have a huge presence on the Internet and we need your help driving them off the net, and

are asking you not to patronize them or buy their CD.

We will not give you their home site but some of the other sites link to their site and we can

help that. OUT THA TRUNK is on the following sites:

Below are the sites that we would like you to complain to about the CD but more importantly

please write the

two major hiphop radio stations that OUT THA TRUNK is submitted to for rotation in the US

:

106Kmel

(write: bigvonjohnson@clearchannel.com or jamesarcher@clearchannel.com) and Hot97

(write: hot97@hot97.com) Write in Subject field "Dont Play OUT THA TRUNK" if they

get

enough of these letters they will not

add to rotations and all the other Stations will follow suit.Remember these stations

broadcast

worldwide on the

internet also. Also please write or call you local station.

Also Boycott these sites

1. http://www.newmusic.clearchannel.com/artist/SanFranciscoHipHop.com

2. http://www.artists.mp3s.com/artists/371/out_the_trunk.html

3.www.AMAZON.com

www.CDBaby.com www.CDNow.com (if you go to

these sites and keyword

OUT THA TRUNK) those are top sites they are on but they

are on a lot more sites they we are boycotting.Also please write the sites and express your

displeasure with the CD and ask that they remove it.

Please help us even if you like hiphop because it will help hiphop as a whole in the end.

Thank You

Sorry if you dont share our enthusiasm and we will try to make this a one time mailing. If

there is a mistake and we mail twice plese put remove in subject window

Except that the First Amendment defines what the government may do, not
what corporations or private individuals may do. There is no provision
to micro-manage corporate motives in the Bill of Rights.

Not even!

Modern day rap is mostly one guy spouting psychopathic gibberish over a mis-matched drum machine. Listen to someone like 50-cent or any of these new people and you'll see what I mean.

You don't have the days of an MC and a deejay in the background spinning and sampling beats anymore where the MC would rap in time to the beats pumped by the deejay.

Guess they don't want to pay royalties on the loops they sample.....cheap bastards.

There's no hook!

For sale:

(The Radio Crazy is back!!)

Partial ownership of 1 KW fulltime AM radio station in Quitman, GA. Brooks county. Near Valdosta, GA.

Joint venture. WSFB, 1490 KHz, 1 KW. On the air since 1955. The only AM in Brooks county. Nice area. 900 historic register buildings in Quitman!

Asking price is $75,000. NO real estate is included. Studios and transmitter under one roof. Leased at $400.00 per month.

Active or inactive investors with at least $10,000 each are welcome. You must be a US citizen with no felony convictions. (FCC policy).

The "Radio Crazy" is not THAT crazy! Hi! He is a semi-retired broadcast engineer. Last job in radio was Chief Engineer for a 5 KW AM in NYC. The "Radio Crazy" lives in Macon, GA. Ham since 1950. (W6GIV, Advanced class). Age is 67. Active and healthy.

Tel: (478)741-1710.

PLEASE! No "AM bashers" or other "negative nabobs" (Yes, I don't know what the hell a "nabob" is either but it ain't no compliment! HI!)

More details only to those who properly identify themselves. That means your REAL name and tel. number at the very least and your word of honor that you will (a) Not contact the station directly and (b) That you have available IMMEDIATELY at least $10,000.

All investors would be on the board with full voting rights if desired. No single investor may own more than 49 percent and this goes for me too!

73,

Meyer Gottesman, W6GIV
aka "The Radio Crazy"

>Is there more free speech in Hip Hop than in Country?

My guess is that speech is more free in the Hip Hop format. Of course, that's no indication of the quality of the speech itself. Clearly the Hip Hop listeners are used to the obnoxious or stupid behavior and don't mind wading through it for the occasional kernel of truth.

Although I don't listen to that format regularly, and I find it hard to take at times, I have to give credit where it's due.

Each of us will tolerate various indignities and ugliness so that we can celebrate the arts in all its forms. Anyone who decides to filter their artists by political persuasions before sampling their creations would be facing a very bleak life.

Only when an artist becomes obviously and deliberately disgusting, obnoxious, and rude, do I sit up and take notice. Naturally, like pornography, I know it when I see it. IMHO, while the Dixie Chicks may be treading closer to the fringe of what their audience will approve of, they're barely even in the same league as the Hip Hop crowd.

In this scheme of things, I think ABC is over-reacting. I'd leave it up to the Program Director of each station to decide for themselves.

At least one station is looking at the subject correctly as reported in the Thursday (3/20/03) Detroit Free Press. Quote:

LET FREEDOM SING: Maureen Lesourd, vice-president and general manager of Detroit's dominant country station WYCD-FM (99.5), says, "We are obviously mindful that many of our listeners might disagree" with Dixie Chicks' Natalie Mains' London stage slagging of President George W. Bush. "But it's not a song content issue; it's a comment by a free American who is free to speak her mind." So the Chicks stay on 99.5. "We're really a music station" Lesourd said, that plays what its audience wants to hear and separates the song from the political position. Also still on the playlist: Toby Keith's "Courtesy of the Red, White and Blue (The Angry American)."

Interesting. We are supposedly fighting a war to protect freedoms (such as freedom of expression). Yet for those who use that freedom in a way that displeases us, we advocate censorship. That inconsistency appears to bother no one--least of all those in the media industry.

The concept that private enterprise should be exempt from the important task of preserving such social guarantees also appears to be more than just a little self-serving.

And we wonder why some in the wider world have come to the conclusion that the American Constitution is just a collection of empty words.

What inconsistency? Are you saying that those who would react to what
someone else says under their "First Amendment Rights" should be
prevented from expressing a counter view or, put another way, "censored"
in their reaction? No one and nothing guarantees ANYONE an audience, nor
is there a guarantee of a favorable response or freedom from
consequences for one's self-expression.

> The concept that private enterprise should be exempt from the important
> task of preserving such social guarantees also appears to be more than
> just a little self-serving.

So you would deny private enterprise from expressing its own views? If
you don't like what the industry did, then you have means at your
disposal to express yourself. The antidote to speech or actions you
don't like is more speech, not condemnation for such expression.

> And we wonder why some in the wider world have come to the conclusion that
> the American Constitution is just a collection of empty words.

No, it is a "collection of empty words" if we allow SOME people to
express themselves and not others.

The Dixie Chicks would not have been banned for a cover of "Imagine." A
fairer test is whether hip-hop artists can get airplay assailing Bush by name.
Maybe they can. The Dixie Chicks' free speech rights are no less guaranteed
than those of hip-hop artists, but the tolerance of it by their audience is
entirely a matter of marketplace choice.

Why should a radio station be forced to play something that it's
listeners don't want to hear?

Why should the listeners be forced to listen if they want to hear the
station's broadcast?

I often say in many spam discussion forums (like
news.admin.net-abuse.email here on Usenet) that free speech rights
don't trump personal property rights or the right not to listen. A
similar principle is at work here.

> And we wonder why some in the wider world have come to the conclusion that
> the American Constitution is just a collection of empty words.

So you advocate changing the law so that, for example, you can't get
into trouble for yelling "Fire!" in a crowded theater?

My hat's off to Maureen. I think she's doing the right thing. Alleged
patriots claim our guys are protecting the freedoms we enjoy out of
one side of their mouths and wanting to ban speech they don't like out
of the other side. My guess is there are a lot of soldiers out there
still listening to the Dixie Chicks in the middle of the desert.

Allowing opposing opinions does more to validate what our soldiers are
doing than anything else I can think of. They're trying to topple a
tyrant who has made censorship a mainstay of his regime. It doesn't
make sense to me for us to be doing the same thing under a different
banner.

Let them speak. In the end we'll be more faithful to what we stand for
and it'll have absolutely no effect on the outcome of this war.

Jeez! Not another "Concerned Citizen's Group." Especially one that won't identify itself or tell us what the target of the boycott has done to deserve a boycott. From what I found on www.sanfranciscohiphop.com it appears to be a compilation of San Francisco artists.

Before you ask us to destroy someone's efforts you should extend us the courtesy of telling us who makes up your group and what the "offenders" have done.

Hmm. I read a poll of listeners in one of New York's newspapers (it
was a wire service story, not New York). It showed about 66% of
listeners surveyed either wanted the songs kept on the air or didn't
care, either way. The "yes" votes said they believed she had a right
to say whatever she believed and they would continue to listen to
their music.

Doesn't sound like a marketplace choice to me.

What does the Constitution have to do with this? A radio station (or group
of stations) has the right to play or not play what they want, no? Are you
advocating that a radio station should be forced to play a song it doesn't
want to? Because if you aren't, then you have no argument.

>Doesn't sound like a marketplace choice to me.

When the dust settles, it will probably turn out to have been some
programmers trying to get their stations noticed and talked about.

When one of our stations decided a few years ago to ban opera from
its airwaves there was a huge hue and cry. The local newspapers
vilified us, accusing us of "selling out" and spearheading the
cultural "dumbing down" of America. We got deluged with angry letters
and phone calls, including some death threats. And then the fall
book came out, and the ratings were higher than I'd ever seen
them. They stayed high, too, for a year or two.

The market decides who gets played and who doesn't. Hip-hop gets played because there is an audience willing to buy it, and it appeals to some advertisers. Cop-killing hip-hop doesn't get the play it once did because a large segment of the audience didn't want it. Country stations program to a country audience, and the country audience doesn't seem interested in the Dixie Chicks right now. Neil Boortz made a comment last week that Natalie should make those comments on the stage of the Rymen Auditorium and "see how that crowd likes it."

That is, of course, absolutely untrue, since I lack the access to the
public airwaves that a large broadcasting company has.

>No, it is a "collection of empty words" if we allow SOME people to
>express themselves and not others.

And that is indeed what has happened.

I have no problem with broadcasters expressing particular points of
view; but they ought to leave some room on their airwaves (which,
after all, are *our* airwaves) for the views of people who disagree
with them.

Each station (or group of stations) can make their own marketplace decisions. Are their decisions always accurate? If they were, then nobody in radio would ever get fired for making bad format decisions, bad programming decisions, etc. A radio station mis-read its audience? Noooooooo! That's never happened.

I wasn't aware they were censored. In fact, I'm pretty sure Natalie's
thoughtless and narrowminded statement was broadcast and printed in just
about any news related medium there is in this country.

Or is what you're confusing "censor" with actually what we call our right
to not support someone we might consider shallow and inconsiderate of the
very things that gave them the freedom to be callous in the first place?

Publish an article in a newspaper or magazine.
Call a talkshow.
Post to Usenet.
Send letters to trade journals.
I could go on.

Real music has tonal and rhythmic characteristics that can be
definitively qualified. There are sounds played on some radio stations
that are definitively NOT music.

This is most likely NOT a knee jerk reaction. Remember, Radio is in the "Moving Products off of clients shelves" business. If 90% of existing listeners thought that they had no problem with the Dixie Chicks and 10% would leave and go to my competition everytime they heard a DC song then guess what? 10% of my audience migrates when the song comes on and I'm now screwed. Do I see the 90% leaving because I do NOT play them? No way. I DO see the 10% (And my numbers show well over 50% here) leaving when they hear the song. What do I do? Drop the group and avoid the subject. If you turn on the radio and hear the song playing, you might be annoyed. If you turn on the radio and DON'T hear the song playing you won't be annoyed NOW and this whole thing will most likely be over before anyone realizes we dropped it.

It's all about the money and the perception...

I understand that a color commentator for Cincinnati's Basketball games was ejected from the arena for yelling at officials. This came after Cincinnati coach Bob Huggins was ejected for arguing with officials. This is the first time I can ever recall a sports broadcaster actually being ejected from a game for arguing with officials. I used to engineer high school and college sports games for some stations here in Kentucky, and some of our announcers would get pretty heated on the air about poor officiating. One guy I worked with wife's was a coach for a girls high school basketball team and his voice was gone after the game broadcast because he got so heated about bad calls going against his wife's players. There may be something on some of the sports web pages about this. I just thought this was interesting.

It isn't just a right, it is a mandate under the terms of the station
license. The license of a radio station MUST maintain control of its
airwaves at all times. If it does not, it loses the license.

> Are you
> advocating that a radio station should be forced to play a song it doesn't
> want to? Because if you aren't, then you have no argument.

Any station that played anything that it did not deem suitable for the
airwaves would be in very serious trouble.

Unfortunately, the people (read: children) who listen to this combination of sounds (read: noise) are in the 18-25 demographic range. Prime real estate for advertisers and PD's desperately seeking a format.

Let us not be over dramatic here about the "me" generation.....back in
1984 or so the play by play announcer for the Universtiy of Evansville got a
technical for remarks he made as the official ran past him. He was fired at
the end of the season I think....however....he then got hired to do PBP for
an NBA team. Seems the NBA liked the passion of the guy. I'm sure there are
older stories too.
My Dad was a High School principal in the 1970's and used to have to
keep an eye on certain parents who might charge the floor over a bad call.
And who can forget Woody Hayes and the famous punch?
You gotta have passion for the game....just not too much passion!

**

AMERICA AT WAR: HAM RADIO PREPARES

America's terror threat level has again been raised to "Code Orange." This in the wake of President Bush’s ultimatum to Iraqui dictator Saddam Hussein. And with our nation on high alert for terrorist attacks, Homeland Security Secretary Tom Ridge outlined a national plan Tuesday March 18th. One that he said would increase America's at-home defenses. Part of it is in the area of personal communications. Amateur Radio Newsline’s Norm Seeley, KI7UP, has the latest on this and the way ham radio can be prepared:

--

The plan, which Homeland Security Secretary Tom Ridge has named Operation Liberty Shield heightens security at the nation's borders, airports, seaports and railways. It also provides additional security at nuclear and chemical plans along with protecting elements of the nation's food supply and distribution system.

As you have probably heard in other n ews reports, vehicles are again will be subject to random inspections on roads leading into and out of airports, sea-ports and similar facilities. Most of those who will making inspection stops are probably unaware of ham radio equipment and why hams have it in their cars. Akll they will sdee is a different kind of radio that they have never experienced before. So, for the forseeable future Amateur Radio operators would be well advised to carry a copy of their license with them if they are driving a vehicle equiped with an antenna array anyplace close to a high security area. Its much simpler to show you ham ticket to the inspector than to try to explain the hobby while a long line of cars behibd you are honking their horns.

Also suggested by Holeland Security is for every family put in place an emergency communication plan. This plan should be specific to a given family unit, understood by all of its members and practiced regularly.

Some experts have recommended that a family communications plan not be totally dependant on land based or cvellular telephones that can easily become overloaded in an emergency. Recommended are forms of personal radio including FRS and the new M.U.R.S. service. Families where all members are licensed radio amateurs have a definite advantage here. If your wife and kids are not yet hams, now might be a hood time to make getting them all tickets as a super high priority. Three places on the web you can find training information are www.arrl.org, www.w5yi.org and www.gordonwestradioschool.com. And gordonwestradioschool is one word.

Radio amateurs involved in civil defense and disaster preparedness should now be on high alert as well. Radio gear should be in tip-top shape, tested daily and H-T batteries should be maintained at full charge. Do the same spare battery sets. Also, have one or more sets of alkaline cells ready to go. If the power goes out you will have no way to quickly recharge your NiCad or NiMH packs.

If you belong to an emergency service group like ARES or RACES, make sure your leaders know how to contact you 24 hours a day, 7 days a week. Take part in regular any scheduled on-the-air drills so that you will be knife-edge sharp if your services are needed.

And if you have never had Emergency Communications training, don’t wait. The ARRL is the only national Amateur Radio group certified to provide you with the schooling you need and courses are available right now. As soon as this newscast is over we urge you to go to the League’s website at www.arrl.org and to sign up.

Meantime, the American Red Cross is urging families and individuals across the nation to make appropriate preparations. The relief agency suggests everyone follow the Red Cross Recommendations for the Homeland Security Advisory System. It’s on the web at www.redcross.org.

For the Amateur Radio Newsline, I’m Norm Seely, KI7UP, reporting.

--

We will have more on ham radio and its part in defending America against the threat of terrorism in future Amateur Radio Newsline reports. (ARNewsline™)

**

AMERICA AT WAR: PROTECTING THE NATIONS COMMUNICATIONS

With war now reality and the possibility of terrorism, leaders from the telecommunications, Internet Service Provider, satellite and cable industries have begun consideration of widespread recommendations to help restore communications services in the event of an attack on the nation’s communications infrastructure. Some of the recommendations were presented by members of the Network Reliability and Interoperability Council at its quarterly meeting March 14th at the FCC.

In developing what the group calls its best practices for service continuity and disaster recovery, the industry representatives identified and analyzed more than 200 such concepts. These cover a wide range of scenarios. And for the first time in the area of cyber security the communications industry has conducted a thorough assessment and analysis of its vulnerabilities.

The 56-member council vote on which recommendations to put in place will be completed on March 28th. (Published news reports)

**

HAM RADIO IN SPACE: ARISS TO CONTINUE WHILE SHUTTLES ARE GROUNDED

The grounding of America's Space Shuttles following the February 1st Columbia disaster has not had any major impact on Amateur Radio. Roy Neal, K6DUE, brings us up to date on whats happening in the shuttle program and with manned ham radio in space:

--

The announcements by NASA that its having Boeing build a new Orbital Space Plane and that it hopes to have the remaining Space Shuttles back in the sky by this fall signal a turning point for the space agency. It is telling the world that things are getting back on track.

But in there here and now there are still several months before full space operations resume. Amateur Radio on the International Space Station Chairman Frank Bauer, KA3HDO, says that ARISS is prepared for any eventuality.

According to Bauer, until the shuttles fly there will be less scientific work taking place on the International Space Station. This is because of the reduced on-orbit staffing of two member crews.

Bauer believes the most probable scenario for a crew change will be what we reported two weeks ago. That U-S Astronaut Ed Lu, KC5WKK and Russian Cosmonaut Yuri Malenchenko will fly to the I-S-S on a Soyuz rocket to become the Expedition 7 crew. But Bauer adds that Astronaut Mike Foale, KB5UAC, is a back-up for the crew -- also in training -- just in case he is needed. He also notes that Astronaut Pedro Duque, KC5RGG, who planned to use the ARISS equipment on the upcoming Soyuz transport flight, will now probably fly in the fall.

Baueer says that the only major setback for ham radio so far concerns upgrading the I-S-S ham station itself. According to KA3HDO, with the shuttles not flying, consumables like food and water are the highest priority items to be launched on the upcoming Progress re-supply missions. This means that the ARISS hardware that was planned to be flown this year will probably be delayed. The gear waiting for transport includes the Slow Scan Television equipment, plus Kenwood D700 and Yeasu FT-100 radios and the Naval Academy's P C Sat 2 ham satellite. Bauer says that this equipment will be kept ready for any upcoming transport flight opportunities to the I-S-S.

The good news: Bauer says that the opportunities for school contacts will remain at the same. Look for them at a rate of at least two a week. Maybe more if the Expedition 7 crew finds itself with extra free time.

Right now, it appears as if ARISS operation from the I-S-S will continue on as it has since operations resumed. This, as investigators on the ground work to determine what caused the Columbia to disintegrate as it attempted to land last month and get ready to return the rest of the shuttle fleet to service later this year.

For the Amateur Radio Newsline, I’m Roy Neal, K6DUE.

--

The only item not touched on by Bauer was open contacts with the ham radio public. These tend to occurr only when the crew has some unscheduled free time. (ARISS)

RESCUE RADIO: UK RADIO CLUB FIRE

Back on Earth, a radio club meeting is interupted by a fire. It happened in the U-K and Jeramy Boot, G4NJH, joins us from Nottingham Englanmd with the details:

--

The Bredhurst Receiving and Transmitting Society's quiz night on the 6th of March was interrupted by what all members present assumed to be a power cut. However, club member Terry Wheeler, G7MIM, went out to investigate and discovered that a fire had broken out in the room above the club. He calmly asked the members to leave the premises and the evacuation of the building took place in a swift, orderly and calm manner. Richard, G7PPE, tried to open the door of the flat above the club room where the fire had started as the occupant was still inside, but was unable to break down the door. Fire crews arrived in a matter of minutes and the occupant was rescued and taken to hospital. Jeramy Boot, G4NJH.

--

Jean Darley, G1DLL, the Secretary of the Bredhurst Receiving and Transmitting Society says -- and we quote: "It's never a dull moment if you're a member of our radio society." G1DLL is also now trying to find an alternative venue for the club to meet. (GB2RS)

RADIO LAW: ANTENNA PROTECTION - CALIFORNIA TRIES AGAIN

If at first you don’t succeed, try again. And that’s exactly what hams in California are doing as they try to convince the state legislature and the governor that its time to offer protection for their antennas and towers. Amateur Radio Newsline’s Bruce Tennant, K6PZW has more:

--
March 26th is the date for a legislative hearing on California's latest attempt to pass an Amateur Radio antenna protection bill. The ARRL Letter says that Assembly Bill 1228 was introduced February 21st by Assemblyman Bob Dutton. It has been referred to the Committee on Local Government for consideration.

ARRL Pacific Division Director Bob Vallio, W6RGG, and the League’s antenna expert Dean Straw, N6BV, are among those scheduled to testify on behalf of AB 1228. Several others also plan to attend.

Back in 2000, the California Legislature passed a bill incorporating the essence of PRB-1, but Governor Gray Davis vetoed the measure. At that time the Governor said his opposition stemmed from a lack of budgetary funds to complete the required studies and his personal belief that amateur antennas should be considered a local rather than a state issue. The earlier California measure had carried a price tag of between $70,000 and $100,000 to fund studies and a model ordinance that lawmakers required.

Organizers behind the current bill say the new measure, being called "The Emergency Communications Enhancement Act," will not carry any price tag. A copy of the current legislative proposal is available on-line the California State Legislature web site.

For the Amateur Radio Newsline, I’m Bruce Tennant, K6PZW, in Los Angeles.

--

So far, 16 states have incorporated the essence of PRB-1 into their laws or have approved Amateur Radio antenna legislation that includes minimum regulatory heights for antenna structures. (ARRL)

**

RADIO LAW: CALIFORNIA WORKING TO MOBILE CELL PHONE BAN

Still in the Golden State, a bill requiring cell phone users to use handsfree devices while driving has been adopted by a powerful California Assembly committee. Bill Pasternak, WA6ITF, has been following the story and has the latest developments:

--

The measure passed the California Assembly Transportation Committee on a 14 to 5 vote on Monday March 10th. This, after falling a single vote short of passage for the past two legislative sessions.

The bill's author is Assemblyman Joe Simitian, of Palo Alto. He has called the committee's approval the first step to saving lives on California roads and highways.

Under the Simitian's bill a first offense for using a cell phone while driving a motor vehicle would result in a mandatory $20 fine. Subsequent violations would carry a maximum fine of $50. Drivers could use handsfree cell phones without threat of a penalty.

The measure is exclusive to mobile cellular telephone use. It reportedly excludes all other forms of two-way radio communications. The bill now heads to the state Appropriations Committee for further hearings.

Reporting from near the city of Valencia California, I’m Bill Pasternak, WA6ITF, for the Amateur Radio Newsline.

--

If the measure eventually becomes law, California will become the second state to require handsfree use of cell phones by drivers. New York was the first back in 2001. (ARNewsline™ from various reports and sources.)

**

ENFORCEMENT: FCC ALLEGES NUMEROUS VIOLATIONS ONB MICHIGAN REPEATER

A pair of Michigan repeater operators have been told to cease operating their systems under automatic control. This, as the FCC launches an investigation into charges of several rules violations. The agency’s Daryl Duckworth, NN0W, has more;

--

Duckworth: “The Detroit District Director issued an order to cease autonmatic control of Amateur repeater station K5YHA to Sheri Gilbert and an order to cease automatic control of Amateur repeater station K5EKP to William Gilbert, both of Lupton Michigan. Both stations are under review by the Enforcerment Bureau for apparent violations of the Commissions rules inccluding inadaquite station control and deliberate interference.”

--

In a letter February 24th letter to the Gilberts, FCC Special Counsel Riley Hollingsworth alleges that numerous rule violations have taken place on the repeater. Also that the repeater is the source of interference to the K8GER system. He said that Violations on the repeater consisted of failure to identify by some users, use of false or misleading call signs by users and failure to have a control operator for the repeater. Hollingsworth alleges that back in January the Gilberts’ apparently turned the operation of the repeater over to a car rally. During that time several of these type of rule violations occurred for more than 12 hours during a two-day period.

The letters warns the Gilberts’ that that if they are unwilling or unable to prevent violations on their repeater, then their Amateur operator and station licenses will be subject to enforcement action by the Commission. This could include a fine, operator license suspension or station license revocation. The Gilbert’s have since informed the FCC that the repeater has been taken off the air. (FCC)

**

AT THE FCC: NOW WE HAVE COALS

The acronym laden Federal Communications Commission has added COALS to its dictionary. This, as the regulatory agency begins implementation of the Cable Operations and Licensing System by Report and Order on March 13th.

With COALS the FCC has expanded its electronic filing capabilities to make it easier for multichannel video programming distributors to submit applications, reports, and other documents. The FCC says that COALS also makes license and cable operational information more accessible to FCC staff. This in turn makes for more efficiency in monitoring spectrum usage and competitive conditions in the cable and multichannel video marketplace. The FCC adds that the introduction of COALS represents more progress in the FCC’s own modernization initiative. (FCC)

**

RADIO RULES: MEDIA OWNERSHIP HEARINGS

It looks like there will be more public hearings on media ownership restrictions. A Democrat on the Federal Communications Commission plans to hold two more hearings, sidestepping the wishes of the agency's Republican chairman.

Commissioner Michael Copps says he will hold hearings at the University of Washington in Seattle and Duke University in Durham, North Carolina. Copps is seeking public input on the F-C-C's review of whether decades-old media ownership restrictions are appropriate in a market altered by the growth of the Internet, satellite boadcasting and cable television.

FCC chairman Michael Powell had previously said that the hearing he held in Richmond, Virginia, on February 27th is all that's needed. Powell said that the agency has received 13 thousand comments from the public, most filed electronically. (FCC)

**

HAM RADIO CUDOS: PAUL HARVEY HONORS HAMS

Radio commentator Paul Harvey dchose Wednesday, March 19th to honor ham radio. In his broadcast, Harvey described radio amateurs as America's quiet warriors. He said that there are 700,000 of them who are unpaid, uncelebrated, civilian, radio operators, who are there during and after floods, fires and tornadoes. And says Harvey, after the 911 attack hams were indispensable in reuniting families.

It was a very unexpected salute to the nations ham radio community. You can find it on the web at www.paulharvey.com. Look for the show dated March 19th. (W6RCL)

**

CHANGING OF THE GUARD: MARC TONNA, F9FT, - SK

A pioneer in antenna design has passed on. According to a notice on thew A.F.T. antenna wwebsite, company founder Marc Tonna, F9FT died on March 2nd at the age of 91.

Way back in 1946, Marc Tonna revisited the design described by the Japanese searchers Yagi and Uda in 1926. Tonna brought to the Yagi improvements that made his antennas famous among the radio-amateurs, as well as in the field of the then uprising commercial TV. He later went on to become the co-founder of the company Antennes Tonna which today is known as A.F.T.. (AFT)

**

NAMES IN THE NEWS: NEW ARKANSAS SM

Dennis Schaefer, W5RZ, has been appointed as the new Arkansas ARRL Section Manager. He succeeds Bob Ideker, WB5VUH, who first served as Section Manager from 1991 through 1995 and who returned to office in 2001.

And heres where it become rather uinteresting. Ideker had decided to not run for another term. Eldon Bryant, K7ZQR, was elected to replace him. But Bryant later decided not to assume the office and Schaefer was named as his replacement.

Schaefer’s term begins on April 1st. Arkansas ARRL members -- or anyone elser can contact him by e-mail to w5rz@arrl.org (ARRL)

EMERGING TECHNOLOGY: CALL IT MC INTERNET

Hungry? You may soon get a surprising bonus when you dine at the Golden Arches. This, with word that McDonald's restaurants in three U.S. cities will be offering one hour of free high-speed Internet access to anyone who buys a promotional meal.

Ten McDonald's in Manhattan New York began offering wireless WiFi, or 802.11b, Internet access on Wednesday, Matrch 12th. By the end of 2003 McDonald's plans to extend the access to 300 restaurant locations in New York City, Chicago and a yet to be announced California city. Window signs will alert customers to which restaurants have WiFi wireless access. After using the hour of free access that comes with a meal, customers can pay $3 for another hour online or get more time by purchasing another extra value meal

Besides McDonald's, Internet surfers will also be able to tote their laptops to 400 U.S. Borders book stores, hundreds of hotels and a pair of U.S. airports

where WiFi access will be available this summer. (Published news reports)

SPACE AND SCIENCE: MORE ON SETI@HOME

Last week Amater Radio Newsline’s Henry Feinberg, K2SSQ, brought you the latest news on a project called seti@home. Henry is back this week with some background on the project and how it got stasrted:

--
SETI@home first offered its screensaver to the world in May of 1999 as the first example of wide-scale distributed computing. Its aim was to link idle computers through the Internet to tackle large computational problem involved in searching for intelligent signals from space.

The key to its success was the collaboration between two people who would become the principal architects of the project. David Anderson is a computer scientist who was one of the principal developers of distributed computing. Dan Werthimer is a physicist with two decades of experience collecting radio data and parsing it in search of unusual signals from space. Together, they have drawn in not only the computer community, but many others as well. This includes thousands of ham radio operators interested in offering use of their spare computer time to benefit worthwhile projects.

Werthimer, who serves as chief scientist for SETI@home has conducted his own Search for Extraterrestrial Intelligence for the past 24 years. For 11 of those years he has been able to use the giant 1,000 foot diameter radiotelescope at Arecibo Puerto Rico to look again at promising locations and frequency ranges. This, to determine if a strong radio signal is more than random noise or a transmission from an orbiting satellite.

So far no luck but Werthimer is not disappointed. This is because SETI@home has mobilized so much more computing power than has ever before been thrown at signal analysis. Also, the team has been able to perform much more detailed and complicated computations on the radio data than now possible with Werthimer's own ongoing SETI project, called Search for Extraterrestrial Radio Emissions from Nearby Developed Intelligent Populations. Thats SERENDIP IV for short.

What is important is that SETI@home has performed the most sensitive and detailed SETI sky survey to date. It has also demonstrated the power of the Internet for doing scientific distributed computing, and has allowed the general public -- and the ham radio communuity to participate directly in an exciting research project.

And the success of SETI@home has also spawned numerous other distributed computing projects. These include Folding@home -- a distributed computing project to calculate the three-dimensional structure of proteins and climateprediction.net to improve scientific forecasts of 21st century climate. And scientists say that there is more to come.

For the Amateur Radio Newsline, I’m Henry Feinberg, K2SSQ.

--

So far, 4,287,000-plus users have lent thir spare computing time to analyze radio data for the SETI@home team. You can become a part of the project by taking your web browser over to http://setiathome.ssl.berkeley.edu. And if you missed that U-R-L you will find it in the print edition of this weeks amateur Radio Newsline report. (W6RCL, Published Reports)

DX

In D-X, word that A35KB has gone QRT -- probably for good! Paul Kidd, A35RK, told the Ohio Penn D-X newsletter that he hasn't heard Father Kevin Burke, A35KB, on the air for some time. So, last week telephoned Father Kevin only to learn that he is very busy with his duties as parish priest on the Island of Eua. Because of this, he is no longer able to operate on the radio, has allowed his license to expire, his station is dismantled, he has no intention of getting back on the air any time soon. Nor can he any longer respond to QSL requests. (OPDX)

On a brighter note for D-X’ers, the OPDX also reports that SP9FIH will be active from Tonga through April 14th. He already has verbal permission to operate and his license will be given to him after arrival on the island. Activity will be SSB on 80 through 10 meters including the WARC Bands. QSL to P.O. Box 480, 44-100 Gliwice, Poland. (OPDX)

And lastly word that Meanguera Island in the Fonseca Gulf will ba activated by DL7IQ, DL7IO and YS1CF from march 27th to the 28th as HU1M. Modes used will be SSB, CW, SSTV and RTTY. On the 29th and 30th the same call letters will be from San Diego Beach El Salvador. Full information is on the web at www.dl7io.de. (The’ Modern DX’er)

**

THAT FINAL ITEM: SWLFEST 2003

And finally this week, hams are not the only radio hobbiests who get together at conventions. Shortwave listeners recently had a major get-together in Pennsylvania that saw guests and presenters from around the world. Steve Coletti of WBCQ was among them and has this in-depth report on SWL Winterfest 2003:

--

The listening side of the radio hobby made its 16th pilgrimage through the snow to the little town of Kulpsville, PA., for the annual SWL Winterfest hosted by NASWA. Although SWL stands for short wave listeners, the fest activities cover DC to daylight as again there were the usual demonstrations of overseas TV via satellite, the activities of the group who we affectionately call the "Scanner Scum", and a demonstration of DRM, the European digital shortwave broadcast standard by Jan Peter Werkman of Radio Netherlands, James Briggs of Merlin Communications and Kim Elliot, KD9XB, of the Voice Of America with additional help of a PC loaned by attendee Eric Cottrell, WB1HBU, to decode the broadcasts beamed specifically to Kulpsville.

This year, Bill Whitacre of the International Broadcast Bureau, parent of the VOA and other US international broadcast ventures, was able to schedule it's annual meeting of radio monitors to coincide with the Winerfest and 26 professional listeners from around the world joined the crowd in Kulpsville to explain that their job was more than just making sure that the signal was heard in the target area.

Although the Fest has been a listener only event, over one third of the attendees every year are hams and this year new ground was broken as Skip Arey, N2EI, ran an introduction to Ham Radio forum. Not only the first time for this discussion, but it was also one of two first time evening forums held on Friday night.

The international broadcasters were represented this year by Adventist World Radio and Radio Free Asia in the forums as well as live broadcasts over WBCQ. In addition to some regularly scheduled programming that went remote on Friday night, WBCQ had a Saturday marathon broadcast by the station's engineering magician, "Tim Tron" Smith, WA1HLR.

Other forums featured reports on listening tips, a summation of a DXpedition to Australia, and a report on overseas SWL group, the European DX Council's annual meeting.

Last year, Bob Zenotti, HB9ASQ, co-host of the now gone Shortwave Merry-Go-Round on Swiss Radio International made his first appearance at the fest as a guest speaker. This year he came on his own as regular attendee.

--

Zenotti: “This is one of the best ones I can remember. Great bunch of people, fantastic discussions, and a lot of excitement here….and very little sleep.”

--

The fest was not without it's humor. The hotel has the Stockholm, Copenhagen, and Oslo meeting rooms. In honor of the delegation from Finland that attends every year, the hosts of the event, Richard Cuff and John Figliosi, unofficially named the fest's hospitality suite, the Helsinki room.

For the Amateur Radio Newsline, I’m Steve Colletti a-k-a Big Steve Cole of WBCQ Radio reporting fot the Amateur Radio Newsline.
--

The 2004 S-W-L Winterfest is slated a year vfrom now on March 12th to the 13th at the same venue. You will find lots more about it on the web at www.swlfest.com. (Strve Coletti for ARNewsline™)

430. CP for 1500-AM Los Angeles area

Newsgroup: rec.radio.broadcasting
Date: 2003-03-22 22:16:34 UTC
From: jimhilliker@hotmail.com
Message-ID: <b5inc2ano1@xuxa.iecc.com>
Source record: 8557

Does anyone have any current information about progress being made, if any, for a new CP from 2001 in the Los Angeles area for 1500-AM, licensed to Culver City, with the call letters KIEV?? This would replace the old KROQ-AM on 1500 from Burbank, which went dark around 1984. (Anybody know why KROQ-AM went dark??)

This new CP for 1500 says it would be 50 kw days and 7.1 kw nights from xmtr site off the Pomona Freeway between Monterey Park and Montebello...

In the late 1980s and 1990s, this CP had the calls KRQR, I believe, and the licensee for the CP is out of Sacramento, Royce Intl. B.C.,

Any new details would be appreciated...Anyone think this will get on the air??
Hard to believe a new stand-alone AM in L.A. could make it.

Details: www.FCC.gov: search: Facility No 57893

Thanks.

Jim Hilliker
Monterey, CA

431. Where to find small rigid coax and other items ?

Newsgroup: rec.radio.broadcasting
Date: 2003-03-22 22:16:35 UTC
From: Lex-Lutor <lex-lutor@post.hinet.hr>

Hi,

I'm looking where to find or to buy next items:

- Semi-rigid coax or rigid coax

- low impedance Teflon coax (to make broadband transformers)

- other good resources to make some FM amplifiers 50-100 MHz (300-600W)

- ferrite breads and cores

Thanks !

432. info on Gates m-6095 exciter

Newsgroup: rec.radio.broadcasting
Date: 2003-03-22 22:16:36 UTC
From: john98731@excite.com
Message-ID: <b5inc4aob1@xuxa.iecc.com>

I picked up a Gates m-6095 exciter the other day and have some questions about it. Its a mono tube unit from the 60's with 10 watt is all of the information I've been able to find on the internet. It has 12 screw terminals on the back, I cannot figure out what their functions are, I could trace for power but figuring out audio and possible remote power on would be hard & time consuming. On the front it has a switch labled mod 1, both, mod2, from what I gather this unit runs two modulators at once and compares their results when in the both position ? There is also a 1/4" jack on the from which maybe is for the audio ? Does it have built in preemphasis or must that be provided externaly ? And how hard/easy is it to recrystal it? If somebody has a manual that would be great too, I found on on a webpage but they want like 80 bucks for it.

Thanks, John

This would replace the old KROQ-AM on 1500 from Burbank, which went dark around
1984. (Anybody know why KROQ-AM went dark?)
>>

IIRC, Geo. Cameron Communications itself went dark.

Then co-owned KROQ-FM, Pasadena, is currently owned by Infinity, and one of the
original KBLA/KBBQ/KROQ/1500 towers is being used as an auxiliary for the FM
incarnation of that station.

The original 1500 AM site (and present FM site) can be seen at ...

<http://www.topozone.com/map.asp?z=11&n=3784453&e=384060&s=25&size=l&u=2>

This station was originally on 1490, in a somewhat similar way (although MUCH
more poorly engineered) as was WLQV/1500, Detroit.

>>
Anyone think this will get on the air?
>>

The best site is from ex-KRLA/1110's site ... but that will never happen now as
ABC has apparently made a diplex agreement with KRLA/870.

My guess is what with Royce's problems with another of its stations, the
likelihood of 1500 returning anytime soon is low.

Hope this is helpful - haven't been in the radio game in a while so excuse my lay terminology.

Currently KIEV is an 870 AM station (licensed I think to Glendale?). I don't believe it's a 50kw. Current format is talk with some slots for folks who buy airtime and produce their own shows (I forget what this is called - not timeshare - wow it has been a long time.

My guess is if this pans out, KIEV would move to 1500 and then would sell the 870 freq to someone else...

My undertanding was that 1500 went dark for two reasons: licencee problems
with FCC and inability to make money.
>
> This new CP for 1500 says it would be 50 kw days and 7.1 kw nights
> from xmtr site off the Pomona Freeway between Monterey Park and

Not zoned yet. NIMBY.

> Any new details would be appreciated...Anyone think this will get on
> the air??
> Hard to believe a new stand-alone AM in L.A. could make it.

It is hard to envision an AM in LA that did not make money. There are far
more buyers than sellers. 1500, if it gets zoned and built, will have a
perfect signal for many of the Asian communities in LA; there are more
potential buyers of block time than there are stations. There are $920
million dollars in ad revenue in LA. There is always something left for the
small, bottom feeding stations.

Remember, Sol Levine sold the 1650 Costa Mesa X-band station for $35
million... and it is Korean... with 10 kw days and 1 kw night.

I guess I didn't make my point clearly enough. The broadcaster is not PART of the game, he is there to report it. When he gets thrown out for interfering, he MADE the news, rather than reporting it. I happen to love Jim Rome. I think he's the best sports-talk guy to ever hit the airwaves. The problem is that most that attempt to be, ARE NOT Jim Rome. He does a niche type show, and is damn good at it. The "clones" out there (not in the listener sense, but the on-air clones) try to interject talk-show style into their PBP, and it sucks.

Report the story, don't make it. That's my only point.

Rick

438. For sale: Partial interest in AM station in Georgia.

Newsgroup: rec.radio.broadcasting
Date: 2003-03-23 22:47:31 UTC
From: Meyer Gottesman <wrecktech@yahoo.com>
Message-ID: <b5ldi3$o9h$1@xuxa.iecc.com>
Source record: 8562

For sale:

The "Radio Crazy" is back!

Partial ownership (Joint venture) in fulltime AM
station in Quitman, GA. WSFB. 1490 KHz. On the air
since 1955. Brooks county. Only AM in that county.
Near Valdosta, GA.

Full price is $75,000. NO real estate is included. You
heard it first here, kiddies! The rent for the
combined studio/xmtr site is $400.00 a month.

Active or inactive (But not inept! HI!) investors with
at least $10,000 are welcome. All investors would be
on the board with full voting rights if desired.
Please! No "AM bashers" or "negative nabobs" I suppose
if you fit into that category you would not be
answering anyway!

This is a nice little "Mom and Pop" type AM in small
community. There are 900 historic register buildings
in this community! One of the largest collections in
the state!

The "Radio Crazy" is NOT THAT crazy! My last job in
radio (2001) was Chief Engineer for a 5 KW fulltime AM
in New York City. This market is somewhat (?) larger
than Quitman, GA. (???)

Tel: (478)741-1710 or email.

73,

Meyer Gottesman, W6GIV
aka "The Radio Crazy" aka "Meyer, da animal".

439. For sale: Part interest in AM station in West Virginia

Newsgroup: rec.radio.broadcasting
Date: 2003-03-24 00:39:18 UTC
From: Meyer Gottesman <wrecktech@yahoo.com>
Message-ID: <b5lk3m$gn4$1@xuxa.iecc.com>
Source record: 8567

For sale:

The "Radio Crazy" is back!

Partial ownership (Joint venture) in daytime AM
station in Ravenswood, WV. WMOV. 1360 KHz. On the air
since 1953. Only AM in that county. 1 KW days, 500
watts PSA and 20 watts at night. Night power covers
city of license.

Full price is $75,000. Real estate IS included. You
heard it first here, kiddies! The rent for the
tower site is $350.00 a month. The home is included
free.

Active or inactive (But not inept! HI!) investors with
at least $10,000 are welcome. All investors would be
on the board with full voting rights if desired.
Please! No "AM bashers" or "negative nabobs" I suppose
if you fit into that category you would not be
answering anyway!

This is a nice little "Mom and Pop" type AM in small
community.

The "Radio Crazy" is NOT THAT crazy! My last job in
radio (2001) was Chief Engineer for a 5 KW fulltime AM
in New York City. This market is somewhat (?) larger
than Quitman, GA. (???)

Tel: (478)741-1710 or email.

73,

Meyer Gottesman, W6GIV
aka "The Radio Crazy" aka "Meyer, da animal".

>>
Remember, Sol Levine sold the 1650 Costa Mesa X band station for $35 million...
and it is Korean... with 10 kw days and 1 kw night.
>>

And ...

... ol' Sol used a completely unusable station on 540 as leverage to get that
conversion to 1650.

The 540 station was sited an incredible 86 miles from the city of license.

Levine is one smart cookie ... build a completely bogus station, then petition
for an X-band frequency as a s-called "upgrade".

441. Infinity in Los Angeles, who get's sold?

Newsgroup: rec.radio.broadcasting

It's been a while since I've heard anything on which radio property Infinity will sell in the Los Angeles market. I know they currently own

93.1 KCBS Arrow 93
94.7 KTWV The Wave
97.1 KLSX Hot Talk
101.1 KRTH Oldies
106.7 KROQ Alternative
980 KFWB 24H News
1070 KNX News plus

As CBS owns both KCBS 2 & KCAL 9 I believe they need to sell a radio station. Who is on the chopping block?

Discuss.

442. Re: Iraq War Frequency Page Updated Mil and SWL Freqs.

It was quite interesting to hear to some EAMs and SKYKING messages on the Global HF freqs that might be "for real". Of course, it was also a little worrisome that some of the youngsters reading those messages got the giggles half way through or felt obligated to bring out the DJ in themselves and punch up the delivery just a little bit.

The old Iron Eagle must be doing the B-52 equivalent of barrel rolls in his grave right now.

KFWB. They already tried to put it in a blind trust pending the current FCC review of ownership requirements.

980 is the only signal that does not rally cover the bulk of the population centers of LA MSA day and night.

That's sort of old information...since then, the station at 870
adopted the historic L.A. calls KRLA (ex-1110). Though I believe it
still does sell some brokered slots, it's mainly the Los Angeles
outlet for Salem's syndicated conservative non-religious talkers
(including L.A.'s own Dennis Prager...it's his flagship station now
after leaving KABC/790). They do have a local morning show with
former KCBQ/San Diego GM and talk host Mark Larson and local radio guy
Mark Marino...the show is simulcast on KCBQ and KRLH/590 in the
Riverside/San Bernardino market.

It is now owned by Salem.

>My guess is if this pans out, KIEV would move to 1500 and then would
>sell the 870 freq to someone else...

Unlikely, considering the above events.

Mike

870 in Glendale is licesnsed to the call letters KRLA, and has been for
about a year.
>
> My guess is if this pans out, KIEV would move to 1500 and then would

870 is owned by major grouo broadcaster Salem. It is not moving anywhere.
Especially 1500.

True ... but KRLA/870 is supposed to be moving in with ex-KRLA, KSPN/1110.

However, now KPSN and KDIS/710 are supposed to be swapping frequencies.

And, it was KIEV/1500, in an earlier incarnation, also owned by Royce, which was supposed to be moving in with 710.

KROQ is the highest billing of all the infinity stations; it is the third or fourth highest billing station in the entire USA. That is the last one they will sell. The least profitable is probably KCBS right now.

Anyway, they already announced that the wanted to put KFWB in a blind trust pending the outcome of the FCC investigation into cross ownership. The FCC said no... so they are looking for another plan.

That seems to be true. If it gets built.
>
> However, now KPSN and KDIS/710 are supposed to be swapping frequencies.

They did at the beginning of the year. Has to do with night coverage for
KSPN's Angels Broadcasts. 710 goes deeper at night into Orange County.
>
> And, it was KIEV/1500, in an earlier incarnation, also owned by Royce,

That was when it was a CP for Burbank or Tujunga or somesuch. It has now
moved to Culver City as COL, making a San Gabriel Valley site essential.

>>

The weakness of 980's signal would be mitigated if/when they install the two 90
degree towers they need in order to implement their 50 kW DA-2 plan.

Old news.

Radio Disney LA is now on 1110 and ESPN Radio LA is now on AM
71.

This happened months ago.

They should do what Clear Channel does: sell it to a company that will
be happy to sell it back if the possibility arises. In the meantime,
they can pay the new owner to continue to be allowed to provide whatever
programming they deem appropriate (with duly executed network agreements
of course).

Yea, it was funny when KROQ's PD went to New York's WXRK and created a KROQ
clone. They even go by the name K-ROCK, whatever that means.

Agreed, KROQ concerts sell out in minutes. I'd suggest a frequency switch
for KROQ as 106.7 is a weak signal compared to 93.1, 94.7 or 101.1 but there
is the frequency recognition working against that plan.

I've been a KROQ listener since '81, makes me happy my favorite station is a
mighty one.

Not sure that's an absolute. Transfer the callsign to the LA 1070
(as the TV station has), and flog it off to... um... Entercom? Hispanic?
Heh... Wouldn't Dave Stewart love to have that one to take care of...

Would it be eligible to reclaim the "KQW" callsign?

Dear Gregg:

I don't mind responding re: AM in GA. I am (repeat!)
not a broker, agent, etc.

I am simply trying to buy an AM station and elicit
some help. Is there anything dishonorable about that.

I concede AM is a "hard sell" but I do resent the
perception that you somehow believe I am less than
honest. I was a civilian employee in 1972 with the US
Dept. of Defense and has access to the Post Commander
of the entire 6th Army. (A General). Do you really
think they'd grant a SECRET level security clearance
to a crook! It took the FBI six weeks of background
checks before I got the clearance!

I have NOT posted 100 stations but I will admit I have
reposted the same stations several times.

Why this would somehow bother you is a puzzle to me. I
have not taken a dime from anyone in this forum.

Cordially,

Meyer Gottesman

A number of "legacy" Infinity stations, including the very first one, were cut loose for the merger with CBS. Believe me, if a station doesn't fit the program, it will be gone in an instant. There is no sentimentality in radio acquisitions these days. Sure, if there is history in a station, then promote it. But other than that it has no value.

We were even considering using "sentimentality" and "Mel" in the same
sentence?

Kind of doubtful. KFWB is no billing slouch, doing around $30 million last
year. Now, with the LA Dodgers, they will probably put even more bucks on
the books.

Interestingly, the CP no longer appears on the FCC website. Nor does the KLAC one, either.
>>

The one for 50 kW (days) into 1110's towers is still there, but the one for 50 kW (nights) into 1110's towers is gone.

At least in the "snapshot" of the database which I examined.

After WJW-AM 850 was sold off to a different owner, WJW-TV 8 here became WJKW-TV for several years. When WJW-AM changed calls to WRMR-AM, WJKW was allowed to return to its original calls. Channel 8 remains WJW to this day, through a number of ownership changes and an affiliation flip from CBS to Fox.

Don't know if it's happened anywhere else.

Would it be eligible to reclaim the "KQW" callsign?
>>

Not a chance.

That KQW was on 1010, and was licensed to San Jose.

So, there isn't even a frequency or a COL connection.

The "KHJ rule" (i.e., "KK" calls being somehow confused with the Spanish word for "feces") couldn't be applied, and other than that, no three-letter calls are permitted to be issued.

I seriously doubt if WFIL could get back it's old WFI call.

I don't think they're a big deal, not that I'm actually in a position
to buy radio stations. If we can come to a consensus about whether or
not he should post them, I'll adjust the posting rules accordingly.

I don't see any harm in the postings. from all I know of Meyer, he is on the up-and-up, and simply trying to put together packages where small investors can buy a piece of a radio station. that seems to fit one of the purposes of this board.

While many complain about consolidation, Meyer is at least doing something to show that small investors or operators can get into radio. While I would not be personally very attracted to 250 watt stations in Somewhere, ID, I commend Meyer for trying.

I will respond this one time...

First: having a security clearance 30 years ago means nothing now....besides you are the one telling us you had it. A crook WOULD lie about that!

Second: Nowhere in your posts do you state that you are puting your own money into these ventures. So i assume you are getting others to invest so that you get a free ride if you get enough investors.

Third: If you are offering these stations for sale...that DOES make you an agent of sorts.

Fourth: I do believe you are close to 100 stations, but i don't keep track. You must have a great retirement package if you can invest in that many stations...even if it's only half or one quarter of that number. Being able to invest in 25 stations is pretty impressive. This goes to #2 and my assertion that you are funding your retirement by getting others to invest for you.... that would in fact make you a broker then. And a scumbag!

Lastly: I think you are posting in the wrong group! Many of the people that come to this newsgroup are naive about radio and don't have much money and can be sucked into a deal where they lose it all and you end up with that station. You should use a real broker.

I will always point out things that dont make sense and keep people from flushing their life savings down the toilet so you can play radio.

I won't stand by and watch this "harmless" old coot fleese my fellow man.

> I will respond this one time...

I already see a bunch of posts in favor of Meyer Gottesmann continuing to post his station info. Yours is the only dissenting vote, right now. (Not that our little straw poll is over yet; it isn't.)

And is it really necessary to call him a crook? Is there a reason you feel the need to libel the guy?

What's YOUR deal? This isn't the first time you've said what you just said. Do you have some sort of agenda?

Searching groups.google.com for posts in RRB from you, I see posts from 3/3/02 and 6/24/02 that read like the one I am replying to.

Am I going to have to start dropping your posts from the queue? You would have the distinction of being the first and only non-spammer to have this honor.

Food for thought.

I'm pretty liberal in what I'll let through, but libelous crap like the stuff you post in response to Meyer will not be tolerated, period. I would like to continue reading your other submissions and would suggest that you take whatever your problem is to another forum.

I think that the Meyer should be free to continue his posts -- allowing these posts is hardly an endorsement by the moderator of how good of business opportunities these stations might or might not be. For anyone who is thinking of investing, due diligence would certainly be in order no matter who you're buying from, or where you're hearing of the opportunities.

I also can't help but notice that while Meyer is posting under his full name, his critics are using pseudonyms or first name only. Which frankly makes me question the credibility of those who seem intent on making a stink.

I have no problem with Meyer's posting about opportunities to participate in ownership. In fact sometimes I even find it fun to try and figure out what station it is when he gives vague descriptions.

If someone doesn't want to read them, the answer is simple....don't. Most new newsreaders/browsers have twit filters now days. Let the complainer do his own filtering. Let those of us who don't mind seeing them continue to see them.

Nearly every newsreader has what's called a "twit filter." I'm sure you already know that. If you're offended by a poster, put his address in the filter and the quality of your life will improve.

>Does he really think we are that stupid?

I've seen some people make a lot of money on "junky AM stations" once they were well managed. I know someone who bought some of those stations in the Midwest, improved them and has retired with an impressive nest egg. He bought stations out of bankruptcy and made a fortune. As a matter of fact, I had lunch with a friend today whose daughter bought the "junky AM station" she worked for when it went bankrupt. She paid a little over $100k for it. The last offer to buy it in a small market was $3 million. She said no.

>Hey, the man may not be a crook, but I remember getting a resume from
>him waaaay back and it was soooooo weird!!!

I've had great luck hiring people whose resumes look "soooooo weird." In fact, they attract my attention. If you want resumes that look like applications for bank tellers, go into banking.

>Even the titles turn my stomach since I don't actually read the posts

I don't think Meyer has harmed anyone by posting his deals on AM stations. I'm not personally interested in buying a part of an AM station, but I have communicated a bit with Meyer by email. He seems like a reasonable enough guy to me. At least his posts are about RADIO, which is the topic of this forum. If it offends someone that he periodically returns with information about another station for sale, just don't read the post. It's pretty obvious who made it.

I'd like to think that someone who is contemplating investing in a station would do a little more research and give a lot more though to the process than just blindly sending in money from a post on a newsgroup. I haven't heard Meyer ask anyone to do that, but if you'd like more information, he seems perfectly willing to give it to you privately.

At least, his posts are interesting to think about. Many of the posts on this forum can't make that claim.

Chuck

491. For sale: Partial interest in S. GA AM radio station.

Newsgroup: rec.radio.broadcasting
Date: 2003-03-26 22:11:40 UTC
From: Meyer Gottesman <wrecktech@yahoo.com>
Message-ID: <b5t8isklf1@xuxa.iecc.com>
Source record: 8519

For sale:

Partial interest in S. Georgia AM radio station. Joint
venture. Active or inactive investors with $10,000
min. are welcome. All investors would be on the board
with full voting rights if desired.

It is WSFB, Quitman, GA. On the air since 1955. Class
"C" (formerly called Class IV) 1490 KHz, 1,000 watts,
fulltime. Studios and transmitter under one roof.
Leased at $400.00 a month so SORRY kiddies, no real
estate with this "Dog"!

But this "Dog" can get well! The total asking price is
$75,000.

PLEASE! Do NOT contact the station directly.

FYI, I am NOT a broker, shill, agent, owner or part
owner.

Please! NO "AM bashers" or "negative nabobs".

Tel: (478)741-1710 in Macon, GA. I will gladly go into
greater detail with anyone calling in good faith.

73,

Meyer Gottesman, W6GIV

Dear Mr. Ross:

Sorry but I don't have the schematic for the
Dymek-McKay AM5 tuner but I once owned that tuner and
I can tell you it was one of the finest AM tuners ever
made. I should know! I was once Chief Engineer for an
AM in NYC!

The tuner uses a MOSFET front end and an extra low
distortion diode detector and 2 IF bandwidths if I
recall.

If you ever want to sell that tuner, for heaven's
sakes, let me know.

My tel. is: (478)741-1710.

Possibly Ron & Fez, a local comedy/talk duo who were the last local
talk hosts on the station. Now at WJFK-FM/Washington, DC in the same
time slot.

If R&F weren't on, and they were in another slot (I think they
occupied just about every slot there, except AM drive), it may have
been Westwood One syndicated talker Tom Leykis.

How true. In my neck of the woods, the small-town FM's have been pretty much bought up by the big groups, upgraded in class and moved into neighboring cities. This leaves the small AM's in the small towns, which the big boys don't want. These stations are excellent opportunities for someone who knows what they're doing, and at least a couple of them here are doing quite well. There is a town near here of no more than 5,000 population where the FM moved away, and the two remaining AM's are hitting hard with local news, sports, etc., and seem to be doing quite well.

Oh neat! It's an easy listening station!!! You don't find too many of
those these days. I really miss that music on the radio.

How many EZ stations are left in the country now? Around 20 or so? Or is
that classical...

WNEW-FM was running Ron and Fez.

I believe they were already being relayed into DC via WJFK-FM.

It was hard to keep track...since they kept shuffling that show back
and forth so often.

It amazes me that Clear Channel even bought groups in tiny markets
like Akron, Youngstown, Ashtabula and Sandusky, Ohio. They even own
Y-102 out in the High Desert of California, where I'm moving in June.
(That station is licensed to Apple Valley... a town that would
probably be considered by most people to be "middle of nowhere.")

Thanks David! :)

So then, I guess that's a good thing. Personally, I'd think it'd be foolish to tamper with the current formula, correct? Especially considering there's not all that many other (moneymaking) options for MW radios at the moment.

The Sandusky deal was probably brokered with the Miller Broadcasting
group and they got the FM and the Cleveland station.

It does my heart good to see someone selling a "junky" AM station to
us regular folks instead of CC. My guess is that either the economy
sucks, CC didn't make them an offer, or they don't WANT to sell to CC.

If that aforementioned Sandusky station came up for sale again cheap,
I might spring some bucks for it and get closer to my roots.

"They," who? Clear Channel never sold anything in Cleveland to Miller,
and Miller has never owned anything in Cleveland to the best of my
knowledge.

The stations in question are WCPZ/102.7 and WLEC/1450. Also, CC now
owns WMJK/100.9, licensed to Clyde, Ohio (Majic 100.9, and they stole
the logo and look-and-feel from Clear Channel's WMJI/Majic 105.7 in
Cleveland). I don't recall whether Clear Channel owns any other
stations in the Firelands region.

Amateur Radio Newsline™ Report 1337 March 28, 2003

Amateur Radio Newsline report number 1337 with a release date of Friday, March 28 2003 to follow in 5-4-3-2-1.

The following is a Q-S-T.

Keeping a repeater on the air in New Zealand could become very expensive and Australia considers complete restructuring of its Amateur Radio service. Find out the details on Amateur Radio Newsline report number 1337 coming your way right now

(Billboard Cart Here)

**

RADIO REGULATIONS: NEW ZEALAND MAY START REPEATER LICENSE FEES

Ham radio operators could soon be paying a lot of money to keep a repeater on the air in New Zealand. This as government regulators down-under look at instituting a new license fees that could make keeping a system on-the-air prohibitive for many clubs that sponsor multiple machines. Amateur Radio Newsline's Jim Meachen, ZL2BHF, is in Auckland New Zealand with the rest of this breaking story:

--
NZART stands for The New Zealand Association of Radio Transmitters and it is the official national ham radio society here in New Zealand. It also functions much the same as the ARRL in the United States and is a member of the International Amateur Radio Union.

NZART has received proposals from government telecommunications regulators that could cost hams in this nation a lot of money just to stay on the air. What the New Zealand regulators want to do is go to lifetime licensing with a one off license payment, That's the good idea. But there is more.

Regulators have also proposed fees for repeater and beacon licenses that are just plain unacceptable to NZART or the New Zealand ham radio community. Right now there is no repeater or beacon license fee. Under the proposed revision, there would a NZ$250 initial fee to put a one on the air and an on-going annual NZ $200 charge per system to keep it on the air. Currently the NZ to US Dollar exchange at just under 2 for 1.

The current no fee for beacons and repeaters was introduced some years ago for good reason. This proposal is a very significant policy change with what NZART says are serious and unacceptable implications. This is because, by definition and by international agreement, the Amateur Service is non-pecuniary and by international agreement cannot be used for money-making. Unlike other services

that can pass on costs to others, in the world of Amateur Radio, there are no "others". As a result, the NZART
intends to oppose this one, all the way.

Reporting from below the Southern Cross in Auckland New Zealand, I’m Jim Meachen, ZL2BHF, for the Amateur Radio Newsline.

--

An example of what Jim was talking about? Since each repeater would pay the $200 license fee, a club with 5 systems -- which is quite common -- would be paying $1000 New Zealand dollars every 12 months. (NZART)

**

RESTRUCTURING: WILL AUSTRALIA CHANGE ALL?

The debate in Australia about the need for a new Entry Level license has now been expanded into a call for the review of the entire amateur licensing system. Q-News Graham Kemp, VK4BB, in Brisbane is here with the details:

--

A research report entitled "Amateur radio and the challenge of change" has been co-authored by Jim Linton VK3PC and Roger Harrison VK2ZRH. Here is Jim Linton VK3PC giving a summary report of the Linton-Harrison Paper 2003.

--

(Note: This is an expanded version of what is found in the audio newscast)

VK3PC: “Amateur radio is at the crossroads, it can continue straight ahead down hill and virtually disappear, or set its own path by changing the amateur licensing system.

The time to act is now. When the UK Foundation License was introduced at the beginning of last year, there was not instant support for Australia to take a similar approach. However, some 15 months later there is majority support for a new license in Australia.

What the Linton-Harrison Paper 2003 does is to refocus the debate on the entire licensing system in Australia, the types of licenses, the syllabuses and examinations. We must not be tempted to simply copy the UK Foundation License. It does not meet Australian conditions and needs, and will not provide the necessary sustained growth for amateur radio here.

Australia's new Entry Level License should not be strictly an "operators' license" - a simple permit to use a type-approved transceiver. Entry Level Licensees should be able to enjoy the thrill and satisfaction of operating a radiocommunication system under as many circumstances and conditions and on a wide variety of bands across the RF spectrum as they wish to explore. This should be in keeping with long-standing amateur radio tradition and in line with the ITU definition, which says amateur radio exists for the purpose of self-training, intercommunication and technical investigations.

There will be changes to the licensing system as a direct result of the World Radiocommunications Conference in Geneva later this year where the mandatory Morse code testing requirement is to end.
The amateur radio community and the Wireless Institute of Australia must be ready to take action to revitalize the amateur radio licensing system at the earliest opportunity.

If the right action is not taken, the decline of amateur radio that the Linton-Harrison Paper identifies as being in now its 6th year, will lead to its ultimate demise.

Again, sustainable growth is absolutely essential. It is important to encourage people into the hobby who retain their license and their interest in amateur radio. A hobby that continues to interest, challenge or reward them.

Linton-Harrison advocates a two license system. An Entry Level with a syllabus set at a basic standard, along the lines of the original intention of the Australian Novice license. An Unrestricted License with a syllabus that is revised to comply with the ITU Recommendations for amateur licensing.

The Linton-Harrison Paper describes the current Novice and AOCP syllabuses as being "bloated" and beyond what is expected internationally. The WIA Federal Council agrees.

The current Novice license standard is recognized as being too high. It should not take 40 weeks study to get an amateur license. The Novice license is equivalent to the United States Technician License.

The current AOCP examination is also not relevant to the needs of today, and is at least two decades behind the times. The Linton-Harrison Paper calls for the whole licensing structure, the examination system and syllabuses to undergo a fundamental rethink. In its 8-pages the Paper covers much more than I can in this audio report.

--

Linton and Harrison wrote a similar paper in 1985 that is still being referred to today. (Q-News)

RESCUE RADIO: THE PARTNERSHIP FOR PUBLIC WARNINGS DRAFT IS NOW AVAILABLE

Here in the United States as well as around the world, letting the public know that an emergency situation is taking place can save lives. Because of this government agencies as well as the private sector are always trying to find betters methods of issuing alerts.

Now, comes word of a draft document for a new United States national emergency warning strategy from a group called the Partnership For Public Warning. A plan that some say holds the potential to truly modernize the way the public is informed.

For those not aware, the Partnership for Public Warning is a national organization formed in November of 2001. Its Board of Trustee’s include

representatives from every area of public warning communications including at least one radio amateur. The stated goal of the Partnership for Public Warning is to promote and enhance efficient, effective, and integrated dissemination of public warnings and related information so as to save lives, reduce disaster losses and speed recovery.

This document they have released is said to represent the first time anyone has proposed an overall emergency warning strategy for the United States. The concepts outlined help to look ahead to more advanced warning systems than the current E-A-S, weather service products, and other offerings. After reading it, the Partnership for Public Warning invites your participation and comments. You will find it in cyberspace at:
http://www.ppw.us/ppw/docs/nationalstrategy.pdf (GCC, PPW))

**

RESCUE RADIO: S.DAKOTA EMERGENCY COMMS LOOSE TOWER

The town of Mitchell South Dakota has last its 180 foot communications tower used for public safety and public radio. According to Jeff Pierce of the South Dakota Bureau of Information and Telecommunications, the tower fell Tuesday, March 18th after a ground anchor rotted and gave way.

Pierce said it knocked out State Radio communications used by law enforcement and other agencies, though nearby towers picked up that radio traffic. South Dakota Public Radio in the area was off the air until a portable tower was put up the next day but reception of weather alerts will not be possible until the fallen tower is replaced. Also, Mitchell police have not been able to use handheld radios and instead must rely on radios in their cars. A replacement tower should be installed and operational the week of April 1st. (CGC)

RESCUE RADIO: NJ HAMS RESPOND FOLLOWING PROPANE BLAST

New Jersey radio amateurs were called up following a large propane explosion in the city of Newton the weekend of March 8th. Amateur Radio Newsline’s Ken Locke, N8PJN, has the rest of the story:

--

It was Robert Stepanek, N2TTT who put out the call for more assistance. Stepanek is the ARES District Emergency Coordinator of Susan County who requested assistance in the form of additional operators after a propane tank exploded in the town on Newton New Jersey on March 14th. Hams from several

other New Jersey counties responded.

Amateur radios' primary role was to provide back-up relief shelter communications. Many of the evacuated residents were sheltered by the Susan County Chapter of the American Red Cross.

Pat Day is the Executive Director of that Red Cross chapter. According to Day, about 1000 residents who were forced out of their homes. Those who did not have other places to stay went to nearby shelters operated by the relief agency where some stayed until March 16th. Hams from Somerset, Union, Morris and Hudson
counties volunteered during the emergency.

For the Amateur Radio Newsline, I'm Ken Locke, N8PJN, reporting

--

Rich Krajewski, WB2CRD is the Public Information Coordinator for the ARRL's Northern New Jersey Section and provided most of the information for this story. (WB2CRD)

**

RESCUE RADIO: KILLER TORNADO HITS GEORGIA

Amateur Radio operators in southwestern Georgia have been helping in the wake of tornadoes that hit the region on March 20th. The storms left six people dead and over 200 injured. Georgia's Governor has declared a state of emergency in two of the hardest hit areas.

According to an ARRL Bulletin, ARES was activated in Mitchell, Worth, Lee and Dougherty counties. There, hams have been assisting various relief agencies including the American Red Cross, the Salvation Army and Georgia Baptist Disaster Relief.

ARES members of the Albany Amateur Radio Club also responded. Most of them are Red Cross volunteers. They took emergency response vehicles to the affected areas to feed victims and provide communications.

The ARRL Lee County Georgia Emergency Coordinator is Bob Smith, K4PHE. He says that several ARES members have been volunteering continuously since the tornadoes hit. (ARRL)

**

ENFORCEMENT: NY HAM WARNED ABOUT INTERFERENCE

A Patchogue New York ham has been told that he could face a fine of up to $7500 if he continues to violate the Amateur Service Rules. The FCC's Daryl Duckworth, NN0W, tells us who and why:

--

Duckworth: "Anthony Satornino, N2QPY, was issued a Warning Notice concerning deliberate interference with other licensees' on the 2 meter Amateur band and

engaging in unlicensed operation in the 10 meter band.”

--

Satornino was also asked to clarify his actual address for FCC records and to do so within 20 days. (FCC)

**

ENFORCEMENT: THE FCC VS. K1MAN - AGAIN

The FCC has again written to Maine radio amateur Glenn Baxter, K1MAN, regarding he operates his Amateur Radio station. Amateur Radio Newsline’s Paul Courson, WA3VJB, is in Washington with the details:

--

In its latest letter to Glenn Baxter, K1MAN, the Commission says he has not corrected problems that prompted their letter in January, which was based on monitored information and numerous
complaints to the FCC.

The FCC claims that Baxter’s Amateur Radio station is apparently being used for broadcasting non-ham radio matter including programs, talk shows, and children’s shows. The agency also alleges transmissions from his station are being used for deliberate interference and for communications where Baxter apparently's trying to make money.

The FCC also notes that some of the transmissions start and stop erratically, and leave the air with no identification as required by Commission rules. An enforcement official who wrote the letter said such operation indicates the transmissions are not under the control of a licensed operator.

The FCC goes on to say that the transmissions from Baxter’s station are tape recordings, which themselves wouldn't be illegal, but that in some cases it sounds to the FCC as if the recordings may have been questionably taken from an answering machine and off the telephone and broadcast without full compliance with the law. Enforcement authorities also wrote some of the transmissions are repetitive, apparently for weeks, of the same telephone calls.

Baxter has raised controversy for years with what he portrays as a daily bulletin service on 14.272, 3.972 and 3.890 MHz, prompting interference complaints from sideband and AM communities alike.

Baxter has patterned his program to the style of commercial talk radio, right down to having a toll free telephone number for listeners to call in and chat. The FCC wants Baxter to respond to its latest letter to decide what if anything to do next.

For the Amateur Radio Newsline, I'm Paul Courson, WA3VJB, near FCC headquarters in Washington.

--

This latest letter to Baxter came from Vincent F. Kajunski who is the FCC’s District Director in Boston Massachusetts. Kajunski also directed K1MAN to submit weekly reports detailing certain aspects of his stations on air operations. (FCC)

**

ENFORCEMENT: ALASKA BROADCASTER FACES FINES $137,000

A Christian broadcaster is facing up to $137,500 in fines for alleged wetlands damage on Alaska’s Kenai Peninsula. Fred Vobbe, W8HDU, of the National Radio Club’s D-X Audio Service has more:

--

The Anchorage Daily News reported on March 13th that Alexander Kozned of Ninilchik poured gravel and other fill into about three and a half acres of protected wetlands, as well as a stream and intertidal zone that drains into Cook Inlet.

The charges against Kozned come in a complaint filed this month by attorneys for the United States Environmental Protection Agency. The alleged violations are reported to have taken place during the summer of 2002 on Kozned's property a few miles north of Ninilchik. That’s a location where he reportedly wants to install a broadcast antenna array to broadcast religious programming to Russia and China.

An attorney for Kozned said the area affected is less than a tenth of an acre and that volunteers, not knowing about the wetlands, made an honest mistake. He also claims that the EPA's reaction amounts to overkill.

But officials at the federal agency said Kozned knew of the wetlands and filled them without a permit, despite a 1998 warning. The E-P-A and the U.S. Army Corps of Engineers issued cease-and-desist orders at that time after discovering that Kozned used earth-moving and road building equipment on wetlands to build antenna pads. The E-P-A ordered Kozned to restore and revegetate the wetlands he harmed. Kozned complied and was not fined in that case.

For the Amateur Radio Newsline, I’m Fred Vobbe, W8HDU.

--

The charge marks his second run-in with federal environmental regulators. (Anchorage Daily News)

EMERGING TECHNOLOGY: A NEW KIND OF POP UP SPAM

As if junk e-mail and pop-up ads weren't annoying enough on their own, now there's pop-up junk e-mail. This, as the result of a developer of bulk-mail software has figuring out how to blast
computers with pop-up spam over the Internet through a messaging function on many Windows operating systems. Amateur Radio Newslie’s Bruce Tennant, K6PZW, is here with more on how it works:

--
The software is called DirectAdvertiser. The company that developed it is reportedly based in Romania. In recent weeks, Internet users have reported receiving pop-up messages such as one touting university degrees without classes or books.

DirectAdvertiser does not hack into computers. Rather, it
uses a part of the Windows operating system called Messenger. It comes turned on by default with many Windows systems including 2000 and XP. Its meant for system administrators to broadcast service notices and should not to be confused with the various other instant messaging programs.

DirectAdvertiser was first reported by Wired.com, and appears to represent the latest attempt to bypass the increasingly sophisticated e-mail spam filters employed by leading Internet service providers and individual users. It also appears to circumvent federal and state laws designed to curb junk e-mail.

For the Amateur Radio Newsline, I’m Bruce Tennant, K6PZW, reporting

--

There is one major fault to DirectAdvertiser that makes it easy to beat. To receive the pop-ups Windows Messanger must be turned on. If you don’t want to get them -- just turn Messanger off. (OnLine Technology)

HAM RADIO IN SPACE: AMSAT SPACE SYMPOSIUM SEEKS PAPERS

The 2003 AMSAT-NA Annual Symposium, scheduled for October 17 to the 19th in Toronto Canada has put out its first call for papers to be presented at the event. The subject matter should be of general interest to amateur radio operators involved in satellite communications.

Papers may be presented by the author during the Symposium or simply offered for inclusion in the Symposium Proceedings publication. A brief abstract of the proposed paper should be submitted as soon as possible. The final date for abstracts is June 15th with copy ready papers must be received no later than August 15th. Electronic submittal is preferred in Microsoft Word format. E-mail electronic submittals to Wayne Chandler at ve3whc@amsat.org (AMSAT)

**

INTERNATIONAL - AFGHANISTAN: NEW KANDAHAR RADIO STATION TO BE LAUNCHED

On the international scene, the Boston-based N-G-O Afghans for Civil Society has announced that former BBC producer Akhtar Kohestani will serve as station manager for Afghan Independent Radio or A-I-R. This is a new station which is to be launched this spring.

A-I-R will be the first independent radio station to be based in the former Taliban stronghold of Kandahar in southern Afghanistan. Plans are under development for program sharing with the BBC, Radio Free Europe, Radio Liberty, the Voice of America and Radio Afghanistan. (Stewart McKenzie)

**

INTERNATIONAL - POLAND: NEW BANDS FOR SP HAMS

Also, SP5HS reports that Poland’s new national frequency allocation table came into effect on February 27th and its pretty good news for that nations hams. The new rules allows S P amateurs to use the 136 kHz band, while the 50 MHz band is now allocated to amateurs in Poland on a secondary basis. 6 meters is still shared with government services. (GB2RS)

**

BEACONS: 2 METER K7XC/B ON THE AIR FROM NEVADA

A new 2 meter propagation beacon is on the air from the state of Nevada. Amateur Radio Newsline’s Don Wilbanks, AD5DW, tells us who put it on and where to find it:

--

Tim Mareck, K7XC reports that the 2 Meter beacon operating under is call sign is now installed at it's new mountain top home here in grid square DM-09. Tim says that its on 144.288 MHz and operating from 4900 feet atop Lahotan Peak. This is above the Lahotan Reservoir near Silver Springs Nevada. Currently, the beacon consists of a 10 watt C-W transmitter into a single K-Q Loop at the 30' level on the tower. If you hear it, you can be pretty sure that 2 meters is open to Nevada from where ever you are.

Tike adds that the next project is a 6 meter beacon from the same site. It will use a Yaesu FT-620B running at 10 watts into a old style KB6KQ loop. This antenna will be placed 2' above the 2 meter loop on the same mast. Tim's target date to complete this phase of the project? He says hopefully sometime in June.

--

Again, the frequency of the K7XC beacon is 144.288 MHz. If you hear it you can send Q-S-N reports to Tim by e-mail at timm@cccomm.net (VHF Reflector)

**

DX

In D-X, six German operators will be active as A-35-X-M from Tonga to the 4th of April. They will concentrate on working Europe. More information is at www.df3cb.com/a35xm (OPDX)

And Tim Totten, N4GN, reports that all Oh-J-one thru Oh-J-8 QSL cards for W-R-T-C 2002 have been printed and ready for release. If you want to obtain your QSL cards directly, send an S-A-S-E before April 15th to Toni Linden, OH2JTE, Ohratie 16E218, 01370 Vantaa, Finland. Tim also says that plaque and T-shirt and Early Bird submission winners can be viewed at the following site. Its out there in cyberspace -- at www.n4gn.com/wrtc. (N4GN)

**

THAT FINAL ITEM: YHOTY 2003 NOMINATIONS SOUGHT

And finally this week, the nominating season for the 2003 Young Ham of the Year Award is now open. Our producer, Bill Pasternak, WA6ITF, is here with the details:

--

Each year, we at the Amateur Radio Newsline join forces with Vertex-Standard and C-Q Magazine to honor the accomplishments of a young radio amateur who has contributed in some special way to the hobby or to society through the hobby.

The rules are still the same. A nominee must be age 18 or younger, hold any class of Amateur Radio license issued by the FCC and live in the contiguous 48 states. And this year, thanks to Kevin Boudreaux, N5XMH, its easier than ever to file a nomination.

Kevin was the 1993 Young Ham of the Year award winner. He has now created a new on-line home for the award that has all the information, rules and downloadable forms needed to submit a nomination. And Kevin has taken it a step further. He has also created our first-ever fill in the blank on-line nomination form. Just provide the information on-line, click at the bottom of the page and your nomination is on its way to us.

After you finish filing your nomination, please click on some of the other pages and take a look around. You will find it in cyberspace at www.yhoty.org/2003.htm . There is also a link to it from our website at www.arnewsline.org . Printed forms are available for an SASE to the Young Ham of the Year Award, 28197 Robin Avenue, Santa Clarita California 91350.

--

Our thanks to Kevin Boudreaux, N5XMH, of Dynamic Marketing for taking the time to create this new website. He is one Young Ham of the Year who is still an important part of the award. (ARNewsline™)

**

Two of our stations went off the air abruptly Wednesday at 6 A.M. when the T-1 line we use for an STL went down. The local telephone company took until this afternoon to get the line back up. The cable department said the problem was something electronic (and therefore not their problem), while the "special services" people kept insisting it was a bad pair (and therefore not their problem).

Meanwhile, we lost two days worth of business on two stations.

What a bunch of bozos.

I find having two independent ISPs eliminates provider frustration,
pretty much. Use the one that works when one doesn't work.

I imagine having an alternative mechanism would have a similar effect
in broadcasting.

The studios don't have line of sight to one transmitter site and only a
grazing path to the other. Sometimes the STL works and sometimes it
doesn't. On this particular occasion it didn't, so we were S.O.L.

I should mention that the permit granted us to occupy the premises
contains a "no antennas" clause which we violated in putting an STL
antenna on the roof. There is a local ordinance strictly prohibiting
any sort of tower except at a handful of specific locations, none of
which is ours.

Kick and scream as if your life depends on it.

If you dont get a reaction before the business day is over, go down to your actual COB (telco central office) and have a nice 'discussion' with them. They allways seem to 'like' that.... but in my experience, you usually get stuf done the easy way.

The techs always go there between jobs, and its pretty simple for them to track something down there if a pissed off business customer actually comes in and wont leave till the problem is dealth with, or begins to be dealth with.

Of course, you usually have to socially engineer your way into the cob, but after explaing your situation... and telling them (turn to 9x.x FM and tell me if you hear anything) really helps too.

;-)

Whenever Telco gets involved between a studio and a transmitter I get nervous. At WOR we had a huge phone cable cut by construction workers who thought the copper was worth something. We lost all phone lines. Since our STL was microwave we were still on the air.

Since I don't trust telco with POTS I don't want them controlling my digital connections to the transmitter.

Rich

>stuf done the easy way.

At WOR we did a yearly radiothon for a children's charity. Two years ago telco screwed up badly. ISDN drops weren't made and the telephone banks weren't working.

We called to top honcho and repeatedly mentioned on the air what the cause of the problem was. It got fixed and we were able to get them to contribute $50,000 to the charity. They don't like it when we mention how badly they're screwing up on the air.

In Boston, WJIB (the original one) often had Boston Edison problems. We had a generator at the studio and repeatedly mentioned that Edison was not cooperating. Turns out the top honcho at Edison was a listener. He got help there fast. Nearly every time we had a problem he'd call the station to make sure it wasn't Edison's fault.

At one point, Telco sold our equalized 15KHz STL lines to someone. They removed the equalizers. We kept explaining to listeners why we sounded so bad. It got fixed fast. Another time they set us up with stereo lines that ran so far apart (44 miles) that phasing was terrible. Another round of mentions got us equal length lines.

Never be afraid to let your listeners know when a utility is causing you trouble.

Rich

There's one remedy I haven't heard from anyone, and it's one that I've used as a consumer, that I'm aware of since I work in a telecomm-related industry.

Rich Wood has submitted a suggestion that I'm about to post that in this type of situation, you let everyone know how the telco is screwing up. It's an excellent suggestion.

Once the immediate problem is solved, go after them! File a complaint with your state's PUC/PSC. Telcos are a regulated utility. Data services may or may not be regulated depending on what you have... the ISP side of the telco typically isn't... but your friendly local phone company must at least file tarriffs on T-1, DSL and ISDN circuits.

Can't speak for other states, but I've successfully used the Ohio PUC to force the hand of both SBC Ameritech (who currently provides local service to my home) and XO (who used to service a couple business phone lines of mine) to Do The Right Thing.

I would like to know what the offensive lyrics are before I join in any boycott of any group. However I think the music industry is busy killing itself so I am not too worried.

I mean if they sell offensive music and only a small percentage of people, those to stupid and actual criminals buy it, then what about the rest of the people? I also doubt they'll be reselling this crap in 20 years to the same people because I don't think jailed inmates have a lot of disposable income. But even if they do....so what, how many people is that?

The music industry has lost it's mind selling this crap. Look at the Beatles, they sold music that made people feel good. Gee...duh...they forgot that already? AND the biggest joke is they can't even figure out how to make money anymore because they can't deal with the Internet or new technology. They are like retarded dinosaurs sticking their heads in the sand.

About twenty years ago in Tampa, we had a 'disgruntled ex-employee"
come out the studio in Pinellas Park and use and axe on the phone
lines that linked the studios to the tower site about six miles away.
And every other line in the bundle for that matter. Luckily, she did
it on a Sunday morning, probably after a very late night in a bar
coming up with this brilliant plan of retribution. Since it was
Sunday morning, we didnt lose much in the way of business and the
telco guys were quick to come help us get back on the air.. but that
was when Ma Bell owned it all. Sure made things simpler.

I remember back in 1995 (or was it 1996), you guys did a "talk concert" (my term for it) in Bryant Park - did the whole broadcast day from the park behind the main library.

During Grant's show, the damned feed back to the studio went down for ..... almost 15 minutes (or at least it seemed that long). I was sitting in the front row and had a radio with my earplug.

Apparently WOR was using a phone line back to the studio?

What was most embarrasing was that the board op had no backup music or spots or anything cued up in case of an emergency. There was dead air going out.....

P.S.: I stopped by the WOR building a couple of weekends ago, the big metal sign strip that said WOR 710 WOR 710 WOR 710 WOR 710 across it's full length over the entrance facing Broadway was gone. What gave? :-(

I'll suggest that to my colleagues, but I have a feeling they will have some reservations. The telco is an advertiser on our flagship station, which is in a large market and gets pretty reliable telco service. The stations getting screwed are in a much smaller market[1] and I doubt there is any telco person there of sufficient rank or authority to respond to an on-air complaint (or even in our large market; there used to be an autonomous "division" of the telco serving our state and four or five others under a president who was a listener to our flagship station, but that was two telcos ago; now everything is run from a head office in a state well beyond the reach of any of our stations).

The first thing I'm going to do, I think, is put a ten-foot mast under our STL antenna and see if anyone from the town or county objects.

[1] I could go on at length about what I perceive to be a culture of mediocrity permeating that particular market, but perhaps that is a tale for another time.

That was a day I'd rather forget. The feed went down several times. The ISDN line simply wasn't reliable.

>What was most embarrasing was that the board op had no backup music or
>spots or anything cued up in case of an emergency. There was dead air

I had a heart to heart chat with that board op., as did a number of people in the engineering department. In the case of a network show there was always supposed to be a hot backup running. We even had copies of network shows stored at ABC's Technical Operations Center. That's where the network originated the day the phone lines were cut. ABC was wonderfully helpful.

I don't remember any such sign. It must have been taken down before I got there. All I remember was one set of call letters and a place where "Mutual" used to be. It hadn't been painted over very well and you could see where the letters used to be.

Lorenzo Milam's book should be adapted for LPFM and similar operations. It would be a darned sight better than any of the broadcasting texts I have seen in college book stores of late.

For sale:

(The "Radio Crazy" is back!)

Partial interest in fulltime 1 KW AM radio station in
Quitman, Georgia. Near Valdosta. On the air since
1955. 1490 KHz. Class "C" (Formerly called class IV).

This is the only AM in the county.

City of about 4700 in a county of about 16,500.

Joint venture. Active or inactive investors with at
least $10,000 each are welcome.

NO repeat NO real estate is included. It is leased for
$400.00 per month. Studios and transmitter are under
one roof in a very pretty residential setting.

I am NOT a broker, agent, shill, owner or part owner
with respect to this station.

Tel. (478) 741-1710 in Macon, GA.

73,

Meyer Gottesman, W6GIV

Yes, actually, the FCC recently issued a new CP for 74 watts. That does make the station receivable (in varying degrees) in most of Longview, assuming you have a good radio. Most car radios are OK with it, but it is cretainly not a strong signal.

The local Radio Shack reports selling "more than average" numbers of outdoor FM antennas recently. I can't tell you if the station has anything to do with that or not.

The last time his name came up I called his office to see how he was
doing. He'll be back in April from Mexico. He might be interested,
though, lately, he's been writing on issues of the handicapped. Please
don't get on me for not being PC. Lorenzo refers to them as "crips."
Since he's a polio survivor he has that right.

Sorry, can't help with the schematic but can tell you about McKay Dymek. I am a a boyhood friend of George McKay (W6WXG) who developed the AM-5 tuner with his Chief Engineer, Paul Metsker. I helped put out a promotional newspaper called the Dymek News in those days, and have a list of more than 80 stations using this tuner, including WGAR, Cleveland, in 1976.

Among his other products were the DR22/33 series general coverage AM/LSB/USB digital communications receivers that covered 50 kHz to 29.7 mHz. Some of these are available on the used market but are considered very rare. He sold many of the rack mounted version to the South Korean Navy. All Dymek products were made in Southern California, USA!

Unfortunately George has retired from the business and the name has been sold to a company in Oregon.

548. For sale: Partial interest in fulltime AM station in Georgia.

Newsgroup: rec.radio.broadcasting
Date: 2003-04-04 16:36:19 UTC
From: Meyer Gottesman <wrecktech@yahoo.com>
Message-ID: <b6kca3$bo8$1@xuxa.iecc.com>
Source record: 8474

For sale:

Partial interest in AM radio station in Quitman, GA.

WSFB, 1490 KHz, fulltime, 1 KW. On the air since 1955.
This is the only AM in the county.

Joint venture. Active or inactive investors with at
least $10,000 each are welcome. All investors would be
on the board with full voting rights if desired. No
individual may own more than 49 percent. We want
investors, not bullies! This rule applies to me too!

Asking price is $75,000 and owner will seller finance
with $25,000 down.

NO repeat NO real estate is included. You heard it
first here, kiddies! That is rented at $400.00 per
month. Studios and transmitter under one roof.

Tel: (478)741-1710 in Macon, GA.

I am NOT an agent, broker, shill, owner or part owner
of this station.

I am a semi-retired broadcast engineer. Resume emailed
or snail mailed on request.

Please, no "AM bashers" or other "negative nabobs" (I
don't know what the hell a "nabob" is either!)

73,

Meyer Gottesman, W6GIV
aka "The Radio Crazy"

> OB (Outside Braodcast) vans / vehicles ?

I don't know about low-cost, but here are some companies off the top of my head:

http://www.alice.co.uk/
http://www.bbcresources.com/

You could do worse than ask on the engineering forum of http://www.mediauk.com/ - a lot more UK media-y-y-y-y types hang around on there than they do on Usenet.

The Radio Authority sent us a list of equipment suppliers when we applied for our last RSL -- sadly, the documentation is all 90 miles away from me at the moment.

> We're doing a 10 day RSL from the centre of Huddersfield in
> July and really need to sort out an OB vehicle for the last 2 days.

Good luck with it -- I'll try and have a listen from down in Leeds.

> Had a quote from a company called Radica, but they want 2000
> quid for something that's currently in America, and sounds too
> posh for Madonna, nevermind us lot. :o)

That's because Radica are generally expensive, but they're generally very clued up. Our main FM broadcast transmitter is a Radica, and it's superb.

Hello

I wonder if anyone knows SL Huntley, who was a radio writer and journalist in Chicago. He was to the writer of popular comic strip Mescal Ike from twenties to forties; Art Huhta was the artist.

I'd like to know which were his first names and some biographical info about his life and work.

Best regards, Ilpo Lagerstedt, Finland

I certainly support his right to do his job - and use this newsgroup to do it.

I don't know if it's diversity - or just that the radio biz is screwed up.

This is the same newsgroup where Opie and Anthony had their defenders and advocates; on the other hand, people jump all over Meyer for trying to broker a deal here or there.

Go figure.

552. where hear DJ "Hubcap Carter"...?

I am looking for some audio tapes cassette tapes of a radio station
that was on the air in the early to mid 70s, in houston texas,, the
station logo was . .....ALL MUSIC ALL THE TIME,,,,,
almost all the music was instrumental with a couple with vocals, some of
the music selections i remember where,
Colours,,,,,,,, that was a vocal,,
Chasing Rainbows,,,,,,,,instr,
Memorys are made of This,, instr.
Eye Level,,,,,,, instr,,
I Love Paris,,,,instr,,,
Song Sung Blue,,,,, instr,,,
Tennesse waltz,,,, inst, with vocals,,
Here Comes The Sun,,,,,,,instr, ==========
This station was a easy listening music station and it was called KYND
FM 92 Pasadena ,Houston,,Tx,,,,,,,
they said that there music was recorded in england,,,,, I know that
this format was also used in pennsylvania it was the same exact sound
track when i visited there in 76,,the songs even played in the same
order so it must have been a big reel to reel tape they had,unless it
was a satellite feed from somewhere,, if any one just happened to tape
record this station in the 70s, and wouldnt mind makeing me a copy,will
pay you for your tape and mailing costs,,, please write me or post
here,,, thanks for all your help ,,
best regards,, Ricky

Approach a Dymek AM5, yeah! A crystal set connected to
a 5/8 wave tower!! HI!

I owned a Dymek AM5 circa 1976 and you could not tell
AM from FM mono!!! The combination of high
sensitivity, dual selectivity and low detector
distortion make it the 75A-4 of AM tuners! I am sorry
I sold it to this day!

I should know good tuners, my last job in radio was
Chief Engineer for a 5 KW fulltime AM in NYC. HI!

**

RADIO HONORS: WORLD AMATEUR RADIO DAY

Amateur Radio Supporting Education' is theme for World Amateur Radio Day. Its coming up real soon. RSGB newsreader Jeramy Boot, G4NJH, is here with the details:

--

The theme of this year's IARU World Amateur Radio Day is to be 'Amateur Radio supporting technology education in the classroom'.

World Amateur Radio Day is marked on the 18th of April each year to commemorate the anniversary of the founding of the International Amateur Radio Union on that date in 1925.

Ole Garpestad, LA2RR, the Chairman of IARU Region 1 writes: "There is no doubt that the future of amateur radio belongs to those that are now in the classroom. In keeping with this theme, I would like to encourage every society in the Region to let our young people know that amateur radio is a unique hobby - simultaneously sport, scientific study, personal pleasure and collective activity. And that radio amateurs today are voluntary and selfless researchers in the technological field of amateur radio, an important resource to every country, and something to be proud of."

"But the 18th of April is not only a day to think about our future, it is our day, a day for celebration. All of us, societies and individuals, can celebrate in our various ways - organizing presentations, club meetings, parties, honoring senior radio amateurs who go back to the early years of IARU, or just putting our equipment on the air and making just a single QSO on this day, so realizing how large our ham community is."

Jeramy Boot, G4NJH

--

Again, the date for this years World Amateur Radio Day is Friday, April 18th. (GB2RS)

**

HAM RADIO IN SPACE: PROJECT EAGLE ON HOLD

Plans to launch one of two new ham radio satellites have been put on hold. The reason for the setback can be traced to one word: Funding.

The bird in question is named Project Eagle. It, along with the Project Echo ham-sat is one of two birds that AMSAT had previously announced for development.

According to AMSAT North America President Robin Haighton, VE3FRH, the current levels of contributions to the amateur satellite organization are not enough to pay for building and launching both future satellites. One of two projects has to be put on hold and furloughing Eagle has been the decision.

Up until now AMSAT North America had been working on both new satellites simultaneously. While ECHO is still on schedule for possible launch later this year, the launch of Eagle has been delayed indefinitely. (AMSAT)

**

HAM RADIO IN SPACE: TWO-HAM CREW HEADED TO THE ISS

Just as ARISS Chaiman Frank Bauer, KA3HDO, predicted a few weeks ago, two ham radio operators will be replacing the current three man crew on board the International Space Station. A NASA announcement identifies the latest space adventures as U-S astronaut Ed Lu and Russian cosmonaut Yuri Malenchenko.

Lu holds the call sign KC5WKJ while Malenchenko is RK3DUP. They will comprise the Expedition 7 crew, replacing Expedition 6 astronauts and Ken Bowersox, KD5JBP, Don Pettit, KD5MDT, and Russian cosmonaut Nikolai Budarin.

NASA and its partners decided on manning the ISS with two space explorers instead of three as an interim measure until the U-S space shuttles are flying again. A two man crew conserves on the amount of vital supplies needed for on-orbit life.

Three person crews will resume when the Columbia disaster investigation is concluded and the space shuttles take to the sky again. The three remaining Shuttles in NASA's fleet Endeavour, Atlantis, and Discovery have been grounded until the cause of the Columbia accident can be determined and safety changes implemented.

NASA's Return to Flight team has been told to complete their initial tasks in time to support the earliest possible launch date, which would be this fall. But officials of the space agency say that it could take

months longer to prepare the shuttles to fly again. (From published news reports)

HAM RADIO AT WAR: DOING BATTLE WITHIN

Ham radio is supposed to transcend international politics, but you would never know this by the on-air antics of one unnamed Ukrainian radio amateur and a few stateside hams.

Lets start with a post on the QCWA remailer by Bob Harvey, K2PI. Harvey says that he heard the Ukrainian operating a contest on March 30th. Thats not news in itself except that the Ukrainian was refusing to work United States or U-K amateurs because of the war in Iraq.

Harvey writes that the Ukrainian said to call him only if you supported his view that the United States was conducting an illegal and evil war. Needless to he had no QSO's with any American or British hams.

But theres another side to it. John Sielke, W2AGN comments over the same QCWA remailer on the plight of a French ham friend of his. W2AGN says that the guy was harassed off of another ham radio remailer only because he was French and the other hams did not agree with France's anti-war stand. Sielke says that the unidentified French ham was truly vilified even though he had made no comments concerning Iraq or politics. He was just attacked purely because he was French. (QCWA Reflector)

**

RADIO RULES: FCC CONSIDERS INTERFERENCE IMMUNITY FOR RECIEVERS

We predicted a month ago that it would happen. Now comes word that the FCC has issued a Notice of Inquiry, seeking comments on possibly requiring receiver manufacturers to build in a certain level of interference immunity. Bill Pasternak, WA6ITF, has more:

--
As noted on the CQ Magazine website and elsewhere in cyberspace, amateurs have been frustrated for years by trying to explain to neighbors that interference problems were really the result of poor design. Bad engineering in their TVs, stereos, cordless phones and other receivers.

Now, because of the need to protect Digital Television transmissions, the FCC is seeking comments on the current immunity performance and interference tolerance of existing receivers. Its also looking at the possibilities for improving receiver immunity in the not to distant future.

The FCC says that it is soliciting input from the public on possible approaches to achieving desired levels of receiver immunity. This runs the gammit from better product warning labels to the possibility of implementing mandatory standards governing the manufacture, import and sale of consumer electronics reception gear.

It is all in FCC E-T Docket 03-65. You will find it on the web by using the document search engine at www.fcc.gov.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF

--

Again the inquirtey into interference immunity standards can be found in FCC E-T Docket 03-65. (CQ Website, FCC)

**

FCC: VANITY FEES MAY BE GOING UP

If you are planning to go for a vanity call sign, do it now or be prepared to pay a few cents more. The proposed hike to $16.30 for a vanity call comes in an FCC Notice of Proposed Rule Making dealing with fee collection matters released on March 26th. Its all in M-D Docket No. 03-83 and comments on it are due no later than April 25th. (From FCC release)

**

ENFORCEMENT: FCC - YOU SOLVE THE PROBLEM

The FCC has told the operators of two competing repeaters that its not going to solve the dispute between them. The agency's Daryl Duckworth, NN0W, explains:

--

Duckworth: "The Enforcement Bureau has written to Grearal Gogue of Conway Arkansas, David Stone of Morrelton, Arkansas and Tom Lee of Jerusalem, Arkansas, regarding repeaters AC5RU and KD5CYA. In the letter it was stated after reviewing the submissions of all relevant information, we declined to intervene in this dispute. It is our position, that in this case, both parties are responsible for solving the interference and we urged them to so in the best interests of Amateur Radio."

--

In this case, two repeaters sharing the same frequency claim mutual interference. On May 24, 2000, the FCC opened an inquiry about

allegations that Lee's AC5RU system was causing harmful interference to coordinated repeater KD5CYA, licensed to Gerald Hogue. The allegations stated that Lee's repeater was uncoordinated because the coordination had been forfeited by numerous changes in location.

On August 14, 2000, the FCC notified Lee that it was his responsibility to prevent interference to KD5CYA inasmuch as it appeared to be the coordinated repeater. On September 14, 2000, after reviewing Lee's lengthy response, the FCC rescinded its requirement that Lee solve the interference to the KD5CYA repeater. This is because it was unclear to the FCC as to which repeater was properly coordinated. The Commission said that it was not an appropriate matter for enforcement action. It also urged the parties to take advantage of the mediation and dispute resolution program of the ARRL but one declined.

Lee submitted additional information on January 5, 2001. On February 8, 2001, after receiving additional documents from all parties, the FCC stated that although it failed to see why mediation or arbitration would not be a viable option, we nevertheless agreed to review the matter once again. In response to allegations of deliberate interference, we cautioned everyone involved to cooperate in the resolution of this matter.

Now, almost two years later the FCC has again said its not going to act. It says that after reviewing the submissions and all relevant information, that it will not intervene in this dispute. The agency says that in this case, both parties are responsible for solving the interference and it urges them to do so in the best interests of Amateur Radio. (FCC, RAIN)

**

AT THE FCC: MULETA NEW WTB CHIEF

John Muleta is the new Chief of the FCC's Wireless Telecommunications Bureau, which regulates amateur radio along with other two-way radio services. According to the ARRL, Muleta worked for the FCC from 1994 to 1998 and his positions included Chief of the Enforcement Division. He has also worked in the private sector since 1998. Muleta succeeds Thomas Sugrue, who headed the bureau the last four years. (ARRL)

**

RADIO LAW: CONGRESS APPROVES DIFFERENT AMBER ALERT MEASURES

The United States House of Representatives has approved creation of a nationwide Amber Alert network. The action came on Thursday, March 27th after politicians on both sides of the aisle attached several additional child protection measures to the bill.

The bill, approved by a 410 to 14 vote, now goes to the Senate, which earlier approved legislation authorizing only the nationwide child kidnapping alert network. President Bush has commended the House on

acting on legislation to help expand an Amber Alert system across the nation. He says that he looks forward to signing a reconciled version of the bill. (Published news reports)

**

RESCUE RADIO: UK POLICE ASK HAMS TO HELP SOLVE ROAD MURDER

Police in Surrey are asking U-K hams and C-B operators to help solve a case of murder by road-rage. Just after midnight UTC, on Friday the 21st of March, a truck driver on the M3 motorway was driving northbound when someone threw an object at the cab of his vehicle. It smashed the windshield and hit the driver and fatally injuring him. He was able to bring the truck to a safe halt before loosing conciousness. He died at the scene.

Investigators belive that the object was thrown from a footbridge over the highway. They are asking any ham or C-B operator who was driving in the area that night to call in and let them know if they saw anything. Surrey Police say that any leads would be appreciated. (GB2RS)

**

RESCUE RADIO: HAMS HELP SAVE YOUNG BURN VICTIM IN HONDURAS

The ARRL Letter says that quick action on the part of a group of ham radio operators may have saved the life of an young burn victim in Honduras. The 8 year old girl was seriously burned late last month. Amateur Radio operators and volunteers at the International Health Service clinic in a remote village in southeastern Honduras and stateside hams worked together on the air to bring needed treatment to the child. With ham radio to coordinate the move, the youngster was evacuated by air to the nearest town with a hospital. From there she was taken to the capital city of Tegucigalpa, where the University of Honduras Medical Center has a burn trauma unit. (ARRL)

**

WELCOMING THE YOUNG: W9SM AT THE WAUSAU CHILDRENS FESTIVAL

The Wisconsin Valley Radio Association will be sponsoring a special event station W9SM, at the 30th Annual Children's Festival in Wausau, Wisconsin.

The date is Saturday April 5th. The Children's Festival features hands-on activities at numerous booths run by various community groups.

The special event station will operate between 1600 UTC and 2200 UTC on April 5th. This, in the General portions of the 10, 15, 20 or 40 meter bands both SSB and CW.

While in operation the station will demonstrate several aspects of amateur radio to the children attending, including APRS and High Frequecy operations. The kids who stop by will also have the

opportunity to get on the air.

The Festival is sponsored by the Children's Festival Committee and the Wausau and Marathon County Parks and the Recreation and Forestry Department. QSL via WB2TLQ at his callbook address. (WB2TLQ)

**

CONVENTIONS AND HAMFESTS: NAB HAM RADIO RECEPTION - APRIL 9

On the convention scene, the annual Amateur Radio Reception at the National Association of Broadcasters Convention is slated for 6 to 8 p.m. on Wednesday April 9th. The venue is the Hilton Hotel in Las Vegas Nevada, right next door to the famed Las Vegas Convention Center.

This years hosts are again CQ Magazine and Kenwood Communications. Publisher Dick Ross, K2MGA and Editor Rich Moseson, W2VU will be there representing CQ. Paul Middleton, K4NUH, will be on hand for Kenwood.

Between 800 to 1000 hams in the broadcast industry attend this yearly ham radio social get together. Among them will be top ARRL officials and some of the folks from Amateur Radio Newsline.

The National Association of Broadcasters Convention is one of the largest held each year in Las Vegas. It typically draws over 100,000 attendees. More information is on the web at www.nab.org/conventions/nab2003 (ARNewsline™)

HAMFESTS AND CONVENTIONS: GO SEE THE TV COMMERCIAL

Ever see a television commercial for a ham radio convention? Well the Rochester Hamfest has one and its now on-line so that you can see and hear it.

The commercial comes courtesy of the Rochester Hamfest. That show is slated for May 30th through June 1st at the Monroe County Fairgrounds in Rocheter New York.

To view or download the T-V spot go to www.rochesterhamfest.org. Then scroll down to the words "click here to see our new TV commerrcial."

And oh yes. A high speed connection is recommended. This is because it is a 5.9 Mega Byte file that opens in most recent media players

including Apple Quicktime and Real Player One. (Rochester Hamfest)

**

HAM RADIO IN SPACE: THE 2003 AMSAT-UK SPACE COLLOQUIUM

And the 18th AMSAT U-K Space Colloquium will be held from July 25th to the 27th at Surrey University, Guildford in Surrey England. This year speakers are a bit hard to find. So planners have relaxed the requirement for a printed paper to accompany the talk. AMSAT says that in 2003 this will not be mandatory.

Other changes this year include "Beginners' Sessions" on both Friday and Saturday afternoons and an earlier start of talks. These will begin right after lunch on Friday but alternate planned tours will be available all day.

Full information about the 2003 Colloquium is on the AMSAT-UK web site. You will find it in cyberspace at www.uk.amsat.org/colloquium.htm. (AMSAT-UK)

**

INTERNATIONAL - UK: CB RULES AND FREQUUENCIES TO CHANGE

On the international freont, look for some major changes to happen to 11 meter Citizens Radio in the United Kingdom over the next several years. This, as the result of the British equivlant of our Notice of Inquirey being issued by their Radiocommunications Agency on March 25th.

The Consultation Document -- as it is known -- contains a proposal to deregulate Citizens' Band radio in the United Kingdom and withdraw the 40 U-K only CB channels by 2010. It also proposes removing the need for individual licensing in 2004.

Not changed would be the current technical equipment requirements and the current operating rules. The deleted U-K only channels would be replaced by the 40 pan-European C-B channels. A press release from the U-K Radiocommunications Agency says that this deregulatory move is intended to provide easier access to C-B and to enhance enjoyment of the hobby. (GB2RS)

**

INTERNATIONAL - INDONESIA: WORLD-WIDE CB DIRECTORY

The Indonesian DX Club is inviting Citizen's Band operators around the world to register their callsigns for the IDXC's C-B Radio Callsign Directory. IDXC is the only one DX listeners club located in Indonesia, and regularly listed in the World Radio TV Handbook. To learn more about the club and register take your web browser www.idxc.org/callsign and explore a rather interesting spot in cyberspace. (IDXC)

**

AWARDS: GET YOUR SWL CERTIFICATE

Duane Fischer, W8DBF, says that the beautiful Hallicrafters Ccollectors International Short-Wave Achievement Certificate is still available. You get it for verified reception of 25, 50, 75, 100 or more countries. Proof of reception is not required as the award runs on the honor system. You can see a low resolution copy and get more information on line at the Hallicrafters Ccollectors International website. Irts in cyberspace at www.w9wze.org (W8DBF)

**

DX

In DX, word from KA2AEV that a group from the recently formed Antigua & Barbuda Radio Club will be traveling to their sister island of Barbuda April 18th to the 21st. Plans call for stations on 160 through 10 mters plus a 2 meter station for local contacts using the call sign V21BBQ. Organizers say that to their knowledge, there has never been any ham activity from Barbuda. In addition to racking up contacts the operators hope to expose the islands residents to the magic of the hobby while familiarizing the worlds ham community with Barbuda. QSL to the Antigua & Barbuda Radio Club, P.O. Box 965, St.John's, Antigua, West Indies. (KA2AEV)

Also, PS7AHR is the official station of The Brazilian Amateur Radio Historical Archive . According to Ronaldo Reis, PS7AB, this is an organization devoted to documenting and preserving the history of amateur radio in Brazil. If you happen to contact it, please QSL via the bureau or direct to P.O. Box 2021, Natal/RN, 59094-970, Brazil. More information, in Spanish and English, can be found on the web at www.ps7ab.com.br (PS7AB)

**

THAT FINAL "APRIL 1ST" ITEM: RADIO THAT CAN MAKE YOU SICK

And finally this week, it appears that some hams may be facing a new health threat ... especially if they eat while operating the radio. Roving correspondent Pierre Pullinmyleg is back from his self imposed exile and filed this report on Tuesday, April 1st:

--

For decades, wives of radio amateurs have said that ham radio makes them sick to their stomachs. Now, it seems that ham radio may actually DO that.

The French Office of Oohs and Lalas, or FOOL, has been studying reports of amateurs falling ill after eating while operating during certain band openings on 6 and 10 meters. Officials at FOOL have determined that the problem occurs only during periods of sporadic-E propagation and believe that the radio waves carry with them into the shack of ham some of the ionization from the E-layer of the ionosphere.

If food is present at the amateur's operating position, then the ions apparently interact with bacteria present in the food to cause food poisoning. The scientists have determined that this is a type of E-Coli contamination which they have named Sporadic-E-Coli, both because it occurs only sporadically and because it appears to be caused by sporadic-E radio signals. They recommend using audio filtration in order to "cleanse" the signals before they reach the speaker, which appears to be the major medium of transmission.

Reporting from the E-layer, this is Pierre Pullinmyleg for Newsline.

--

Pierre says that another option, of course, is to eat in the shack only during periods of F-layer propagation -- and then -- to only munch on chocolate F2 layer cake. (A Pierre Pullinmyleg Annual April 1st Exclusive Report)

Message-ID: <b6ta7o$se7$1@xuxa.iecc.com>
Source record: 8487

NEW ANTENNA FOR SALE---THE SUPER JPOLE!---EMAIL US FOR SOME PICTURES!
Superskyhooks is pleased to announce the sale of one of our kick-ass SUPER JPOLE antennas to a Northeastern Ohio FM Broadcast pirate! This antenna replaces his tired and dying 1/2 wave dipole with a 14 foot tall, 6dB gain monster! Delivery of this antenna marks a milestone for Superskyhooks, we have now sold our first FM BCB antenna! After selling oodles of amateur radio antennas over the years we are just flat tickled pink to be working with the Jolly Roger type folks!

The Super Jpole is a 6dB gain, ALL ALUMINUM antenna that totally outperforms a 5/8 wave costing much more. Don't get ripped off by inferior, PVC pipe designs at inflated prices.

Superskyhooks is producing this antenna for the FM Broadcast band, made to your frequency specification, for $92.00 plus shipping to the lower 48 US states.

EMAIL Superskyhooks@juno.com for more information!

Do not get ripped by the big commercial companies. We can make you a damn nice antenna, or an array of them, for way less dough. Our stuff is not some junk thrown together. It is professional looking and works super. Amateurs by the score have bought antennas from us, and now my fellow ham and pirate DocWu has persuaded us that the market might be good. An example of our deals: 5/8 wave pre tuned to your frequency and checked with an MFJ 269 analyzer: $50.00 plus ACTUAL ship costs. 1/2 wavelength Jpole pre tuned to your frequency and checked with an MFJ 269 analyzer: $40.00 plus ACTUAL ship costs. 1/2 wavelength dipole, pre tuned to your frequency and checked with an MFJ 269 analyzer: $28.00 plus ACTUAL ship costs. These are METAL antennas, not some pvc and wire stuff. All come with a complete and detailed instruction manual that spoon feeds ya through the assembly process. Most antennas assemble in 15 minutes or less!

Email with your requests to superskyhooks@juno.com
Pictures available soon on a web page under construction. REMEMBER, prices are way too damned high not to take advantage of this deal.

We also will build an antenna to your specifications for just about any VHF or UHF frequency for less money than anyone else. The competition knows us, you should as well!
An email gets pics of some of the stuff we have done in jpg format.
Superskyhooks accepts paypal, money orders, or checks.

561. Re: where hear DJ "Hubcap Carter"...?

Unfortunately, Hubcap doesn't have too many stations broadcasting his show.
As of last summer WPTR, 1540 AM, Albany, NY carried it on Saturday nights.
WPTR is clear channel north and east of Albany.

Hi folks,

Does anyone have any technical info on digital radio in the UK via satellite, cable and Freeview? I'm particularly interested to find out about sound quality issues, not least coding system used and bitrate - are these generally the same as on DAB? Any subjective feedback on the use and sound of these media?

Many TIA,

Rich

568. Lovell Webb R.I.P. - WKAZ, Charleston, WV

Newsgroup: rec.radio.broadcasting
Date: 2003-04-10 16:24:39 UTC
From: Rick Callebs <callebs@earthlink.net>
Message-ID: <b745s7$po6$1@xuxa.iecc.com>
Source record: 8495

Posted at the 95 WKAZ FOREVER radio tribute website http://www.95wkaz.com

Lovell McKinley Webb, 60, of Charleston West Virginia, formerly of Gordon, departed this life April 7, 2003, after a long and brave fight with cancer.

He was the son of Maycel Webb and the late Bobbie Webb of Gordon.

Lovell graduated from Van High School in 1961 and attended the Elkins Institute of Technology, Chicago, graduating as a first class engineer. He worked as a radio announcer for AM 950 - WKAZ Radio, Charleston, for 17 years. Lovell was a Ham Radio operator (N8KAZ) since he was a teenager, serving as president of the Kanawha Amateur Radio Club for two terms. Lovell had a love for radio and had made many great friends whom he dearly loved.

Lovell leaves behind to cherish his memory his wife, Jacquelin Rickman Webb, formerly of Dorothy; and their family of pets, which were his close companions and which he called "The Zoo;" brothers and sisters-in-law, Daniel R. and Judy Webb of Gordon, Jackson and Brenda Webb of Wharton, Johnson and Brenda Webb of Ypsilanti, Mich.; sisters and brothers-in-law, Judith and Earl Gunnoe and Nona and David Wilcox, all of Gordon; brother- and sister-in-law, Don and Nita Perry of Campbells Creek; sister-in-law, Peggy Rickman of Katy, Texas; brothers-in-law, Dink Rickman of Speonk, N.Y., Buck Rickman of Toledo, Ohio; several nieces and nephews; and a host of friends.

Service will be 11 a.m. Thursday, April 10, at Handley Funeral Home, Danville, West Virginia with the Rev. Philip Rowe officiating. Interment will be in Memory Gardens, Madison, although the most important burial was on the 28th day of September 1953, in obedience to the command and in imitation of the example of our Lord Jesus Christ, Lovell McKinley Webb was buried with Him in baptism at Van by his grandfather, the Rev. Marvin Lovell Kuhn.

Friends may call from 6 to 9 p.m. Wednesday at the funeral home.

Here is the way it should be done (see URL below). However I don't know
of a source for the coils, because just about all of these circuits are
no longer used, having been replaced with digital circuits such as T1,
etc. On second thought, the coils may be available for radio stations
which use a phone line for their studio to transmitter link. I'm
xposting to 3 other ngs to see if anyone there might know.

Greetings,

This organ may soon be taken to the dump.

A 4/14 Kilgen (one of only three of its type built by Kilgen) built for, and once installed in the studio of WFIL in Philadelphia in 1937. Owner is late on storage payments.
It appears tp be complete in two storage lockers in Loveland, OH.

The off-again, on-again owner had wanted $10,000. Self Storage people MIGHT sell it for the delinquent amount due on the storage unit; it would not hurt to ask.

Interested?
Quickly contact Kevin Collopy at 10686 Loveland Madiera Rd. Loveland, OH 45140

Musically,

Stan Krider

Phantom circuits and repeat coils are wonderfully fun things to
play with. They make a lot of sense if you have a pair of
leased lines and need one more. Or if you own the cable and
would have to install a new 25 pair cable for a few miles.

Repeat coils are actually very commonly available, except they
will be called "hybrid transformer" instead, and they'll be much
smaller than the coils discussed in the URL (which were designed
in the 1930's).

But between rooms? Running more cable is a *lot* less expensive
and less trouble than trying to multiplex multiple channels.
And if you do have an application where the distance is great
enough to be worth the effort, digital multiplexing would be
much preferred.

Amateur Radio Newsline™ Report 1339 - April 11, 2003

The following is a closed circuit report. Here is Amateur Radio Newsline's support fund administrator, Andy Jarema, N6TCQ.

--

For the month of February we heard from: Monthly contributors Joseph Bartzi, Jr., KC8DKF of Wadsworth, OH, and Scott Hensley of the Area Communications Team, of San Jose, CA. Total contributions were $25, with NO clubs heard from. On the other hand, our expenses were $661.

That doesn't work! We need your help to keep these newscasts on the air!

I'll make you a deal: you send whatever you can, and I will take the next few weeks to catch up on who's been helping us stay on the air over the past year.

A reminder that Am,ateur Radio Newsline™ is a federal, 501 (c)(3) non-profit corporation. All contributions are tax-deductible.

The address for the Newsline Support fund is PO Box 660937, Arcadia, CA 91066. If you missed it, it will be given again at the end of this week's newscast. I'm Andy Jarema, N6TCQ.

--

Thanks Andy. That ends the closed circuit with Amateur Radio Newsline report number 1339 with a release date of Friday, April 11 2003 to follow in 5-4-3-2-1.

The following is a Q-S-T. Australia says its time to restructure that nations Amateur Radio Service and ham radio in Iraq. These stories and more on Amateur Radio Newsline report number 1339 coming your way right now.

(Billboard Cart Here)

**

RESTRUCTURING: AUSTRALIA SAYS TWO LICENSES WILL DO

The Wireless Institute of Australia says that its time to restructure ham radio down-under and that two licenses will do. David Jones, VK4OF, reports from last weekends W-I-A Annual General Meting in the city of Adelaide:

--
Audio report only. Hear it at http://www.arnewsline.org
--

Jones' report quotes a press release from Wireless Institute of Australia President Ernie Hocking, VK1LK. We will have more in future Amateur Radio Newsline reports. (Q-News)

**

AMERICA AT WAR: BAGDHAD RADIO CLUB STATION CLOSED FOR DURATION OF WAR

Ham radio will hopefully re-emerge in Iraq after the war has ended. In the meantime, the Daily DX and the ARRL Letter relay information from Diya Sayah, YI1DZ. This, on the plight of one of that nations best known Amateur Radio operations.

YI1DZ, is one of the primary operators at the Baghdad Radio Club YI1BGD station in Baghdad. He reported that just prior to the outbreak of hostilities in Iraq that he had dismantled the station. Also, that all of the equipment is stored in as safe a place as possible.

Daily D-X Editor Bernie McClenny, W3UR, says that he doubts there will be any activity in the near future from YI1BGD or any other Iraqui Amateur Radio station. The YI1BGD club station went on the air in the 1970s and the Iraqi Association for Radio Amateurs remains an International Amateur Radio Union member-society. (ARRL, Daily DX)

**

IN THE PUBLIC LIGHT: AMATEUR RADIO AT NAB-2003

I'm Bill Pasternak, WA6ITF, in Las Vegas Nevada, where the National Association of Broadcasters Convention Amateur Radio Reception is just winding down. An estimated 700 hams involved in the broadcast profession spent the last 2 hours enjoying one anmothers company. They also heard a brief talk by ARRL Presodent Jim Haynie, W5JBP, who used the occasion to thank thee Las Vegas Amateur Radio Club for an important monetary donation:

--

Haynie: "I want to thank the members for the $1000 donation to the (ARRL) Education and Technology Fund. We think it is particularly important in as much as the Big Project as we call it -- in slang terms -- is teaching kids about Amateur Radio who will hopefully be the next engineers at your radio station or something like that. This exposure to electronics is very important to Amateur Radio and very important for industry.

So with that, have a good time , and again my thanks to the Las Vegas Amateur Radio Club for your vey wonderful and generous donation."

--

Well over 100,000 broadcasters and those in allied businesses attended the 2003 National Association of Broadcasters convention. Among them where three friends who hads not seen one another in almost three decades. They are Dick Flanagan, W6OLD, Martin Geisler, WA6TIC and this writer. All of us were members of the Palisades Amateur Radio Club back in the 1970's. Ill be back with more about this radio club after a short airplane ride home.

Annd less we forget. The N-A-B Amateur Radio Reception was again co-sponsored by Kenwood Communications and CQ Magazine.

Reporting from a quiet alcove just outside the Las Vegas Convention Center on my way to McCarren airport, I'm Bill Pasternak, WA6ITF, for the Amateur Radio Newsline. Don. (ARNewsline™)

**

Break 1

>From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the WD9AKO and K9BAR repeaters serving Bolngbrook Illinois.

(5 sec pause here)

**

RADIO LAW: HAM RADIO CC&R BILL REINTRODUCED IN CONGRESS

Another Congressional attempt is under way to provide relief to amateurs prevented by private deed covenants, conditions and restrictions from installing outdoor antennas. The ARRL Letter says that New York Representative Steve Israel has again introduced the "Amateur Radio Emergency Communications Consistency Act" into the current session of Congress. The measure, designated HR 1478, would require private land-use regulators such as homeowners' associations to reasonably accommodate Amateur Radio antennas consistent with the PRB-1 limited federal preemption. PRB-1 now applies only to states and municipalities. (ARRL)

**

RADIO LAW: CALIFORNIA PRB1-LIKE LAW TAKES A GIANT STEP

Some good news for hams living in the Golden State. ARRL Southwestern Division Director Art Goddard, W6XD, says that the California version of PRB-1 passed the Local Government Committee on a unanimous vote at its April 2nd meeting. Goddard says that the next step for A B 1228 is the full California State Assembly.

Representing ARRL at the Committee hearing were Dean Straw, N6BV and Pacific Director Bob Vallio, W6RGG. In his bulletin, Goddard took the time to thank Mike Mitchell, W6RW, Assembly member Bob Dutton and his staff as well. (ARRL SW Div. Newsletter)

**

SPECTRUM SHARING: SATELLITE-FED TRANSLATORS IN THE COMMERCIAL FM BAND

The FCC has assigned RM-10609 to a proposal by Calvary Chapel of Twin Falls and two smaller broadcasters. This, for authority to allow satellite-fed translators or Satellators in the "non-reserved" F M 92 to 108 MHz band. Amateur Radio's Bruce Tennant, K6PZW, has more.

--
As we all know, 92 to 108 Mhz is the band that is currently used by commercial broadcasters, over-the-air-fed translators and most Low Powe F-M stations. Currently, what are called Satellators are restricted to the 88 to 92 MHz band and the translator must be owned by the primary station.

But Calvary Chapel of Twin Falls and the other petitioners want the FCC to allow satellite-fed translators in the non-reserved F M 92 to 108 MHz band. The petitioners claim this proposal will have little impact on existing stations in the spectrum. This is because there is currently a freeze on new terrestrial translators in that band.

The FCC has not indicated when it might act on the Calvary Chapel of Twin Falls rules change request.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

So far the only major objection has come from National Public Radio. N-P-R generally supports the Twin Falls petition, but proposes that coverage distance limitations be set for Satellator operations. More is on the web at http://gullfoss2.fcc.gov/prod/ecfs/comsrch_v2.cgi (CGC Communicator)

HAM TESTING: FCC AND VEC'S TO MEET IN JULY

The 2003 National Conference of Volunteer Eximination Coordinators Conference in Gettysburg, Pennsylvania is set for July 25th. This is the annual get-together between the FCC and the Volunteer Examination Coordinators that maintain the question pools and handle all Amateur Radio testing.

Planners say that last years conference was a success and that they are looking for input for this year'a agenda. Please send any thoughts you have for this years conference to John Creel, WB3GXW. John's e-mail is WB3GXW@arrl.net (NCVEC)

**

RESCUE RADIO COMS: THE BOSTON MARATHON NEEDS YOU

If you are planning a trip to Massachusetts later this month and will have a hand held radio with you, the ARRL Letter says that the Boston Marathon can use you.

The 107th running of the event is slated for Patriots' Day, Monday, April 21st. Planners say that they still need more Amateur Radio volunteers to assist with communications for this year's event. If you want to donate your time, please contact Paul Topolski, WSEX by e-mail to w1sex@arrl.net or Steve Schwarm, W3EVE, at w3eve@arrl.net.

Once again, that's the Boston Marathon, on Monday April 21st and its looking for hams top help out. (ARRL)

**

ON THE AIRWAVES: THE LIBERAL RADIO NETWORK

Venture capitalists from Chicago are reportedly behind an effort to start a liberal leaning talk radio network. One that might offer an alternative to conservative talk show hosts heard across the airwaves these days.

The group will be called AnShell Media L.L.C.. Its backers are reportedly investing an initial $10 million. They are also hoping for assistance from like minded entrepreneurs.

With the intent to be on the air by this fall, the are talking with comedian and author Al Franken about working with the network. They also hope to attract other politically liberal entertainers and political guests as well. (ThePolicyPeport nerwsletter)

**

UPCOMING EVENTS: FIELD DAY - VCARS AT THE REAGAN LIBRARY

The Ventura County Amateur Radio Society will conduct it's Field Day 2003 operations on the grounds of the Ronald Reagan Persidential Library and Museum, in Simi Valley, California. According to Peter Heins, N6ZE, this will mark the third year of Field Day operations in conjunction with and co-sponsored by the Reagan facility. (N6ZE)

**

UPCOMING EVENTS: COMMEMORTING FRANK LLOYD WRIGHTS WESTCOTT HOUSE

The Westcott Wireless Preservation Association will be hosting special event station W8AGA on Saturday, May 3rd. The operation will taker place from Frank Lloyd Wright's Westcott house in Springfield, Ohio.

The Westcott Wireless Preservation Association serving the Westcott House Foundation by continuing radio operations at the Frank Lloyd Wright designed Westcott home. Wright designed Ohio's only prairie style house for Burton and Orpha Westcott in 1907. The house is now undergoing extensive restoration and will eventually be opened to the public as a house museum.

But in the here and now, the special event station is coming on the air. A special QSL card will be issued to any station with a confirmed QSO with W8AGA and who sends a QSL card and SASE to the Westcott Wireless Preservation Association. QSL information is on the web at

www.westcotthouse.org/w8aga (Press release)

**

CONVENTIONS AND HAMFESTS: MILWAUKEE - A SUPER SUCCESS

On the convention and hamfest circuit, word that last weekends A-E-S Superfest in Milwaukee Wisconsin is being called a super success. A late season storm made for some fairly inclement weather but it did not dampen the spirit of the regions ham community that showed up in droves to see what was new and buy what was hot.

According to industry sources the weather may have played to the advantage of dealers by driving the crowds to the display floor. And while Friday was a bit slow, Saturday more than made up for it with lots of high tickeet items moving out. We are told that averaged out sales were pretty good on both days and nobody is complaining.

The Superfesrt is held every April and is sponsored by Amateur Electronic Supply. (ARNewsline™)

**

CONVENTIONS AND HAMFESTS: RENO NEVADA IN MAY

And word that the Spring 2003 Reno Ham Swap will be held Saturday May 10th between 7:00 AM and 1:00 PM local time. The event is sponsored by the Reno Nevada Area Metro Simplex Amateur Radio Club. For Complete Details Visit the website at http://k7xc.tripod.com/hamswap/ (Via e-mail)

HAM RADIO IN SPACE: BIG UK ARISS SUCCESS

Its one of the best ARISS contacts to date. This, as students at the Rushey Mead secondary school near Leicester England spent about 10 minutes talking with U-S Astronaut Ken Bowersox KD5JBP on board the International Space Station. It took place on Friday April 4th, and this is how it sounded:

--
contact audio
--

Rushey Mead is a U-K secondary school for 11 to 16 years olds. It also has an active amateur radio club. But for this special occasion, the GB2NSC station of the National Space Center was chosen for the space talk. John Heath, G7HIA operated the station. Here's more of the QSO.

--
contact audio
--

Students, teachers, parents, and the media were present as twelve youngsters asked questions about life in space of Ken Bowersox, KD5JBP.

More contact audio is at Howard Longs website. It is in cyberspace at http://users.skynet.be/fa059641/2003_04_01.htm (ARNewsline™ audio with courtesy of Howard Long, G6LVB.)

**

HAM RADIO IN SPACE: PC SAT ECLIPSE POWER PROBLEMS

AMSAT says that PC Sat is still going strong, but is on ragged edge of power budget during maximum eclipses. This is according to Bob Bruinga, WB4APR, who reports that controllers have caught the satellite on several occasions doing a low power reset.

Bruninga adds that fortunately they have been able to restore the bird before the batteries went to negative power budget. WB4APR recommends that since there are as many as 50 users per day, it is best if everyone turns off any unattended user stations at night when PC Sat is in eclipse. (ANS)

**

EMERGING TECHNOLOGY: SECURITY PROBLEM WITH SENDMAIL - PSTCH AVAILABLE

According to its developer, the most widely used program for transferring e-mail between computer networks has a security flaw. One that could allow attackers to disrupt the flow of e-mail and intercept messages.

The program involved is called Sendmail. The security flaw does not directly affect your personal computers but it does put e-mail and information sent over the Internet at risk. Fixes for the vulnerability are available, free of charge, at Sendmail's Web site by applying a patch or upgrading to the latest version of Sendmail.

Atlanta-based Internet Security Systems Inc estimates that Sendmail handles as much as three-quarters of all Internet e-mail traffic. Sendmail Inc. which developed the program is located in Emeryville, California. (Published news reports)

**

EMERGING TECHNOLOGY: TUBE-TYPE PC'S

It seems that a venerable old friend simply refuses to die the death of technical obsolescence. The vacuum tube continues its reemergence into the audio marketplace, this time -- believe it or not -- in Personal Computerss.

The first tube motherboard appeared last year in response to PC gamers who craved the allegedly "more natural" sound produced by vacuum tube technology. Those who have seen the boasrds call it a strange sight to behold.

More on this May-December marriage of filament and silicon can be found at the website at http://www.neoseeker.com/Articles/Hardware/Reviews/aopenax4btube (CGC Communicator, Clayton Creekmore and neoseeker.com)

**

ON THE AIRWAVES: DIGITAL RADIO MONDIALE IS ON ITS WAY

After long years of gathering a consortium, prototyping and testing, Digital Radio Mondiale has announced that there will be an official launch at the World Radio Conference in Geneva, in June. Thiis according to a report in shortwave.com.

Digital Radio Mondiale, better known by its initials D-R-M is the world's only non-proprietary, digital broadcasting system for short-wave, medium-wave and long-wave with the ability to use existing frequencies and bandwidth across the globe. With near-FM quality sound, DRM hopes to revitalize the AM broadcasting bands below 30 Mhz in markets worldwide.

And right on the heels of the launch announcement came the granting of two highly significant standards for DRM. First, the International Electrotechnical Committee has given the Digital Radio Mondiale on-air system its highest stamp of approval as an International Standard. This was followed by the International Telecommunication Union granting permission for any broadcaster to use existing frequency assignments for DRM digital transmissions. This, provided that there is no interference with other stations. (ASWLC)

**

INTERNATIONAL -IRELAND" A WALKERS FESTIVAL

Over in Ireland, word that theTipperary Amateur Radio Group provided emergency communications support for up to 300 walkers expected to take part in the A-her-low Hillwalking Festival. The event was held the weekend of April 5th and 6th in Irland's Galty Mountainsl. (GB2RS)

**

DX

In DX, word that G3RWL, will be active as 8P6DR from Barbados through the 20th of April on 10 to 40 meters. He will also be on 80 and 6

meters if he can arrange the antennas. (GB2RS)

And VK3OT will be active as VK9XI from Christmas Island through April 21st. He will be concentrating on CW on the H-F bands and 6 metres. Priority will be given to High Frequency CW when 6 is closed. More info is on the web at http://members.datafast.net.au/electronics/path.htm

**

THAT FINAL ITEM: THE PARC FIELD DAY FILM LIVES AGAIN

And finally this week some very good news for ypou ham radio cinema fans. After having been among the missing for over two decaders, a famous ham radio movie has surfaced. And it will soon have its first official public screening since its restoration was completed. The guy who has the movie on his shelf -- our own Bill Pasternak, WA6ITF, has some background on this ham radio cinematic classic:

--
The film's real name is simply Field Day 1971. It is a tongue - in cheek look at the planning and execution of the ARRL Field Day operating event by what was then one of the most active radio clubs in the United States. My home radio club The famed Pallisades Amateur Rado Club of Culver City California. Home of "good-guy the gokld plated radio" repeater.

Field Day 1971 was produced and edited by George Hively, W6GRH, -- then WA6YEA -- as a club project over thirty years ago. Hively, who has spent his life in the motion picture business wrote the script, supervised the filming, edited it together and provided the music and the narriation. And notice we said filming. Field Day 1971 was produced long before the advent of home videotape. It was shot using Super 8 millimerter motion picture film and consumer cameras. The sound track was on a separate tape cassette. In fact, it still must be projected that way -- even today.

A preview screening of the restored movie took place a March 8th at the HandiHams winter camp in Malibu California. They loved it. As a result of that enthuiastic welcome, a public showing of Field Day 1971 to the California ham radio community has been tentatively scheduled for Wednesday evening May 14th. This, hosted by the Santa Clarita Amateur Radio Club that meets just North of Los Angeles.

And for those of you who are wondering where the movie has been hiding the past 20+ years, this might surprise you. It has been kept safe and well protected by a former PARC member -- Richard Burton, the ex-WB6JAC. Richard contacted us a few months ago asking if we would like to have the movie. We said yes, and with the assistance of Anita O'Delll, N2IHX, the movie was brought back to projectable condition.

Because there is only one projectable print of Field Day 1971 available it cannot be lent out. But W6GRH tells Amateur Radio Newsline that plans call for it to be transferred to video -- either VHS casssette or

possibly DVD. And the sound will always match the picture that way. We hope.

With Field Day `71 -- the movie -- sitting on my desk as I record this, I'm Bill Pasternak, WA6ITF.

--

Meantime, those wanting to attend this first public screening in two decades of this riotous movie, you should consult the Santa Clarita Valley Amateur Radio Club website for meeting details. Its on-line at www.w6jw.org. Scroll down and click on "Monthly Meetings" for more. (ARNewsline™)

Jensen doesn't seem to sell any appropriate hybrid transformers. Or
at least there are not listed on their web page.

Here are examples of the type of transformer required,

Once WNEW abandoned their 'classic rock' format the station has sucked. At one time WNEW was at the forefront of classic/alternative rock stations. It was among the last stations to feature on-air personalities heavily involved in the music production business. Bring back the likes of Scott Muni and the crew!

Source record: 8411

For sale:

Partial interest in 1 KW fulltime AM in Quitman,
Georgia, USA.

The "Radio Crazy" is back! We will accept funds only
from those that have it! Will the DISHONORABLE Meyer
Gottesman please step forward! Hi! I am not even a
small crook! We will have no money before its time!
Ha!

WSFB, 1490 killer hurts! 1 killer watt. On air since
1955. Could be scrapped by ambitious radio ham and
converted to 160 meter band. Think of the DX with 150
ft. tower and 120 ground radios!

This station is too old for a BAR MITZVAH and too
young for a burial! HI!

Active or inactive (i.e. lazy!) investors with at
least $10,000 are welcome. If you have more, you are
still welcome! All investors will be on the board with
full voting rights if desired.

Listen up! NO REAL (or unreal) estate is included but
for an additional $75,000 or so we can get that. The
station itself is going for $75,000 asking.

Don't you dare even think about calling the station
directly! The seller will take a dim view of your lack
of ethics and so will I. In short, if I determine that
you did the dastardly deed, I will not take your funds
if you begged me! I believe in fair play. The "Radio
Crazy" ain't THAT crazy! HI! The deal is already
locked up!

Study yo's and old 4-400A tube transmitter under one
roof. The roof does not leak but the transmitter
probably leaks or sux!! Did you expect a Nautel for
that price, Dude!

Don't you dare laff. Station is automated with DOS
software running on a "fast" 386 PC. Well fast
compared to a Commodore 64! Grin!

If you want to bring and donate your 5.0 GHZ, Pentium
V CPU 2004 model Dell with Quadruple processors

running Windows "Ultra 2004" that's cool! Make sure it
has at least a 1000 GIG hard drive with FAT 64 file
system and 1024 megs of RAM! Anything slower donated
to the Goodwill on next April 1.

Tel: (478) 741-1710 in not-so-beautiful Macon, GA.

Since man-made systems (ships, e.g.) are often given the appelation "she",
perhaps a BAT MITZVAH would be appropriate.

587. Starting a Radio station

Newsgroup: rec.radio.broadcasting
Date: 2003-04-15 19:15:29 UTC
From: bcasci@runbox.com
Message-ID: <b7hloh$q5r$1@xuxa.iecc.com>
Source record: 8414

Hello all,

I've been thinking about starting a low powered radio station...maybe 300 watts or so. I understand the equipment that I need, and the costs (and surprisingly cheap!)..thats the easy part. But the some of the laws and engineering options confuse me. If anyone thats been through this process could shed some light or point me in the right direction that would be great!

Here are my questions:

1. What class of FCC license do I need and how much might it cost? I'm only looking to beableto broadcast 20 or 30 miles out. (I want to cover a couple towns)

2. How do you go about finding an available frequency to brodcast on?

3. Are there any affordable consultants that can help out with the legal end of thing? Fcc laws, local zoning laws, ect ect.

4. I can't put the broadcast antenna on my apartment building, I know they just wouldn't let me. So, do you have any advice as to finding a good location to place the antenna and studio? Can you have the studio and brodcast antenna in different locations? There are several very tall building in my area..if the studio could be in my aprtment and the the signal beamed over to some sort of rebroadcaster on the top of one of those buildings..that would be cool. But..I probably couldn;t afford to do this.

5. Are there any web resources that can give me a detailed guide on starting a radio station. I didn't find any good ones.

Thanks for you time guys,
Brandon

PS
please copy any responses to directly and not just to the group if its possible.

Why? I'm not visually impaired and I blink several times a minute. I
believe it's purpose it to keep the eyeball wet and lubricated. Try
wearing contact lenses and not blinking.

Let's call it "Wet Eyeball 102.7"

Rich

That's precisely it. Even better...try standing in front of a fan...or even in the subway and not blinking....yeechhh....cold eyeballs don't feel good. :-(

I wonder if fish blink...

Figure on tens of thousands of dollars in consultant fees, and possibly a significant part of a million dollars in additional expenses.

If the proposed frequency is the least bit desirable, you'll be battling the likes of CC, and they'll keep you in court for decades.

To call a blind person "a blink" is similar to calling someone by an ethnic
slang name.

Is it Blink or Stink? Sounds like a format with no direction. Your right, this kind of crap dosen't have a chance in hell.

Hi Brandon

You pose a lot of questions and I will try to give you a quick summary of the major problems in front of you.

First. I assume you are talking about a low power FM station and those won't get you the twenty to thirty miles of coverage you want. That kind of coverage would require at least 3k depending on the site and you just stepped WAY up from running a little low power station for fun into serious money investment. If you strictly want a true low power station, think three miles coverage, not thirty. This puts you back into the area where you can run it on your own dime.

Don't assume that you will even be able to find an open frequency depending on your location. It is likely you will be able to find an open LPFM channel with some searching with the help of a consulting engineering firm, which is not cheap either. Channels may have already be allocated for your area but not yet filed for but chances are slim on that. If you go that route, be prepared to hurry up and wait, to file all the forms and pay for all the studies required then wait until the commission decides to act. I am not even sure the FCC is even moving on these class stations now.

You can always choose to do you own scan of the dial, find an opening, and power up your own pirate station in the proud if somewhat shady tradition of many in the past. I don't encourage it as it is illegal and can get you fined and even jailed. The system is not set up to encourage the individual to take to the air and even the LPFM act that was supposed to bring diversity to the dial made sure the rules were stacked against successful operations by limiting power so severely that commercial success is mostly impossible. Even the non profits saw the futility paying for the startup and operation of a station that couldnt even cover the city limits.

As for the stack of local and state laws you may face, good luck. if you pursue a legitimate station, be prepared to fork over money for lawyers to set up your corporation or foundation that is necessary for operations.

A better alternative, set up an internet station you can netcast on or become a volunteer at a non profit or community or university station. There is always room for more voices in the established alternative broadcast outlets and they can provide good hands on experience if you decide to seek a career in the commercial broadcasting field.

I am sure many others can give you more and better information and I hope this hasnt burst your bubble. Just think about this.. there is a good reason you never hear the station you always wish you could operate on the air... and dont you think if it was as easy as you hope it is.. everyone would have one?

I am disappointed at their choice of format. The format has to be the absolute most non-human, corporate, decision I have seen in radio. It is not as bad as the one by the guy who decided to sell the legendary 92.5 KTU-FM. However, I do not in any way believe that the format will survive 2 years. To their credit: if this program has any chance of survival, it would be in New York. However, I do think it could've gained high power ratios if placed on a small Manhattan-based signal. This way, it could reach the star-struck (think E-Channel)tourist types.
I know they want to reach the potentially lucrative female demos but an AC/Rock format would have done the job. Can NEW compete with LITE? We'll see.

WNEW: 102.7 Where Rock Lives! Maybe???

WCBN - 30 Years of Freeing Your Mind - Listen to us online!

WCBN is the University of Michigan student-run community freeform radio
station in Ann Arbor, Michigan. We broadcast at 200 watts to the
University and its surrounding communities from the basement of the
Student Activities Building in downtown treetown. We have been
broadcasting a genre-less overview of music, news, and public affairs
for 30 years.

WCBN's musical format is freeform, with some specialty shows. Freeform
involves all different kinds of music, including jazz, reggae, blues,
hip-hop, country, rock, and just about everything else under the sun.
Instead of telling our DJs what to play, we allow them to select their
own recordings from our vast and unique library. It is their
responsibility to mix together many different kinds of music in an
intelligent fashion, and show links between musical genres.

Click here to listen to our live WCBN-FM Ann Arbor broadcast!

Any new format is a calculated risk. You don't think they have not researched this extensively?

The target is young adult females. Are you a young adult female?

Come back in 6 months and we'll see what the trends are showing. For the moment, it is certainly different. Whether it is perceived as good by its intended target is a matter no newsgroup post can determine.

Look over the "LPFM" info on the FCC site. It isn't as easy as the original plan called for several years ago! It was originally designed for the average individual, but that changed awhile back. Many hoops to jump through, but isn't that how everything is in our society?

I just purchased XM two weeks ago. I can tell you that it will not be easy to ever go back to local (over-the-air) broadcasts. I would heartily recommend this product if you live in an area that fails to provide you with programming that is to your liking or you have an exremely varied taste in music. Of course, it is not a perfect system. I would like to see a lot more channels in each of the formats. However, I have found a few stations that have surprised me as to their high level of quality. I do have some favorites that I knew I would like; Comedy, Chrome and Fox News. Some of the surprises I found are as follows:

Luna
U-POP XM29
Cinemagic XM23
Groove XM64
Squizz

I'd like to hear some surprises and/or disappointments others have found.

SeeYa!

You won't catch me listening to your favorites - yet there are other XM
channels I really like.

IMO, that is the strength of XM.

With so many channels they can serve many tastes, including some very niche
ones like mine - which could never be supported by ads.

I see no reason that they need 17 rock channels, only very slightly
different, like FM has in many areas. Come to think of it, XM probably does
have 17 channels an old codger like me would call rock.....

Right now the FCC is working through the LP-100 (LP1) 100 watt applications submitted during the filing windows. LPFM is a non-commercial service.

There were lots of applications, a large fraction of which are so defective that they don't have a chance IMO. Many, many of the correctly-drawn applications are from religious organizations.

Eventually the FCC will get around to opening filing windows for LP-10 [LP2}, the 10-watt version of LPFM. AFAIK, no dates have yet been set.

Brandon, it's not possible to do it legally. You'd have to go the pirate route. Of course if you DO...you'll risk getting cought... which could result in ALL of your equipment being confiscated, possible fines into the 'thousands' of dollars and even prosecution.

Welcome to 'freedom of speach' in America...where the airwaves are for everyone......uh....as long as you can afford them.

Anything in this sort of idea that can be done with these
coils can be done with cheap op-amps. Using these powered by a
cheap wall-wart can make it feasible for very short runs.

That would be a *bad* mistake! The hybrid transformers are
nice, never fail, passive devices. Op-amps are active devices
requiring multiple components, all of which raises both the
failure rate and the cost. There is exactly one advantage to
using op-amps, and it would be an overpowering one if
multiplexing were actually necessary. That advantage is
amplitude distortion, where the op-amps are great and the hybrid
transformers are very restricted.

Regardless, between rooms in the same building????

Buy more wire. It is by far the better solution.

Brandon, I hate to throw cold water on your plan, but if it was that easy everyone would be running their own broadcast stations. Broadcast equipment isn't all that cheap either; it's industrial-grade stuff that's designed to keep working 24/7 without even a hiccup, despite all the abuse semi-sentient disc jockeys (like I was, 'way back then) can throw at it.

>Here are my questions:
>
>1. What class of FCC license do I need and how much might it cost? I'm
>only looking to beableto broadcast 20 or 30 miles out. (I want to
>cover a couple towns)

You need a broadcast station license for the station itself, plus operators' permits for the people who operate the transmitters. The operators permits are the easy part -- a simple form and a few dollars are all you need (provided you meet a few minimum standards such as being a U.S. citizen or legal resident). The broadcast station license is much more difficult to obtain; you'll start by applying for a construction permit, and you'll have to show that you've done your homework -- frequency is availble where you intend to operate the station, you can operate it without interfering with other FCC-authorized operations and equipment, and a lot more. This part alone can cost a small fortune in well-earned fees to consulting engineers and lawyers who specialize in the Communications Act and related law. If you actually get a construction permit, then you can begin buying and assembling the equipment you need to operate legally. Don't think that just because you want a low-power transmitter you can skimp on all the other equipment you need, or even that a low-power broadcast transmitter is all that inexpensive. If you get this far, you'll have to document your construction and show all the measurements you make to insure that the equipment is operating within closely-defined tolerances; you may have to make (usually-expensive) modifications during construction to prevent interference if anyone --

and I do mean ANYONE -- complains that you are interfering with their TVs, stereos, pacemakers, garage-door openers, cordless telephones or anything else. If you make it this far, you will need an (more money) expert to certify that everything is operating legally; then and only then will you receive your actual station license.

Oh, did I mention that in addition to the FCC (Federal Communications Commission) you'll have to get permission from the FAA (Federal Aviation Authority) to erect an antenna tower? And you'll have to meet specific tower-height and obstruction-marking (tower lighting) requirements? And, if your transmitter site is too close to an airport or along its approach path you may not be able to put up a tower there at all?

Once you're on the air (if you get this far) you'll have to make sure every person who operates the transmitter knows how to monitor its operations (that is, read the meters and either adjust or shut down the transmitter if it goes outside of legal parameters). With modern transmitters this isn't much of a problem because they usually shut themselves down before they drift out of legal tolerances. As long as you use a limiting device to prevent excessive modulation (think of it is loudness) that could interfere with stations on other channels, and you don't drift off your assigned channel, you'll probably be all right. At least until it's time to renew your station license, at which time you will have to show that you have done your best to avoid breaking any of a multitude of federal laws and FCC regulations that were designed to make sure you are operating in the best interests of the community where you are licensed. (If you get written complaints from local citizens, you must respond to them and keep both the original letters and copies of your responses in a file that is available for inspection by anyone who wants to look at it. You'll have to document compliance with OSHA, equal-opportunity laws, and all the usual legal red tape that accompanies any business. And you can't do just anything you want on your station, or someone else can come along, show you were not serving the interests of the community, and file a competing application for your license when time comes for renewal.)

>2. How do you go about finding an available frequency to brodcast on?

Money, lots and lots of it, paid to a consulting engineering firm to check the FCC database and their own maps, then do a survey of the area and see if there is an available gap in the broadcast spectrum where you want to put your station. Perhaps more money, paid to a broadcaster on the extreme fringe of your signal, to get them to agree to let you pay the costs associated with moving them to a different frequency so you won't interfere with them if-and-when you get your license and go on the air. Perhaps additional money for special antenna arrays to limit your signal strength in the direction of one or more stations.

>3. Are there any affordable consultants that can help out with the
>legal end of thing? Fcc laws, local zoning laws, ect ect.

"Affordable" is a relative term. If you're Bill Gates, just about anything is affordable. If you're an ordinary guy, you'll need to win a big lottery payout first. If you have one or two well-heeled partners, your company may be able to afford the consultants you need.

>4. I can't put the broadcast antenna on my apartment building, I know
>they just wouldn't let me. So, do you have any advice as to finding a

>the the signal beamed over to some sort of rebroadcaster on the top of
>one of those buildings..that would be cool. But..I probably couldn;t
>afford to do this.

Usually you'll want to find the highest natural terrain in your area, and pay whatever the landowner wants for a plot large enough to contain your entire transmitter site including the tower's "fall zone". Which reminds me -- INSURANCE! It's a bad idea to put an antenna on any piece of property you do not own outright, and you probably won't want the hassle of dealing with all the interference problems if you put the transmitter site in the middle of town.

It is possible to put the studio and transmitter in different locations, and operate the transmitter by remote control This is not cheap, since you'll need telephone and/or microwave links for both the programming you transmit and the transmitter controls, but it is how most commercial stations do things.

>5. Are there any web resources that can give me a detailed guide on
>starting a radio station. I didn't find any good ones.

For legal low-power broadcasting, I don't know of any. There probably are some that describe "pirate" (illegal) broadcasting, but I don't personally know any of those either. The best place to start looking on the Web may well be www.fcc.gov. If nothing else, the FCC site will give you some idea of how serious the federal government is about keeping people legal.

If you are looking for a hobby, let me suggest you look into Amateur Radio instead. It isn't "broadcasting" (which is one-way transmision to everyone in general and no one in particular), and you can't transmit music or other "entertainment" programming; but you can do it without breaking the bank (you can buy complete rigs at Radio Shack) or becoming an electronics genius (you'll need to know a few things, but there are some good study guides). The Technician Class license doesn't even require Morse Code any longer, and it is possible for a Technician to operate two-way communications with stations all over the world.

If it's actual broadcasting that interests you, don't try to start your own station; instead, look toward working on an existing

broadcast station. Many colleges and universities, and even some high schools, have student-operated stations where you can learn the basics. Public-radio foundations in many cities operate stations that are always looking for volunteers, and sometimes they even offer paying jobs. After you have some experience -- and assuming you have real talent -- you can try for a job at a commercial broadcast station. If you're like most of us you'll make enough to live on for a few years, then move on to a "real" job. If you're stubborn like I was, you'll make a career of broadcasting (I'm retired now). If you're extremely good AND extremely fortunate, you might even land a major-market gig someday, at which time you can start saving up money to buy your own station ... which is where this discussion began, as i recall.

If you can't wait that long, go into broadcast sales; salesmen generally make a lot more money than on-air types. Seel for a good station (or keep moving up until you are at a really susccessful station), save your money until you're rish enough to buy into an existing station, and become a broadcast mogul. I know of a few former on-air people who have done this, but unless you're a top air personality on a high-rated station in a medium or large market, just saving money is hard enough -- actually getting rich in radio is much easier if you go into sales.

You will never get the cross talk down and keep it down with OpAmps.
Those resistors will drift too much to hold the null.

Ron

The 111C was the standard transformer used on all EQ Audio circuits
for many years.
They were one of the best transformers for audio that were ever made.

Most Radio stations that have been in the same place a few years
should have a bunch of them laying around.

I know that the radio station I worked for had at least 8 of them on
the wall in the Distribuition room.

5 words is all it takes to describe XM/Sirius to me, and I'm a big fan of radio:

Should Be A Lot Better.

But I'll elaborate:

It's not horrible, but it's the same quality of radio that you get for free and they charge $10 or more for it per month. Everything I dislike about normal radio is there. Especially, for a subscription based service, there should be NO voicetracking, and NO repetitive loops of programming. There were several instances where XM was repeating itself when I had it. Either the same annoying movie-clips between songs, or anonymous voicetrack programming. Even the TV rebroadcasted programming annoys me. Shouldn't they be broadcasting radio specific news instead of playing a bunch of TV channels???

Where I grew up (in the 80's-90's even!) before Clear Channel, even the local FM stations had live DJ's at night. And they didn't charge listeners a dime.

My advice to anyone considering XM is to invest the $100-150 towards a good outdoor rooftop AM/FM antenna. You'll get a lot of stations you never knew existed, and the ones in the fringe areas might not be owned by Clear Channel (and might, therefore, be perfect!). Either way, you'll save the monthly fee.

If you must pay a monthly fee to someone, get a DirecTv dish and get yourself 30 or so Music Choice channels free with your television.

612. Deciding XM or Sirius ? Here's a review.

Newsgroup: rec.radio.broadcasting
Date: 2003-04-17 12:31:48 UTC
From: James Dixon <luckyjimdixon@yahoo.com>
Message-ID: <b7m6rk$g8t$1@xuxa.iecc.com>
Source record: 8438
Cross-posted to: rec.radio.broadcasting,misc.transport.trucking,rec.video.satellite,rec.audio.car,rec.audio

Now that I have had both services, and having noticed that a google search yields no definitive answers for people, I wanted to post my personal review of the two systems.

I have an Alpine CDA-7878 and an Alpine XM unit and a Panasonic Sirius unit, both with Terk antennas. The Alpine unit was connected to the head unit via an AiNet cable and the Sirius unit was connected with an auxiliary RCA adapter available from Alpine (KCA-121B). I had XM since it debuted and Sirius for a few months in the Pacific Northwest.

The bottom line, for those needing a quick answer, is Sirius is superior in sound quality, features(free streaming from their website!), and channel quality(better music, no commercials, better talk). XM has a few more channels that make very little difference to the end result (read on).

After careful review of both systems, Sirius came out the winnner, as I have said. The channels are laid out well, lack commercials, sound great, and are streamed on the internet. The only disadvantage of Sirius was its oft-sited lack of Nascar, which they seem to be trying to remedy. Also, XM has an extra comedy channel (it's boring, and features older, censored comedy), and a few more "experimental" music channels which most will find totally useless. Surfing XM for music is often like surfing the regular (terrestrial) radio in a large city-you get nothing but frustration. It's no wonder XM doesn't stream live on the net so that you can try before you buy. Also, XM's channel layout was unfriendly, in my opinion.

The greatest and most dizzying drawback in comparing the two, however, are the staggeringly stupid and annoying XM commercials. Not necessarily the corporate commercials that come from outside companies (which are annoying in an expected way), but the ridiculous and loud in-house XM stuff that makes you have to turn down your radio really quick when you've had it up loud-especially with the windows open (yes, they are that embarrassing). This, and the better performance of Sirius, was the deciding factor in my cancelling XM.

XM, however, holds their own and can satisfy a customer with some decent music and a fair selection of Talk. If not for Sirius, I would have kept XM, I think; probably because it IS nice to listen to the same station no matter where you go. Yet, as is the way of competition, Sirius has offered everything good that XM does and DONE IT RIGHT. Sirius outshines in the talk category, with a variety of Right and Left-wing shows, all of the useful talk channels XM has, and NPR, PRI, and a well laid-out channel plan.

XM does a bit better in the design of their customer care website. Sirius also has a customer care website, but it is not as robust (less detail).

However, XM doesn't have streaming audio on its website-apparently we all have to pay XM $6.99 extra in additon to buying another $200 receiver for the house. In addition to the crappy commercials, this is probably where the corporate influence of XM being part-owned by ClearChannel and GM shows. (Clearchannel is responsible for the reason regular radio is so terrible).

So, there you have it. I am not a shill; I was just so overwhelmed by the chasm between these two services, that I felt compelled to put a proper review on usenet.

One other interesting tidbit is that I was able to receive both services with an antenna hidden below the rear-deck of my
car-made possible probably because it has a large rear-window at a steep angle. Sound quality was the same wherever the antenna was placed-inside or outside-of course. I understand that there was a professional review of XM vs. Sirius and that XM was said to have better sound, but the superiority of Sirius was glaring in my test. I say A-B it at a store with XM, if you can, on the same system. Do a channel comparison, too-I'm sure you'll see that what I've written is the case.

Good luck, and, for my two cents, I would support Sirius unless XM does an about-face. XM may be cheaper by a few bucks, but trust me: you get what you pay for.

If you have a good question I may respond to you if you would like to send it to me.

Is the programming commercial free, or do I have to pay US$9.99 a
month and *still* listen to commercials?

This blink shit is a mix of Z100 top 40 and WWRL urban soul. It won't fly. Stick the research up your ass. The young females in my immediate neighborhood love Sirius stream 66 The Beat. A few months ago these girls (during their card games and parties) were listening to rap on Hot 97 and sometimes flipping over to 103.5 for dance. I was surprised what a hit The Beat turned out to be. I set up an FM modulator to feed Sirius around my house and kids all over the block got hip and started listening and begging me not to switch to the other 60 channels. They won. I listen to the other Sirius channels in the car but 66 the Beat (upbeat dance) is hot. The Blink/Stink no chance in hell. It's a total waste.

Any research based on having to go to your house would be, hmmm, suspect.

As I said, don't fly off so fast. Give te format two to three books and we
will all see what it is going to do.

Thanks for that informative review. I have been considering both
services. For me I am left with judging that XM seems more likely to be
the survivor *if* only one of the services survives, and finding that
Sirius has a better choice of talk programming, especially the NPR
lineup.

as a retailer that sells BOTH
we have sold several hundred XM systems
and less than 10 Sirius systems since they came out!
We have KIOSK displays for both with a Kenwood Head in the Sirius
display and a Pioneer head in the XM display, both are hooked up to
outside antennas and both are tied into our main soundboard... The
displays are as EQUAL as we can get em, and customers can easily
sample both! But XM way way way outsells Sirius....

As a user!
I have BOTH in my tahoe...
ALthough I really like Sirius, I am 99% of the
time listening on XM...!!

They both sound great!
They both have occasional drop outs for 1 second of so a
couple times a month (no biggie) depending on where I
am driving.... (both acceptable to me!)

As far as commercials are concerned...
On the XM music channels I listen to, there are no commercials
On the SIRIUS music channels I listen to there are no commercials.
(I dont listen to ALL channels so I am only relating MY views)

On the news channels I have been listening to lately (cause of the war)
the commercials are about equal on both Sirius and XM...

However, on some of the other channels although SIRIUS brags about
no commercials, they have commercials that SUCK BIGTIME!

A good example is, the old time radio show channel... I sometimes listen to
it on my 30 minute drive to and from work...

SIRIUS has commercial breaks every 7 to 10 minutes! The commercial
breaks are 4 minutes or 6 minutes long AND SUCK! They are the same
commercials everytime and you really get tired of them!

XM has a similar channel for old time radio shows and they do commercials
aprox every 15 minutes of 5 minute duration! And they are not ALL the
same old crap every time....

With XM I can listen to an entire show on the
way to work in the 30 minute time peroid... With Sirius there are so many
commercials the whole show doesnt make it in my driving window...
The commercials are SO BAD on that channel that when I see a SIRIUS
"NO COMMERCIALS" banner or brochure it makes me wanna tear

it up and stomp on it!!!

But, only YOU can judge and a great deal of it depends on the channels
that YOU want to listen to..

They are both pretty darned great!!

Actually I chose XM for the real variety of talk. I can get NPR anywhere I want, they are like cockroaches, but to get things like Smoke This, Bruce Williams, At Home with Gary Sullivan and some real variety you need to look at XM

Internet Radio Linking Project

There are now over 2000 World-wide Ham radio Repeater and Simplex Internet Voice Gateways.

Please remind radio hams to take their handhelds with them when travelling aboard as many cities around the world now have their VHF and UHF repeaters and some VHF/UHF simplex radio channels linked to Internet Voice Gateways.

This makes it possible for hams to keep in touch with ham friends in other cities by using the local Internet Voice Gateway in the city they are visiting.

Internet Voice Gateways on repeaters or simplex channels also come in useful when there is no H.F. propagation so friends can keep in touch across the word.

Other uses might be setting up QRP contacts H.F. skeds SSTV etc I have used them to give talks to radio cubs in different countries and clubs around the U.K.

There are three separate linking systems Irlp Echolink and eQSO.

For and a list of cities and countries where the links are available and for further information please email me or visit my web site.

What kind of null can you get .... reliably, over the whole
frequency range .... with transformers? I've a huge experience with
op-amps and precision resistors and have never, ever, found resistor
drift to be a problem, even in the 85dB common mode rejection
range. I normally use 1000 ohm or 10K 0.1% precision chip resistors
with a small (.25% range) trimpot.

I admit I've been tempted to go to transformers for my uses,
which goes somewhat above audio, but in range of the specs
of audio transformers, but op-amps always seemed to work fine,
and I never got good numbers for the common mode rejection of
the transformers over their whole frequency range.

Anybody know any history of WNRC-TV? I found it on USGS map, at 41° 24' 42"N, 73° 07' 48"W - SOUTHBURY, CT quad between Bridgeport & Waterbury. (I assume no relation to Nichols College WNRC*95.1 Dudley, MA). I've search the web, found no reference , and haven't been able to correlate it to any station current or past.
I'm a DX'er who likes to plot sites, and calculate AM patterns, coverage maps, etc. This one eludes me, so any ideas would be appreciated. Thank You.

>slang name.

Hmm. I had never heard that before. I've known many blind people in my life and that would never have occurred to me. I don't usually call people by ethnic slang or physical slang based on physical traits, anyway.

When I was a kid the guy who got me interested in Ham Radio was blind. He was involved with many of the early moonbounce experiments and did a lot of work with the government on experimental projects, satellites included. He was so good at what he did I never though of him as limited in any way.

I have a dear friend who is deaf and he gets frustrated that I think of him as "normal" as anyone else and often forget to face him so he can read my lips. I don't do it intentionally. He seems to live life so normally that I forget I need to make that extra effort for him.

Rob Ashard <rob@ashard.freeserve.co.uk> wrote:

"Is XM solid music or does it have DJ's?"

Their pop music channels have DJs (and jingles); I'm not sure about their classical channels.

"Is it subscription financed or does it air ad's (or both)?"

AFAIK the channels XM produces are commercial free, but some channels coming from outside producers have commercials. Under FCC rules XM and Sirius can only offer subscription services, so not even the commercial-supported channels are free to air.

Been using Sirius since April 2002 when it became available in the NYC area. It clearly has the the best music choices and on the open road beats the shit out of XM with solid reception. XM is only good near the cities where their repeaters are but once you get 20 miles out there's lots of breakup. Sirius radio sales will pick up once they ramp up their advertising. They won't go out of business and the worst that could happen is they could be taken over by another company.

I might do that, but it is so hard to keep the dish aligned with the
satellite when you're driving down the road :-)

I sucked it up and got the Delphi unit because it was small and
portable for my needs, the boom box in the vehicle and the cradle to
my Bose at home.

I, likewise, didn't particularly want to support CC, but I did it anyway. They say that XM has about 500K subscribers to Sirius 30K. As far as the channel lineup, I wanted more talk and less music. When Sirius comes out with the smaller unit, I'll patch my bleeding edge wound and get the other one, or both.

Anyone know a free source list of all USA stations operating on AM 1270 KHz?

How do these compare to normal FM/AM broadcast radio services in the States? Advertising at those levels isn't heard of in our radio market... 15/20 minutes an hour of adverts - a quarter/third of output! Argh!

I still expect Sirius to be taken over by Clear Channel. Clear Channel has
a rather minor investment in XM (about as much money as a couple of FM
stations). They could afford to throw that investment away if Sirius
becomes available on a bankruptcy "fire sale".

WCBN WILL DESTROY YOUR FEEBLE FORMATS

WCBN - 30 Years of Freeing Your Mind - Listen to us online!

WCBN is the University of Michigan student-run community freeform radio station in Ann Arbor, Michigan. We broadcast at 200 watts to the University and its surrounding communities from the basement of the Student Activities Building in downtown treetown. We have been broadcasting a genre-less overview of music, news, and public affairs for 30 years.

WCBN's musical format is freeform, with some specialty shows. Freeform involves all different kinds of music, including jazz, reggae, blues, hip-hop, country, rock, and just about everything else under the sun. Instead of telling our DJs what to play, we allow them to select their own recordings from our vast and unique library. It is their responsibility to mix together many different kinds of music in an intelligent fashion, and show links between musical genres.

Click here to listen to our live WCBN-FM Ann Arbor broadcast!

Has any one taken one of the Sirius radios for the car and adapted it so it works in a house? I would like to get the Sirius service, but as I am blind and do not drive or own a car, I seem to be left out in the cold.
Regards:

Dave

How do you know that serius is better when you dont have XM to compare it to???

I have both and on the open road they BOTH have great reception ...
I have used mine all over texas !!
AND I DO HAVE BOTH!

Pure, unadulterated Horse-Pucky! I have mine in my house and two cars, in Peacham, VT...where we get one semi-decent NPR signal and no other radio worth listening to.

Have driven south to NJ...east to Boston and Portland...west to Buffalo and north past Montreal, with NO serious dropouts on XM. Some local dropouts when behind big stands of trees or large granite rock formations. Had the same minor dropouts on the Belt Parkway in Queens, NY...no worse than up here in the Northeast Kingdom.

About a dozen people in the area have XM...without it we wouldn't have any listenable radio.

All the negative reviews of XM and Sirius (I've listened to Sirius online...but they cut you off after 20 minutes), come from people who either live in the few remaining areas with a wide choice on terrestial radio...or folks who have never listened to satellite radio. Once you have the selection and quality, you are hooked.

I worked in professional radio (three stations on Long Island and the ABC Radio Network) for many years...and satellite radio is as good as that ever was.

Now, if we could only bring back Jean Sheperd, Bob & Ray, and Willie B.....

I have the Pioneer FM modulated XM unit in my 2001 Ford F150. I've had the service for over a year; I commute from RURAL central Virginia into the Washington D.C./Dulles technology corridor everyday - almost exclusively on two-lane back roads, avoiding the interstates at all costs. I'm clearly NOT near their repeaters for the majority of my drive.

I have NEVER lost signal for more than a few seconds, and usually this is caused by being trapped under an overpass in congested traffic (where my "view" to the satellite is obviously obscured). Even on country roads in Orange and Louisa counties (i.e. - the middle of nowhere) with thick overhead foliage, I've never lost signal. I have never experienced any of the "breakups" you describe. Perhaps you had a poor installation?

There are some improvements that XM could make in the programming - a better variety of country music is one. But the Pop/Rock/Comedy/Jazz/Dance (I love BPM - 81) content is superb. If you take the view that XM is like your cable television provider - there's a lot more variety and a lot more good content than you get for free over the air. For me, it's definitely worth the $10/month.

Cheers,

Jeremy Powell

Thirty-seven of XM's 61 music channels have advertising:

7--Seventies (oldies)
8--Eighties (oldies)
11--Nashville! (Today's Hot New Country)
13--Hank's Place (traditional country)
20--Top 20 (continuous countdown of Top 20 most requested songs from
CHR playlist on XM site)
21--KISS (simulcast of KIIS-FM LA)
22--Mix (simulcast of Mix in Houston)
23--The Heart (soft AC)
24--Sunny (easy listening)
25--MTV (simulcast of web radio)
26--VH1 (ditto)
27--Cinemagic (music from movies)
29--Upop (Worldspace global pop music channel)
41--Bone Yard (hard rock)
42--XMLM (metal)
43--XMU (college radio/indie rock)
48--Squizz (hard modern rock)
52--Unsigned (artists unsigned to major labels)
60--Soul Street (urban oldies from 50s-70s)
61--The Flow ("neosoul" like Alicia Keys and India.Arie)
62--Suite 62 (urban AC)
63--Spirit (gospel)
64--The Groove (urban oldies from 80s-90s)
66--Raw (hip-hop)
67--The City (urban hits)
72--Beyond Jazz (fusion jazz too loud or too jazzy for "smooth jazz"
NAC)
81--BPM (dance hits)
82--The System (electronica)
90--Aguila (Spanish hits)
91--Caricia (Spanish AC)
92--Vibra (rock en espanol)
93--Tejano
94--Caliente (Carribean)
100--World Zone (world music)

102--Nouma (African)
115--Radio Disney
116--XM Kids

The interesting thing about the list is that it's not all "mass appeal" channels, as I would expect (I didn't expect the metal channel and some of the modern rock channels to have advertising). Interesting that the majority of the urban channels and the "hits" (CHR/AC) channels and all of the Latin and children's channels have advertising, while most or all of the jazz and classical channels don't. And for those who'll go into the kneejerk remark "$9.95 a month and there's still commercials?", in most chances I believe it's only around five minutes an hour.

On the other hand, all of Sirius' music channels are commercial-free--no exceptions.

640. Re: FM SCA radiation pattern

>I am looking for data on FM SCA transmitting pattern and range of coverage.
>If a large typical FM station transmitting 50KW, one can expect SCA to be
>2.5-5KW.

SCA doesn't work like that; rather, the audio spectrum of a station carrying an SCA extends beyond the range of human hearing, and a modulated tone at (usually) 67 kHz or 92 kHz is injected into the audio going into the transmitter. This information is present in all receivers tuned to the station, but non-SCA-capable receivers ignore it and recover only the audible frequencies (stereo receivers recover also a left-minus-right signal from information centered at 38 kHz).

What kind of range of coverage can I expect from such a station?
>Thanks for any info.

Anywhere you can get a clean signal from a station carrying an SCA you should be able to hear the SCA.

My partner at work would argue with the breakup story. He loves his XM and only looses it under some overpasses. (He also lost it in mid-continent on a coast-to-coast trip, maybe transitioning between satellites; simply switching his unit off and back on made it work.)

He commutes daily from Temecula, California, to San Diego, through rural areas that probably have no repeaters at all. Since I don't know the signal strengths in these areas or the hardware in use or the quality of the installations, I'd be a fool to go much beyond what I've said.

RADIO HONORS: DAYTON HAMVENTION 2003 AWARDS ANNOUNCED

The judges have made their decision and now the Dayton Amateur Radio Association announces its Hamvention award winners for 2003. We have this report:

--

He gave the world of Amateur Radio "Kids Day." And now, the Dayton Amateur Radio Association has decided to reward Larry Tyree, N6TR, of Boring Oregon, by naming him 2003 Radio Amateur of the Year.

We caught up with N6TR a few hours after he learned he had been selected. He says that the award really honors what Kids Day is all about:

--

Tyree: "Its really been incredable just seeing how its taken off on its own and I am very proud to have come up with the idea and done the initial sponsorship of it."

--

Tree, as her prefers to be known, was first licensed in 1967 as WN6ZVC. He obtained his distinctive N6TR callsign in 1977 and these days holds an Amateur Extra Class license.

Tree grew up in Los Angeles' San Fernando Valley but moved to Oregon in 1984. And long before he created Kids' Day, Tyree was immersed in almost every aspect of the hobby. He is an avid contester who can regularly be heard on all bands from 160 through 6 meters.

Tyree also spends a lot of his ham radio time in front of his computer on ham radio related matters. Why all of the computer time? It's another of his many contributions to Amateur Radio. Tree Tyree is the creator of the very

popular “TR-LOG” contest logging software.

But what about “Kids Day?” How does a contester and ham radio software writer come to create a twice yearly operating event specifically designed to introduce ham radio to the younger set? You have to start by realizing that Tree Tyree is first and foremost a parent himself.

--

Tyree: “I think the ingredient that helped enable this is that I have my own kids. At the time when Kids Day was invented they were 3 and 5 years old. And I just somehow flashed on the concept of -- well -- lets get kids on the air and have them talk to other kids. Lets just make thaty happen. So, under the guise of the Boring Amateur Radio Club, we put that together and made it happen. I think that the first one was just an hour or two hours and the response was pretty signifigant.”

--

But how do you keep it interesting for youngsters? N6TR had an answer for that too:

--

Tyree: “I think the other important ingredient to the Kids Day concept was to give the kids something to talk about as a formulia that they could work under so that they have something to talk about. And thats how we came up with the idea of the simple thing of your name, and your age, where you live and your favorite color. “

--

Tyree envisioned “Kids Day” to be what it has evolved into. That of a ham radio social event for the younger set. One where experienced operators open their hearts and his ham stations so that youngsters can get on the air and enjoy the fun of talking with other kids through the magic of Amateur Radio.

But Tree Tyree is not the only ham to take honors at Dayton this year. If you are into Echolink, then the name Jonathan Taylor and the call sign K1RFD, is very familiar to you. This is because Taylor is the ham who made Echolink happen. And for this important contribution to integrating the world of ham radio with the world of the Internet the Ridgefield, Connecticut ham has been named to receive this years Specific Achievement Award.

For those of you not into computerized ham radio, Echolink is one of a very popular using voice-over-IP technology and linking protocol software system that allowd Amateur Radio stations to communicate with one another over the Internet. Using Echolink permits worldwide connections between stations, from computer to station, or from computer to computer.

But Echolink is not Taylor’s only contribution to ham radio. Anorther is his Echo-Station software package. This gem is a is a repeater-control program designed to run under the popular Microsoft Windows platform. This makes it easy to set up a complete, fully-functional repeater or "announcement machine"

using a personal computer. In fact, some of you may be listening to this nerwscast over a repeater that is using Echo Station to replay it.

Last and by no means least come Steve Dimse, K4HG, of Cudjoe Key Florida. Actually we should say Dr. Steve Dimse, because K4HG is a Clinical Assistant Professor of Medicine at the University of Miami. His primary responsibility is that of attending physician in the U M / Jackson Memorial Medical Center Emergency Department. And in his spare time, Steve loves to play ham radio with an emphasis on the digital side of things.

Among his technical achievemets are his authoring of a number of APRS related internet programs, including, Global APRS, javAPRS and APRServe. Dimse is also the developer and administrator of the APRS internet database at www.findu.com.

We should add that the world of computers pre-dates K4HG's career in medicine. His undergraduate degree in 1980 was in computer science from Pepperdine University in Malibu California. He then worked as a Programmer for Hughes Aircraft as a Member of the Technical Staff before entering medical school.

With congratulations to all three of this years Dayton award winners, I'm David Black, KB4KCH, reporting.

--

The winners will be presented their awards at a special ceremony to be held at Dayton's HARA Arena on Saturday, May 17th. You can hear more about the plans for Hamvention 2003 with Pat Neff on this weeks RAIN Report. Its on-line right now in streaming audio at www.rainreport.com. Or, if you are Internet deprived, you can dial in on your phone to listen. The number in Chicago is area code 847 827 RAIN. Thats 847 827 7246. (Dayton Hamvention®, ARNewsline™)

RADIO RECORDS: UK HAMS TAKE LF TO MICROWAVE TITLES

Three amateurs have achieved the unusual feat of setting new United Kingdom distance records for bands at the opposite ends of the electro-msagnetic ham radio spectrum. Jeramy Boot, G4NJH, has the details:

--

Derek Atter, G3GRO, and Allan Wyatt, G8LSD, of the Crawley Amateur Radio Club teamed up with David Bowman, G0MRF, to set new distance records for 73 kHz in the LF spectrum and for Laser communications at a wavelength of 670 nanometres.

On the 73kHz band David, G0MRF, drove from London to operate from the QTH of RadCom columnist Simon Lewis, GM4PLM, near Ayr in Scotland. Meanwhile Derek, G3GRO, and Jim Moritz, M0BMU, set up a temporary station at the Cable and Wireless Museum at Porthcurno near Lands End. The two groups had a contact on the evening of the 1st of April over a distance of 610 kilometres.

Four days later on Saturday the 5th of April, Allan, G8LSD, and David, G0MRF, took advantage of a cold, clear night to set up laser communications equipment on the cliffs near Dover in Kent and at Fairlight near Hastings in East Sussex. After three hours waiting for the atmosphere to clear and precisely locating each other, calls and reports of 559 and 579 were finally exchanged. The distance of 49.3 kilometres exceeds a previous record set in 1998. Both stations used modulated CW achieved by switching the laser on and off at 488Hz.

Jeramy Boot, G4NJH.

--

According to G4NJH, when the lasers were aligned they were among the brightest objects on the horizon across the entire 50 kilometer path. (GB2RS)

HAM RADIO AT WAR: AMATEUR RADIO FROM IRAQ - REDUX

Don’t be to surprised if you soon start hearing a number of stations signing portable YI from Iraq. Chris Partridge, G8AUU, reports to Amateur Radio Newsline™ from Kuwait City that with the war winding down a number of international news agencies plan on setting up bureaus in Baghdad, Basra, Mousal and other key Iraqui cities.

G8AUU was in a news satellite truck when we spoke with him by telephone on Saturday April 12th. According to Chris, more than a small number of the technicians and engineers serving at these bureaus will be hams. This includes a satellite engineer from Polish TV, some French hams working for Globecast and a number of others that he knows of. G8AUU believes that its only a matter of time before some of them get ham radio gear and take to the air -- portable YI -- from Iraq.

The news from Chris Partridge, G8AUU comes only days after The Daily DX and the ARRL Letter reported that Jim Dunkerton, KT4CK, had been active from the Middle East on 15 meters SSB. On April 7th, he was identifying as YI/KT4CK and saying he was in the desert of Southern Iraq. (G8AUU, ARRL, ARNewsline™)

**

ENFORCEMENT: FCC TO CALIFORNIA HAM - STAY OFF THE AIR

A southern California ham has been told to stay off ther air after his license was set aside by the FCC’s Wireless Telecommunications Bureau. Amateur Radio Newsline’s Bruce Tennant, has the rest of ther story:

--

Recieving the order to cease operation was Drew Feldman, KG6PFC, of Los Angeles.

By way of background, this is Feldman’s second license. Back in May of 2000 the FCC canceled his original N3KSO ticket after he failed to appear for re-examination as directed by the agency.

Later on Feldman did attend an exam session where he passed the Technician class test. It was after that exam that he was then issued the KG6PFC call.

But says the FCC, it set aside Feldman’s latest license grant on March 18th. This, based on what it described as new complaints it received about his on-air operation. The letter did not elaborate on what the exact nature if the infractions are but it did warn Feldman that he currently has no authority to operate any for of Amateur Radio transmitting equipment. That doing so would be a violation of the Communications Act and could mean a stiff fine or even time in jail.

For the Amateur Radio Nerwsline, I’m Bruce Tennant, K6PZW, in Los Angeles.

--

No word as to weather Feldman plans an appeal. (FCC)

**

ENFORCEMENT: REPEATER PROBLEMS IN N.D.

If you thought interference to repeaters are just a big city phenomena, guess again. This as a North Dakota ham receives a warning letter from the FCC. The agency’s Daryl Duckworth, NN0W, has the details:

--

Duckworth: “Erin Rourke, N0KCN, of Fargo North Dakota, was issued a Warning Notice concerning deliberate interference with the KC0SD repeater systyem on 146.060 Mhz in the Fargo area. The interference has consisted of unidentified transmissions, tones, and the playing of music.”

--

In its letter the FCC warned Rourke that continued incidents of such interference to the KC0SD repeater or to any other Amateur communications will subject him to license revocation and suspension proceedings, as well as a hefty fine. (FCC, RAIN)

**

ENFORCEMENT: PAY TV PIRATES INDICTED

A federal grand jury in Los Angeles has indicted 17 people who authorities say hacked into satellite television transmissions, causing millions of dollars in losses to DirecTV and Dish Network. The U.S. Attorney's office says that six of the defendants were charged with violating the anti-encryption provisions of the Digital Millennium Copyright Act. The other charges involved conspiracy or

manufacturing a device for the purpose of stealing satellite signals. All three counts carry a maximum sentence of five years in prision. (Published news reports)

**

RADIO LAW: UTAH GOVERNOR SIGNS PRO ANTENNA BILL

Utah became the 17th state to pass a PRB-1 like law. After being sponsored by Representative Neal Hendrickson the measure went to the states legal department, then to the house sub-committee where it initally died. But Representative Hendrickson revived it and after John Hanson, KI7AR, testified on its behalf the measure sailed through both the house and senate. It took another 63 days for the Governor Mike Leavitt to sign it. He has -- and it becomes Utah state law on May 1st. (KD7FQD via QRZ.com)

**

RADIO LAW: ISRAEL ACTS TO PROTECT HAM ANTENNAS

Utah is not the only place thats protecting the rights of its radio amateurs when it comes to towers and antennas. So is state of Israel. Bill Pasternak, WA6ITF, has more:

--
Hagal International is the English language edition of the Israel Amateur Radio Club’s newsletter. And Hagal reports some good news for that nations hams.

According to the newsletter, Israeli cities and municipalities may no longer prohibit amateur radio antenna structures on for reasons of zoning. In other words, hams cannot be denied anteenas just because neighborhoods want to be free of what they view as unsightly antennas. Thats the good news, heres the bad.

Hagal goes on to say that the legal erection of an antenna and support may still not be the easiest task. A building permit must still be obtained after submitting the plans to be signed by a construction enginee. Also, there must be an authorization from the Ministry of the Environment showing that the antenna does not emit dangerous radiation.

But Israeli hams say that this PRB-1 like legal change is a first good step, and nobody is going to complasin.

For the Amateur Radio Newsline, I’m Bill Pasternak, WA6ITF.

--

The next step will be to try to get the Ministry to ease some of the environmental restrictions Israeli hams currently face. (Hagal International, IARC)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

EMERGING TECHNOLOGY: DOOROUGH HOLDS ON TECHNICAL ASPECT OF NEW AM SCHEME

Noted audio innovator Mike Dorrough, KO6NM, called off a special presentation of a new technology slated at last weeks National Association of Broadcasters convention in Las Vegas. Amateur Radio Newsline's Paul Courson, WA3VJB, has the reason why:

--

Mike Dorrough, KO6NM, had planned to announce details of an enhanced technique to improve the loudness of full carrier, dual sideband AM signals. But his lawyers said -- wait a minute -- you do not have patent protection yet. So, as the patent attorney process continues, the speach is delayed.

As previously reported on Amateur Radio Newsline, KO6NM has told fellow A-M enthusiasts he intends to share some of his experiments on H-F, and that he will invite their comments and analysis on how the system sounds with basic voice audio waveforms such as those in amateur service.

Dorrough believes that his new technical scheme holds promise to increase the already warm and inviting sound of AM among vintage hams, who could deploy the audio on new or old transmitters used on HF.

Even though their gear may be old, these hams are actually on the cutting edge of technology in improving double sideband full carrier A-M transmissions. More than 100 retired broadcast transmitters are known to have reached private hands, with most of them now restored and operating on 160, 75 and 40 meters across the United States. In addition, a number of homebrew buffs have constructed solid state "Class E" transmitters which offer outstanding audio quality and simple design

Dorrough, who is best known in the broadcast industry for his creation of the L-E-D Audio Loudness Meter is also a prominent member of the AM Amateur Radio community. He is active on the short-wave ham bands and is often heard running one of a variety of retired broadcast transmitters he has restored on 160 and 75 meters. He has been worked coast-to-coast when in California, as well as from his second home in Wisconsin.

For the Amateur Radio Nerwsline, Paul Courson, WA3VJB, Washington.

--

According to reports, Dorrough was encouraged by his attorneys to delay his remarks until the patent issue is resolved. As soon as they are and KO6NM schedules another presentation, Amateur Radio Newsline will bring you the details. (WA3VJB)

**

HAM RADIO IN SPACE: AMSAT ESTABLISHES ECHOLINK CONFERENCE SERVER

AMSAT has announced the opening of a new Echolink conference server as a new service from its amsat.org website. A conference server uses voice over I-P technology and allows many operators, links, and repeaters to share the same conversation in real time.

The new AMSAT conference server was established to provide a place for satellite operators world-wide to congregate and chat. The server is up continuously and all amateurs are invited to connect and give it a try.

More information about the *AMSAT* EchoLink conference server is available at http://www.amsat.org/echolink (ANS)

**

ON THE NET: NEW TEMPORARY MAREX-NA URL

Miles Mann WF1F, has announced a new website address for his Manned Amateur Radio Experiment or MAREX N-A group. The temporary U-R-L is http://wf1f.home.attbi.com. Mann asks that you delete any bookmarks you have for the old MAREX website which was pirated away by a foreign web host company some 30 days after it was renewed here in the United States. (WF1F)

**

INTERNATIONAL - IARU: THREE NEW MEMBERS WELCOMED

The International Amateur Radio Union has admitted three new member societies. According to an ARRL Bulletin, the new members are the National Association Radioamateurs of Georgia, the Federation of Radiosport of the Republic of Armenia and the Vietnam Amateur Radio Club.

The IARU was founded in 1925. It is a worldwide federation of national Amateur Radio societies with members in 156 countries and separate territories. (ARRL)

**

INTERNATIONAL - CANADA: NEW RAC BOD MEMBERS

Radio Amateurs of Canada has announced that Ian MacFarquhar, VE9IM, was elected by the RAC Board of Directors effective February 17th. MacFarquhawill fill the unexpired term of First Vice President, vacated by Joe MacPherson, VE1CH. (RAC)

**

DX

In D-X, DL8EBW reports on an upcoming all VHF DXpedition to a pair of Norway’s most wanted grid squares. The VHF-DX-GROUP will activate both JP-43 and JP-33 in Western Norway on both 6 and 2 meters looking for meteor scatter, tropo and aurora contacts. The call sign to be used is LA6K. Modes will be HSCW, SSB and FSK 441 with the time frame of the operation centered around the IARU contest. For more information and the sked list please check

www.qsl.net/la7dfa on the World Wide Web. (VHF Reflector)

**

THAT FINAL ITEM: RESCUE RADIO PLANNING - ECOMMWEST 2003 IN RENO

Our old friend Neil Mc Kie, WA6KLA, reports on an up-coming emergency communications event on Saturday, May 31st to be held in Reno Nevada. Called EMCOMMWEST 2003, the event is jointly sponsored by the ARRL Nevada Section and Northern Nevada Amateur Radio Services, Inc. Speakers include Jim Utterback, KC6TWC, Disaster Services Manager for the Reno-Tahoe Chapter of the American Red Cross, Alex King, Disaster Services Coordinator for the Salvation Army in Reno along with Nevada ARRL Section Manager Dick Flanagan W6OLD and numerous others. More about this important rescue radio planning event can be found on the web at www.cvrc.net/emcommwest (WA6KLA)

Probably your best bet is to use the FCC coverage calculation site:
http://www.fcc.gov/mmb/asd/bickel/curves.html
treating the SCA power as the power you wish to calculate coverage. you
do also need the height above average terrain (HAAT) for this site. you can
select it output in miles if you input HAAT in feet.

Theoretically, the pattern should be the same as the main signal,
after all, it's the same antenna.
As for power, it depends.
FM is line of sight, any obstructions will degrade the signal and the
lower the transmit power, the greater the degradation tends to be.
If it's a clear shot on the prairies, you could even get up to 75
miles, which, with the curvature of the earth, is about maximum for
any terrestrial FM.

I thought the whole appeal of QRP was to use extremely low power and
see what you could get with it. It seems to me that using the Internet
to set something up in advance defeats the purpose.

What commercials on Sirius are you talking about? There aren't any on the music channels and there aren't any of these really long comercials that I hae heard on the talk channels. Which channel?

By the way, if people are buying so many more XM units (and, agreed, XM has more subscribers), what reasons are they citing. I know most of my friends prefer Sirius, but have Alpine head units and so went with XM...

Were the A-B systems used for comparing the XM and Sirius compared using the same speakers, etc.? Obviously the head units are probably different...

Personally, I really dont think XM outsells Sirius because the programming or sound quality is better on XM. I stopped by BestBuy, yesterday, and I think they must be hella paid to push the XM because that's all you hear about. Seems like more Clearchannel bully-monopoly pressure to me.

Anyway, glad to see the discussion forming!

Sirius spent something like $60 million last year in advertising; if did not seem to do them much good.

I have driven outside metros extensively with XM; the only dropouts are occasional ones for a fraction of a second in heavily shadowed urban areas. On the freeways, I have never had a dropout going between LA and Phoenix, Albuquerque,Las Vegas, San Francisco, Fresno and San Diego.

I like NPR, but like the next guy says, you can get them in every market
(although some program times vary)

But I'd rather got go with a company that says they only have enough money
to make it to June. They may go belly up this summer. Maybe eventually XM
will pick up NPR and add a couple more channels...

Clear Channel owns about 6% of XM. The big owners are GM and Honda, with
nearly half the company. Next are several mutual funds, then some of the
interested broadcasters like CCU, HBC and Radio One.

657. Inovonics 255 processor sought after

I'm on the lookout for an Inovonics 255 Audio Processor if anyone knows of one for sale. I live in the UK & these particular units are not as common over here as they are in the US, also I'm told the second-hand market is slightly cheaper than here in the UK. What price (second-hand) do these units go for??

If anyone knows of such a unit for sale, please could you reply to this thread & we'll make contact! At least, can anyone point me in the direction of a good 'surplus Broadcast' supplier.

Regards

Neil

Yes, you can do this with a Jensen SSR2000; it's a universal add-on tuner with a CB-mike style LCD-display controller and RCA plug outputs to your stereo amp. You'll need a 12-vdc power supply that simulates a car's; you can splice the tuner's power wires to a cigarette-lighter plug and get maybe get power from one of the Radio Shack bench power supplies that accept that plug. I actually get the 12-vdc from my computer. A Lian-Li removable hard drive rack from Computergate. Several trays: one with a back-up hard drive, one with a Zip disk, and, when I'm not using those, one with the 12-v pair of power leads spliced to a cigarette-lighter receptacle for the Jensen. Don't use a wall-wart for power, and ground the antenna without fail. Jensen has nine one-button presets and 11 two-button presets. Works great. Note: when activating, be prepared to tell Sirius the VN of the vehicle you've theoretically installed the unit in.

It's fine on the Ohio Tpk. You might get a second or so dropout on the Penna Tpk, and also in the tunnels. I've driven DC to Dayton, DC to Detroit, DC to Cleveland and coverage is 99.99% perfect [6 seconds in 60,000 seconds]. I'd say no more dropout than 5 seconds + tunnels on your likely route.

There are a couple of places on I-68 in western Maryland where you are on the wrong side of a steep hill where the XM sig goes out for a minute or so. These really are beyond the middle of nowhere.

I am neither an employee nor investor of/in XM.

Source record: 8390

My decision to go with Sirius over XM was dictated by these factors in order of importance to me:

1. Channel offerings--the availability of two NPR channels, one PRI channel and the World Radio Network on Sirius trumped XM's offerings in this regard. Both have C-SPAN and each has a BBC World Service channel (variety on XM; news on Sirius). Both have more than an ample variety of music and other specialty channels.

2. Technology--without the ability to sample each in a controlled test, it appeared to me that Sirius' delivery system would be more reliable, (1) given its need for only 100 terrestrial repeaters and XM's need for up to 1,000; (2) fixed low elevation satellites (XM) vs. a system designed to have at least one satellite overhead at all times (Sirius).

3. A commitment to media not dominated by advertising interests (Sirius) vs. a lesser commitment in this regard (XM).

I've had Sirius since January and I agree wholeheartedly with the comments that say once you've actually subscribed, you'll wonder how you did without it. The 12.95 a month I'm paying is money well spent. This is how radio should be.

> he was doing evenings in Toledo in 1983. He was last working for Fox
> Sports radio.

Speaking of which, what happened to Kevin Kiley? Fox appearantly gave Chuck Booms the boot and Mason started sitting in. Kiley went on and on how he and Booms had seperate contracts, then one day Kiley was gone. For the longest time the new guy said he was sitting in for Kiley, but as far as I know, Kiley never returned. I stopped listening.

Source record: 8391

Probably more what you want though, a what-am-I-hearing question,
http://www.radio-locator.com

type in your zipcode to get a useless list of local stations.

But at the bottom of that page, the useful part: put in 1270 and
a distance in miles, and it will list all stations on 1270 within
that many miles with their distances and bearings.

So your zipcode had some use after all.

Saw this in misc.transport.road:

The Federal Communications Commission's biweekly report of call letters this week includes these entries for the New Mexico State Highway & Transportation Department:

43 04/11/2003 KMRT-
LP FL NEW MEXICO STATE HIGHWAY AND
TRANSPORTATION DEPARTMENT MORIARTY NM 20010612AFO New
44 04/11/2003 KOCS-LP FL NEW MEXICO STATE HIGHWAY AND
TRANSPORTATION DEPARTMENT SOCORRO NM 20010612AFR New
45 04/11/2003 KRZO-LP FL NEW MEXICO STATE HIGHWAY AND
TRANSPORTATION DEPARTMENT CARRIZOZO NM 20010612AFD New
46 04/11/2003 KSGI-LP FL NEW MEXICO STATE HIGHWAY AND
TRANSPORTATION DEPARTMENT SPRINGER NM 20010612AFT New
47 04/11/2003 KSNJ-LP FL NEW MEXICO STATE HIGHWAY AND
TRANSPORTATION DEPARTMENT SAN JON NM 20010612AGH New

The FCC released some earlier call-sign notices including more of these stations:

10 02/20/2003 KAON-
LP FL NEW MEXICO STATE HIGHWAY AND
TRANSPORTATION DEPARTMENT RATON NM 20010612AGG New
11 02/20/2003 KFOS-LP FL NEW MEXICO STATE HIGHWAY AND
TRANSPORTATION DEPARTMENT FORT SUMNER NM 20010612AGI
New
12 02/20/2003 KIVO-LP FL NEW MEXICO STATE HIGHWAY AND
TRANSPORTATION DEPARTMENT CLOVIS NM 20010612AFH New
13 02/20/2003 KLDA-
LP FL NEW MEXICO STATE HIGHWAY AND
TRANSPORTATION DEPARTMENT CARLSBAD NM 20010612AFC New
14 02/20/2003 KLME-
LP FL NEW MEXICO STATE HIGHWAY AND
TRANSPORTATION DEPARTMENT LA MESITA NEGRA NM 20010612AFZ
New
15 02/20/2003 KRWL-
LP FL NEW MEXICO STATE HIGHWAY AND
TRANSPORTATION DEPARTMENT ROSWELL NM 20010612AGJ New
16 02/20/2003 KTDF-LP LP K27EA
17 02/20/2003 KTIA-LP FL NEW MEXICO STATE HIGHWAY AND
TRANSPORTATION DEPARTMENT ARTESIA NM 20010612AFB New
18 02/20/2003 KTOS-LP FL NEW MEXICO STATE HIGHWAY AND
TRANSPORTATION DEPARTMENT TAOS NM 20010612AGE New
19 02/20/2003 KUAB-

LP FL NEW MEXICO STATE HIGHWAY AND
TRANSPORTATION DEPARTMENT CUBA NM 20010612AFI New
20 02/20/2003 KUUM-
LP FL NEW MEXICO STATE HIGHWAY AND
TRANSPORTATION DEPARTMENT TUCUMCARI NM 20010612AFV New
21 02/20/2003 KVAU-
LP FL NEW MEXICO STATE HIGHWAY AND
TRANSPORTATION DEPARTMENT VAUGHN NM 20010612AFW New

4 03/04/2003 KHMA-
LP FL NEW MEXICO STATE HIGHWAY AND
TRANSPORTATION DEPARTMENT CHAMA NM 20010612AFE New
5 03/04/2003 KRWE-
LP FL NEW MEXICO STATE HIGHWAY AND
TRANSPORTATION DEPARTMENT ROWE NM 20010612AFX New

Some interesting things to note.

The call letters all are derived from the town names that they are located in.

Upon looking at the FCC's LPFM page, there are two other states that have a stack of these LPFMs that have been granted CPs or are pending apps. Those two are New York (two agencies) and Iowa.

These look like they were all approved at the same time, or in two groups. Also, does anyone know whether any of the New Mexico stations have actually hit the air and if so what is the programming?

671. Looking for used and broken broadcast equipment.

Newsgroup: rec.radio.broadcasting
Date: 2003-04-28 14:54:26 UTC
From: "Rev. Robert P. Chrysafis" <kc8gpd28@earthlink.net>

Source record: 8398

Hello,

I am presently trying to start a part 15 AM/FM station and i am looking
for any old equipment you may have lying around the station that you want to
get rid of. I am looking for transmitters / exciters, AM / FM, solid state,
or hybrid, Crystal or PLL, 50w or less. Please note the tx's will be backed
down to P15 levels(250uV/m@3m FM and 100mw input / 3m ant AM). Also looking
for carts, tape decks, boards, mic's, etc. Don't care working/non-working
will fix if need be. so engineers dig up that old stuff you don't know what
to do with and i'll put it to good use. I live in an apartment and the
complex is on a couple of acres so P15 AM / FM will work great for this
purpose. I am a licensed amateur operator and do not wan't to jepeordize my
license with pirate activity. So rest assured this will be operated under
P15 rules. I can travel 100mi from 08826 to pick up stuff.
I will take anything you can spare as long as it fits in a toyota corrolla.
I am trying to do this as a public service to the other tennents and it will
be non commercial.

Thank You,

--
Rev. Robert P. Chrysafis (kc8gpd)
88.3 FM Stereo 1610 AM (Part 15)

I had XM installed in my car for a while and really liked it. It had great sound quality overall. I recently switched over to Sirius because of the "Commercial Free' music channels. Holy Cow! After listening to Sirius for about a month now...the Sirius programming is sooo much better. The DJ's offer insight into the songs (which i really like). The XM DJ's reminded me of annoying FM DJ's. I also think that Sirius sounds better to my ears. The music seems like it breathes more. Kind of like hearing a regular CD and a SACD. XM has a compressed sound quality to it. Overall, I am ecstatic with Sirius in my car. I am excited to get one of their home units or boomboxes due out soon too. Sirius must love me....because of me showing their system to friends and family...they must have at least an additional 50 subs! I am thinking about investing in the company I love it so much. I think their shares are like under $1. Unbeleivable! If this thing takes off....we could have the next microsoft?

John A. Figliozzi:

I thought you were into world band radio only! The way I look at it, XM and Sirius will probably either have a very short product life cycle or be used exclusively in cars and trucks.

Here's why - the Internet. I wouldn't give 2 cents for the long-term viability of radio, television, or newspapers as we know it today, the future is on the world wide web.

Now, how to make web-based multi media profitable is for another thread...and day.

BTW, I've sold all my short wave radios except for my Sangean ATS 606, I'm not investing another dime in this technology when most of my favorite programs are now available on the web using Real Audio.

Interesting stuff!
Rod Serling also reportedly worked at WMRN radio in Marion, Ohio for a time...probably late 40's early 50's when the station ran lots of network "classic" programming (it wasn't classic at the time) and had an in-house studio that hosted live performances by area bands and entertainers.
Anyway, former WMRN CE Joe Peters told me that Serling was fired from the station because he spent a lot of time writing strange stories. Peters died several years ago so I have no way of knowing if it's true or not.

In casual shopping, my observation was that Sirius sounded quitet a bit better than XM, but I really liked the add on XM tuner made by Delphi. The Sirius tuner I listened to seemed awkward to use, especially at 75 mph.

>I thought that LPFMs were limited to one to a customer. How can the state
>own a couple of dozen in light of this (supposed) rule?

There was a loophole for applicants that are Public Service Safety Organizations to apply for more than one LPFM. The exemption also included colleges with more than one campus, colleges with an existing full power station, and national organizations (including churches) with multiple regions or chapters (like Boy Scouts, Kiwanis, etc.) who were all exempted from the one to a customer rule.

The religious broadcasters have really capitalized on this. It seems they are in the process of building large LPFM networks. These same folks have applied for multiple translators in the most recent March filing window. It is estimated that 13,500 translator applications were made in the five-day window. The overwhelming number of applications totally overloaded the FCC's on-line CDBS pages. You still can't find out who applied. As I understand it, the FCC hopes to have the applications posted in early May. It makes LPFM applications seem inconsequential.

Of course, these translators can run 250 watts at very high elevations. They also do not need to protect third adjacent channels, like 100 watt LPFM's If you guys got worked up over the idea of a lowly LPFM moving into your community, I'm afraid "you ain't seen nothin' yet."

Chuck

So, here I am sitting in San Francisco with a Sirius equiped Hertz rental car. This is my first real exposure to Sirius except online trial. I have XM in my house and cars in Vermont...one Sony unit that I move around.

PRO: Excellent audio quality...can't compare directly because I use a cassette adapter with XM, and this is direct wired. Sounds less compressed, more open with better low freq response.Antenna is on roof near back window.

More knowledgable DJ's, especially on Broadway and Jazz stations. Only XM DJ's that I like are at "Franks Place" programmed by Jonathan Schwartz.

Much better selection of Jazz, standards, and news choices (NPR, PRI) than XM.

CON: Did Sirius just shange all the channels and names? Only about half match the flash card and brochure in the Hertz car. I had to sit in a parking lot and go through all the stations, writing down names, formats and channel numbers on a pad. The average car renter would not take the time to do this...just an old radio guy...

Head unit impossible to change stations while driving without a serious accident. Buttons tiny and type on screen unreadable fron drivers seat.

Many dropouts in City and under all bridges from airport. Definitely no repeaters here. Goes away completely under overhead electric tram wires on Union Street.

I've only had it for two days, and will have it till 5/9....will update impressions as I live with Sirius some more.

Cheers,
Bob Ring

If you're a chair potato you might have a chance with that. The
advantage of radio is portability. When the web becomes wireless,
it'll become just another form of radio.

Having been on the board of advisors for two webcasting companies and
an early part of broadcast.com I don't share your bright vision of
webcasting's future. All three are either dead or shadows of their
former selves.

682. My take on XM vr. Sirius.

Newsgroup: rec.radio.broadcasting
Date: 2003-04-29 12:40:51 UTC
From: jander7@hotmail.com
Message-ID: <b8lrsj$ci8$1@xuxa.iecc.com>
Source record: 8309

Here's my take on the XM vs. Sirius question.

I've only really heard XM, at a Best Buy in Salt Lake City. The signal quality is better than the local stations, the closest to their quality was the classical music FM (KBYU) and a rimshotter booster (KWKD), but it beat out everything else hands down.

>From the music I've heard on it, they've got a good variety in almost every category. Maybe missing som of the good sounds here and there, but like any new station, they have to build a library, and that can take some doing to get all you want in the library. Few local stations, mainly the classicals, ever are able to acquire a very good library of music.

Heard nary a commercial. They had it on the alternative rock and hit $&B channels and so I don't know if they aired a commercial or not.

As far as flexibility, XM wins. They have the three incarnations of the Delphi SkyFi Radio and various receivers for car and home. And they just soft-launched a $70 PC kit that has features not even available to RealAudio or Windows Media users, not even mp3 players can touch the new kit. Also, you don't have to be on the net to use it with your PC, just hook up the hardware, run the install disc for the interface display, and you're off. See xmradio.com for more.

More on music selection. Saw the Sirius site and it did not have some of the stuff that XM does.

Also, I have a question or two. Are either one of these services going to have more than the present 100 channels? That might be a strong selling point if they could do more than that. There are some possibilties programming-wize that can't be addressed without having about 50 or so more channels online. These choices are very hit-and-miss on AM/FM, largely found on translators or FMs class-A or lower in many areas and a few innovative ones that are popular on the 'net.

Secondly, is there anything under development or is it just that there may not be a way to do this: That is, make a portable 'walkman' style player that can pick up signals from above inside a public transit bus or car or whatever where you can't use or have access to an outside antenna setup? Seems it could be done with upgraded antenna gain, but I'm not sure IF it can even be done, tell me if it can or can't be resolved. (signals don't go throuhg metal at all, unlike regular AM/FM broadcast.

Also, when setting up either service in the home, do you need to be near a south-facing window and if not, how can one get reception without having a south-facing window (like some apartment complexes, etc.)?

>From what I have heard about their subscriber numbers, it appears quite a ways from taking off. They are competing against each other, against free radio, as well as CDs including burned CD's. It took years to convince people to pay for television reception, and only then not until cable offered programming not found on free TV that appealed to mass audiences. While there is some of that on satellite radio, much of their product is available elsewhere.

Hi Rich,

have a look at "www.lyngsat.com" (Astra 28° digital) to see the offering
of digital satellite radio in the UK.

Compared to FM radio the sound quality of the many satellite feeds is
just amazing - at least the BBC programs are.

I'm not a classical music fan, but the playlists on the stations I listen to
are extensive. The "Deep Tracks" channel (classic rock and current music by
artists whose style meshes with the established icons of the genre) boasts
more than 6,000 songs. The Decades channels have anywhere from 2,500 to
4,000-plus songs in regular rotation. I've had my XM since January and I
still hear a lot of new songs every day.

This topic has come up frequently on http://www.xmfan.com, a bulletin board
for XM users. The techies on the board contend that adding channels will
degrade sound quality, as there's only so much bandwidth available to
squeeze in all the channels. Sirius has an exclusive deal with the NBA for
nightly games on several additional channels, and those who've tried Sirius
say the audio on the music channels has suffered.

If you're in a city, there may be a terrestrial signal booster in your area.
Otherwise, eastern and western windows work fine in wooden houses like mine
and may work acceptably in some brick-and-steel buildings. If your only

exposure is a northern one in a brick-and-steel building and there's no repeater nearby, you won't hear a thing.

With WINAMP 2.x, there;s a plug in called "Sound Solution" that will do anything you need, Also get the SqrSoft Advanced Crossfader plugin.

If you're not running Winamp, consider OTSDj.

If you're running somehting else, then you're on your own.

All,

I know this is a longshot, but I'm hoping someone out there happened to be taping WMAL (AM-630 in Washington DC) during the hours of 6am to 7:30am EDT on Monday, April 28th 2003 (yesterday).

I'm seeking a recording and/or a transcript of the Morning News show with Andy Parks, Bill Press, and Jane Norris. WMAL has a general policy of not providing recordings or transcripts, and the Radio/TV Monitoring Service in DC doesn't start recording until 8am.

If you have any idea where I could find what I'm looking for, I'd greatly appreciate your assistance.

Regards,
Rob

Unlikely, as they are already squeezing pretty hard to compress 100 channels into the available bandwidth. They have both slightly changed their channel mix over the past year. I'm sure these small changes will continue. More channels mean more employees mean more losses at the present time.

> Secondly, is there anything under development or is it just that there
> may not be a way to do this: That is, make a portable 'walkman' style
> player that can pick up signals from above inside a public transit bus
> or car or whatever where you can't use or have access to an outside
> antenna setup?

Two problems. The sat radio chip sets still eat a LOT of power so the batteries in a tiny walkperson wouldn't last long. IMO, you'd have to be close to a repeater to get an adequate signal in a bus. While XM may have dozens of repeaters around each of the largest cities, one can assume that Sirius has about 1/10-th as many.

> Also, when setting up either service in the home, do you need to be
> near a south-facing window and if not, how can one get reception
> without having a south-facing window (like some apartment complexes,
> etc.)?

I had my XM antenna in a SE-facing window (I'm on the East Coast) and sigs got spotty on wet days. Now it's on the mantle in the living room, in the center of the house, and works fine. I have a friend who lives on the "wrong" side of a lower floor of an appartment in Washington, DC. He gets fine XM reception, but it is surely from a repeater.

I'd guess that the situation with Sirius is quite different since their sats are constantly moving. At times the two visible sats are essentially at the same point over South Dakota. At other times one of the visible sats is over northern Hudson's Bay, Canada, and the other is either over the Caribbean or way off the western coast of Mexico. Which window should I choose for my Sirius antenna? Since their sats are at a high-ish angle, the sig might get in through the attic of a one-story house - unless the attic insulation has foil backing.

I don't have the pat solutions, but I hope the above has shed some light.

The father of Boston talk radio died last night at the age of 79.
Started in the late '50's on WMEX/1510 and subsequently WBZ, WRKO, a few
others and another WMEX. He also relocated to Chicago briefly in the
late '60's. He pulled no punches. Remember the seat belt issue?
Although he believed in seat belts he felt it was a violation of
personal rights to make them mandatory. As everyone of us in
Massachusetts knows, a compromise was reached. The family has invited
all of his fans to attend the calling hours on Thursday. Classy
gesture.

THAT is the problem. Satellite radio is a rebroadcast of everything from FM stations to TV channels. They could have done SO much innovative stuff, but instead, we get the "Playboy Channel" which is occasional audio from the TV channel.

I don't understand why anyone would pay $10/month for the channels currently available from XM/Sirius. I was expecting much more when I first read about the services years ago. I was expecting like HBO quality stuff for my radio. Full length CD's. Live concerts in their entirety. 1st class DJ's/programs. Not a bunch of voicetracked stuff and talk shows I can already hear on AM/FM.

They don't even carry the top rate AM/FM shows for $10/month!!! It's like second rate stuff!

Is there a program or DJ you want to hear on it?

If so, sign up. If not, don't waste your money.

I've tried one of the two services and it really didn't have much to offer me, and I am not a fan of voicetracking/taped programming so I didn't like it. I also don't like repeating annoying clips/promos between songs instead of live DJ's. Your milage may vary.

I'm not sure a broadcast processing chain is the best for Internet
streaming. In particular, coding schemes such as mp3 do not handle
clipped audio very well. My suggestion is to apply some AGC but
nothing else.

Cross-posted to: rec.radio.broadcasting,misc.transport.trucking,rec.video.satellite,rec.audio.car,rec.audio

It was very much apples to apples, and if you think about it, you will realize why. I know very well how satellite works, and this was an excellent A-B.

I could compare because I was using the same system and the same connection, albeit in different ways. Let me explain:

The Ai-Net signal from the XM Alpine unit comes in through a proprietary cable at the AI-Net interface. The panasonic came in through RCA connection to an auxiliary Ai-NEt adapter Alpine sells.

The only difference could be in the way that Alpine or Panasonic treated the voltage or other attributes of the signals being output by their units. In that case, there are two possibilities: first, XM has poor sound quality, or second, Alpine's XM unit stinks. Of course, it could have been a mixture of the two.

Bottom line is, the Panasonic CR-SRF100 (CR-SRT100) pushed an infinitely better signal under exactly the same conditions.

Hope that helps.

What compromise? Seat belts were voted out, then legislated back in. I still remember the sign on I-84 at the Connecticut-Massachusetts line: "Buckle Up. Massachusetts Suggests (slapped over "Requires") the Use of Safety Belts."

Sirius is more reliable on long trips. XM relies more heavily on repeaters for urban penatration but suffers a bit out in the hills. Content is a personal choice, so you better go to their web sites and give both a good listen before you plulk down your cash.

If you live in Los Angeles, you could've heard both Kiley and Booms.
Kiley guest hosted on The Loose Cannons show about a month ago.
They've had a bunch of fill in hosts, trying to find a replacement for
the guy that left. Kiley is pretty boring without Booms. But they had
good chemistry together. Anyways, today Booms guest hosted on the
Loose Cannon show and he's going to be on tomorrow as well. It was
pretty funny. Booms of course took his shots at Kiley, except he
refused to call him by his name. He called him his "ex" or "the other
guy". And asked why Kiley appeared on the show before he did. A bunch
of callers called in and wanted Booms to be the permanent co-host. Of
course, there were those who hated him as well.

WCBN WILL DESTROY YOUR FEEBLE FORMAT

WCBN - 30 Years of Freeing Your Mind - Listen to us online!

WCBN is the University of Michigan student-run community freeform radio station in Ann Arbor, Michigan. We broadcast at 200 watts to the University and its surrounding communities from the basement of the Student Activities Building in downtown treetown. We have been broadcasting a genre-less overview of music, news, and public affairs for 30 years.

WCBN's musical format is freeform, with some specialty shows. Freeform involves all different kinds of music, including jazz, reggae, blues, hip-hop, country, rock, and just about everything else under the sun. Instead of telling our DJs what to play, we allow them to select their own recordings from our vast and unique library. It is their responsibility to mix together many different kinds of music in an intelligent fashion, and show links between musical genres.

Click here to listen to our live WCBN-FM Ann Arbor broadcast!

I'm sitting on the fence. I'd sign up for either service if the equipment were cheap, or if there were a smaller monthly fee. I like the idea of getting my favorite programming no matter where in the US I happen to be. Also, I haven't seen a portable setup that I could carry when I'm not in a vehicle. Please inform me if I'm wrong about portable equipment.

Cheaper equipment would make me consider.

710. BASYS newsroom system: sourcecode anybody?

Newsgroup: rec.radio.broadcasting
Date: 2003-04-30 16:35:56 UTC
From: patrik.tschudin@srdrs.ch
Message-ID: <b8ou1c$2lt$1@xuxa.iecc.com>
Source record: 8337

Maybe swiss public radio is the only place on earth, where the newsroom system BASYS still is in daily and heavy use? The hardware is almost antique, the operating system also. but basys is - still great (call me outfashioned, but it's fast, lean, integrated, easy to use, all in one place, and all that without ever touching a mouse. if speed really counts, almost nothing beats basys...). but: there is no more support for this system. not really. if i got it right, basys was bought by avid 1994 and then somehow given up and forgotten as a unix-based newsroom system. as far as i could find out, here it runs on DEC hardware running ultrix.

Here comes my question:

Does anybody out there have a copy of the sourcecode of basys?

Or do you know someone who might know someone who has it? Or do you know whom to contact to check for the copyrights? Or do you know someone who could decide to release the sourcecode to the public?

the aim would be: make it run on a modern Linux or *BSD Unix. I bet this would be possible. somehow... why? basically i want to avoid this bloated, overloaded, ugly and slow all-in-one windowsbased newsroom- and audioediting- and broadcasting-tool (of which i will not tell you the name), that threatens to take over my PC very soon in the course of a so called upgrade. at least partially. at least for the newswire-, planning-, adress-, show-preparation- and shortmessage-part. I do accept that you can't reasonably edit audio on a unix terminal-session... but for all the rest, i prefer basys, i admit.

looking foreward to any response here and to my e-mail (please!)
thanks!
Patrik

711. Re: Deciding XM or Sirius ? Here's a review.

Was it really a better signal, or was it just louder??

On my Pioneer I have the direct connect XM and the
AUX adapter with the SIRIUS.... They are NOT the same
audio levels!!!

But my Pioneer has a feature where I can adjust the individual
volume levels so that they both are equal... I dont hear any
significant difference in sound quality at all..

My guess is YOU are being FOOLed by the slightly different
audio levels and you think the louder one sounds better....!!

Dont feel bad, folks are fooled by the high volt headunits the exact
same way...

See ya

Your guess is wrong. This Alpine unit has level controls, as well, and I HAVE A MULTIMETER AND A DECIBEL METER, AS WELL, NOT TO MENTION A BRAIN THAT KNOWS HOW TO USE THEM. So it would appear, THAT I AM NOT BEING FOOLED.

Now, if we are done shouting at each other and insulting each other's intelligence, maybe we can move on to something productive.

In addition, I was able to test these units on a home stereo amplifier, and, though there was some slight signal difference, of course, it was embarrrasingly clear the Sirius sounds better. I'm not into being a fanboy, I'm just calling it as I saw it, and I was very careful to make an equal comparison.

It's alive & well.

It has become what's now known as Avid iNews.
http://www.avid.com/products/inews/ . The webpage says the platform is
WinXP but that's the clients - the servers run on Unix. Irix and SCO to
be specific.

I'm not 100% certain it still supports the old Wyse terminals - haven't
tried one for 3-4 version upgrades. They said they were going to phase
those out but I don't recall hearing that they actually did.

Look around that avid.com URL and I think you'll find someone you could
ask. However, I would be quite confident the chances of getting the
source are zero.

WCBN WILL DESTROY YOUR FEEBLE FORMATS

WCBN - 30 Years of Freeing Your Mind - Listen to us online!

WCBN is the University of Michigan student-run community freeform radio station in Ann Arbor, Michigan. We broadcast at 200 watts to the University and its surrounding communities from the basement of the Student Activities Building in downtown treetown. We have been broadcasting a genre-less overview of music, news, and public affairs for 30 years.

WCBN's musical format is freeform, with some specialty shows. Freeform involves all different kinds of music, including jazz, reggae, blues, hip-hop, country, rock, and just about everything else under the sun. Instead of telling our DJs what to play, we allow them to select their own recordings from our vast and unique library. It is their responsibility to mix together many different kinds of music in an intelligent fashion, and show links between musical genres.

Click here to listen to our live WCBN-FM Ann Arbor broadcast!

I thought Kiley and Booms were great together, and I really enjoyed their
show on Fox. But alas, it is radio, and the suits never seem to leave a
good thing alone.

That's what I've read. I would be using the Ogg Vorbis codec to stream,
but I'm sure it's no exception. If I were to avoid clipping and stick to
compression and limiting do you think the results would be decent?

Only a couple of XM channels are terrestrial stations, picked mostly for
their star-power. All the rest are XM specific products.
>
> I don't understand why anyone would pay $10/month for the channels

Prohibitied by the Digital Millennium Copyright Act. Not just XM, Sirius and
all streaming audio sources.

> Live concerts in their
> entirety.

XM does unpluggeds and stuff from one of their several performance studios.
Artists generally don't license concert performances, and the copyright act
prohibits this... for XM and any other digital source.

Radio legend Jerry Williams past away today at Massachusetts General Hospital in Boston. He was 80 years old. Jerry was one of the originators of the talk radio format and Larry King would call him for career advice, Howard Stern would listen with awe when he was a college student. He was a pioneer at political activistism in radio as he campaigned against seat belt laws, tax increases, and he called Boston's Big Dig an albatross a decade before it was widely known as a boondoggle.

He was able to give legendary monologues and always was respectful to those who called his show, giving them enough time to actually talk.

He was a talk show host in Chicago, Philadelphia, and Boston and the originator of the National Association of Radio Talk Show Hosts. Williams was inducted into the Radio Hall of Fame in 1996.

What is it,
as in what does decibel mean, or what does one decibel equate to?

the word decibel means one 10th of a BEL
(named from Alexander Graham Bell)

One Decibel is usually the amount of sound change that is just
perceptable
by a human with good hearing under ideal circumstances.. Like a hearing
test....

Is this what your looking for?

Eddie

Playing music *is not* original product. Music can be purchased in stores
or downloaded for free from Kazaa. People buy cable or satellite television
because they get product that is unique and not available elsewhere. You
can't buy CNN, FOX News or the Weather Channel at Wal-Mart.

Maybe after paying $120 - $300 a year for internet service, $240 - $720 a year for cable, $240 - $600 a year for cellular, etc., maybe $127.75 a year for a radio service that is primarily not unique is just one bill too much for many people.

Psychoacoustic codecs want to see something that resembles natural
sound. The more processing one applies, the more the sound will
diverge from what the codec's designers envisioned, and the more
mistakes it will make.

The rule I have always followed is to process no more than is necessary.

Well, I'm sick of talking to you, but just to clear the air, I don't work for Sirius. I am an IT admin and an engineer in the Northwest. I got on this kick after deciding I really only wanted one of the two satellite services in my car, so I decided to look on Google to see if anyone had the goods on which was better. I found next to nothing as far as a review went, so I set about making one myself. Yes, a friend and I did get those meters out to test what I could to see where the difference was coming from, and yes, you are a dick for insinuating otherwise. I appreciated the challenge at fist, but now you're just being stupid. Ask some real questions so this thread doesn't go to pot - it was getting pretty cool, and it would be great to hear even more opinions, don't you think?

So, your now telling us that you and a buddy got out the
decibel meters and set up your car so that XM and SIRIUS were
exactly the same level.???

What did you use for a reference signal?

If I were to do level match something in my lab I would
choose something like a 1k tone and with that it
would be fairly easy to adjust both sources
to be equal...

But I was not aware that SIRIUS or XM had any
reference tones that could be accessed by an end user such as
yourself.. I would imagine it would even be hard to have XM and
SIRIUS to play the same song ! So how on earth did you accuratly
set up a decibel meter in your car to make sure the output level of
XM and SIRIUS were the same??? Playing music the dB meter
would be jumping all over the place and not of much value....!!!

So I would find a decibel meter nearly useless for that, I would simply
adjust the levels by ear...

This is why your claim of using a decibel
meter sounds so far fetched to me...

Its also why I still believe that
any difference you say you heard between the XM and SIRIUS were
likely to be SIGNAL LEVEL differences and not actually sound
quality differences...!! (your not a very good liar)

And now, when I call you on it you tell me
your SICK OF TALKING TO ME!
HA HA HA

Alot of folks get that sick feeling when they are caught in a lie...
HA HA HA

Sorry to bust your chops, but my SIRIUS sounds great and my
XM sounds great as well... One is not noticably better than the other!

Your review was a good idea, but you have to try to stay with FACTS.

See ya - better luck next time.....

Eddie Runner

How the hell did *I* get roped into this?! All I did was respond to a question about the definition of a decibel. It's not my fault he happened to use my post to respond to Eddie's.

My problem with Sirius (and XM) is that there are only a couple of
channels I'd ever listen to, so the $/channel per month is a little bit
steep.

The answer about the "barely perceptible change in loudness" is correct. In addition,
mathematically, 1 decibel is approximately a 25% change in the power level of an electrical
signal. Thus, one and a quarter watts of power into a speaker is about 1 decibel more than
one watt. Radio transmitters and receivers are often spec'ed in dB, but it's RF power, not
audio. (Cable TV spec is different -- let's don't go there.)

A three dB change in power is a doubling (or halving) of power; a 10 dB change is a change
by a factor of 10, either up or down. Voltage and current have their own scales but I don't
want to write a textbook here.

740. Orgy(R) time at WHRB

Newsgroup: rec.radio.broadcasting
Date: 2003-05-03 03:15:30 UTC
From: umarc <umarc@hippogryph.com>
Message-ID: <b8vc8inam1@xuxa.iecc.com>
Source record: 8264

Marion Lignana Rosenberg reports:

I'm once again emerging from lurkdom to urge you to sample WHRB's offerings: this time, Spring 2003 Orgy(r) Period. People in the Boston area can set their radio dials to 95.3 FM; those of us outside Boston can punch up <http://www.whrb.org/>. (Full disclosure: I'm an alumna.)

The major broadcasts of Spring 2003 Orgy(r) Period are:
May 6, 19h00 (to May 9, 19h00): Sergei Prokofiev
May 11, 22h00 (to May 14, 15h00): Paul Hindemith

Other highlights include:
May 5, 13h00: Henri Dutilleux
May 11, 8h30: Ivo Pogorelich
May 15, 10h00: Don Carlo Gesualdo
May 24, 16h00: Johann Nepomuk Hummel
May 25, 12h30: Erich Kleiber
May 25, 23h00: Charles-Valentin Alkan
May 26, 13h00: Yuri Bashmet

Especially noteworthy:
June 1, 12h30: approximately twelve hours of broadcasts commemorating the fiftieth anniversary of Queen Elizabeth II's coronation, including British musicals and ballads, Goon Show highlights, and the coronation ceremony itself (recorded in Westminster Abbey on June 2, 1953)

June 8, 19h00: preview of the Boston Early Music Festival, with live, in-studio performances and giveaways

Complete listings are available at <http://www.whrb.org/pg/MayJun2003.html>.

Of particular interest to opera-l: throughout the summer, WHRB will be presenting live-by-tape opera performances from Europe. Details are available at <http://whrb.org/pg/Summer2003.pdf>.

An all-volunteer station broadcasting from the basement of a freshman dormitory at Harvard, WHRB is (sadly) something of a giant among classical broadcasters in the United States these days. WHRB is home to the Metropolitan Opera in Boston, and its "Sunday Night at the Opera" broadcast is one of the longest-running opera programs in the United States. WHRB is one of the last U.S. stations presenting substantial amounts of classical vocal music, historic recordings, and music of the 20th and 21st centuries. Outstanding WHRB staffers of the past include Martin Bookspan, Dale Harris, Igor Kipnis, John Rockwell, and Alex Ross.

WHRB welcomes feedback: <mail@whrb.org>. Again, since the staff is unpaid, listeners' messages of praise and constructive criticism are gratefully received, and also help WHRB in its advertising and promotional efforts. (WHRB pays its own way and receives no support whatsoever from the university.)

Buon ascolto!

mlr

IMO, that is the wrong criterion.

Maybe a better one would be whether you can find what you want on
[Sirius/XM] any time you want to listen. I don't need to be torn between
three or ten channels I like. I just want to be pretty sure of finding at
least one I like any time I listen.

OTOH, I can grant that sat radio may not be aimed at ___your___ interests.

We used average readings for a variety of similar music, yielding a loudness range which, all other parameters being equal, gave us some gauge of what level of signal was being amplified. Agreed, we did not compare exactly the same song.

Man, you're rude. What the hell is your problem? If you're so damn interested, quit screwing around and post your own review instead of wasting everyone's time trying to pick mine apart. Jeez.

....

Do you work for XM?

Ah. Everybody but Sid, apparently. Seriously, he dropped off the face
of the earth in the late 80's or early 90's, I think. I was shocked to
hear he was still alive, and the reaction I got from a couple of other
people was invariably the same. "Jerry Williams died? Geez, I thought
he'd died ages ago!" He was big for a little while, but, hey, the guy
wasn't Brudnoy or anything.

Hello out there!! In the 60's i always taped the WMEX WooWoo (& other DJ's) programs, but lost them over the years. Other than the 1 album that is out (1961?) with Arnie Ginsburg/WMEX, is there anyone out there that has any tapes that they personally made, like i did? This is just for personal/nostalgia use, & is not part of any diabolical scheme. I just want to reminisce by being able to listen to some of it again. Can anyone help? My sincere thanks!!....Jerry (jermyrauto@att.net). PS...i understand that Arnie is still around, & living up in Maine. Does anyone know how i might be able to contact him? Again....THANK YOU!!!

>>I think I speak for just about everybody in Massachusetts when I say... I
>thought he'd died YEARS ago.<

You're entitled to your opinion, I guess. Jerry Williams and I did not like each other. I used him as a Bob Grant replacement and had to remove him from the network during a show. He was furious (as I would have been) and accused me of trying to destroy his career.

However, in his prime, Jerry was one of the best talk show hosts in the business. I don't need to like someone to grant them their due. I'm sorry to lose him.

Rich

As I type this, my Delphi XM radio tuned to channel 166 displays that =
Dr. Natasha is supposedly on. Well, I hear two boring computer geeks =
talking about flat panel monitors. Nothing could be further from Dr. =
Natasha.

I tried calling XM technical support and I was told to tune to "89.1"! =
When I explained to the genius that he's supposedly helping customers =
with a SATELLITE RADIO, he went speechless. Then he gagged something =
about being in "activation" and not in "programming". When I requested =
someone who is knowledgeable about this problem, he stated that he knew =
no one who was and could not transfer me or give me another number to =
call. Stellar customer service from another loser outfit!

When I studied this XM company just a minute ago, I found out that Clear =
Channel is one of its owners. And that pretty much explains it all to =
me. After Clear Channel ruined free FM and AM in this country, they now =
have set out to bastardize pay radio too. Too bad Mays & Co (Clear =
Channel owners) are too inbred with the Bush administration to be =
subject to any antitrust action. At least for a while.

So much for this piece of crap radio service. I'll go back to DX'ing SW =
and the few good MW and FM stations I can get in San Antonio. Anybody =
know a good FM/AM tuner? Denon TU-680NAB perhaps...

XM radio sucks!

Margaret

I have listened intently for audable differences between XM and SIRIUS.
I have BOTH in my car, and I have both at the stereo shop I work at..
EITHER system is hooked up for EASY A/B switching between the two.

Although SIRIUS claims thier SPLEX sounds better and although XM
claims thier system sounds better, I HAVE YET TO HEAR IT!!!

SIRIUS claims thier three sats are better than XMs two!
XM clains the 2 GEO STATIONARY birds are better cause they dont duck
behind the horizon! I cant tell the difference by listening!!

> If you're so damn
> interested, quit screwing around and post your own review instead of wasting
> everyone's time trying to pick mine apart. Jeez.

I am !! I am!!
My findings have been posted time after time....
I find no significant differences other than the programming! Some folks like

Sirius programing, some folks (appearantly most folks) like XM programing!

My facts can be backed up... I dont have claims based on my magic
decibel meter that cant be duplicated... ;-)

> Do you work for XM?

If I did would I say?
* Sorry to bust your chops, but my SIRIUS sounds great and my

Just because the answers were not the answer YOU WANTED
does not mean the answers were WRONG..!!
I didnt see ANY wrong answers...
The way you worded the question was not too precise in the first place,
if you noticed in my response I gave you TWO correct answeres and then
asked if thats the ones your looking for! You didnt bother to be more
precise in your question so all you got were very general BUT CORRECT
answers....

Kinda like asking if the SKY IS BLUE but the answer you want
is the precise composition and percentages of atmospheric gasses
that make up the blue hue of the atmosphere of the earth at 2100
UTC on Sept 24th measured from a certain mountaintop in UTAH...

Then you act like WERE STUPID!!!?????

ha ha ha ha....

I've been asked to find out how much it costs to advertise on network radio shows, ie, Limbaugh, Dr. Laura, Michael Savage, etc.

Before I call the syndicators, a ballpark number would be helpful. Is anyone aware of how network commercial costs are computed using some kind of ratio that may be determined by how many millions of people may be listening at any given time. In other words, is there a formula for coming up with how much you can expect to pay based on how many listeners are delivered by these shows?

Your help and knowledge is greatly appreciated! BD

Not quite right either.

A dB is a power ratio, not a measure of power itself. It is _not_ a voltage
ratio under any conditions. The 20log voltage representation of dB assumes
that both voltages are measured
[P= E^2 / R] in the same-impedance circuit - so it's really a power ratio.

dBm is power relative to one milliwatt. Impedance isn't involved. A
milliwatt is a milliwatt.

Your confusion is probably that old moving needle VU/dB meters were really
voltmeters, and only read correct dBm when measuring the voltage in a
600-ohm circuit.

Bob C.
Leaving no nit unpicked.

Good, it's the AM band ones that screw you up, taking away access
tp this-or-that worthwhile program from a distant city in favor of
a continuous political advertisement for the highway department budget.

There's a very subtle thing called Orwell's Inversion, noticed by
John Gall (_Systemantics_) long ago, quote

2. Orwell's Inversion.
The confusion of Input and Output.

Example. A giant program to Conquer Cancer is begun.
At the end of five years, cancer has not been conquered,
but one thousand research papers have been published.
In addition, one million copies of a pamphlet entitled
` `You and the War Against Cancer'' have been distributed.
Those publications will absolutely be regarded as Output
rather than Input.

Likewise, the radio stations will be regarded as output.

From: Mike Terry <miketerry@ukrivals.net>
Message-ID: <b94072$61u$1@xuxa.iecc.com>
Source record: 8297

The Summer 2003 edition of Broadcasts in English is now available from the British DX Club. It was compiled by Alan Pennington and includes details of all currently known international broadcasts in English on shortwave and mediumwave for the Summer A03 schedule period. It is in time order throughout and covers all target areas. Transmitter sites are listed where known. A comprehensive guide to DX and Media Programmes is also included plus schedules for WorldSpace and World Radio Network for Europe.

Copies are available at the following prices (postage included):

United Kingdom - 2 pounds sterling
Europe - 5 International Reply Coupons; 5 Euros or 4 US Dollars
Rest of the World - 6 International Reply Coupons or 5 US Dollars

UK cheques/Postal Orders should be made payable to British DX Club.
Payments in Dollars or Euros are only accepted in cash.

All orders/enquiries to:
British DX Club, 126 Bargery Road, Catford, London SE6 2LR, UK

Or visit web site www.bdxc.org.uk

769. DJ LIST FOR 1970'S IN PENNSYLVANIA

Newsgroup: rec.radio.broadcasting
Date: 2003-05-04 21:20:36 UTC
From: Husurdadee@aol.com
Message-ID: <b94074$62n$1@xuxa.iecc.com>
Source record: 8298

I was wondering if anyone knows if there is a list of the DJ'S that were broadcasting from Pennsylvania in the 1970's? If there is a list where would it be available? I have been trying to find some of the old jock's and with all the station and handle names it is so hard without list or picking brains who are not so good for the picking now a days. I am included in the later. Please let me know. Also, does anyone remember who the dj's were in the Bedford/Everett PA area in the mid 70's?

Thanks
Becky

770. Looking for Ken Williams DJ WILLIAMS WCRO/WGLU Johnstown, pa

Newsgroup: rec.radio.broadcasting
Date: 2003-05-04 21:20:38 UTC
From: Husurdadee@aol.com
Message-ID: <b94076$636$1@xuxa.iecc.com>
Source record: 8202

Does anyone out there have any information on Ken Williams who was a DJ in the years 1975-78 in Johnstown, Pa? He started at WCRO and moved to WGLU in Johnstown, PA. There is a group of us looking for old Johnstown, PA DJ'S for a possible reunion. Also looking for Sister Lori Love, DJ Dana (Mary Ann Verovstik) I think she may be in Atlanta, GA, Jim DiAngelilo (Rev. Jim). We know where Jack Micheals, DJ Kelly, and few others are. Any help with this would be great. Would love to set up a spin night reunion.

Thanks

Becky

Your opinion is definitely in the minority and petty to say the least. Every reviewer of XM I've read basically loves it. I love it. Worth every penny of the $90 I paid for the receiver and $10 per month for the service. It beats AM and FM broadcast all to hell...

Agreed
I like my TX9500 and my DX-398 but SW is getting a little to religious for
me LOL
$10 a month is what i pay to stay in several CD borrowing libraries, a
better value in my opinion.
I just spent $5 at my goodwill to get a box of 100 Lp's mostly trash i
agree, but better waste of time and money than subscription radio.

By the way, I have spent some time in San Antonio, nice place to be, I want
to retire to Texas someday and get a big 'ol cattle ranch, with no cows!

Fun

He probably assumed that you (1) had an RF modulator to connect your XM receiver to a car FM radio -- those often have their output at 89.1 MHz -- and (2) were still tuned to a local FM station, not the RF modulator signal.

Depends on where you live. If CC controls radio in your city, as it does in so many areas, crap is what you get. Of course, most of the content on XM is on AM/FM somewhere.

Why you'd want to support CC by signing up with their XM product (admittedly, they don't own ALL of XM, but still) doesn't make sense to me. I try to avoid everything CC. Their hourly commercial count and other business practices are very anti-consumer.

XM needs better programming (I don't need more channels; but considering AM/FM has at least 40-50 in most areas; maybe that too) to get my $10, and they REALLY need to stop taping/voicetracking stuff as does AM/FM. It sounds BORING. My opinion.

I may have a list of some of us buried in a carton in a closet. You might want to root around the Penn State website to find alumni veterans of WHR and WDFM who went on to stations elsewhere, as many stepped through stations in the area -- especially Altoona and also through Cary Simpson's Allegheny Mountain network (WGMR, WTRN, WBLF, WKBI, WEND, WNBT etc). Cary is still active in broadcasting -- you might contact him through the WTRN website. I think he knows everyone who worked in broadcasting in the entire commonwealth from the early 1950s on <g>.

I've read the reviews, too; the comments printed are bought and paid
for.

The minority opinion is that of the defensive XM subscribers, still
trying to justify the waste of money. Anyone with any sense doesn't
bother with pay radio! Who wants to listen to consultant-selected
music in "near CD quality" (with all the compression artifacts) when
they can play any music they want and have true CD quality?

OTOH, Margaret should lose the html for posting on UseNet, and this
has nothing to do with shortwave radio.

According to http://www.xmradio.com/skyfi/ , this is a possible mode of
operation.

I wonder what mode of operation is actually being used.

Interesting. I'd certainly like to know what it is specifically that
you like about XM as compared to AM/FM. Based on what I've read about
direct satellite broadcasting, it would not seem to offer much to me
to justify its expense. What am I missing?

BTW, is the data stream a proprietary digital protocol, or is it mp3?

The McDonald's argument. It may be pap, but you get the same pap all over the US, whether there are local radio stations or not. There are lots of places in the Midwest and great lakes region where reception options get thin.

(1) The benefits of satellite transmission. If you live in cities like San Diego, mobile terrestrial audio reception is for crap because there is no such thing as line-of-sight or anything vaguely like it that works all over San Diego county. This is violently different than what happens in say, Wayne county MI where terrestrial line-of-sight is reasonably universal. OTOH as far south as San Diego, you have line-of-sight to equatorial satellites at a fairly steep incline all over the place. Again, it's the opposite of what it is as far north as Detroit. Pacific Northwest? Could be iffy.

(2) The benefits of diversity transmission and reception. XM satellite transmission can be augmented with multiple terrestrial transmitters. Whether or not XM is satellite or terrestrial where you live is transparent to you. It just works.

http://www.codingtechnologies.com/news/assets/20020418_XMradio_eng.pdf

"XM is able to deliver its superior sound quality coast-to-coast by using two of the most powerful commercial satellites ever built, augmented by a nationwide network of more than 800 repeaters in 70 cities,the most extensive SDARS repeater network available."

> BTW, is the data stream a proprietary digital protocol, or is it mp3?

It's very proprietary and enciphered, but somewhat based on AAC. All 100 or so stereo programs appear to be more-or-less interleaved in the data stream. More detail in the reference, above.

Body handling: HTML body converted to readable text

No, you won't find a lot of what XM plays on your local FM airwaves. There's 100 channels, over 40 of which are 100% commercial Free. The idea is laughable! I've been exposed to more new music in the last year with my XM systems than I have in the last 10 years listening to FM. In particular, I love the World Music channel, the decades channels, and all the good rock channels. Plus radio theater, detective stories from Imagination Theater in Seattle (Harry nile and Sherlock Holmes) and uncesored comedy.

Clear Channel is an investor, yes. But GM is the majority shareholder, not Clear Channel. Furthermore, Clear Channel's main involvement in XM (just like Inifinity is involved in Sirius) is to provide content. THe Bill Handle Show, John and Ken Show, Phil Hendrie, Bruce Williams, Coast to Coast AM etc...all Clear Channel content.

Why would XM provide crappy service and content when the customer's alternative is free FM? The answer? They don't. You were confused when he told you to tune to 89.1. I deal with idiot computer users like you all the time who don't know what question to ask and how to ask it, hell, most of the time, they can't even define the problem.

http://arstechnica.com/reviews/02q2/xmradio/xm-radio-1.html Check out my review here on Satellite Radio, written last summer.

No, you won't find a lot of what XM plays on your local FM airwaves. There's 100 channels, over 40 of which are 100% commercial Free. The idea is laughable! I've been exposed to more new music in the last year with my XM systems than I have in the last 10 years listening to FM. In particular, I love the World Music channel, the decades channels, and all the good rock channels. Plus radio theater, detective stories from Imagination Theater in Seattle (Harry nile and Sherlock Holmes) and uncesored comedy.

Clear Channel is an investor, yes. But GM is the majority shareholder, not Clear Channel. Furthermore, Clear Channel's main involvement in XM (just like Inifinity is involved in Sirius) is to provide content. THe Bill Handle Show, John and Ken Show, Phil Hendrie, Bruce Williams, Coast to Coast AM etc...all Clear Channel content.

http://arstechnica.com/reviews/02q2/xmradio/xm-radio-1.html Check out my review here on Satellite Radio, written last summer.

BUT SARGE, you said all the guys that
answered "can't answer what a decibel is."

I say THEY DID!
THEY WERE RIGHT!!!

If you had payed a bit of attention back in elementary school
you might have noticed that when your teacher showed you
the DICTIONARY that many words have SEVERAL
DEFINITIONS!!

And just cause it was not the answer YOU WANTED
does not make them wrong!

You must be new here if you think I have thin skin.
http://www.teamrocs.com/crap/newbie.htm
Are you new here???

I been here pissin folks off with facts since 1994 or so...ha ha ha

Keep em comin, I dont even have a killfile!

For a long time I did laboratory instrumentation consulting and building special instruments. In a large percentage of cases my job was trying to define the problem. Once their problem was defined, many people could solve it themselves. My customers were lab-type PhD physicists and chemists, but that didn't mean they could define an instrumentation problem.

Got the Jensen SR2000 hooked up to a FM modulator and cover all the FM radios in my house and most of my neighborhood with any channel I select. Most of young people enjoy Sirius channel 66 The beat. Hooking it up was simple. Just be sure to place the Sirius antenna on at least a 2ft x 2ft sheet of metal (which acts as a ground plane) and mount it facing the southern sky.

Why should a Sirius antenna "face the southern sky"? One of the satellites
is over northern Hudson's Bay when the other active sat is either over the
southern Caribbean or off the SW coast of Mexico.

Four hours later both active Sirius satellites are colocated over the
Dakotas. The third is over southern South America at that time [and turned
off].

I'd say there is __NO__ preferred direction to point a Sirius antenna.

There is probably a shortwave group that will give you a better answer. Try Groups.Google.com .

Remember that the DSP is done at 12 kHz. This means that the RX-320 doesn't excel at its widest IF/audio bandwidth. Of course it doesn't have FM.

That said, I think it's an amazing radio. Ten-Tec believes in being open about their products, so you can get various 3rd-party control programs in to addition the one Ten-Tec supplies.

You can now send your old RX-320 to Ten-Tec and they will bring out the 12 kHz IF. Feed this into a sound card and run s/w now available and you have a DRM receiver. IIRC, they charge $50 for this mod.

None of the other radios you mention will do DRM.

If you don't need portability, I'd guess the RX-320 is far better than the YB-400.

The R-390 is large and a bit clunky. The commercial Collins radios of that period weren't wonderful in respect to spurious responses. And you can spend a Big Bundle on IF filters for the 390. The 390 may be more sensitive than the TenTec above 20 or so MHz.

I don't know anything concrete about the 525.

FOR THE MONEY, the RX-320 is outstanding. They also sell a radio which is essentially a 320 with a front panel.

801. How did local radio performing during the tornado outbreak?

Newsgroup: rec.radio.broadcasting
Date: 2003-05-06 17:07:18 UTC
From: "Jay \"Boogieman\" Edwards" <boogie350@NOSPAMyahoo.com>
Message-ID: <b98q46$6c1$1@xuxa.iecc.com>
Source record: 8230

I'm curious to hear how local radio stations did in their coverage of this devastating outbreak. It came to mind last night, "how the heck are these people getting critical information on life threatening weather situations if CC, etc., has no staffs at these stations"?

I think if there are enough failures, (such as CC stations sitting in normal programming) we may be able to bombard the FCC and demand that they limit corporate ownership or mandate local programming guidelines.

I think if CC, etc. can own all these stations, they should at least SERVE and INFORM their communities during times such as this. Sitting on the bird while a tornado rips the county apart is inexcusable and that should be grounds for revocation of the license, IMO.

Wake up Paul,

IT IS A FACT
THAT I CANNOT TELL THE DIFFERENCE BY LISTENING!
(in an A/B test)

It may also be my opinion they sound the same, but that doesnt
change the FACT that I CANT TELL THE DIFFERENCE BY
LISTENING!

Geez,
get the dictionary out man!!!
Words MEAN something, and for your proper understanding of what the words
could mean it is important that you pay attention to them and realize that even
in
a dictionary there could be several meanings.... FACTS and OPINIONS both
have wonderfull meanings, and just because I used one does not mean I did not
use another! A sentence or paragraph CAN HAVE my opinion and ALSO
state some FACTS!

I would rather argue the techical aspects of the SIRIUS vs XM as this thread is

titled, than the elementary school crap that some of you guys scrape off the
bottom of the barrel cause thats ALL YA GOT!!!

While you and I may be near a coast, not everyone has an "opposite" coast.

The southeastern Caribbean is _east_ of much of the US east coast, thus you wouldn't want to aim west. The eastern Caribbean islands are directly south of Nova Scotia and Bermuda. That is where each active Sirius sat is located once in its orbit.

Since the elevation angle of the active Sirius sats is always above 45 deg, _up_ still seems to be the best way to aim for them.

Find a radio ham who is interested in the ham satellites and who has a copy of the NOVA software. Plug in the Sirius orbital elements. It's quite revealing.

I imagine in that trail of destruction that the power grid took one *hell*
of a beating just from the storm gusts and lightning alone, not to mention
the damage by tornadoes. I'd think there are many, many miles of lines
down. All of the videos I've seen show really bad damage, and a hell of a
lot of it.

That's a good point for generators. It used to be that even many smaller
stations had generators, but I don't know if that's true or not. At least
most medium to large stations I worked at did and a couple small ones did
as well.

In that kind of scenario, there are a lot of reasons to want local coverage
in your community:

-Informing the community of the extent of damage
-Inform then of dangerous conditions, such as gas leaks
-Spread the word of where people's help might be needed
-Keep the community abreast of any additional weather threats

I would also think that if the town's radio station is down, being able to
throw a 1 watt FM on the air simply to maintain communication with the
public without fear of imprisonment would be a nice thought as well.

I have to say that a portable scanner is far better than a regular radio
for keeping ahead of the storm and abreast of the situation. Its a pity
that everyone doesn't own one though.

>I think if there are enough failures, (such as CC stations sitting in normal programming) we may be able to bombard the FCC and demand that they limit corporate ownership or mandate local programming guidelines.<

As has been posted before on this newsgroup, to the point where it's really getting old, the FCC is not the culprit. Ownership limits are set by Congress. As for programming, there's that pesky little thing known as the First Amendment that would get in the way.

>Sitting on the bird while a tornado rips the county apart is inexcusable and that should be grounds for revocation of the license, IMO.<

Yes, it's inexcusable...but *if it's true,* NO FCC rules have been violated. If you want to stop this, petition the FCC to get its rules changed...which will happen, in this particular case, when pigs fly.

EAS was designed from the get-go to be implemented at unattended stations, and if the stations so desired, and were actually on the air during the tornados, they could have automatically rebroadcast tornado warnings without any human intervention. Doing so is not rocket science.

Amazing how much time is taken up here by people getting angry about something that may not have taken place. But, then, we expect nothing less from the hate-Clear-Channel-at-all-costs crowd.

That doesn't mean others couldn't tell the difference. It is your opinion. Someone else could listen to the same thing and hear something different. Your hearing is not the the standard of measurement for all of humanity. I am awake!

Generally tornado tragedies, in addition to being great entertainment,
produce documentary evidence for another increase in NOAA's budget.

And of course bright-eyed and bushy-tailed radio types are out with
the herd thinking how important they are, if only people would notice.

It makes you long for the good old days, when the weekly paper
headlined the situation ``That Was a Good One!'' when it came out
again.

That was back when news was news.

Paul Jensen wrote:

> That doesn't mean others couldn't tell the difference.

How true...
However, I have been in the audio biz for nearly 30 years
and have had my share of setting up A/B tests...
I woud bet that most of the folks out there would not be able to tell if I cant
tell... ;-)

Of course I would encourage you to try! ya never know....

In fact, the whole point of my getting involved in this thread in the first
place
was to encourage folks to LISTEN and form thier own judgements on
which system is better for them! And not believe the idiots that say
(with no A/B comparisons) that one sounds better than the other!

Too many folks buy an XM and blindly clain it sounds better!
Too many folks buy a SIRIUS and blindly claim it sounds better!
Too few folks have the opportunity to compare both!

> It is your opinion.

No, its FACT that I cannot tell the sound quality difference by listening
in my own vehicle or our store display while switching back and fourth
from Sirius to XM.... It is FACT that other folks have experienced the
same thing on my system and our store display as well.

IT IS MY OPINION, that most folks that have not already listened to
my vehicle or the store systems would not be able to point out a significant
difference either.... You welcome to come take a listen though! ;-)

> Someone else could listen to the same thing and hear something different.

Could be, Maybe! nothings impossible ya know! ;-)
But would you wanna bet???

> Your hearing is not the the standard of measurement for all of humanity.

No, but it is the standard for ME.... Just as yours is the reference for
yourself.

> I am awake!

Yes Paul, this time your statements are much better than before...

I work for 6 CC stations, and that is the rule. After 6PM all are "empty morgues"! Totally pitiful situation too. The bottom line is ALL they care about. We had dead air many times, because snow on the sat dish! They may say they care, but they don't. The monthly billing is ALL they care about.

Personally, I have no idea. I used TV. And the automatic NWS weather
radio. Everyone should have one of the new SAME radios, the ones that
key on the EAS data bursts and go off only for those counties you program.

I'm not in the habit of using radio for local information. I find the
one-sided politics of the commercial talk stations offensive, and can't
stand to listen for more than a few seconds. It's not at all impossible
that they actually did a very good job on the weather. (it's also not
at all impossible they did a very bad job..)

The NPR station doesn't have much local news presence. I do listen to
music stations but they're pretty much useless for severe weather info.

Disclaimer: I work for a TV station.

>No, its FACT that I cannot tell the sound quality difference by listening
>in my own vehicle or our store display while switching back and fourth
>from Sirius to XM....

I did my comparison in what is probably the worst place in the world to judge audio: a Wal Mart store. Even there, I could tell a difference. Both receivers were connected to identical Pioneer receivers, and they used the same speakers. I checked to make sure the EQ settings were the same on both receivers. My conclusion was the Sirius sounded a bit better, but it had a terrible user interface. The Sirius unit I listened to had a hand held device that looked like a CB radio mic. It was very slow to respond to changes. The XM Delphi receiver was very nice to use with a good user interface. It would be much easier todeal with at 70 mph.

The XM unit sounded OK, but I preferred the sound of the Sirius receiver. Of course there was no way to do a direct A-B comparison with the same music playing on both units, so my observation, like all other ones is subjective.

I admit that Sirius had more programming that interested me than XM which seemed to be more in line with programming I can already get for free off the air. I guess my musical tastes are not entirely mainstream.

Regardless of sound quality, I really haven't had the urge to buy either one.

816. No FM Radio inside building

Newsgroup: rec.radio.broadcasting
Date: 2003-05-07 21:06:19 UTC
From: chris@chriswilliams.net
Message-ID: <b9bsgb$3ro$1@xuxa.iecc.com>
Source record: 8243

Hi. I get 1 FM radio station where I work. The building I work in a very large even though it is only 1 story high. Many of us have radios at our desks, but we only pull in 1 FM radio station. We really don't care about the AM stations, but would rather have more of a selection of FM stations, there are many out there if you are in the car.

Since we don't get any other stations, my question is, are there any options out there to rebroadcast the FM radio signals from outside to smaller transmitters inside the building. I don't think the company would go for large antennas on everyone's desk, so I am looking for a small "gadget" that would work for everyone. Anyone have any ideas?

Thanks,
Chris

Some stations I've heard really make me wonder just *who* is allegedly the target listening audience. I sure wouldn't listen to it, and can't think of many who *would*. Now that's messed up.

> The NPR station doesn't have much local news presence. I do listen to

> info.

That's always been the case pretty much. Public stations have pretty much always been notoriously dependant on network programming.

In our area, we have WWJ, which is great for breaking news and weather, but most of the local radio stations are behind by ten minutes. The AM's are all on birds and 1/2 the FM's are VT'ed. Fortunately, we still have a few live stations with coverage relevant to the area. But I know, in the heartland especially, this is not the case. Most local stations there have been scarfed up by large corporations and are now running unattended.

It can be aruged that EAS will automatically break in, corporate can switch to local TV audio, etc., but that assumes everything is working correctly. A human can always improvise around malfuntions and such, but a relay clicks the same whether there's a source feeding it or not.

I'm starting to really understand the pirate radio movement more than ever. It's a waste that most LPFM's are only going to be adding more religion to

the dial, which has plenty now. Most who wanted LPFM licenses have an actual desire to serve their communities, but were turned down in favor of church groups.

> Disclaimer: I work for a TV station.

TV has been the winner over radio for decades IMO. But you'll still find a few stations that are just as useless as unattended radio.

In stuctures built of concrete and steel, the windows are the principal
sources of radio signals from the outside. You need to put your radio
(or its antenna) closer to a window.

The best solution would be a single roof-mounted antenna with a splitter
feeding all the radios. But I've never seen that done anywhere except
at a broadcasting company. Most employers don't value radio reception
at their workplaces highly enough to install such things.

I don't suppose the boss is one of the folks interested in better
reception?

This would be the cheapest and best possibility.
Think about to install a community antenna on the top of this building.

Regards!

Ralf

If someone in your company is technically inclined, you may be able to
use a small low-powered transmitter to rebroadcast the signals from the
outside world within the building. The drawback is that it would only
work with one station at a time, but I suppose you could run multiple
flea-powered transmitters, each one tuned to a local station
unrecievable inside the building.
I remember hearing Rush Limbaugh reading a letter from a listener who
said they had done that so everybody in a building could hear his
program. They called it the "Rush Repeater". Of course he thought it
was cool.
Of course there's always streaming audio from the internet, but I'm
guessing company policy forbids that, with bandwidth issues and all that...

Try a better radio? I've experimented and found an old Casio boombox
that was better than the others. It beat out a GE Superradio and a
Sony table top.

I had some luck with inductively coupling the radio to the phone cord
by wrapping the radio antenna with the phone cord (the Superadio).

I'm amused that you find viewpoints other than those of your own "offensive." But do you find the one-sided politics of ABC News, CBS News, CNN, and NBC News offensive as well? Radio talk shows are generally commentary shows and present themselves as such up front. They make no attempt to hide their bias. These major networks on the other hand, present themselves as "hard news" and objective reporting. Yet such icons as Dan Rather and Peter Jennings frequently inject their own strong bias to their "news". CNN finally admits that it omitted horrifying stories on Iraq for 12 years (even involving its own employees) so that they could stay close to Baghdad to parrot the Hussein regime.

> The NPR station doesn't have much local news presence.

NPR, now there's a true place to find non one-sided politics, lol. All things considered, except conservative. And government funded to broadcast their one-sided politics to boot.

So what you guys are saying is that the public can not depend on radio broadcasts on the AM and FM broadcast bands to deliver a local public service alerts or messages (in this case tornado warnings and results).

So instead the gov uses your tax dollars to expand the NWS network. A local county in my area put up their own network of translators on 14xxkhz AM to cover public alerts because the main AM station only broadcasts in Polish.

My own local AM station only broadcasts in Spanish.

And most of the listening public probably is listening to FM anyhow.

Radio Shack 12-249. Strangely enough, looking for it on the RS website
all I can find are PDF manuals - I have a horrible feeling they've been
stupid enough to discontinue it.

> Some stations I've heard really make me wonder just *who* is allegedly the
> target listening audience. I sure wouldn't listen to it, and can't think of

Oh, I think they have a definite audience in mind. There are plenty of
people listening. There are also plenty of people who fall *outside*
their target audience.

> That's always been the case pretty much. Public stations have pretty much
> always been notoriously dependant on network programming.

Depends on where you are. Wisconsin Public Radio is very effective
locally, but few other states do that well.

> It can be aruged that EAS will automatically break in, corporate can switch
> to local TV audio, etc., but that assumes everything is working correctly.
> A human can always improvise around malfuntions and such, but a relay

Stations are only required to relay RMT (Required Monthly Test), EAN
(we're about to get nuked), and EAT. (OK, we're *not* going to get
nuked) RWT (Required Weekly Test) must be logged. Anything else can be
legally ignored - up to and including TOR. (Tornado Warning)

I know at least one station around here *does* relay the EAS
transmissions for severe weather, but I wouldn't be surprised if it's
only one station.

Now that said, none of the major TV stations relay EAS for weather
either. They all handle weather with their own systems and people, and
do far better than a mere relay of the weather wire could.

Many (though by no means all) of the religious LPFM permittees are local churches. Now whether that means they'll program locally remains to be seen. I would not at all rule out local churches being able to produce quality local programming of interest to all people, not just their members.

There are more than a few that I'm rather suspicious of though.

Really, religious groups simply filed far more LPFM applications. (and secular groups were more likely to file in larger cities, where they tended to get clobbered by the Oxley anti-LPFM bill) The more you file, the more you get...

> TV has been the winner over radio for decades IMO. But you'll still find a

Oh, there are plenty of TV stations that are just as unattended as radio. Here in Nashville I'd only count on the ABC/CBS/NBC affiliates for emergency info. Fox/UPN/WB do crawl weather alerts, and run a credible 9pm newscast on the Fox channel.

Cable is required to pass EAS, and in Nashville passes the weather alerts. Not much but better than nothing...

I'm amused that the myth of a liberal media bias still has legs. In the age where right wing parrots have a near total lock on AM bandwidth (thanks to Premier/Clear Channel - did anyone notice that CC gives tons of payola to Republicans?) - conservatives still whine that their point of view can't be heard over the noise of a supposed liberal media. The signal to noise ratio is decidedly conservative in this country. Since the original poster was talking about his lack of unbiased options *on the radio*, I think you performed some really fancy footwork by refocusing the thread to your perceived bias on television. This isn't a television newsgroup...but I'll take a bite out of the flame bait.

<gets out asbestos napkins>

Television news coverage is demonstrably conservative in presentation. The Faux News Channel is the giant elephant in the room that you failed to mention when you listed supposed liberal news organizations. The Conservative Soundbite Nooz Network is currently kicking CNN's ass in the numbers game and the Murdoch open bias is the rule of law in O'Reilly/Hannity/Snow land. And no, Alan Colmes doesn't even begin to approach "fair and balanced".

NBC has leaned conservative ever since the 2000 election - thanks to the right-handed control of one Mr. Jack Welch. Tim Russert certainly loves to tear into liberals every Sunday morning on Meet The Press - and he throws softballs to every conservative that graces his set. Chris Matthew's Hardball on MSNBC only seems to apply when liberals show.

Over at CNN, most of the real journalist have jumped ship (or been pushed) to make room for those who will to try to "out-bias" Fox. Lou Dobbs and Wolf Blitzer as liberal hacks? Only to the most delusional. The last ray of hope at CNN is their Crossfire program - where Paul Begala and Tucker Carlson duke it out daily. Both hosts get equal time, and the shouting matches are kept to a minimum. Larry King just needs to retire.

CNN and Fox are both guilty of omitting the horrifying images coming out of Iraq *post-conflict*. The devastation and humanitarian catastrophe are simply not being reported; by default placing a pro-war/conservative spin on the news. Only CBS News has had the guts to report on the cholera outbreaks in Iraq due to inadequate clean water and medical services for the "liberated". War is ugly - but the American people only see the victory - thanks to the dominant conservative spin of our news organizations. When the news networks only report about a victorious president, and fail to report on the devastation caused by his decisions, the myth of a liberal media begins to look frighteningly thin.

Sorry Steve (Mr. Excellent Moderator) for providing so much flame fodder. That's certainly not what I had originally intended. In the interest of "balance", whatever that means these days, the lone liberal in the group (am I?) felt the need to point out the bullshit when he smelled it. Now, I've probably stepped in it too. <grin>

Now - let's get back to talking about radio.

Best,

Jeremy Powell

Alerts, no. Messages, yes.

Once they become aware of some danger they'll tune in. If they're not
listening, an alert won't do much good.

Actually, at any point in time most of the public isn't listening to
anything. In a small town, the best alert system is warning sirens and
police cars equipped with PA systems.

In a city like New York I can't imagine a way we could alert the
entire population other than the police and fire departments going
from building to building. By the time they've completed that task
it's probably too late.

I suppose a lot depends on where you were.

I'm only aware of one Nashville-area station that's been off the air during the severe weather. (so far... as my NOAA radio just went off again for a tornado watch...) Actually it lost its STL.

Two stations in Jackson reportedly lost their tower. Pretty good excuse for being off the air awhile! (I've seen that tower, it's pretty stout. On the other hand, it's also only about a mile from downtown, where you probably saw all that devastation on TV.)

One upside for consolidation... if severe weather wipes "NewsTalk 1710" off the air, they could far more quickly get their information programming back on the air on co-owned "Kiss 97.6" than on someone else's CHR outlet. Backup transmitter/tower/antenna sites can be shared among a group cluster.

> I'm amused that you find viewpoints other than those of your own "offensive."

There's a difference between respectful disagreement (as, for example, you might see when representatives of the two parties appear on "Face The Nation" or similar programs) and offensive one-sided propagandizing. (such as Rush's - or worse, G. Gordon's - shows)

I'm not suggesting these programs shouldn't be on the air. What I'm saying is that I don't like them, and I'm not going to listen to them.

I don't like country music either, so I don't listen to WSM. Doesn't mean I think WSM should lose its license. It does mean I'm not going to get my news from AM 650.

You apparently accept the suggestion of left-wing bias in the major media as fact. I don't. Most people to the left of my positions believe ABC/CBS/CNN/NBC are controlled by their rich owners Disney/Viacom/TW/GE and are biased in favor of the *right*.

It's hard to admit one's wrong on an issue, or one's favorite politician is wrong, or even to admit that one disagrees with a significant proportion of the population. It's a lot easier to believe the media is reporting it inaccurately.

And sometimes you'd be right. As a business, the media must appeal to an audience. They must broadcast what they think their audience wants to hear/see. Research shows Americans want to believe marijuana is dangerous, so you see lots of stories about pot seizures and few about those who argue it's safe for adults. Among plenty of other examples.

> CNN finally admits that it
> omitted horrifying stories on Iraq for 12 years (even involving its own
> employees) so that they could stay close to Baghdad to parrot the Hussein
> regime.

This was certainly a serious lapse in judgement. When you've been praised to high heaven for your reporting from Baghdad in Gulf War I, you tend to be very careful to ensure your ability to repeat your work in case of Gulf War II. In this case it led to a mistake. A big one.

> NPR, now there's a true place to find non one-sided politics, lol. All things
> considered, except conservative.

Again, I don't buy this. I hear plenty of representatives of the right
on NPR. Just because they're the only place that gives any voice to the
left doesn't make them one-sided.

As long as commercial stations only present one side, *someone* has to
present the other. Actually, I believe we should indeed eliminate the
subsidy to NPR from the general fund.

It should, instead, be financed by a tax on commercial broadcasters.

This is all backwards. The assumption is that the authorities know something and it has to be relayed to eager and fit consuming public.

The truth is the other way. I _often_ have things to relay to the authorities, they _never_ have anything to relay to me. The speakers ought to be inside administrative offices, and there ought to be a microphone outside. That's the correct public service model.

Orwell went into this current complete inversion and how it gets started.

We don't want to hear from the authorities. Thanks anyway, stuff it.

That's what I'm trying to determine - has the consolidation of radio (both AM & FM) created a situation where it is no longer worth bothering with in an emergency. Does not every "preparedness" agency ask you have a battery-powered radio and batteries handy in emergencies such as a tornado? If the only thing coming in on that radio is canned programming, why bother? Put a battery powered VHF scanner in there instead.

> So instead the gov uses your tax dollars to expand the NWS network. A
> local county in my area put up their own network of translators on
> 14xxkhz AM to cover public alerts because the main AM station only
> broadcasts in Polish.

Also, I see the LPFM and microbroadcasting stations as possibly being more of an asset in a local emergency. We're considering doing just that here, using small part 15 transmitters to cover the two neighboring apartment complexes.

> My own local AM station only broadcasts in Spanish.
>
> And most of the listening public probably is listening to FM anyhow.

FM can be "canned" just as easily as AM though.

[Moderator's note: And often is...]

TWC has an irritating "alarm clock" beep tone when they pass EAS stuff.
It's about 30dB over the program level and could wake a dead man.

| I'm amused that you find viewpoints other than those of your own "offensive."

I'm not a fascist but I find fascist viewpoints quite offensive.
If you're not a fascist, I guess you would find concentration
camps to be merely "amusing".

| NPR, now there's a true place to find non one-sided politics, lol. All things
| considered, except conservative. And government funded to broadcast their
| one-sided politics to boot.

Oh, great, another sock puppet in the "if it isn't broadcasting
what I want to hear, it's one-sided liberal bias" chorus.

The networks have their problems but, if anything, they tend to be
biased toward whomever is in power at the moment.

There is no such thing as a liberal news channel or network, but
conservatives have plenty of electronic outlets these days: Faux
"News", Christian Broadcasting Network, numerous radio talk shows,
and so forth. Liberal voices have been drowned out and moderate
voices are in danger of same. It's beginning to resemble the latter
days of the Weimar Republic.

Amateur Radio Newsline™ Report 1342 - May 2, 2003

Amateur Radio Newsline report number 1342 with a release date of Friday, May 2 2003 to follow in 5-4-3-2-1.

The following is a Q-S-T. An all ham crew takes over the International Space Station, another new record on 136 Kilohertz and the FCC asks the Amateur Auxiliary to help clean up the 10 meter band. Find out more on Amateur Radio Newsline report number 1342 coming your way right now.

(Billboard Cart Here)

**

HAM RADIO IN SPACE: TWO-MAN EXPEDITION 7 HAM RADIO CREW ARRIVES AT ISS

A two ham Expedition 7 crew arrived at the International Space Station on April 28th to replace the crew currently on board. Amateur Radio Newsline's Roy Neal, K6DUE, has the rest of the story:

- -

There are five men in the crew aboard the International Space Station. Those numbers ARE different. Now that U S Space Shuttles are temporarily out of commission, the Russian Soyuz has been pressed into service as a ferry. Much of its space is filled with food and supplies and the crew size has been cut from 3 down to 2 for the time being.

Two men...cosmonaut Yuri Malenchenko, RK3DUP and astronaut Ed Lu, KC5WKJ, have arrived....the first teamever to get to the I S S aboard a Russian spacecraft. They will replace 3 men...Commander Ken Bowersox, KD5JBP, Don Pettit, KD5MDT, and Nikolai Budarin, RV3FB. That team is scheduled to fly back to earth on the third of May, using a Soyuz that has been docked in orbit since the Columbia shuttle disintegrated killing all seven people on board.

A NASA investigation apppears to be centering on a piece of foam insulation as the cause of disaster...foam that broke loose during liftoff, hitting the Shuttle's left wing.

A final report on the accident may be several more months in coming. Until then Russia's Soyuz is the only crew transport to and from the i s s and the International Space Program has slowed to a mere trickle of its former self. Space officials of the 9 countries directly concerned with building and flying the shuttle are optimistic, saying the delay gives them time better to prepare for the very complex missions of the next ten years.

Roy Neal, K6DUE

--

The two man Expedition 7 crew will spend the next six months on-orbit conducting scientific experiments. Because of the reduced workload they may also have more time for additional ham radio operations and especially school contacts from space. (ARNewsline™ from published reports)

**

ENFORCEMENT: AMATEUR AUXILIARY ASKED TO ASSIST FCC IN 10 METER CLEAN-UP

Back on Mother Earth, the FCC has asked the assistance of the ARRL' s Amateur Auxiliary as part of a clean-up of illegal users of the 10 meter band. In a memorandum issued on April 28th, FCC Special Counsel Riley Hollingsworth, K4ZDH, asks the Auxiliary's help for the next 6 months in identifying any unlicensed operation using the 10 meter Amateur spectrum.

>From May through October Auxiliary members will be tasked with monitoring the band to determine whether interlopers are domestic business entities. This includes trucking companies, truckers or other individuals who are not licensed to be in the band or simply not licensed at all.

The FCC is not requesting that Auxiliary members provide direction finding. Hollingsworth does ask that where possible that Auxiliary members provide the names and cities of the operators, and license plate numbers and state if the interfering signal is coming from a vehicle.

The project has been assigned case number 2003-583 and Hollingsworth does ask Auxiliary members to use their best judgment as to whether to include tape recordings of what they monitor. Authority to use the ham radio volunteers in this investigation comes under the terms of long standing agreement between the FCC's Field Operations Bureau and the American Radio Relay League. (FCC)

**

ENFORCEMENT: 11 METER OPERATION BRINGS FCC WRATH TO IDAHO HAMS

Meantime, the FCC has let a trio of Idaho amateurs know that unlicensed operation outside Amateur Radio frequencies could lead to revocation of their ham tickets. Bruce Tennant, K6PZW, has more:

--
The ARRL Letter reports that FCC Special Counsel Riley Hollingsworth, K4ZDH, recently wrote three Boise amateurs, citing allegations that they had transmitted without a license on several frequencies near the 11 meter Blass D CB band.

Letters went out March 17 to Dave Every, KD7QAS; John F. Hail, KD7QAW; and Tom M. Sjoberg, KD7RCS. Every holds a General ticket, while Hail and Sjoberg are Technician licensees.

According to Hollingsworth, the Commission has information indicating that the three hams transmitted without a license on 26.350, 27.420 and 27.700 MHz using SSB and SSTV. These three frequencies involved are above and

below the 11 meter Citizens Radio Band.

Hollingsworth letter pointed out that in addition to the possibility of license revocation proceedings being undertaken, fines for unlicensed operation could also be imposed. These normally range from $7500 to $10,000.

For the Amateur Radio Newslione, I'm Bruce Tennant, K6PZW, reporting.

--

Hollingsworth says he understands that the unlicensed operations have ceased. (ARRL)

**

ENFORCEMENT: KANSAS STATION OWNER FINED

The FCC has fined Maria L. Salazar, licensee of Station KTCM - FM in Kingman, Kansas, and owner of an antenna structure near Spivey, Kansas, thirty-nine thousand dollars. This, for what the Commission says are willful and repeated violations of the Communications Act and of the Commission's Rules. Amateur Radio Newsline's Bill Pasternak, WA6ITF, has the details:

--
Specifically, the regulatory agency says that Maria L. Salazar operated a radio station from an unauthorized location and that she failed to maintain prescribed obstruction lighting on an antenna structure. But thats not all. Te FCC says that she also failed to install and maintain Emergency Alert System equipment at the station, failed to maintain a main studio at an authorized location and failed to maintain a public inspection file.

By way of background, on July 18, 2002, the Commission issued a Notice of Apparent Liability for Forfeiture -- better known as a fine -- in the amount of $39,000 to Salazar. Although she received a copy of the N-A-L, she never filed a response. So the FCC has now affirmed the fine and ordered Salizar to -- pay up.

For the Amateur Radio Newsline, Bill Pasternak, WA6ITF.

--

The FCC has instructed its Enforcement Bureau to do a follow-up investigation to determine whether Salazar has come into compliance. If not, further enforcement action will be taken. That could include the possibility of a license revocation proceeding. (FCC)

**

(5 sec pause here)

**

FCC BEGINS INQUIRY REGARDING BROADBAND OVER POWER LINES

The FCC has also launched an inquiry into the use of existing power lines to send and receive broadband data by carrier current as some old timers might call it.

According to Bob Gonsett's CGC Communicator, two different Broadband over Power Line or B-P-L techniques are being considered. "Access B-P-L" uses 1,000 to 40,000 volt power lines to bring Internet and other broadband data to homes and offices. "In-House B-P-L" uses existing electric utility wiring to network computers and printers - as well as smart appliances - within a building.

CGC notes that today's chip sets for this application are capable of generating RF out to at least 80 MHz using advanced modulation techniques and high data rates. The question of radio frequency interference to authorized spectrum users including Amateur Radio will be an important consideration as these systems are looked at by the FCC.

More is at the FCC's website at:
http://hraunfoss.fcc.gov/edocs_public/attachmatch/DOC-233537A1.doc
and http://hraunfoss.fcc.gov/edocs_public/attachmatch/FCC-03-100A1.doc
(CGC Communicator)

**

HAM RADIO TESTING: NCVEC REMOVES PSK31 QUESTION FROM POOL

The NCVEC Question Pool Committee has withdrawn the use of a test question has in the Technician pool scheduled for use starting July 1st. The querstion designated number T2B17 deals with PSK-31 communications technology.

Again, this is for the new Technician class exam that goers into service on July 1st. The committee says that it apologizes for any inconvenience. (NCVEC)

**

RADIO RULES: FCC REFUSES TO EXPAND THE NCE FM BAND

The FCC has declined to expand the Non-Commercial Educational FM or NCE broadcast. This, band beyond its current limits of 88.1 to 91.9 MHz.

Specifically, the FCC says that television Channel 6 which runs from from 82 to 88 MHz will not be used for NCE radio. Nor will the upper end of the current NCE band be expanded to 93.9 Mhz.

That said, the agency has indicated the expansion issue could be revisited in another FCC proceeding. (CGC Communicator)

**

RADIO LAW: CALIFORNIA PRB-1 LIKE LAW ON TRACK

ARRL Southwestern Division Director Art Goddard, W6XD, reports that the California limited antenna structure protection measure passed the state Assembly on a vote of 67 to nothing on April 10th. Writing in the division electronic newsletter, Goddars days that the bill, patterned after the ferderal P R B One, was then sent to the state Senate where it received its first reading. It now awaits assignment to a Senate committee and further action. (ARRL SW Div. Newsletter)

**

HAM RADIO IN CYBERSPACE: MIZUHO WEBSITE BACK UP

KU4QD says over the VHF Reflector that the unofficial English language Mizuho website is back up. This site is dedicated to Mizuho built ham radio gear and contains a wealth of reference material that's hard to find anywhere else.

For those of you who don't know about Mizuho, it is a family run business started by a former Trio engineer over 30 years ago. The company is best known for its HF and VHF SSB and CW monoband handhelds. These were manufactured from 1981 until 2002. The company also made some VHF base and portable SSB/CW rigs.

KU4QD says that some of the manuals and schematics haven't been uploaded yet, but everything else is there, including more new pictures and specs for various Mizuho gear. And , oh yes. You will find the website at www.mizuhoradio.com (VHF Reflector)

**

NAMES IN THE NEWS: K8JE TO SPEAK AT MURRAY STATE UNIVERSITY ARC

ARRL Great Lakes Division Director Jim Weaver, K8JE, will visit the Murray State University Amateur Radio Club at the club's May 6 meeting. Weaver will talk on Amateur Radio today and as it will be in the future and all radio amateurs in western Kentucky are invited. The venue is the Freed Curd Auditorium of the I & T Building on the Murray State campus at 7 p.m. local time. Murray State University is located in Murray Kentuckey. For directions contact Ron Ladd by e-mail to UBX@Webtv.net or visit campus.murraystate.edu/org/msuarc (Via e-mail)

**

CONVENTIONS AND HAMFESTS: COLORADO IN MAY

The 2003 ARRL Rocky Mountain Division Convention is slated for May 30, 31 and June 1st at the Holiday Inn Estes Park Conference Center. League President Jim Haynie, W5JBP, is slated to be the featured speaker at Saturday Night's Banquet. For more information take your web browser to www.hamconcolorado.org (Via e-mail)

**

HAPPENING AT HAMVENTION 2003r - THE AMSAT FORUM

This years Dayton Hamvention AMSAT Forum will place special emphasis on the status of new satellite projects such as Phase III E and the Eagle ham satellites which are currently being designed. The speakers list so far includes Rick Hambly, W2GPS, Bdale Garbee, KB0G and Gould Smith, WA4SXM, to name only a few.

This years AMSAT Forum will be on will be on Saturday, May 17th from 8:15 to 9:45 EDT in HARA Arena Meeting Room 1. The session is always standing room only. More is on the web at http://www.amsat.org/amsat/activities/dayton (AMSAT)

HAPPENING AT HAMVENTION 2003r - THE ANNUAL TOWN MEETING

And Amateur Radio Newsline is again teaming up with the Hamvention to bring you another in its ongoing series of Ham Radio Town Meetings. Ken Lock, N8PJN, has the details:

--

This years topic is how to make Amateur Radio more friendly for kids so that they will stay in the hobby. Our keynote speaker is Mr. Audio himself -- Bob Heil, K9EID. Bob has been a ham since he was a youngster and has some definite ideas on this subject.

Other presenters include New York Educator Carole Perry, WB2MGP, Philadelphia KYW Radio personality Mark Abrams, NT3V and his son - 2002 Young Ham of the Year award recipient Josh Abramowicz, KB3GWY. Josh will cover scouting and its relationship to ham radio youth.

>From Florida Richard Paczkowski, Jr., KF4BIA, will be joining us. Richard was our 1998 Young Ham of the Year award winner. He will talk about ways the Internet can be used to interest kids in the hobby.

Others on the speakers roster are Gary Pearce, KN4AQ, of the ARRL's Public Relations Committee and Keith Glispie, WA6TFD, of Suite Sixteen Post in Burbank California. Glispie is a true Amateur Radio success story that took him from a teenage ham to the co-owner of one of televisions most sought after editing facilities.

Also joining us will be John Creel, WB3GXW, who is the outgoing Chairman of the NCVEC and 2003 Radio Amateur of the Year Larry "Tree" Tyree, N6TR, talking about the ham radio children's holiday he created called Kids Day.

And as always there will be door prizes. This year the goodies include an 2 meter HT courtesy of Alinco and a mini-bom-box AM, FM, Cassette radio from Jensen.

So, please join us at Hamvention 2003 for this special session dedicated to making ham radio a friendlier world for the younger set. Rember, kids are the future of the hobby.

For the Amateur Radio Newsline, I'm Ken Locke, N8PJN.

--

The Ham Radio Town Meeting is from 1 to 3 P.M on Saturday May 17th. The venue is the HARA Arena in Dayton Ohio in meeting room 3. We hope to see you there. (ARNewsline™)

HAM RADIO MOVIES: FIELD DAY `71 - REDUX

Two weeks ago we told you that the famed Palisades Amateur Radio Club movie "Field Day 1971" had surfaced after almost two decades in hiding. Now, Southern California hams can get to see it again on Wednesday evening, May 14th. This, in a special screening hosted by the Santa Clarita Amateur Radio Club and Amateur Radio Newsline.

"Field Day 1971" was produced by George Hively, W6GRH, -- then WA6YEA -- over thirty years ago. His half-hour movie is a tongue-in-cheek look at the way one of the regions most famous radio clubs of the 20th century held forth annually to conquer the vagaries of the Ionesphere while having a jolly old time. Or, was it just having a jolly old time with some radios thrown in as an excuse for a hilltop party? Only this movie knows for sure!

The venue chosen for the screening is the City Council Chambers in the City of Santa Clarita California at 7 p.m. Pacific Daylight time. Talk in will be on the 146.79 W6JW repeater. The repeater uses an access tone is 123.0 Hz.

There is only room for about 190 people, so seating will be first-come, first served, with one expeption. If you are a former Palisades Amateur Radio Club member and want to reserve a seat please e-mail wa6itf@arnewsline.org. For more information on the Santa Clarita Amateur Radio Club and the meeting, take your web browser over to www.w6jw.org and click on the word "announcements." (ARNewsline™)

RADIO RECORDS: FIRST GM TO YU ON 136 KHX

Another new record has been set on 136 Kilohertz. This, as a ham in Scotland contacts his counterpart in Yugoslavia. Jeramy Boot, G4NJH, has more:

--

Simon Lewis, GM4PLM, completed the first Scotland to Yugoslavia LF contact on the 20th of April. At 2228 UTC on Sunday, Simon had a two-way contact

with Teo, YU7AR, on 137.7kHz.

Simon was using equipment left behind by David Bowman, G0MRF, when the UK 73kHz record was broken, as reported on GB2RS two weeks ago.

GM4PLM is currently the only known GM active on the 136kHz band and at present is using a 125-metre long wire antenna. He plans to improve the antenna system over the summer in preparation for trans-Atlantic tests next winter.

Jeramy Boot, G4NJH

--

After completeing the QSO, Lewis paused to thank G0MRF and G3GRO for their help, and for the donation of equipment to allow him to become active on the 136kHz band. (GB2RS)

**

ON THE AIR: SPECIAL EVENT - 58 YEARS SINCE WW-2

On the air, members of the Crimea Contest Club will activate special event station, EO58JM, from the Ukraine between May 5th to the 11th. Their operation is to celebrate the 58 years since World War II. QSL's via KG6AR. (OPDX)

**

ON THE AIR: CELEBRATING SIBERIA

And keep an ear out for special event stations using the call signs UE9OWQ and UE9ORQ to be active between May 10th to the 18th. This to celebrate the 10th anniversary of the Radio Prim Correspondence club in Siberia. The two stations are also expected to be on between June 28th to the 30th for the 110th anniversary of the capital city of Novosibirsk Siberia. For more details and on how to receive a special certificate, visit www.nsk.su/~rpc/eh.htm (OPDX)

**

ON THE AIR: THE OREGON QSO PARTY 2003

The 2003 Oregon QSO Party will take place on Saturday, May 10 beginning at 14:00 UTC. Sponsored by the Central Oregon DX Club, the object is to work stations in Oregon, and for Oregon stations to work the world. For full information select the Oregon QSO Party link on the Central Oregon DX Club web page at www.codxc.org (K2DI)

**

DX

In DX, CT1CPP is active as S92UN from Sao Tome and Principe for the next three months. Suggested frequencies are 14.270, 21.270 and 28. 470 MHz on SSB. QSL as directed on the air.

And thirteen members of the F6KOP club station will be active as TM7R from Groix Island through the 12th of May. The operation will be on the HF, VHF and UHF bands using CW, SSB, PSK 31, RTTY and Slow Scan TV.

Lastly, the visit by Bill Burton, T88BA, to the South-West Island of Palau, scheduled been postponed until next month, The reason: A lack of money for fueling the government ship that was to carry him. (DX via OPDX and GB2RS)

**

THAT FINAL ITEM: TALKING TO A NOT SO SILENT S.K.

And finally this week, have you ever talked with a Silent Key? Believe it or not we have. His name is Ray Ortgiesen, WF1B, and last week he was named as an honored Silent Key by the planners of this years Dayton Hamvention. But as you will hrear, Ray is very much alive, well and and delighting the honor:

--

Ortgiesen: "I'm enjoying it so far. Its been quite a gas to get phone calls and e-mail's from so many people concerned about my health."

--

Why is the not so Silent Key recieving all these health and welfare inquiries? Well, heres the story in a nut-shell.

Back in the 1980's, in the Neanderthal days of home computing, Ray wrote RTTY. This program soon became the leading contest software for computerized radio teletype. And last week the Dayton Hamvention decided to honor him by nameing him as one of a group of Silent Key Award recipients. But Ray as we already know, Ray is still very much among the living and his first chore was letting everyone know he was still here.

--

Ortgeisen: "Its been fun. I did send out some e-mails as soon as I found out that it was publicized. I sent out e-mails on the of the major reflectors grearting them from the other side and leetting them know that I was fine, and obviously there was a mistake made."

--

Mistake or not, Ray is now an official walking, talking and breathing Silent Key. So we asked him if he had any special wish for the future of the hobby:

--

Ortgeisen: "I hope with the coming of digital and especially computerization that we can keep people interested in radio."

--

And as to the award itself? WF1B, had these -- er -- parting words:

--

Ortgeisen: "Its nice to know that folks considered me for this award, and I am happier to know it being alive, than not ever having known this fact had I indeed been a Silent Key."

--

How the mistake nameing Ortgiesen as a Silent Key Award winner is not clear. But no matter. Ray says that he' kind of enjoying the honor of being this years Dayton Hamvention -- not so silent -- "Silent Key." (ARNewsline™)

>mention when you listed supposed liberal news organizations.

True, the Fox News Channel is by far the #1 cable news network, in
part because it is noticeably more conservative than its rivals. But
its audience is only about one-third the size of the third-ranked
evening news on a broadcast network.

>
>Now - let's get back to talking about radio.

In my market, five talk stations have a smaller combined audience than
one music station that employs me. In fact, even the #2 music station
in the market beats all talk radio put together. Lumped all together,
talk radio here is, on average, heard by less than 8% of listeners,.
This is a right wing lock?

I certainly did not say that. The best place for radio weather warnings though would be NOAA weather radio, or if that is not available, a local news radio station. If neither of those are available any station should be broadcasting emergency messages, if there is indeed an emergency. However tornadoes are extremely difficult to predict where they will occur. When they do occur, they are very local and can happen very, very quickly. To get a real time warning of where a tornado is, you need real time information from a person observing the funnel, or real time information from somebody actively watching Doppler weather radar.

> I'm amused that the myth of a liberal media bias still has legs.

This is a worthy discussion. Nowhere above did I allege "liberal media bias", real or myth. However segments of the media certainly ARE biased. As I pointed out, conservative talk radio makes not attempt to hide its bias. Many mainstream "pure" news outlets certainly do.

> In the age where right wing parrots have a near total lock on AM bandwidth
> (thanks to
> Premier/Clear Channel - did anyone notice that CC gives tons of payola to
> Republicans?)

CC gives money to Democrats too. So what? The right to contribute to campaigns and have your voice heard is protected by the First Amendment in the US. It seems that Clear Channel is the new employer du jour to detest.

> - conservatives still whine that their point of view can't be
> heard over the noise of a supposed liberal media.

I certainly wasn't whining about it. The difference today is that conservative voices ARE being heard, albeit not on the CBS Evening News with Dan Rather. Hence the surprise and silly personal attacks by politicians such as Tom Daschle (D-SD) on conservative voices in radio.

> The signal to noise ratio
> is decidedly conservative in this country. Since the original poster was

Introducing the television aspect was important in a discussion of radio, because radio is finally providing an opportunity for voices to be heard that do not tow the traditional liberal line.

> <gets out asbestos napkins>
>
> Television news coverage is demonstrably conservative in presentation. The
> Faux News Channel is the giant elephant in the room that you failed to
> mention when you listed supposed liberal news organizations.

Of course I didn't list FOX News as a liberal news organization--because it isn't one. Sure FOX might seem conservative when compared to other mainstream news outlets today, in much the same way that live steam might seem cold compared to hot lava. What news stories has FOX News broadcasted that you consider to be Faux? Remember, FOX does hard news during the day and during its 7pm hour (eastern), then commentary at night instead of hard news. I don't recall FOX keeping the lid on stories such as Iraq thugs torturing their own reporters over a twelve year period.

In fact the only major non-taxpayer funded syndicated liberal radio host is syndicated by FOX News.

> The
> Conservative Soundbite Nooz Network is currently kicking CNN's ass in the
> numbers game and the Murdoch open bias is the rule of law in
> O'Reilly/Hannity/Snow land.

Murdoch's bias....this must be the reason why he published ultra liberal and conservative hater Michael Moore's book, no? O'Reilly, both Radio and TV, is an independent and has views and opinions all over the place. Just this week he has been having a tuffle with a conservative radio host. Hannity of course is conservative and is presented as such, on his radio program and on TV (with the catchy word "conservative" printed right on the screen next to him at the beginning of each show. Interesting that conservatives call O'Reilly liberal and liberals call O'Reilly conservative.

> And no, Alan Colmes doesn't even begin to
> approach "fair and balanced".

No of course not. He is liberal and is presented as such. The word 'liberal' even appears on the screen next to him at the beginning of his TV show. Before that, he was a well known liberal host for many years on WEVD 1050, New York. However, FOX News invites liberal guests in the same numbers as conservative guests on their programs.

> NBC has leaned conservative ever since the 2000 election - thanks to the
> right-handed control of one Mr. Jack Welch.

Now wait a second. Jack Welch became GE's chairman and CEO in 1981, not in 2000. GE purchased NBC in 1986. By the way, have you noticed Brokaw giving news reports on the "new" NBC Radio news?

> Tim Russert certainly loves to
> tear into liberals every Sunday morning on Meet The Press - and he throws
> softballs to every conservative that graces his set.

Tim Russert tears into liberals,conservatives,foreigners,whoever is part of a big story every Sunday morning.

> Chris Matthew's Hardball on MSNBC only seems to apply when liberals show.

Chris Matthews is a liberal guy who tries to present himself as nonliberal. Heck, he was Tip O'Neil's personal speechwriter.

> Over at CNN, most of the real journalist have jumped ship (or been pushed)

Begala and Tucker are an example of a balance, but CNN even put a Democrat Party Strategist James Carville as a host of the show.
Now CNN is showing signs of change. Woodruff is an example of a CNN anchor who certainly tilts to the left still.

> CNN and Fox are both guilty of omitting the horrifying images coming out of

Huh?

> Only CBS News has had the guts to report on the cholera outbreaks
> in Iraq due to inadequate clean water and medical services for the
> "liberated".

Interesting since I first heard about that cholera outbreak via ABC.

> War is ugly - but the American people only see the victory -
> thanks to the dominant conservative spin of our news organizations. When the

> on the devastation caused by his decisions, the myth of a liberal media
> begins to look frighteningly thin.

There was plenty of coverage of devastation. What was remarkably missing in most mainstream news outlets, however, was the devastation and human travesties caused by Hussein. The decade of torture, electrodes, rape rooms, ears cut off by the thousands, etc. was avoided by mainstream news stations. Finally CNN's Jordan even actually admits this in his NY Times op-ed.

That is correct. This wasn't always the case, but sadly, often today it is.

Fare enough, but unlike many mainstream media outlets, conservative radio shows make no attempt to hide their inherent bias.

>
>

Well I don't like country music, but I don't find it offensive that there are radio stations broadcasting country music all day and night.

> > But do you find the one-sided politics of ABC News, CBS News, CNN, and NBC News

You are assuming that if somebody is "rich" that they are "right." Was Ted Turner "right" when he started CNN? But more importantly you are assuming that if somebody "rich" owns something in the media, that this media will also be conservative. Certainly the New York Times has rich owners but it is a very liberal mainstream newspaper. Nothing wrong with that, except when they editoralize on page 1.

Now these big, allegedly "right" corporations have tried left wing radio hosts, such as former NY governor Mario Cuomo, Harvard law professor Alan Dershowitz, former CT governor Lowell Weicker, former California Gov. Jerry Brown, former Senator. Gary

Hart, and former Virginia governor Doug Wilder. But all couldn't attract an audience to sustain them.

> It's hard to admit one's wrong on an issue, or one's favorite politician
> is wrong, or even to admit that one disagrees with a significant
> proportion of the population. It's a lot easier to believe the media is
> reporting it inaccurately.

Remember when Rush Limbaugh was accused as the reason for the Oklahoma City bombing? Or when NPR reported that a conservative Christian group was responsible for sending Anthrax laced letters to two Democrat senators? Yes, it is VERY easy to believe that the media is inaccurate.

>
>
> And sometimes you'd be right. As a business, the media must appeal to
> an audience. They must broadcast what they think their audience wants
> to hear/see.

Yet often, reporters such as Dan Rather attempt to put their own spin on the news. He even chastized Bernie Goldberg for writing a column in "conservative" Wall Street Journal in a column Rather himself wrote in "middle of the road" NY Times. :) Rather once claimed that Diane Sawyer had "no credibility" due to her "conservative" views.

> Research shows Americans want to believe marijuana is
> dangerous, so you see lots of stories about pot seizures and few about
> those who argue it's safe for adults. Among plenty of other examples.

If you believe that inhaling smoke into the lung tissue with thousands of toxins entering the body is safe, than that's your business.

> left doesn't make them one-sided.

Well, let's see. NPR had a president, Mankiewwicz, who was a George McGovern campaigner. Then the next NPR president, a Carter administration member named Bennet

left NPR to join the Clinton administration. Then the next president, Lewis, was chief fund raiser for Mayor Marion Barry of Washington DC. See any patterns developing here? These aren't presidents of parent companies.

NPR broadcasters couldn't contain their bewilderment about the "surprise best seller" book Unlimited Access. Bob Edwards is fond of talking about "Christian Conservatives" controlling voters. A voice on NPR talked about how the "religious right" was a very vocal minority doing most of the unconstitutional stuff out there. Of course, according to NPR, the "religious right" is a force singlehandedly and forcefully controlled by one person named Pat Robertson.

> As long as commercial stations only present one side, *someone* has to
> present the other.

Commercial radio stations have TRIED to make liberal hosts successful. I mentioned some names above. But since they failed in the marketplace, the taxpayers should subsidize their viewpoint and voice? I don't think so. Should the government fund a conservative broadcast television network to counterbalance ABC,CBS, and NBC?

> Actually, I believe we should indeed eliminate the
> subsidy to NPR from the general fund.
>
> It should, instead, be financed by a tax on commercial broadcasters.

Why not just let it be financed by the market? If people want it, that's fine. They can support it. And let NPR compete for its licenses as other broadcasters must do.

No need for 'multiple flea-power transmitters'.

I reckon that you could put up a simple DIY 'on-channel repeater' which covers the whole FM band. This would consist of an external FM antenna which receives all the FM signals which are available outside, coax feeder into the building, and amplification using a normal DIY store wideband RF amplifier. The output of the amplifier goes to a second FM antenna which radiates in the office area. The only precaution is to ensure that the amplifier gain is less than the loss between the transmit antenna and the receive antenna, otherwise you will get feedback, ie you will have built an oscillator. A minimum margin of at least 10dB would be required. Also, the amplifier should really only cover the FM band (could be wideband with bandpass filter), or you may find the system oscillating at some unknown frequency.

You could even try this without the amplifier (ie a totally passive repeater). There will still be worthwhile re-radiation of the FM signals inside the building, but certainly be no risk of oscillation!

Cheers,
Ian.

Truth be told the conservative shows have the exact same bias as the mainstream outlets. Both have done research and learned what kinds of programming sells airtime. You give your audience what you think they want to see/hear.

>>You apparently accept the suggestion of left-wing bias in the major
>>media as fact. I don't. Most people to the left of my positions believe
>>ABC/CBS/CNN/NBC are controlled by their rich owners Disney/Viacom/TW/GE
>>and are biased in favor of the *right*.
>
> You are assuming that if somebody is "rich" that they are "right."

I'm not assuming anything.

My point is that while you (and many others) believe the major media are left-biased, there are also many people who believe they're right-biased.

Chances are, when both sides hate you you're doing something correct<grin>!

> Now these big, allegedly "right" corporations have tried left wing radio hosts, such
> as former NY governor Mario Cuomo, Harvard law professor Alan Dershowitz, former CT
> governor Lowell Weicker, former California Gov. Jerry Brown, former Senator. Gary
> Hart, and former Virginia governor Doug Wilder. But all couldn't attract an audience
> to sustain them.

IMHO running one or two left-of-center programs on a mostly right-of-center station is never going to work.

As I mentioned at the beginning of this thread, I'm simply not in the habit of listening to talk stations. Not even for completely unbiasable programming like severe weather reports. I suspect my habits are shared by many others.

If the station only promotes their left-of-center programs on their own air, those of us who might enjoy the program will probably never learn it exists.

> Remember when Rush Limbaugh was accused as the reason for the Oklahoma City bombing?

No... Where did anyone in the mainstream accuse Limbaugh of any direct involvement in McVeigh's actions?

As far as creating a climate of hatred of government that may (or may not) have led to this crime.. I think you have to go a fair way to the right of Limbaugh to find that, but some of the crap being spewed on radio certainly qualifies.

> Or when NPR reported that a conservative Christian group was responsible for sending
> Anthrax laced letters to two Democrat senators? Yes, it is VERY easy to believe that
> the media is inaccurate.

Occasionally, yes. We all make honest mistakes. Given past actions it's not unreasonable to believe a conservative Christian group *was* responsible. Since we don't yet *know* who did this, such a report could yet turn out to be correct.

If NPR had evidence it would be by no means unreasonable to run the story. (and if they *didn't* have it, they made a mistake.)

Surely you don't believe conservative shows have never made an honest factual error?

> Well, let's see. NPR had a president, Mankiewwicz, who was a George McGovern
> campaigner. Then the next NPR president, a Carter administration member named Bennet
> left NPR to join the Clinton administration. Then the next president, Lewis, was
> chief fund raiser for Mayor Marion Barry of Washington DC. See any patterns
> developing here? These aren't presidents of parent companies.

Ownership & control of commercial networks by rich people doesn't necessarily make them right-biased, but control of NPR by Democrats makes it left-biased?

(Carter was hardly a liberal. Clinton was outright conservative, unless you're talking about his personal (im)morals which really offended a lot of us on the left too.)

> And let NPR compete for its licenses as other broadcasters must do.

It does. At least as other *non-commercial* broadcasters must do.

I suppose you could eliminate the distinction between commercial and non-commercial stations altogether. And then watch hundreds of religious stations - and thousands of translators - vanish. Either taken over by commercial operations, or outbid by for-profit operations.

Radio New Zealand gets dosh for FM
http://www.nbr.co.nz/print/print.asp?id=5835&cid=1&cname=Media

Radio New Zealand is to receive new funding worth $14.58 million over four years to set up a nationwide FM service and meet the rising costs of its core services, Broadcasting Minister Steve Maharey announced on Tuesday.

National Radio will receive an additional $3.396 million over four years to progressively establish FM services across the country and $2.646 million annually to maintain its programming.

Around 93 per cent of the population will be able to receive the FM service by 2006, the same penetration currently achieved by Concert FM. The current AM service will be retained providing service to those listeners unable to tune in to the FM band.

At present National Radio is only heard on FM in central Auckland, Taupo and Greymouth. It is aimed to have the four main centres on FM by the end of next year.

Mr Maharey said the package, part of Budget 2003, would enable the nation's public radio network to make a larger contribution to the development and maintenance of national and cultural identity.

The FM service will be progressively rolled out over the next three years.

The government has said it is examining the possibility of implementing a digital FM network, but this proposed funding round does not appear to contain any movement in that direction.

An extra $150,000 a year over four years will go to Radio New Zealand International, which broadcasts in shortwave to the Pacific, to provide increased original programming and current affairs aimed at Island listeners. The hours it produces will rise from four hours a day to 10.

U.S. Radio Stations Tallied
http://www.rwonline.com/dailynews/one.php?id=3084

Just how many radio stations are there in the United States?

The FCC is out with the latest answer to that frequent question...

As of March, there were just over 4,800 AMs, 6,000 commercial FMs and 2,400 noncom FMs, for a total of 13,200. There were about 3,800 FM translators and boosters.

Keitha Saw

US] DJs Suspended for Playing Dixie Chicks

COLORADO SPRINGS, Colo. - Country station KKCS has suspended two disc jockeys for playing the Dixie Chicks, violating a ban imposed after the group criticized President Bush.

Lead singer Natalie Maines told a British newspaper she was "ashamed that the president of the United States is from Texas."

"We pulled their music two months ago, and it's been a difficult decision because how can you ignore the hottest group in country music," station manager Jerry Grant said.

He said there has been discussion about whether to reinstate the music, but the DJs, Dave Moore and Jeff Singer, became impatient.

"They made it very clear that they support wholeheartedly the president of the United States. They support wholeheartedly the troops, the military. But they also support the right of free speech," Grant said.

The station has received a couple of hundred calls and 75 percent favored playing the music.

Grand said Moore and Singer will be out for a couple of days.

"I gave them an alternative: stop it now and they'll be on suspension, or they can continue playing them and when they come out of the studio they won't have a job."

The station plans to play the group's music again eventually. "Most stations are starting to play them again anyhow a song here, a song there. I just have a problem with the way this was done. We would have put them in anyhow. But we'd like to do it on our terms," he said.

854. Personality music radio in Sirius/XM

though
> would be NOAA weather radio,

In my county, the weakest NWS broadcast signal is provided from the NWS office that covers my zone. The strongest NOAA weather radio signal is from two transmitters that do not officialy cover our county. Plain english. Orange County, NY is covered by New York City NWS office located in Upton, NY (Brookhaven Labs, Long Island). The signal from an Albany, NY transmitter on Illinois Mtn covers all of the county but Albany is not assigned Orange County. There is also a NWS transmitter getting into western Orange County from a NJ location run by Mount Holly. A good strong solid signal in Middletown, NY required to reliably trigger my ratshack SAME code radio requires a roof mounted external antenna.There is a gentlemans agreement between the NWS forcast offices to send Orange County warnings over the other two tranmitters but for unknown reasons it doesn't always happen all the time.

>or if that is not available, a local news radio..

Local what ?... WTBQ in Warwick, a daytimer with limited reach. WALL in Middletown? remote fed from Poughkeepsie, lights out Spanish only, A Newburgh (WGNY ?) AM station on a temporary tower with a signal that barely gets past the property line ? Maybe CATV between the bamboo steamer and rhinestone cufflink ads ?

> station. If neither of those are available any station should be
broadcasting
> emergency messages, if there is indeed an emergency.

Nope, wouldn't dare break into the satellite feed with a real human (maybe the janitor is the only one left ?)

Luckily we don't get many tornadoes in my neck of the woods. But it is frustrating to impress upon the uniformed like school officials who think that tuning their Weather radios to the strongest signal will get them the local weather, or tuning into a local radio station will get them the latest local news, or reading about it in a regional newspaper will fill in the

spaces.

Commercial broadcasting is a murky tarpit of generic muck, serving no one but the advertisers and the station owners.

God bless the few local independents left on the planet.

I'm in New Zealand. I don't notice any difference in FM and AM stations,
except that FM is louder. Commercials are louder on all stations, and even
worse on TV.

Born in 1929, I still marvel at technology that can bounce live events around the world on satellites, and even from the moon. Shame such a lot of TV is such rubbish! But then, half the population is of less than average intelligence (believe it or not) and their taxes pay for TV too.

Interesting.. How can half the population be less than average? If half of them are below average, what makes up average? If the average is the mean score from the population, I would not have thought it possible more than half the people to be below it? Sounds like a sampling error? Hmmm, I am going to go and play with my Statisics program now and run a couple of tests... I am sure there is someone who can correct me if I am wrong (which I may well be) ... in the meantime, SPSS here I come.

oh what the hell.....here goes...(some editing)

<<Of course I didn't list FOX News as a liberal news organization--because it isn't one. Sure FOX might seem conservative when compared to other mainstreamnews outlets today, in much the same way that live steam might seem cold compared to hot lava. What news stories has FOX News broadcasted that you consider to be Faux? Remember, FOX does hard news during the day and during its7pm hour (eastern), then commentary at night instead of hard news. I don'trecall FOX keeping the lid on stories such as Iraq thugs torturing their own reporters over a twelve year period.>

fox needed a gimmick to break into the cable news market....they chose to get the conservative segment of the audience.
its narrow-casting plain and simple. they don;t have to be the best...they just have to lock up the disenfranchised right segement. someone made the point that they maybe #1 on cable but they still don;t get more than 1/3 of any network news nightly broadcast.

they don;t report faux stories but they are not even handed either. here are 2-recent examples: the mix-up with rivera and arnett. arnett's interview on iraqi t-v during the war was a big mistake. he was fired and i don;t have a problem with that. but rivera broke the most important rule for being an embedded journalist....giving away location. was he fired? no. arnet was vilified.....but why not rivera? because its not about what is right or wrong its who is right or wrong. if rivera had been on another network and done that....do you think fox would have used him in their news promos as they did with arnett? that's not fair and balanced.

how about when a fox reporter on the scene of demonstrations does her job and tells what happened....but she then goes on to say that the crowd is apparently oblivious to the irony of protesting to the very forces that gave them their freedom. i was taught that reporters should report....leave the commentary to others. its not like the residents of baghdad asked the soldiers to free them and if they have complaints who's to say they can;t use their ability to express themselves. the city has a population of millions and a few thousand protested...what's the big deal. that's not fair and balanced reporting, its pandering to the conservative audience to give them what they want to hear.

finally as to cnn worker who was tortured and they didn't talk about for years.....who on earth thought hussien was a nice guy? the reporter involved said he thought the guy would be KILLED if he said more. is the claim that we didn;t know how bad saddam was because they didn;t say some things in this instance?
you can hardly claim that cnn was keeping saddam's killing a secret to protect one man. (more below)

<<Murdoch's bias....this must be the reason why he published ultra liberal and conservative hater Michael Moore's book, no? O'Reilly, both Radio and TV, is an
independent and has views and opinions all over the place. Just this week he has been having a tuffle with a conservative radio host. Hannity of course is conservative and is presented as such, on his radio program and on TV (with the catchy word "conservative" printed right on the screen next to him at the beginning of each show. Interesting that conservatives call O'Reilly liberal and liberals call O'Reilly conservative.>>

its about the money. clear channel isn;t big because they truly care about the quality of their broadcasts. fox has a niche but i dont know if its ideological or not but....moores book would make money (as frankens and other similar books) the decision was easy.

> CNN and Fox are both guilty of omitting the horrifying images coming out of
> Iraq *post-conflict*. The devastation and humanitarian catastrophe are
> simply not being reported; by default placing a pro-war/conservative spin on
> the news.

<<Huh?

here's what i think the poster was referring to. you don;t see those kinds of stories and footage because t-v execs. know viewers here don;t want to see that. it'll cause them to question and more importantly to them perhaps the ratings will drop....we might have to think more deeply about what has happened and the future....so lets switch to laci peterson. i heard an ap radio newscast on the day gerogos was chosen to represent peterson....it was the lead story in the newscast. that is sad.

> War is ugly - but the American people only see the victory -
> thanks to the dominant conservative spin of our news organizations. When the
> news networks only report about a victorious president, and fail to report
> on the devastation caused by his decisions, the myth of a liberal media
> begins to look frighteningly thin.

There was plenty of coverage of devastation. What was remarkably missing in most mainstream news outlets, however, was the devastation and human travesties caused by Hussein. The decade of torture, electrodes, rape rooms, ears cut off by the thousands, etc. was avoided by mainstream news stations. Finally CNN's Jordan even actually admits this in his NY Times op-ed.>>

again....the fact that hussien was a brutal dictator was clearly evident in 1991...(actually before that but he was our guy back then.) cnn's "revelation" was a non-story....except for those that see rivera's mistake as fair and balanced.
another fox example .. a fox anchor was taking a (liberal) guest to task for supporting some actor or actress that had spoken out against the war.....this guy said who were THEY (actors!!!) to question the administration.....i had to laugh...the guy with the outrage was brian kilmeade....the sports guy on foxand friends. the weather guy must have been on break ;-)

peace,
mark

Some of the things they play from the above list include, Gunsmoke, Suspense, Great Gildersleeve, Our miss brooks, and at least one of "X-Minus One" or "Dimension-X", I get the two confused. There may be others from your list, but the above are ones I can remember hearing for sure.

What makes you say "didn't think so...", when you clearly don't know what you are taking about?

Since they put on ``The Swede'' and Perfect Paul and followons, there's hardly
any point to listening to NWS. I used to listen for hours just to hear the
really entertaining announcers. One fellow for years and years gave the
farm report saying ``foilage'' instead of ``foliage'' and of course that repeated
every three minutes for those years. It was great.

I have only a few sad remnants saved on disk. I could have really used RealEncoder in the
80s.
These are from the late 90s, last of a breed.

http://home.att.net/~rhhardin/weather0.ra (63k) Enunciation that you tune in for
http://home.att.net/~rhhardin/weather2.ra (61k) Intern Announcer Next Week Avoiding
Sounding Like Him At All Costs
http://home.att.net/~rhhardin/weather.ra (63k) Really Hot and Muggy (plus! straneous
activities)
http://home.att.net/~rhhardin/weather5.ra (51k) Perfect Paul without Spaces, aka Imperfect
Paul

There was a real market for this and NOAA was wrong to eliminate live announcers instead of
selling advertising
to support them.

Being #1 in cable ratings is "narrow-casting"?

Can it really be an A/B comparison when you can't listen to the same
program service on both Sirius and XM? Or maybe you did? You don't say.

Finally???? Rush Limbaugh has been ridiculing the "liberal" line for
more than a decade, followed close behind (in time) by dozens of Rush
wannabes.

Bob Grant in New York is going on, I believe, his 23rd year of
not-very-liberal talk. I believe Joe Pyne in the 60's wasn't liberal.

I guess time is relative. Compared to the creation of the earth,
conservative radio is new.

Don't ever say that in front of Roger Ailes - the boss. He insists
they're NOT conservative. They're unbiased. He gets very angry when
FOX is portrayed as conservative.

The "disenfranchised right segment" is one of the funniest phrases
I've heard in a long time. They got where they are by being show biz.
Glitzy. Lots of puff. Chatty. It's as though they hired every TV
consultant in the business.

It's even beginning to rub off on the broadcast media. WNBC-TV just
changed their news set and graphics. It looks like LSD is as popular
as ever.

Your right!
It would be unlikely that anyone could have the exact same song
on both units..... I can however switch back and fourth quickly
but the songs are not the same.....

But randomly sampling at different times of day or night with different
songs on each one each time we compare, I would think that once
in a while it would be lopsided.... But I cant tell any noticable difference
either way, anytime....

What I mean is lets say

if XM was better fidelity than SIRIUS
and if Traffic was better fidelity than the Beatles

So if the worse fidelity song was on the better fidelity service when
we might interperate that to SOUND THE SAME.....

However, since both services play Traffic and both plays the Beatles
(in other words the songs are random on both services) then it would
be likely that some times one service would sound better than the other...

I dont hear any significant sound quality differences on them at all.
Typicly they are both very very good... No complaints at all on the
sound quality of either one....

There are folks out there that might say one sounds better than the other, I
imagine that most of these folks that say that are under the influence of
someones
advertising propaganda and not an actual comparison....

This very morning we had a tornado sighting up the street. 3 TV
stations from a nearby large market were doing full coverage. The two
big "news" radio stations were doing some canned talk show. What
happens when people lose their cable and/or power and have only a
battery powered radio for info?? Radio news is non-existent when
needed most.

Of course half the population is below average! The other half is above
average. He did NOT say that MORE than half are below average. However, for
the statement to be true of the numbers, no-one must be exactly on the
average, so the IQ scores must be stated exactly, to however many places of
decimals are necessary to achieve this. IQ scores do not justify this degree
of accuracy, and as they are usually given in whole numbers, a very large
number of people will be right ON the average. In fact the scores are
adjusted to achieve this.

But geopelia did NOT say that half the population have an IQ of below
average. He said that half the population "is of less than average
intelligence". And since he is even older than I am, he has been around long
enough to have learnt to say what he means. You have yet to learn to read
what people say, but I am sure you are young enough to improve with age.
Aren't we all? 8^)

To be more accurate, 49.99% are less than average, 50.01% are more than average.

As I said, it set my mind working and I may well be wrong... I was taking
that as a more literal statement than I needed to, I have just developed an
interest in Statistics (due to the OU course I am doing I don't have much
choice but to have an interest in them...) I just was wondering aloud...
It wasn't meant as criticism, merely as me wondering.

Thats good to hear - I love these shows. A lost artform sadly.

> What makes you say "didn't think so...", when you clearly don't know what
> you are taking about?

Because I hate Clear Channel and I'm biased against them and the
corporatization (word?) of radio in general.

I know radio used to offer more diversity prior to Hellicom Act of 96, so
anytime I see a post preasing a corporate entity i feel compelled to get
on my soap box.

I can't help it. It is a compulsion.....It is good to see that XM
offers something more than what terrestrial radio has become, but I long
to see Clear Channel and elk broken up so radio can improve in the
programing they offer.

>fox needed a gimmick to break into the cable news market....they chose to get the conservative segment of the audience. its narrow-casting plain and simple. they don;t have to be the best...they just have to lock up the disenfranchised right segement. >

<<Don't ever say that in front of Roger Ailes - the boss. He insists they're NOT conservative. They're unbiased. He gets very angry when FOX is portrayed as conservative.>>

yeah...tell him to watch and see fox and friends hosts (for example) roll their eyes at stories concerning "liberals". they don;t have to agree but the sarcasm is just show-biz right?

<<The "disenfranchised right segment" is one of the funniest phrases I've heard in a long time.>>

i tried to be entertaining ;-) still that's the general audience they are trying to attract. cnn does a great job of reporting. it would take years for a new cable news network (like fox) to grab market share just through better reporting. lets take advantage of the perception of a liberal media and infer that we are the fair and balanced place to be. most who would have that view would also believe what? use that info too. it worked. give them what they want to hear.....that sounds good if your selling lots of things but i don;t know if news is one of them.

<<They got where they are by being show biz.Glitzy. Lots of puff. Chatty. It's as though they hired every TV
consultant in the business. >>

well...i respect your opinion and i agree with some of what you have said but i see things on fox (and i don't watch often) which make me cringe.

<<It's even beginning to rub off on the broadcast media. WNBC-TV just changed their news set and graphics. It looks like LSD is as popular as ever.>>

and that is just one of the reasons why.

886. The Super Station acquires MV Communicator

Newsgroup: rec.radio.broadcasting
Date: 2003-05-17 03:21:21 UTC
From: Mike Terry <miketerry@ukrivals.net>
Message-ID: <ba49rhqak1@xuxa.iecc.com>
Source record: 8112
Cross-posted to: alt.radio,alt.radio.uk,rec.radio.broadcasting,rec.radio.info,uk.radio

It's beginning to look like something may be
happening in International Waters in the not
too distant future.
Manchester's Super Station has acquired the
Communicator (Former Laser 558 ship).

>From http://www.mvcommunicator.com/4693.html

On 27 March 2003, The Super Station acquired the radio ship MV Communicator for use as a radio station. Unfortunately, any thoughts of broadcasting have been severely delayed due to vandals entering the ship and smashing up much of the equipment, leaving us with massive repair bills.

Our main priority at the moment is to bring the MV Communicator back from Pampushaven in the Netherlands to Essex, UK so we can carry out repairs and restore her to her former glory as a working radio ship.

We will be launching "The Communicator Club" very soon. Membership of the club will provide you with an exclusive newsletter, trips to see the ship once she returns to the UK, and progress reports as we continue work on her. Discounts on merchandise will also become available. Funds from the membership will help to finance the extensive repairs we need to carry out.

Once repairs to the ship are complete, our aim is to launch a live twenty four hour radio station, broadcasting a mixture of hot A.C. and soft rock.

Very soon we will be publishing recently taken photographs of the ship. This will enable you to witness the scale of the damage, and give you an idea of the extent of repairs needed in order to make the dream of bringing this ship back to life a reality.

In May 2002, Dave Miller called Janie Ash, the former Managing Director of a radio station in Belfast where they both worked, for a chat about a mad idea of saving a radio ship from the scrap yard.

To his amazement she thought the idea of preserving a piece of radio history, while at the same time creating a brand new vibrant radio station was a thrilling prospect.

Through the lengthy process of purchasing the ship, both Dave and Janie remained committed and hopeful that Clear Channel Communications (the previous owner of The Communicator) would finally sell to them for an affordable price and not scrap her.

On 27 March 2003, Dave and Janie flew to Amsterdam to meet Rob Van Der Vegt from Clear Channel to take another look at the vessel and take ownership of

her. It was a huge achievement after months of complex negotiations. As they both stepped on board the smiles dissapeared as they looked around to see that vandals had been on board and wrecked the ship. A deal was struck and the ship was transferred over so that work could commence with immediate effect.

In May 1984 Laser 558 appeared from the radio ship MV Communicator anchored in the North Sea. Its All American DJ's soon attracted a cult audience of 10 million loyal listeners. Independent Local radio stations were not only losing listeners but advertising revenue as well.

Laser 558 always disputed the "pirate" tag and in a press release from the New York Office Roy Lindau President of MMI,the Worldwide Sales Group for the station stated "that unlike other pirate stations of the past Laser 558 is a legal station, since the ship is registered outside of Europe, transmits from International Waters, is owned by a Panamanian company and staffed and supplied by citizens of The United States Of America.

Big American Personalities became household names all over Europe. Jessie Brandon, Rick Harris, David Lee Stone, Steve Masters, Holly Michaels, Craig Novak, Chris Carson,Tommy Rivers and of course Charlie Wolf.

Did some research on whatever happen to the SuperJock and posted it in Wikipedia, which currently resides here:

http://www.wikipedia.org/wiki/Larry_Lujack

If you know, please verify his tenure at various radio stations, especially in the mid-1960s. Though he did two stints EACH at WCFL and WLS (see below) the first two durations are poorly documented on the 'net.

RK

= = = = = = = = = = = = = =

Larry Lujack
>From Wikipedia, the free encyclopedia.

Larry Lujack was a pioneer in the shock jock field and is famous for his Toothfairy tales and "Animal Stories."

He was born June 6, 1940 in Iowa as Larry Blankenburg, attended College of Idaho in Caldwell, Washington State University and was a radio disc jockey starting in the early 1960s at KCID in Caldwell. He subsequently worked at several other radio stations but is best known for his antics on Chicago AM radio stations WLS and WCFL.

Though he retired in 1987, shortly after his son from his first marriage died in a traffic accident, Larry began working again in May 2000 as a remote disc jockey for WUBT. In 1997 he moved from Palatine to the outskirts of Santa Fe, where hs plays golf and landscapes. He was inducted into the Illinois Broadcaster Association's Hall of Fame in June 2002.

888. XM radio no signal - HELP PLEASE!!

Newsgroup: rec.radio.broadcasting
Date: 2003-05-17 03:21:24 UTC
From: Darius <yeahright@whatever.com.easynews.com>
Message-ID: <ba49rkqbh1@xuxa.iecc.com>
Source record: 8113

Having gotten absolutely fed up with the crap on FM radio, I decided to give XM a try, so bought the Delphi SkiFi receiver and the 'Boombox' player. Got it home, plugged it in, and all I got is a message that said 'No signal' So I spent about 3 hours trying to 'aim' the antenna every which way (and them some), trying it in ever room in my apartment and every window - not even a trace of a signal on the 'antenna aiming' screen.
So, I put 6 D batteries in it, walked out to the parking lot, and it worked great. However, as soon as I got anywhere near the covered walkway of my apartment, the signal died instantly :-(
I have windows on two sides of my apartment, but I guess they are the 'wrong sides' .. I'm really not sure which side is south here. I live on the 1st of a 3 floor apartment.
What I want to know is, am I just S.O.L. here, or might I have better luck with a better antena, or possible a different XM receiver? Having previewed some of the channels outside, I really want this to work!!

PS - I apologize in advance if this is the wrong group for this.

Amateur Radio Newsline™ Report 1343 – May 9, 2003

Amateur Radio Newsline report number 1343 with a release date of Friday, May 9th, 2003 to follow in 5-4-3-2-1

The following is a Q-S-T. Ham radio provides aid as tornadoes rip across mid America, a record session for the VEC testing system and the FCC opens the filing period on 'Broadband over Power Line communications. All this and more on Amateur Radio Newsline report number 1343 coming your way right now.

(Billboard Cart Here)

**

RESCUE RADIO: TORNADOES SWEEP THE NATIONS MID-REGION

Ham radio has again come to the aid of America. This time as a series of killer tornadoes rip across the Central and South-Eastern states. We have the details in this report:

--
Blackouts, water shortages and desperate searches for the missing. This is the situation confronting tornado battered residents of the central United States as the death toll rises to 40 from the most violent weather in four years.

Beginning on Sunday the 4th and continuing through most of the week, swarms of violent thunderstorms and tornadoes crashed through the United States midsection. They caused devastation in three states and are spawning problems in several others.

Kansas, Missouri and Tennessee suffered the worst damage in the initial Sunday onslaught. Kansas listed seven people killed, Missouri had seventeen fatalities and Tennessee sixteen. The storms also disrupted electrical power and telephone service with debris from fallen structures blocking roads in some areas.

One of the hardest hit areas was Madison County, Tennessee where ten people were killed. There, power blackouts were widespread and it was not known when telephone service can be restored. Several of the regions A-R-E-S groups were reported activated as was the Missouri Traffic Net operating near 3 point 960 MHz in the 75 meter band.

In Missouri, ARRL Section Emergency Coordinator, Don Moore, K-M-Zero-R, reports that amateur operators are continuing damage assessment duties. An ARRL bulletin says that the Amateur Radio Emergency Service, Radio Amateur Civil Emergency Service and SKYWARN groups were active across the affected area. Hams are also assisting the American Red Cross and Salvation Army relief operations.

A bit to the West, in Kansas, Section Manager Ron Cowan, K-B-Zero-D-T-I, says that one tornado touched down in Leavenworth County. It remained on the ground before crossing the border into Missouri. There the storm brought havoc to Platte and Clay counties before falling apart just North-East of Kansas City. But during its trek, Wyandotte and Leavenworth Counties sustained severe damage. Cowan says that homes were destroyed and utilities knocked out along the twisters path.

The tornadoes were believed to be a part of a huge weather system that rolled across the Midwest and parts of the South. It also spawned twisters in Arkansas, South Dakota and Nebraska. Storms on Tuesday and Wednesday accounted for funnel cloud sightings in Alabama, Illinois and here in Louisiana. In all, nine states are affected and the National Weather Service credited ham radio operators with dozens of storm related reports over the weekend and they are continuing into the week.

As we go to air, hundreds of people are still being housed in temporary shelters where Amateur Radio volunteers have become an important ingredient in relief efforts.

This is obviously an ongoing story and we will have an update in next week’s Amateur Radio Newsline report.

>From New Orleans, Louisiana, I’m Don Wilbanks, AE5DW.

Jim.

--

Thanks Don. (ARNewsline™ from various sources including ARRL bulletins)

**

RESCUE RADIO: TORNADO DESTROYS K0ETC BEACON

There is an ironic side to this story directly affecting ham radio. The K0ETC beacon North of Joplin Missouri in grid square EM27 was aparently destroyed when one of the twisters blew down the building housing it. An Internet posting by the beacons owner Jay Rupar, K0ETC, shortly after the incident said that there were no injuries at the former beacon site but two people were killed by the same storm about 30 miles away. Rupar says that the present location of the beacon itself is unknown but that it will be replaced. (KC6WFS/7)

HAM RADIO HEROES: NOAA HONORS “ALERT” VOLUNTEERS

The National Oceanic and Atmospheric Administration has selected ALERT -- the Alabama Emergency Response Team to receive one of this years NOAA Environmental Hero Awards. This award recognizes ALERT for its outstanding efforts in support of the NOAA National Weather Service Forecast Office in Birmingham.

NOAA says that under the leadership of ALERT president Chuck Arthur, KF4SSX, team members have spent hundreds of hours using ham radio to coordinate storm reports throughout the Birminham office’s warning area. The agency goes on

to say that over the years they have proven to be an invaluable resource during such major events as an F 4 tornado that struck Tuscaloolsa County on December 16th of 2000 and the tornado outbreak of November 24th 2001.

NOAA took special note of ALERT's work following last years Veterans Day severe weather outbreak that included to F 3 catagory tornados that killed 12 people. NOAA says that the ALERT volunteers stayed with their Amateur Radio stations relaying critical storm reports to meteorologists and relaying storm information to Emergency Manasers across the central and northern tiers of the state. NOAA says thart the steady flow of reports were crucial to the issuance of new warnings and the office's ability to quickly get the word out to the publiic.

Presented in in conjunction with Earth Day celebrations, the award honors NOAA volunteers for their tireless efforts to preserve and protect our nation's environment. It was presentede to ALERT on Satyrday, May 3rd. More on ALERT is on the web at www.alert-alabama.org. (NOAA)

THE VEC SYSTYEM: A PROBABLE E-FILING LICENSING RECORD SET

Before a ham can respond to an emergency, he or she first has to become licensed. And a Wisconsin college may have set a new Amateur Radio record in that area. Would you believe 81 new hams in less than 24 hours? Well its true and Amateur Radio Newsline's Roy Neal, K6DUE, is here with the rest of the story:

--

It happened in Wisconsin. Picture this. 81 students sat for and passed their amateur radio tech class license exams in one day. What's more, they received their license grants within 24 hours! This became the largest test session ever to employ the new technique of on-line submission of test results and applicant data to the FCC. They are the students of Dr. John Weiss, WD8KLO of U W Stouts' College of Technology, Engineering and Management

Weiss gave his students the option of earning their radio licenses in partial fulfillment of class requirements. The examination team was coordinated by John Burningham, WB8PUF, of UW-Stout's communication, Education and Training Department. It included Weiss; Jon Fuller, W9JHF, Student Life Services; and UW-Stout students Andy Wagner, KB9TAC and Scott Littfin, N0EDV.

The University of Wisconsin-Stout has a reputation for firsts. In 2001, the college, which is located in Menomonie, became the first to receive the prestigious Malcolm Baldrige National Quality Award. It was presented by none other than President George W. Bush.

The rapid license grants were made possible by using newly available VE-to-VEC-to-FCC electronic submission technology developed by the W5YI Volunteer Examination Coordinator. Using password-protected electronic forms posted to the W5YI VEC website, John Burningham, WB8PUF began keying in the test results right after the exam session.

All 81 applications were waiting at the VEC Office when it opened the following morning. After routine screening, the applications were electronically retransmitted to the FCC. Within an hour, the FCC issued the licenses and call signs. These were immediately forwarded over the Internet to Burningham who informed the waiting students of the new calls while at the same time probably setting a new electronic licensing record for ham radio in the United States. 81 new hams in one day at one licensing location.

Go Wisconsin Stout!

For the Amateur Radio Newsline, Roy Neal, K6DUE.

--

Weiss is an Associate Professor at UW-Stout specializing in advanced telecommunications technology. Additional information on the school’s telecommunication systems program is available on the web at http://tcs.uwstout.edu. (W5YI)

HAMVENTION 2003®: FCC TO BE A NO-SHOW

Don't look for any major ham radio regulatory announcements at next weeks Dayton Hamvention. That's because the agency will not be there. David Black, KB4KCH, reports from Amateur Radio Newsline’s South-East Bureau on the what and the why:

--

Hamvention producer Garry Matthews, K-B-8-G-O-L says conflicting commitments will keep regular FCC presenters Riley Hollingsworth, K4ZDH, and Bill Cross, W3TN from attending. Matthews says the Hamvention tried to find suitable replacements, but none were available.

Speculation suggested that FCC officials might use the Hamvention's Forum to release news of a so-called omnibus Amateur Radio Notice of Proposed Rule Making expected out in May. The notice would consist primarily of outstanding rules change requests and pending petitions for reconsideration. With the Dayton FCC forum canceled, what venue, if any, the Commission might use for its release is not clear.

And what about the two hours on Saturday morning May 17th the FCC was supposed to fill? Matthews says it's being offered to other session leaders who might not like their current time slots and want to change. He says the FCC hould be back in 2004 with Hollingsworth, Cross and perhaps others representing the

Commission.

From the South-East Bureau in Birmingham Alabama, I'm David Black, KB4KCH.

--

We will have more Hamvention 2003® happenings later on in this weeks Amateur Radio Newsline report. (ARNewsline™)

**

RADIO RULES: FCC TAKING COMMENTS ON PLC NOI

And speaking about the FCC, e have a follow up on last weeks story about the agency releasing its Notice of Inquiry on the deployment of ''Broadband over Power Line'' or B-P-L technology. Now comes word that the complete Notice of Inquirey which was released on April 28th is available on the FCC Web site. Also that the FCC now is accepting electronically filed comments via its Electronic Comment Filing System ECFS Express page.

But what about the actual affect of B-P-L on ham radio. An ARRL Bulletin, explains that ''Broadband over Power Line'' is really a form of carrier-current communication better known around the world as power line carrier or P-L-C.

B-P-L would couple high-frequency RF to parts of the power grid and use existing power lines as the transmission medium to deliver broadband and Internet access. This is the same technology refused for use in Japan becuse tests showed signifigant interference to consumer electronic products including Amateur Radio on the high frequency bands. And in the Notice of Inquirey the FCC does acknowledge the signifigant interference risk from B-P-L.

ARRL Lab Manager and RFI-guru Ed Hare, W1RFI, also has concerns. A noted expert in the field, Hare cautions that deployment of B-P-L could affect every amateur in communities where it's employed. This, by causing a significant increase in noise levels. Obviously, this is one isssue that a lot of hams will be filing comments on with the FCC. (ARRL)

**

ENFORCEMENT: UNAUTHORIZED OPERATION BRINGS $5000 FINE

The FCC has issued a $5000 fine to Blue Ridge Erectors, Inc. of Bangor Pennsylvania. This, for operating radio transmitting equipment on 467.250 MHz without Commission authorization.

According to the FCC, back on August 27, 2002, the agency’s New York Field Office issued the forfeiture notice to Blue Ridge but the company has not filed a response to the N-A-L. After waiting almost three-quarters of a year the FCC has affirmed the fine and has ordered Blue Ridge Erectors to pay the $5000 within 30 days of the release of its Order.

For more information on this one take your web browser over to the FCC website at http://hraunfoss.fcc.gov/edocs_public/attachmatch/DA-03-1366A1 (FCC)

**

ENFORCEMENT: FCC ALLEGES MICHIGAN HAM ENGAGED IN DELIBERATE INTERFERENCE, THREATS

The FCC claims that a ham has engaged in deliberate interference, broadcasting and that he threatened other amateurs. And now the agency is sending Michael Guernsey Sr, ND8V, of Parchment Michigan a tape recording to back up those assertions. Amateur Radio Newsline's Blair Alper, KA9SEQ, has the details:

--

According to the ARRL Letter, since late 1998, Michael Guernsey, Sr., N-D-8-V, has been the recipient of seven letters from FCC Special Counsel Riley Hollingsworth. This includes two warning notices. And in 2000, the FCC threatened to designate Guernsey's license for a revocation and suspension hearing. Guernsey subsequently agreed to a nine-month suspension of his High Frequency operating privileges in 2001.

But on April 7th of this year Hollingsworth again wrote to Guernsey. This time Hollingsworth said that the operation of Guernsey's station over the last several years raises questions about the Michigan hams' qualifications to remain a Commission licensee.

According to Hollingsworth, this time there is audio to support the claims. The recorded transmissions were made this past March 26th, and are said to back up complaints from other amateurs of deliberate interference on 20 meters. In his letter, Hollingsworth noted that some of the interference apparently sprang from on-the-air personal disputes or from what Guernsey perceived as deliberate interference to his transmissions. Even so, Hollingsworth said, Guernsey has apparently ignored the Commission's written and verbal warnings to not retaliate with similar behavior.

Hollingsworth advised Guernsey that the alleged deliberate retaliatory threats and transmissions on top of other QSOs are contrary to FCC rules. He also stated this indicates that the numerous warnings issued to date have little, if any, effect in regarding to bringing Guernsey's operation into compliance with Commission rules, indicating that other, harsher enforcement action may be needed.

For the Amateur Radio Newsline, I'm Blair Alper, KA9SEQ, reporting.

--

Hollingsworth told Guernsey review the tape recording and respond in writing and in detail within 20 days of reciept of its reciept. He said the FCC will use the information Guernsey submits to decide whether to designate ND8V's license for a suspension and revocation proceeding or to lift voice privileges from Guernsey's license for the remainder of his license term, which ends in 2012. (ARRL, FCC)

HAMVENTION 2003®: MEET THE MAN BEHIND QRZ.COM

Want to meet the man who makes possible the famed QRZ.COM website? If you're going to the Dayton Hamvention this year, be sure and make it a point to stop

by the W5YI booth in the main building and say hello to Fred Lloyd, AA7BQ, the founder of QRZ.COM. Fred says that he will be there throughout the show and will have some nice QRZ.COM name badge souvineers to hand out to everyone who stops by along with the latest QRZ Ham Radio CD-ROM at a special show price. (QRZ.COM)

**

HAMVENTION 2003®: THE DX HOSPITALITY SUITE

The Northern Ohio DX Association and WVNO Radio will once again sponsor a Hospitality Suite at this year's Dayton Hamvention. The suite will be open on Friday and Saturday evenings in Suite 1011 of the Crowne Plaza Hotel. The Crown Plaza is the old Stouffers located in downtown Dayton.

And in a tribute to one of the areas best known hams, the association is dedicating this year's Hospitality Suite to "Silent Key" Jim Hire, W8ZET, who was a Northern Ohio DX Association Honorary Life Member.

Hire’s wife, Janeen, KC8BRS, has decided to keep the tradition going. She will be providing some special memorabilia of Jim at the Hospitality Suite. (NODXA)

**

HAMVENTION 2003®: RAIN - NEWSLINE BOOTH

And by the way, if you are one of those planning to attend Hamvention 2003, please be sure to pass by the RAIN, Newsline and WA0RCR combined booth to say hello. Its in the Silver Arena area of the HARA Arena complex in space number 358. We hope to see you there. (ARNewsline™)

BREAK 2

This is ham radio news for today’s radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org heard on the W7SP repeater in Salt Lake City Utah and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

CHANGING OF THE GUARD: ED JUGE, W5EJ, - S.K.

Some sad news to report. Word thar well-known amateur Ed Juge, W5EJ, has passed away.

Aaccording to longtime friend and colleague Bob Miller, K2RM, Juge, the former W5TOO, was an executive at RadioShack for many years and one of the people who kept ham radio on the company's radar. Outside the world of ham radio, W5EJ was a well-known and well-respected figure in the computer industry.

Ed Juge also had served on the ARRL No-Code committee in the late 1980s, chaired the ARRL Digital Committee in 1992 and was particularly active in QRP. He is survived by his wife, Jo, KA5ABC, by two children and three grandchildren. (CQ)

**

EMERGING TECHNOLOGY: COGNITIVE RADIO - IT LIVES

Believe it or not there a movement underway at the FCC to increase spectrum efficiency through the use of a new technology being called cognitive radio.

What is cognative radio you ask? This is radio gear and antenna systems that could adapt to their operating environments by automatically identifying vacant spectrum, switching to that spectrum and carrying out a specific communications mission.

Cognitive radio will also be the subject of an upcoming workshop at FCC headquarters. More information is at the http://hraunfoss.fcc.gov/edocs_public/attachmatch/DOC-233615A1.doc (CGC)

**

ON THE WEB: HOW STUFF WORKS

Want to find out how something works? Try taking your web browser over to www.howstuffworks.com. The site is a wealth of information on just about anything in life including ham radio. In fact, if you want a good laymens explanation of our hobby, the direct U-R-L is http://electronics.howstuffworks.com/ham-radio.htm (AE5DW)

**

SPECIAL EVENT: AMATEUR CROSS BAND COMMUNICATIONS TEST

Iin celebration of the 54th anniversary of Armed Forces Day, the United States Army, Air Force, Navy, Marine Corps and Coast Guard are co-sponsoring the annual Military and Amateur Radio Communication Test for 2003. These tests provide hams and short wave listeners an opportunity to demonstrate their individual technical skills while receiving recognition from the Secretary of Defense along with the appropriate military radio stations.

According to an Internet post by N6DDF, although the actual armed Forces Day is celebrated on Saturday, May 17th the crossband communications test was to be conducted one week earlier on May 10th. This, so that it would not conflict with the Dayton Hamvention

QSL cards will be provided to those stations who made contact with the military stations. Also, a special commemorative certificate will be awarded to anyone who receives and copies the digital message from the Secretary of Defense. (Via Internet)

**

DX

In D-X, members of the Clube Radioamadores do Entroncamento will use the special callsign, CS7AL, and will be active May 31st from Castel Alcanede for the Portuguese Castles Award. Operation will be on 40 and 20 meter SSB. Castel Alcanede is located in the Province of Ribatejo. QSL via CT1BXE, direct or via the bureau. (OPDX)

Also look for W2AZK and KF2HC from the North Jersey DX Association portable on St.Croix from June 12th to the 19th. Operation will be SSB and CW on 160 through 10 meters. QSL direct or via the bureau to the call worked. Confirmed QSOs are good towards the North Jersey D-X Association award. See www.njdxa.org for details. (OPDX)

**

THAT FINAL ITEM: ROYAL HONORS

And finally this week, a radio amateur has received royal honors in the Netherlands. Hans van de Groenendaal, ZS6AKV, of the SARL news service has the story of Lou van de Nadort PA0LOU:

--

Lou van de Nadort PA0LOU, retired Chairman of the International Amateur Radio Union Region 1 was recognised by Queen Beatrix of the Netherlands for his outstanding contribution to Amateur Radio. He was decorated with Member of the “Order of Oranje Nassau”.

Lou was one of the 3594 people who were recognised this year by the queen when the Royal Recognition awards were announced on April 30, in Holland known as “Koningine dag”, the queens birthday .

Lou van de Nadort retired from the IARU Region 1 Executive in October last year after having been almost 28 years at the helm of the organisation. In his farewell editorial in Region 1 News he called it retirement from active duty and wrote “I will always have IARU and its work at heart and will continue to support the cause"

The medal was presented to Lou at his home in Zundert in Holland when the Major and a delegation of civics and members of the VERON Council arrived there on April 30. Lou said it took my totally by surprise, I never expected it.

Hans van de Groenendaal ZS6AKV

--

ZS6AKV adds that the award is an acknowledgement for PA0LOU’s outstanding contribution to the community. (SARL News Service)

> >Being #1 in cable ratings is "narrow-casting"?>

<>

<<>>

relative to cable news, yes i think so. most news operations wouldn;t be as bold as to use such marketing (for want of a better word) to sell their product. the traditional way would be to hire big names.....cover all the stories...get the big scoops get new hi-tech graphics but just being better at reporting would take too long and would be way too expensive....its better to find the "disenfranchised" segment and give THEM what they want.

gotta fill 500-channels somehow and the future may be "news to your views".

in the area where i live there is a local t-v station that has the highest share of news viewers than any other station in the us. (not a major metropolitan area) some of the stations competitors actually do a better job of reporting (for example they win lots of news awards and spot reporting awards.....the number-1 just won 2-state awards for p-s-a and childrens show.) but viewers don;t leave the #1 for their competitors. how can the #1 station be beat? better reporting (relative to the #1 which has the revenue and the resources to cover things pretty well) is not going to help you win. i've jokingly suggested that the competition follow fox's lead.

enjoy,
mark

Consider the original post at the top of the thread included a rant that singled out a single broadcaster, CC. Since you felt CC (but no other co.) was an important component of a discussion involving radio and the tornado disasters , which CC stations did not perform well regarding the tornado coverag? Also, how did stations with different owners perform better than these CC stations?

898. XM radio no signal - HELP PLEASE!!

Newsgroup: rec.radio.broadcasting
Date: 2003-05-17 03:46:29 UTC
From: Darius <yeahright@whatever.com.easynews.com>
Message-ID: <ba4bal$2cv$1@xuxa.iecc.com>
Source record: 8126

Having gotten absolutely fed up with the crap on FM radio, I decided to give XM a try, so bought the Delphi SkiFi receiver and the 'Boombox' player. Got it home, plugged it in, and all I got is a message that said 'No signal' So I spent about 3 hours trying to 'aim' the antenna every which way (and them some), trying it in ever room in my apartment and every window - not even a trace of a signal on the 'antenna aiming' screen.
So, I put 6 D batteries in it, walked out to the parking lot, and it worked great. However, as soon as I got anywhere near the covered walkway of my apartment, the signal died instantly :-(
I have windows on two sides of my apartment, but I guess they are the 'wrong sides' .. I'm really not sure which side is south here. I live on the 1st of a 3 floor apartment.
What I want to know is, am I just S.O.L. here, or might I have better luck with a better antena, or possible a different XM receiver? Having previewed some of the channels outside, I really want this to work!!

PS - I apologize in advance if this is the wrong group for this.

PPS - Sending this for a second time - don't think the first message ever made it!

Really? So tell me how did Limbaugh's audience compare with the total audience of ABC,NBC,CBS,CNN,PBS, and NPR? Or the readership of such print outlets as Los Angeles Times, Washington Post, or especially the NY Times, since other media outlets across the country rely on the NY Times for their editorial guidance.

901. BiteMan The Prep-Sheet... A sample of what kind of info you would get every day M - F

Newsgroup: rec.radio.broadcasting

We are radio's BEST friend. What we offer is called BiteMan The Prep-Sheet with at least 15 pages or more of all the information that is worth sharing with your listeners. It is a daily sheet M thru F. Why search the internet for showprep when BiteMan The Prep-Sheet has done it for you. We have scoured the internet for the BEST showprep in the world. It is $36 for 3mo.'s or $72 for 6mo.'s http://www.biteman.net

MANSON BRINGS ON "THE GOLDEN AGE"

MARILYN MANSON's "The Golden Age of Grotesque" arrives in record stores today, three years after his last album, "Holy Wood." Manson celebrated the album's release with his Grotesk Burlesk party at the Key Club in Los Angeles last night. Manson performed a seven-song set featuring five new songs. "I love Manson, that's why I'm here," former GUNS N' ROSES drummer MATT SORUM told Rolling Stone. "He takes it to the extreme. It's a real show, you always know it's going to be an amazing visual performance."

NOEL REDDING DIES

NOEL REDDING, the English bassist best known for playing in the JIMI HENDRIX EXPERIENCE between 1966 and 1969, died Monday of unknown causes; he was fifty-seven. Redding played on Hendrix's three most popular recordings -- "Are You Experienced?" (1967), "Axis: Bold as Love" (1968) and "Electric Ladyland" (1968) -- before departing to start his own bands, FAT MATTRESS and the NOEL REDDING BAND. As a member of the Jimi Hendrix Experience, Redding was inducted into the Rock and Roll Hall of Fame in 1992.

JACKSON SUES MOTOWN

MICHAEL JACKSON is suing his former label Motown Records and its parent company Universal for unpaid royalties and ownership of his early recordings. Jackson claims that Motown breached a contract dated January 1980 that required the label to pay him royalties for pre-1976 recordings he made as a solo artist and with the JACKSON 5. "Neither Motown nor its successors have provided accounting or paid Jackson a single dollar in royalties," reads the suit. "He seeks a complete and accurate accounting and full payment of all royalties due."

YORN RAINS ON FARRELLYS

PETE YORN will cover the ALBERT HAMMOND hit "It Never Rains in Southern California" for the upcoming Farrelly brothers comedy "Stuck on You." Yorn, who is touring behind his new album, "Day I Forgot," will record the song on the road. "My band brought all this recording equipment, like old four-tracks and stuff," Yorn told Rolling Stone. "We might just do it in a

hotel room." The Farrellys provided Yorn with his first break, using two of his songs in their 2000 film, "Me, Myself and Irene," before the release of his 2001 debut.

IN THE NEWS

JAY-Z, who already runs a record label, clothing line and vodka company, will open a sports bar, 40/40, in New York City on May 28th . . . A film student's footage of JOHN LENNON from the former BEATLE's "lost weekend" in 1974 will be auctioned in London in July . . . The Motown songwriting team HOLLAND-DOZIER-HOLLAND will receive the Icon Award at BMI's annual pop awards tonight in Beverly Hills, California . . . JEFF BECK will join the B.B. KING Music Festival, a two-month tour scheduled to begin in late July on the West Coast . . . LISA MARIE PRESLEY will begin a ten-date tour with CHRIS ISAAK on May 31st in Mansfield, Massachusetts . . . SEVENDUST will enter an Atlanta studio with producer BUTCH WALKER in two weeks to record their next album.

ASHANTI will open for MARIAH CAREY's summer tour starting July 18th in Anchorage, Alaska . . . Shooting on the feature film "TENACIOUS D in the Pick of Destiny" is expected to begin by year's end . . . OL' DIRTY BASTARD, recently released from a two-year prison stint, has been recording with the NEPTUNES' PHARRELL WILLIAMS . . . RADIOHEAD, the FLAMING LIPS, VAN MORRISON, JETHRO TULL, CRAIG DAVID, JAMIROQUAI and others will perform at the thirty-seventh annual Montreux Jazz Festival in Switzerland, which runs July 4-19 . . . DOLLY PARTON, JIMMY VAUGHAN and DELBERT McCLINTON will make guest appearances on "Beyond Time," the solo debut by ASLEEP AT THE WHEEL's RAY BENSON . . . New Orleans rockers SUPAGROUP will release their self-titled debut on July 22nd.

902. V - The Production Library

hi, has anyone got this, we are setting up a radio station for a wired hospital system and are still in the early stages, we are experimenting with different presenting techniques and basically making jingles etc, we would like to have v - the production library but are unable to receive until we have a valid MCPS licence, but we are unable to get this until the station is fully up and running. Would it be possible for anyone who has this to do us a copy, it will not be broadcasted, it will be used purely for practise, I would be willing to pay all costs for cd's postage etc, when the station is up and running properly we will use the licensed copy's etc.

TIA

Marc Turner

If this is true, why are people listening to commercial broadcasting? With your premise, we'd have to assume that CD and tape sales would be way, way up. But RIAA keeps crying the blues that they are down.

904. High School and College Broadcasting stations here is 1927 LaneTech High School - Chicago

High School and College Broadcasting stations here is 1927 LaneTech High School - Chicago

http://www.smecc.org/lane_technical_high_school_-.htm
here is tonight's work extracted from the 1927 lane tech - Chicago yearbook. would have loved high school there!

We need more personal write-ups and past stories to add to the museum's web site here.
Please respond off list ok? check your old yearbooks the family has laying around.... see if one of those old high schools or colleges had a station! let's document it! Our address is below...

need old year books! need lane tech before 1927, as this 1927 article is when they just rebuilt the station.... we want to see what it looked like earlier than that!

Please check our web site at
http://www.smecc.org
to see other engineering fields, communications and computation stuff we buy, and by all means when in Arizona drop in and see us.

Yeah, right. :) Fox News has gotten to the successful place where they are by departing from the traditional slants of the major broadcast media outlets and by hosting guests who take opposite sides of each issue and let the best arguments and logic win.

The FM30 is a high quality stand alone transmitter that is extremely reliable.
This particular radio was never used except as a backup, it is mechanically and cosmetically in excellent condition. It has a manual that is very descriptive and helpful.New these go for about $4000..I don't expect that, but please don't waste my time with ridiculous offers.

I do not visit this newsgroup so call if you are serious about this unit.

There used to be a one-man radio station up here - WVCA-FM in Gloucester, which played public domain classical music.
He wasn't much different than this guy.

> http://home.att.net/~rhhardin/weather2.ra (61k) Intern Announcer Next Week Avoiding Sounding Like Him At All Costs

Here in the Boston area, we still have several non-commercial radio stations that are run by college students for college students (that haven't been turned into revenue generators) and you will still find young ladies on the air making their first on-air announcements. It's a bit unpolished but it is pleasant to listen to.

Maybe it's strange, but some would rather listen to content than polish.

I'll jump in here (Hi Ed...long time...)

Pay for radio. just don't get that one.

I burn my own CD's, and monitor AM MW and SW. Just bought a Sony Xplod am/fm/sw for the car. Maybe Gene Scott will be more interesting than radio today. Here up the highway in Awstin it is VERY bad, with what is very little CC involvement. Actually I have not listened to any of theirs here in the two years I've been back. When I left Awstin in 1991 they had one flea bit FM class A. And a 50Kw flame thrower on AM in SA. My how the world has changed.

But pay for radio? I don't get it. That ain't radio.

In radio as in TV, the programming is not the product. You are not the
customer. YOU are the product. The advertiser is the customer.

Some people would rather just pay money outright rather than allowing
themselves to be packaged with other members of their demographic and
sold to the highest bidder. Cash on the barrelhead seems more
straightforward and efficient, not to mention less annoying. At least
the person consuming the programming is now the person the broadcaster
has to please, which should in theory lead to a better service. (In
practice... well, look at cable/satellite TV. Still lots of crap. But
then, 90% of everything is crap.)

Well it costs money to broadcast the signals, so you either pay with your time, by not getting what you want, or pay with your wallet and get what you want.

> and the tornado disasters , which CC stations did not perform well
> regarding the tornado coverag?

I think CC is widely accepted as being the "icon" of radio consolidation
since they own so many stations that are unattended turnkey operations. It
really doesn't matter if it's CC, Cume-U-Less, Joe Blow Broadcasting or the
Infidel Radio Network... the point is, which stations decided that a severe
weather outbreak of this magnitude wasn't worth going live for.

> Also, how did stations with different
> owners perform better than these CC stations?

So far, CC actually had some instances where they provided live coverage
during the storms, and others where they didn't. There were also instances
where stations owned by "other companies" did no more than "sit on the
bird".

If your nearest live station is 70 miles away, you're going to have a
pretty hard time hearing it through all the lightning interference.
It's kind of stupid telling people to have a battery-operated radio at hand
for emergencies if all they'll be able to pick up locally is canned
programming, isn't it?

Yes, I can now name some of the larger applicants:

Educational Media Foundation (K-Love/Air1)
Radio Assist Ministries
CSN International (and affiliated churches).

These three and assorted smaller religious broadcasters account for
the lions share of the applications, I've discovered. In the states
near the Mexican border, there are alot of spanish-language religious
translators, LPFMs, etc., trying to make their mark also.

There have also been some legitimate NCE-FM translator/LPFM applicants
in local areas as well. In Utah it's KBYU, and they are a 24-hour
classical music station, and in Arizona there's KNAU (Board of Regents
for and in behalf of Northern Arizona University) that have alot.
Both of these will provide very much needed services to the
communities they will serve in their states, being that classical
music and fine arts educational programming is rare to begin with. In
the case of the Utah stations for KBYU, this will replace the
classical music programming dumped when KUER went all news-talk two
years back.

What equipment?

The transmitter had been removed by its owner Nozema,, and was not part
of the deal.
The old TX, used by Laser, was only a cabinet and a few parts,
overboard.
The generators are not in working order, the TX was fed by hired
outboard generators.
There was only a simple studio; worth maybe 2000 Pounds.

leaving us with massive repair bills.

Also after it was sold the new owners themselves, to my surprise, did do
nothing to prevent vandalism.

>
> Our main priority at the moment is to bring the MV Communicator back from
> Pampushaven in the Netherlands

The ship MUST be removed since all the permits for anchoring are in the
hands of Nozema.
The new holder of frequency 1224 kHz (to be made known at the end of the
month) might want to get on the air ASAP , Nozema needs to built a
platform or whatever right there for the transmitter.
1224 kHz is assigned to that site.

Essex, UK so we can carry out repairs and
> restore her to her former glory as a working radio ship.

Do they realize that it is in a bad condition, apart from the recent
vandalism? Not seaworthy.

You are attempting to draw a comparison of apples and bowling pins. Arnett was let go by his employers because he gave words of encouragement to the enemy, thereby aiding and abetting the enemy. That was not viewed favorably by his employers, although it was viewed favorably by the Hussein sympathizers.

Rivera did not hurt anybody, and nobody was hurt by Rivera's broadcast that gave him so much flack. First of all, there was a military censor standing next to him (off camera) just as there was for all embedded reporters. He didn't give away any specific locations. If he had actually began to broadcast details that were considered sensitive, he would have been removed from the air mid-sentence. He did not give any aid nor any comfort to the enemy. And fair and balanced has nothing to do with whether you fire an employee because some other network has decided to fire their employee for doing something unrelated.

> how about when a fox reporter on the scene of demonstrations does her job and

Commentary would be discussing whether the protests were right or wrong, or if she agreed with the protests.

> its not like the residents of baghdad asked the soldiers to free them

Liberals don't watch Fox News? Well they sure love to BE on Fox News. Every night liberal guests appear in the same numbers as their conservative counterparts.

Why DID CNN bury this important story for twelve (12) years? Nobody claimed Hussein was a nice guy, but CNN had knowledge that he was much worse than many or most people thought, yet intentionally kept silent. CNN was keeping secrets to protect their own access to Hussein and his thugs so they could report more misinformation from them.

Clear Channel is big because people listen to their radio programming. Good for them. If nobody listened, the company would fail.

> fox has a niche but i dont know if its
> ideological or not but....moores book would make money (as frankens and other

Problem: I DID see those kinds of stories and footage. Perhaps the person who didn't tuned out. A better question is why we didn't see the existing footage of the results of Hussein's poison gas on children, women, and men? Why didn't we see the footage of the thousands of Iraqis whose ears have been lobbed off?

> know viewers here don;t want to see

There's what they said and what you heard them say. I never heard anybody ask "who are [you] to question the admininstration", rather there was a chorus of people saying that it is ok and a duty to question leadership. The problem was the

bankruptcy of the protestors' arguments, or any intelligent reason at all why the same protesters didn't protest Clinton's bombing of Baghdad [1998] or Kosovo [1999]. Please tell me when you heard that being said or what guest was there, and I will attempt to pull the actual trascript. Also please quote with quote markings on each line, your post makes it hard to tell what you are writing and what you are quoting.

The reason for this is not consolidation. It is the fact that many areas have more radio stations than the market can support. Thank the FCC for Docket 80-90 and the dropping in of a thousand or so FMs that, in the most part, were not viable. However, their introduction caused existing successful stations to have to cut back, go on satellite programming or take up voice tracking.

Before consolidation, nearly 60% of US stations were no profitable. You expect a money losing venture to be expanding its service?

923. CNBC Arabiya economic channel to broadcast from Dubai

CNBC Arabiya economic channel to broadcast from Dubai
CNBC Arabiya, a regional Arabic-language satellite economic channel, will launch operations from Dubai next month, news editor Walid Kurdi has announced.

The channel, which will operate from Dubai Media City, will provide in-depth coverage of the economic and business implications of local and international affairs, he told a news conference also attended by chairman and chief executive officer Zafar Siddiqi.

CNBC Arabiya, owned and run by Middle East Business News (MEBN) under a licensing and affiliation agreement with CNBC, will be the latest addition to a growing number of regional news outlets that have chosen Dubai Media City as their base.

Dubai, one of seven emirates making up the United Arab Emirates federation and trading hub of the oil-rich Gulf, has launched a multi-billion-dollar campaign to also become the region's tourism, information and e-commerce capital.

Dubai has its own satellite business channel, which was launched in 1999.

Rick Cotton, president of CNBC Europe, told the news conference that CNBC Europe and CNBC Asia, both joint ventures between NBC and Dow Jones and Company, would "work closely with CNBC Arabiya to provide the channel with access to the network's global news resources.

I don't recall who is behind it, but they supposedly have millions of dollars committed to this project and they plan to roll out a 24/7 network. It was in the news a couple of months ago and was great fodder on many of the talk shows.

www.100000watts.com
Use the SEARCH link at the top and you can find all the stations
on ANY AM or FM freq (or TV) in the US and Canada....OR the AMDATA
Base program that uses the FCC data can also give you xmtr location,
callsign, City Of License (COL) and power PLUS antenna config if
directional! I can send ya the program or I THINK you can get it from
the FCC web site (www.fcc.gov and then search for AM Database)

<snip>

> WCFL Chicago 1967

I can't give you an exact date, but it was early in 1967 in
overnights, replacing the famous all-night jazz show of Sid McCoy and
the late Yvonne Daniels. Uncle Lar got lots of "What is this rock &
roll (expletive), baby?" at "ACtion2-1650," the station's
contest/request line, that first night.

> WLS, Chicago August? 1967 - July 1972

It was sometime in the summer, not too long before I myself came to
Chicago in September 1967.

> WCFL, Chicago July 3, 1972 - March 16, 1976
> WLS, Chicago September 16, 1976 - August 28, 1987
> WUBT, Chicago May 25, 2000 - January 10?, 2001

It was the Saturday previous to when WUBT flipped from urban oldies to
CHR, which was Jan. 12. That was on a Friday, which made Lujack's
last show Jan. 6, 2001. It should also be pointed out that the people
at WUBT did their damnest to cover up that Lujack was in New Mexico
and not in Chicago on his shows--and he went along with the whole
phony coverup. I guess the checks always cleared. :)

Now that you can see the translator apps on the CDBS, it seems that about half the applications were from a handful of applicants. The "satillator land grab of 2003" is well underway.

928. Any advice on radio management

I know that the Arbitron ratings are very complex and probably well over my head. That said, I thought I'd managed to grasp how it works generally for stations, time slots, markets, etc.

Just when I thought I had that all noodled out, I recently heard that broadcasters can make a blanket statement regarding listenership based on the following formula:

If a person listens to at least 15 Minutes of a show per week, that show may claim them as a listener for statistical and advertising purposes.

As a result, a radio show can say "We have Ten Zillion listeners!", even though many of those souls may not have their crystal sets tuned into the show for any significant portion of the time.

Right? Wrong? Way off base?

?^) Dave

Right idea but it doesn't work. 90% (or more) is crap, so I'd rather
not pay for it. Show me a service that consistently gives me the
quality of signal and content that I get sporadically from WQXR and
BBC3 and I'll be happy to pay.

>Nothing has been done yet.

Snipped as much as I could.

I have to back up what you say Ruud.

Last Sunday I met the engineer who worked on-board when it was
broadcasting as Laser Hot Hits.

Mike confirmed what you say above about the condition of this motor
vessel. The hull alone is in a sad state with many dents in the steel.

The main transmitter he looked after was an old 25Kw CSI which never ran
at full power.

I hope the new owners have deep, make that very deep pockets.

Then why not do your first week or so with dry idents and sweepers, and
get v as soon as you have your MCPS licence? They're very prompt at
sending them out, and they're also very nice people.

933. Re: No FM Radio inside building

Newsgroup: rec.radio.broadcasting
Date: 2003-05-18 23:17:12 UTC
From: Chris Boone <CBoone@Earthlink.Net>
Message-ID: <ba949o$r23$1@xuxa.iecc.com>
Source record: 8060

If you can put a single antenna on the roof (TV style horiz if you
can), then you can do this.....use a LOW gain preamp (like 6 to 10db
of gain in the FM band) preferably with a good multistage front
end tuned to the FM band (to keep intermod and overload down)...
then route the amplifier to "Leaky coax" or Radiax (trademark name)..
this is somewhat expensive BUT with say 1/4 or 1/2 in Radiax run
down the center of the hallways, there is enough signal leakage to
reach the radios in the office....OR another way (and may be cheaper
depending on the number of connections) is use CATV hardline (1/2 inch
or larger) and then use TAPs like CATV does to feed directly to
the radio IF they have external antenna connecions...if they dont,
you can have problems trying to connect to them..the TAPS have higher
loss but donot load down the signal as splitters do...thus the signal
in the main trunk stays the same (except for normal coax loss) and does
not get cut in half or more everyplace a splitter would be used!

I have done both....also have used multiple xmtrs in closed coax
systems for in house use...but there is NO cheap way to do it for
multiple rcvrs...it WILL cost something no matter what..

What exactly did Traditional Values do in their past actions that was related to poisoning senators with anthrax in the mail? Please explain this.

> Since we don't yet *know* who did this, such a report
> could yet turn out to be correct.

A report that says Santa Claus is reponsible *could* turn out to be correct. But you better have some evidence first.

>
>
> If NPR had evidence it would be by no means unreasonable to run the

Errors yes. But they neither rely on taxpayer dollars nor do they pretend they do not have bias.

> > Well, let's see. NPR had a president, Mankiewwicz, who was a George McGovern

> necessarily make them right-biased, but control of NPR by Democrats
> makes it left-biased?

Many commercial networks are owned by stockholders, of which you or I can become one. Next, commercial networks must exist in the free market and succeed on their own. NPR is paid for with TAXPAYER dollars which is taken from every taxpayer involuntarily. If liberals or democrats want to have their own left biased network or networks, fine. Let 'em go for it. But why should a network collecting taxpayer dollars be biased at all, in any direction?

>
>
> (Carter was hardly a liberal. Clinton was outright conservative, unless
> you're talking about his personal (im)morals which really offended a lot
> of us on the left too.)

No. Clinton was forced to be occasionally conservative after the 1994 elections. Remember Clinton before then? The Clinton health care plan was as conservative as it was successful.

>
>

That's interesting...there are scores of religious stations here where I am (a good portion
of listenable AM stations actually) that have commerical licenses.

I was wondering if there might be some production people out there that might want to trade some production stuff. I am looking for elements and swishes rewinds and other cool stuff. Let meknow.. Also would be willing to buy some stuff from someone going out of the biz or someone who just wants to get rid of some stuff.

Thanks

Not exactly. According to the Washington Post, "The veteran
correspondent, known for his provocative on-screen style, was not
officially "embedded" with the 101st Airborne -- a status by which
journalists accompany U.S. troops while adhering to certain ground
rules designed to safeguard military security," although he had been
allowed to accompany a unit for a few days, and the military
apparently had expected he would follow those ground rules. There was
no military censor, he was on the air live, and he did broadcast
details considered sensitive and was not removed mid-sentence.

IMHO Geraldo Rivera is, and always has been, a phony and an
embarrassment to all of journalism. Nevertheless, I would have to
agree that what he did in Iraq caused no real damage and was far less
offensive than what Peter Arnett did. Arnett hit the bottom of a
downhill slide that started after Gulf War I. Now some are even
beginning to question the veracity of the work in Vietnam that won him
his Pulitzer.

Now, how the hell did we get here from talking about how radio did
during the tornadoes? I've yet to see good answers to that question,
and I'm curious to know.

> with arnett? that's not fair and balanced.

<<<You are attempting to draw a comparison of apples and bowling pins. Arnett
was let
go by his employers because he gave words of encouragement to the enemy,
thereby
aiding and abetting the enemy. That was not viewed favorably by his employers,
although it was viewed favorably by the Hussein sympathizers.

Rivera did not hurt anybody, and nobody was hurt by Rivera's broadcast that
gave

him so much flack. First of all, there was a military censor standing next to
him
(off camera) just as there was for all embedded reporters. He didn't give away
any
specific locations. If he had actually began to broadcast details that were
considered sensitive, he would have been removed from the air mid-sentence.
He
did not give any aid nor any comfort to the enemy.>>>

i understand your point of view but i disagree. arnett has no credibility in
the area of discerning whether the u-s lead operation iraqi freedom was
achieving its goals as planned or not. (the subject of his interview on iraqi
tv) he should have been fired, what he did was stupid but using your
measure.....was anyone hurt by his words? as for rivera who was on air
live....are you saying his minder was responsible for what he said? why did
the military make him leave if he did nothing wrong? and trying to judge who
or whether anyone was hurt is not the issue. the both broke
rules...journalistic and otherwise. 2-reporters, both trying to push the edge
for an advantage. both were wrong. both should have been fired.

<<<And fair and balanced has
nothing to do with whether you fire an employee because some other network has
decided to fire their employee for doing something unrelated.>>>

i disagree. and as to fair and balanced...name another news outfit that would
have used arnet in promo's for their news product? just one...fox. arnet
was an easy target....feed the base.

> how about when a fox reporter on the scene of demonstrations does her job and
> tells what happened....but she then goes on to say that the crowd is
apparently
> oblivious to the irony of protesting to the very forces that gave them their
> freedom. i was taught that reporters should report....leave the commentary
to
> others.

<<<Commentary would be discussing whether the protests were right or wrong, or
if she
agreed with the protests.>>>

i stand by what i wrote below.....how would you describe her "irony" comment?

> its not like the residents of baghdad asked the soldiers to free them
> and if they have complaints who's to say they can;t use their ability to
> express themselves. the city has a population of millions and a few thousand
> protested...what's the big deal. that's not fair and balanced reporting,
its
> pandering to the conservative audience to give them what they want to hear.

<<<Liberals don't watch Fox News? Well they sure love to BE on Fox News.
Every night
liberal guests appear in the same numbers as their conservative
counterparts.>>>

that doesn;t refute in any way what i wrote. i did not say fox was devoid of liberal contributors.....

>
>
> finally as to cnn worker who was tortured and they didn't talk about for
> years.....who on earth thought hussien was a nice guy? the reporter involved

>
> its about the money. clear channel isn;t big because they truly care about
> the quality of their broadcasts.

<<<Clear Channel is big because people listen to their radio programming.>>>

they are big because they own more radio stations than any other company in history. the company consolidates and creates radio farms to maximize profit, but the only question i have is whether the communities are being served. i had to laugh that a local newspaper here recently ran an article on a CC station in the capitol was mostly voice-tracked. of course the gm of the station in question said it was a way to bring big market talent to this medium market. yeah right. cost had nothing to do with it.

<<< Good for
them. If nobody listened, the company would fail.>>>

are you saying that CC bought stations that were not on the air and then made them a success? which came first...the listener or CC. rule changes have consolidated media ownership...more changes are coming. anyone think the citizens will benefit?

> fox has a niche but i dont know if its

> guy said who were THEY (actors!!!) to question the administration.......i had
> to laugh...the guy with the outrage was brian kilmeade....the sports guy on
> foxand friends. the weather guy must have been on break ;-)

<<<There's what they said and what you heard them say. I never heard anybody ask "who
are [you] to question the admininstration", rather there was a chorus of people saying that it is ok and a duty to question leadership.>>>

my point wasn't what the guest specifically said.....its with the interviewer, the SPORTS guy, brian kilmeade's outrage.

<<<The problem was the
bankruptcy of the protestors' arguments, or any intelligent reason at all why the
same protesters didn't protest Clinton's bombing of Baghdad [1998] or Kosovo [1999].>>>

i wonder what stand the sports guy took on those issues ;-) yes for some there is hypocracy. actors aside. here's an example of greater hypocracy and

from the what #5 guy in the administration? tom delay says you can;t support the troops AND not support the prez. of course you didn;t hear much on fox on how that was his exact stance during kosovo. which is more important? delay's hypocracy or sean penns. if you watch fox....the answer is simple.

see its not about right and wrong..or even truth. its about OUR side being right.

hannity does this all the time on his radio show. (i haven't seen the t-v show in a very long time) he interviews robert kennedy jr and he says to rk,,,,you said that owning an suv was unamerican....rk said twice that he did not.....hannity says i have a tape of you saying it.....rk says i'll vote rpublican in the next election sean if i said that.....hannity plays the tape and on it you can hear rk clearly say that owning an suv was NOT GOOD for america. hannity'sesponse....SEE! i thought what a major mistake, he just lost his credibility.....i was wrong. why didn;t he? he often conducts interviews where he does not do well. he's apologized twice that i'm aware of after appearing on the sunday morning shows and i wonder what happened to the wunderkind. how does he keep his show? (my point finally arriving)....because its not about right or wrong....its about OUR side being right.

<<<Please tell me when you heard that being said or what guest was there, and I will attempt to pull the actual trascript. Also please quote with quote markings on each line, your post makes it hard to tell what you are writing and what you are quoting.>>>

just watch.....count the eyes rolling...the sarcasm....read the main borders above the running scroll.

hey you want to do a search? try one for monday 5/19. cspan just read from an article (didn;t catch which paper or magazine) on fox news. an inside look. i won;t argue with you about quotes. in a nutshell.... i don't like bias period. but i have a problem with the way fox markets the news.

thanks for the intersting exchange.
mark

I believe you are right about Docket 80-90 introducing more stations to markets that were already saturated (with a few under-radioed exceptions). But once those drop-in stations were allocated and built, the only way they could become profitable was by consolidation.
Owning 1300 stations nationally may not be in the best interest of radio, but a market with 20 stations controlled by 3 owners is probably the only way anyone can make money these days. Sharing facilities & staff, along with voicetracking and syndication and other benefits from group ownership is the only thing that can keep so many stations (and choices) viable. Consolidation within the market is not such a bad idea considering the benefits of keeping many stations from going dark, allowing more niche programming, but this could have been achieved without allowing one company to dominate the entire industry.

946. Looking To Trade Production Stuff

Newsgroup: rec.radio.broadcasting

I was wondering if there might be some production people out there that might want to trade some production stuff. I am looking for elements and swishes rewinds and other cool stuff. Let meknow.. Also would be willing to buy some stuff from someone going out of the biz or someone who just wants to get rid of some stuff.

Thanks

At one time, I built a 9-station cluster in a market of about 700,000 that
had about 40 full coverage fulltime stations. All my acquisitions were
facilities that had gone broke or silent; in a cluster, every one was
profitable.

5 minutes, not 15. Listening for 5 minutes in any quarter hour gives credit
for the quarter hour.
>
> As a result, a radio show can say "We have Ten Zillion listeners!", even
> though many of those souls may not have their crystal sets tuned into
> the show for any significant portion of the time.

Advertising is sold not on reach but on pairs of ears. So cume is not the
driving number, it is "Average Quarter Hour Persons" or the average number
of people listening at any one time in a particular part of the day or week.

When we see rankings of stations published on the web or in local papers,
the "share" figures are based on AQH persons, not cume. Share is "Percentage
of persons listening to the radio at that time who were listening to a
particular station."

Cume is less used, mostly to calculate reach and frequency.

I.Q Tests are a measure of how well you cna read the questions... and how good you are at taking I.Q. Tests... They don't work. My I.Q. is 148 according to the tests. Which shows I am good at taking them, rather than I am very above average, there are people who would score very low in one of these tests but would be much more intelligent than you would give them credit for if you are going purely by numbers. I have been in conversations with people who are desperate to let you know what there I.Q. is... but, have they achieved anything? That is all they have to tell you... the number. Intelligence is more than a number on a test sheet.

I agree the RX-320 is a good receiver for the money. I would invite you to read our review of the unit posted on the Radio Netherlands' Media Network pages and the Receiver Shopping List:
http://www.rnw.nl/realradio/rx_index.html

It makes no difference if shortwave is your only interest with the RX-320, but there is a significant roll-off in reception below 2 or 3 MHz and the radio is (in my opinion) useless in the LW spectrum. Rather than use bandpass filters, less expensive high-pass filters protect the receiver from being overloaded by strong MW signals. Even with a 300-ft inverted-L antenna at 90-feet, I could not hear three airport beacons within 30 air miles of my location. MW reception was limited to the strongest local stations in the Philadelphia market.

I can also comment on the JRC NRD-525 versus the -535. Perhaps not a surprise to some (it was to me), I found the -525 is a better performing receiver on LW than the -535. The newer receiver generated more digital hash and noise on the LW spectrum, probably due to the more complex digital readout and circuitry.

FOR SALE:

The "Radio Crazy" is back. It's loose! Hi!

Part ownership in fulltime 1 KW AM station in Quitman, GA. 1490 KHz. On the air since 1955.

NO real estate included in the asking price of $75,000. For another $75,000 asking, we can obtain the building and 3 acres of land.

If not, the rent for tower and studio combined site is only $400.00 a month.

City of about 4,700 population and about 25,000 live in the 0.5 mv. daytime "primary" coverage area.

About 7,000 reside in the "city grade" intense (5.0 mv/meter) coverage area.

This is the ONLY AM in that (Brooks) county. Near Valdosta, GA.

Joint venture. Active or inactive investors with at least $10,000 each are welcome. All investors would be on the board with full voting rights if desired.

I am a semi-retired (I say RETIRED, not TIRED you fruitloop!) broadcast engineer. Ham since 1950. Age 67. Active and healthy.

Last job in radio was CE for a 5 KW fulltime AM in New York City in 2001.

I am NOT a scam man, man!

Tel: (478)741-1710.

73,

Meyer Gottesman, W6GIV

Amateur Radio Newsline=E2=84=A2 Report 1344 =E2=80=93 May 16, 2003

The following is a closed circuit advisory. Amateur Radio Newsline repor=
t
number 1344 will follow.

Ladies and gentlemen, Amateur Radio Newsline=E2=80=99s support fund admin=
istrator,
Andy Jarema, N6TCQ.

--

I want to begin by saying thank-you to all of those who have contributed =
so far
to keeping these Amateur Radio Newsline reports coming your way. As I sa=
id a
few weeks ago, to continue bringing you the news and to continue to honor=
the
accomplishments of youthful radio amateurs with the Young Ham of the Year
Award, we have to raise about $1000 a month. I am happy to tell you that
thanks to your generosity, we are now about 20% of the way to that goal.=20
That=E2=80=99s the good news. The bad is that we still have 80% of the w=
ay to go and
the bills keep coming in. =20

I know that I have said this before but I have to again. The bottom line=
is
that you, and only you keep all of this going. Its your tax deductible
contributions that pay the cost of producing and distributing Amateur Rad=
io
Newsline bulletins. Its your generosity that makes possible the honor be=
stowed
on a young ham operator every August. =20

Without any doubt, you are the most important part of the Amateur Radio
Newsline family because it is you who tell us through your contributions =
that
you want us to continue. And for that we are eternally grateful.

Remember, Amateur Radio Newsline is a federal 501 c 3, not for profit
corporation, and, as I said earlier, your contributions are tax deductibl=
e.=20
Our address is the Amateur Radio Newsline Support Fund, Post Office Box 6=
60937,
Arcadia California, 91066. =20

Thank you for taking the time to listen. Newscast number 1344 follows
immediately. =20

--

Thank you Andy. Now, Amateur Radio Newsline report number 1344 with a re=
lease
date of Thursday, May 15th 2003 to follow in 5-4-3-2-1. =20
=20
The following is a Q-S-T. The tornadoes of May continue as ham radio le=
nds a
hand and the doors open at Hamvention 2003. Find out the details on Amat=
eur
Radio Newsline report number 1344 coming your way right now.

(Billboard Cart Here)=20
=20
**

RESCUE RADIO: THE TORNADOES OF MAY CONTINUE

According to statics, May 4th through the 10th, 2003 was the most active =
week
of tornadoes on record. This, as scores of twisters ripped across the na=
tion's
midsection, reducing hundreds of homes and businesses to splinters. We h=
ave
more on the storms and the part ham radio played in the aftermath in this
report.

--

It was a busy week for ARES and RACES volunteers across the nations
mid-section. Nearly 300 tornadoes have been reported since the beginning =
of
May. That=E2=80=99s nearly 100 more than the most recent comparable outbr=
eak in 1999.
And so far, May 4th to the 10th has been the most volatile time of all.

Tornadoes have been everywhere from Oklahoma and Kansas to the West and t=
o
Alabama and Tennessee here on the south. And ham radio operators have bee=
n on
the job as severe weather spotters looking for approaching storms. They h=
ave
also been part of the clean-up effort after they have hit.

Among the groups using ham radio is the Salvation Army. Its website says =
that
nine emergency disaster vehicles were set up in Kansas and Western Missou=
ri
following twisters that hit there. Its communications arm -- the Salvatio=
n Army
Team Emergency Radio Network was dispatched to each location to assist us=

ing
Amateur Radio channels.

One twister that struck the Oklahoma City area late Friday the 9th approa=
ched
the metropolitan area from the southwest, then skipped through the city. =
This
storm snapped utility poles, flipped a light airplane parked at a local a=
irport
and ripped apart an elementary school. It also knocked out a lot of telep=
hone
communications bringing out emergency trained ham radio operators to fill=
in.

Not long after this tornado hit, the Federal Communications Commission de=
clared
a general communications emergency for the Oklahoma area. United States
Amateurs were told that they could not use 3 point 900 MHz, plus or minus=
3
kHz, unless they were handling emergency traffic. The FCC said the declar=
ation
was in support of ham radio communications by the Salvation Army's tornad=
o
relief efforts. The ban was in force for about 24 hours, terminating at 2=
2:30
on Saturday May 10th.=20

And on Saturday, May 10th, the weather service posted more tornado warnin=
gs for
parts of Indiana, Missouri and Illinois. And the Storm Prediction Center =
said
severe thunderstorms were likely from eastern Oklahoma to western Ohio. I=
n
northeastern Kentucky, at least 17 people were treated at hospitals and m=
ore
than two dozen homes were damaged Saturday night after a tornado hit in L=
ewis
and Mason counties near Maysville. This put already weary ham radio
communicators back on alert once again. Adding to the misery, torrential
downpours flooded streets and fields in Indiana put hams there on call as=
well.

But it was not over yet. Storms with wind speeds of up to 150 mph hit par=
ts of
Central Kentucky early Sunday the 11th. Homes were damaged in Hardin, Har=
t and
Mercer counties. Retired ARRL President George Wilson, W4OYI, who lives i=
n
Owensboro Kentucky says that there were two siren alerts indicating sever=
e
weather was on its way. He says that local hams involved in storm spottin=

g
duties geared up under the leadership of Emergency Coordinator Jake Jenni=
ngs,
KG4EMO. Thankfully, no twisters actually hit but one was spotted around
midnight causing one of the alarms.=20

Severe weather alert systems and ham radio operators involved in ARES and=
RACES
may be in for quite a work out in the days to come. This is because
meteoreologists say that the 2003 tornado season is really just beginning.

For the Amateur Radio Newsline, I'm Don Wilbanks, AE5DW, in New Orleans.

--

President Bush has cleared the way for federal aid by issuing a disaster
declaration for ravaged areas of Tennessee, Kansas, and Missouri Oklahoma=
. The
tornadoes combined with straight-line wind, lightning and floods to cause=
d 44
deaths from Kansas to Georgia. (ARNewsline=E2=84=A2)

**

HAMVENTION 2003=C2=AE: HAMVENTION WANTS TO STAY AT HARA!

The 2003 Dayton Hamvention is on and the big news is that it wants to sta=
y
where it is. Amateur Radio Newsline=E2=80=99s producer Bill Pasternak, W=
A6ITF, has
that story:

--

The Hamvention wants to stay at the Hara Arena. So says the Dayton Daily=
News
which reports that Hamvention organizers are in negotiations for a two-ye=
ar
contract to comtinue using the Trotwood Ohio facility. My colleague Henr=
y
Feinberg, K2SSQ, has that part of the story:

--

The Dayton Daily News article Bill refereed to quotes Hamvention producti=
on
manager Garry Matthews, KB8GOL. He says that organizers are pleased with=
Hara
Arena and want to keep the show in the area. Also, that no other local v=
enue
can comfortably hold Hamvention at its current size. This says Matthews,=
makes
a move unlikely.=20

A story in the May 2nd ARRL Letter said exhibitors would prefer the show =
to be
held in Columbus if Hara wasn't available. Indianapolis and Cincinnati w=
ere
also listed as possible sites. =20

When asked by the Dayton Daily News, Matthews said that the article doesn=
't
mean Hamvention organizers are looking for another site. But says KB8GOL=
,
organizers do have contingency plans that would move the convention elsew=
here
if Hara couldn't host it.

Will Hamvention 2004 be at the HARA Arena? We should know more by Sunday=
the
18th when Hamvention 2003 comes to an end. =20

I=E2=80=99m Henry Feinberg, K2SSQ. Bill.

--

Thanks Henry. =20

**

HAMVENTION 2003=C2=AE: SOCIAL HOUR WILL HONOR AWARD WINNERS

Now turning to the social side of Hamvention 2003 -- and after all -- the
Hamvention is a major social event -- there is some very good news. Seem=
ingly
taking a cue from the highly successful ham radio cocktail hour at the Na=
tional
Association of Broadcasters convention, the Hamvention will host a simila=
r
gathering this year. As Hamvention General Chairman Pat Neff, N8IGS, tol=
d
RAIN=E2=80=99s Hap Holly, KC9RP, this gathering is to honor the Hamventio=
ns award
winners:

--

Neff: =E2=80=9CTheres going to a an award winners reception at HARA on S=
aturday.=20
Its going to start at I believe 6=E2=80=99 o=E2=80=99clock and it will be=
within two of the
largest forum rooms that will be converted. But its only going to have a
capacity of about 450 people.=E2=80=9D

--

In addition to drinks and horderves what else can those buying tickets to=
this
gathering expect?

--

The award winners will be giving acceptance speaches there and, like I sa=
y, its
going to be an informal to-do that will allow the average attendee to be =
able
to possibly get to talk with the award winners as well.

--

Neff says that the decision to hold the reception at the Hara Arena came=
as
the result of feedback from past Hamvention attendees. Many said it was =
hard
to spend the day at the show and then travel across town for a banquet. =
With
the banquet now history and an informal reception at the Hara taking its =
place,
those wanting to attend need only buy a ticket and hang around. We will.

For the Amateur Radio Newsline, Bill Pasternak, WA6ITF. =20

--

Amateur Radio Newsline has a team of reporters in Dayton and will provide=
full
covering of Hamvention 2003. (ARNewsline=E2=84=A2)

HAMVENTION 2003=C2=AE: BIG HAPPENINGS IN DX

Still with Hamvention news, this years D-X forum should be one of the bet=
ter
ones in recent histoey. So says moderator Jay Slough, K4ZLE, who adds th=
at the
scheduled speakers are a really impressive line up. For instasnce, Daily=
D-X
Editor Bernie McClenny, W3UR, will be talking on the recent AH3D operatio=
n.=20
And Al Hernandez, K3VN on hand with the ZL7C story. The ARRL=E2=80=99s =
Wayne Mills,
N7NG with a DXCC update, and if thats not enough, Tedd Mirgliotta, KB8NW,=

will
be on hand to present the Northern Ohio DX Association Award for the 2002
DXpedition of the Year. It looks like there will be something for everyo=
ne at
Hamvention 2003. (OPDX)

**

RADIO LAW: HR-1478 GETS SUPPORT FROM CQ MAGAZINE

CQ Magazine has joined the ARRL in asking hams to support House Bill HR-1=
478.=20
This is the measure re-introduced by New York Congressman Steve Israel to
expand the limited protections of "PRB-1" to homeowners' associations and
restrictive covenants.=20

According to the ARRL, the 2002 version of the bill died without action. =
The
new bill initially had 13 co-sponsors from both parties including the onl=
y two
known hams in Congress. They are identified as Representative Greg Walde=
n,
WB7OCE, of Oregon and Representative Mike Ross, WD5DVR, of Arkansas. =20

The ARRL and CQ are both now encouraging amateurs to contact their
representatives in Congress to request that they support and even co-spon=
sor
the bill. (CQ)

**

ENFORCEMENT: PIRATE BROADCASTER SENTENCED TO JAIL

A Florida pirate broadcaster will spend the next nine months in a federal
prison. This is the sentence handed down by United States Magistrate Dav=
id A.
Baker against Rayon Sherwin =E2=80=9CJunior=E2=80=9D Payne.=20

Payne=E2=80=99s conviction is the result of an investigation that began i=
n February
of 1999. About that time the Commission=E2=80=99s Tampa Office began rec=
eiving
complaints from residents and broadcasters in Orlando of interference to =
the
reception of licensed broadcast stations. The investigation lead them to
Payne=E2=80=99s unlicensed station after which he was charged with multip=
le counts of
operating an unlicensed FM radio facility. =20

Payne pleaded guilty to two of the counts before Magistrate Baker who als=
o
sentenced him to one year supervised release in addition to the jail time=
.=20

Once he is released Payne must perform 50 hours of community service and =
must
not violate any Federal, State or Local laws of the Communications Act of=
1934.
=20

The FCC announced the sentence on Monday May 12th. The case was prosecut=
ed by
the United States Attorney=E2=80=99s Office for the Middle District of Fl=
orida.=20
(FCC)

**

ENFORCEMENT: AN EXPENSIVE LESSON FOR MICHIGAN HAM

The FCC has told a ham to pay a $12,000 fine for willful and repeated
interference, broadcasting of music and failing to identify with his call=
sign.
Being ordered to pay is Scott E. Kamm, N0UGN, currently of Souix City Io=
wa but
who had his statiion licensed to the town of Waterbury Nebraska when he w=
as
first cited.

As previously reported, last December the FCC T-hunted down a strong sign=
al on
the input to a local repeater to Kamm=E2=80=99s Waterbury Nebraska reside=
nce. Agents
then performed a station inspection where they found a two meter transcie=
ver
set to the repeaters frequecy pair. But Kamm denied any knowledge of the
jamming, telling the inspectors that he never transmitted on the system a=
nd
that the radio gear was used for monitoring purposes only.

But the FCC refused to buy Kamm=E2=80=99s story. On January 24th of thi=
s year the
regulatory agency issued Kamm a Notice of Aparenlt Liability in the amoun=
t of
$12,000. Kamm never responded to it. And so a few days ago on May 7th t=
he FCC
affirmed its earlier order and gave Kamm 30 days tio pay up. (FCC)

**

ENFORCEMENT: $2400 FINE FOR UNREGISTERED TOWER

The FCC has also issued a $2400 a monetary forfeiture to Morris Communica=
tions,
Inc. of Greenville, South Carolina for failing to register an antenna
structure. The FCC calls this one a willful violation of Section 17.4(a) =
of the

Commission's Rules.

On July 8, 2002, the Atlanta Office issued Morris a $3,000 forfeiture not=
ice
for failing to register its antenna structure in willful violation. In i=
ts
response, Morris admits that its tower was not registered, but argued tha=
t the
forfeiture should be rescinded because it did not =E2=80=9Cwillfully=E2=80=
=9D violate the
rules. =20

Morris claims that it made two good faith attempts to register the struct=
ure in
1999, but the Commission first rejected its application on erroneous grou=
nds
and later returned it without explanation.

But says the FCC, the Rules provides that, effective July 1, 1996, the ow=
ner of
any proposed or existing antenna structure that requires notification to =
the
Federal Aviation Administration must register the structure with the
Commission. Abother section of the Rules provides that the owner of an a=
ntenna
structure that had been assigned painting or lighting requirements prior =
to
July 1, 1996 must have registered the structure prior to July 1, 1998. =20

Morris admits that its Adrian tower was not registered at the time of the
inspection on May 7, 2002. Accordingly, the FCC says that that Morris vi=
olated
the Rules and has ordered it to pay the fine. The entire fionding is on-=
line
at: http://hraunfoss.fcc.gov/edocs_public/attachmatch/DA-03-1366A1.doc =
(FCC)

**

RADIO RULES: FCC RESOLVES COMMERCIAL BROADCAST SPECTRUM ISSUE

The FCC has released new procedures to allocate and license the commercia=
l F-M
broadcast band. This, where conflicting commercial and noncommercial use=
s are
proposed. Since most new F-M and T-V channels can be used for commercial
purposes and would be affected by non-commercial proposals, the CGC
Communicator says that this decision may have widespread implications. (=
CGC)

**

RADIO RULES: FAA TO SEND CLEARANCE DATA TO FCC ELECTRONICALLY

According to a Primedia trade publication, the Federal Communications
Commission and the Federal Aviation Administration have announced that t=
ower
and antenna airspace clearance data from the FAA will now be transferred
electronically to the FCC. This will enable the Commission to process an=
tenna
structure registration applications faster and more accurately, and will =
save
staff time at both ends. The electronic transfer of data is also expecte=
d to
reduce the time it takes to get this information into the FCC's database =
from
one to two weeks to only one day. More information is opn the web at=20
http://beradio.com/ar/radio_currents_24/index.htm#tower1 (CGC)

NAMES IN THE NEWS: W9GIG TO DEPART THE IRA

ARRL Central Division Director Dick Isely, W9GIG, says that he will not s=
tand
for re-election to an official position within the Illinois Repeater
Association. Isley has been a guising force within the repeater council =
for
years.

It was Isley=E2=80=99s guidence that helped to create the National Freque=
ncy
Coordinators Committee several years ago. He has also served with ther

Illinois Repeater Associuation for many years and has become a main stay =
in the
repeater coordination community.

According to his departure announcement, the decision to stand-down has n=
othing
directly to do with his position within the ARRL but he says that does wa=
nt to
put more of his time toward League matters. Isley says that he has thoro=
ughly
enjoyed working for the Illinois Repeater Association but feels that it i=
s time
that new people step up to leadership positions. He also wished the grou=
p
continued success in its work of providing efficient and fair Amateur Rad=
io
repeater frequency coordination to the hams of Illinois. (Via E-Mail)

THE IRAQ WAR: WHO IS ACCEPTING WHAT POST-CONFLICT OPERATIONS

With the war in Iraq now just about over, both CQ and the ARRL are accept=
ing
certain operations from that nation for their DX award programs. But th=
ere
are some differences. Amateur Radio Newsline=E2=80=99s Bruce Tennant, K6=
PZW, has
that part of the story:

--
PKG HERE
--

Most observers believe that the situation regarding ham radio in Iraq is=
very
fluid and criteria for operations will change. (ARRL, CQ, others)

**

INTERNATIONAL - AUSTRALIA: NEW 23 CM BEACON

VK4RTL experimental 23 centimeter beacon on air neat Townsville Australia=
. It
weent on the air on 21st April on 1296.444 MHz at Mount Stuart for a tria=
l run.
Q-News reports that this mighty little beacon puts out a massive 2.5watt=
s and
can be heard on most modern tri-band handhelds around Townsville and
Thuringowa. Reception and range reports go to vk4wit@wia.org.au (Q-News=
)

**

INTERNATIONAL - CANADA: CANADIAN SPECIAL PREFIXES.=20

Industry Canada has authorized the use of "Special Event Prefixes" betwee=
n May
24th and July 27th to celebrate the 50th Anniversary of the National Libr=
ary of
Canada. The special prefixes are C-K for all V-E's, C-J for all V-A's, C-=
Y for
all V-Oh's and C-Z for all V-Y's. The special prefixes will therefore be
available for use in the upcoming C-Q W-P-X C-W Contest on May 24 and 25t=
h.

**

INTERNATIONAL - ITALY: WOULD YOU LIKE TO FLY IN MY BALLOON

Remember the 1970=E2=80=99s song Up-up and Away by the 5th Dimension? We=
ll a ham
radio group in Italy has come up with a 21st century Amateur Radio versio=
n of
just such an event. =20

The Milan Chapter of the Italian Amateur Radio Society says that its plan=
ning a
manned Amateur Radio Balloning Experiment to take to the sky on Saturday,=
May
17th from Mantova Airport. Operating on 144.330 Mhz upper sideband, the
in-flight operation is slated to begin between 08:00 to 09:00 U-T-C and l=
ast
between 1 and 3 hours. A-P-R-S will be used to track the balloon during =
the
time its aloft. =20

More information on the flight is the groups wesite. That information ap=
pears
on the groups website at www.arimi.it/rubriche/arbe.html (IT2SAI)

**

ON THE AIR: GRID CIRCLEING ROVERS WANTED

N9REP says over the VHF Reflector that the K9RN VHF Contest Group is now
accepting applications for captive rovers during the June VHF/UHF contest=
.=20
Wendell says that the terrain in and around grid square EN52 is very rugg=
ed and
harsh and that the first requirement for rovers is a vehicle capable of
handling any on-or-off road QSO task, particularly regarding grid circlin=
g. =20

Any team wishing to be a captive rover must supply their own approved veh=
icle.=20
A list of vehicle manufacturers that appear to meet all of the demanding =
Rover
specifications is at www.maximog.com (VHF Relector)

**

DX

In DX, word that the make-up of the CY9 DXpedition team is now complete a=
nd the
operation will take place from July 24th to August 2nd. The team members=
are
N0RN, N5VL, W0IZ, KO4RR, K5AAH, K5AB and VE7SV. They will be taking wit=
h them
a Battle Creek Special and will operate on the low bands during all openi=
ngs.
Callsign will be given either at the beginning of the operation or shortl=
y
before. QSL via N5VL. (OPDX)

**

THAT FINAL ITEM: ITS T-HUNT TIME

And finally this wee, do you like hidden transmitter hunting? If you do =
then
this one is for you. Here=E2=80=99s Joe Moell, K0OV, has the latest info=
rmation on
the World Amateur Radio Direction Finding Championship games that are com=
ing
up.

--

Who are the best transmitter hunters in the country? That's what we'll f=
ind
out when the Third USA ARDF Championships get under way near Cincinnati, =
Ohio
on July 30. The sponsors, OH-KY-IN ARC and the Cincinnati Orienteering C=
lub,
promise two challenging radio-orienteering courses. One will be on two m=
eters,
and the other on 80 meters. This is a test of individuals, and it's all =

on
foot. You'll have five transmitters to find each day, negotiating your w=
ay
through the forest with your map, compass and direction-finding gear. If=
you
can walk or jog a 10 km racecourse, you have the stamina to complete an A=
RDF
event. If you're a senior citizen, don't worry about being trounced by
teenagers, because there are a total of nine age categories, five for men=
and
boys, four for women and girls.

This year, the USA Championships are an international event, combined wit=
h the
International Amateur Radio Union (IARU) Region 2 ARDF Championships. If=
past
events are any indication, there will be plenty of international experts =
in the
sport on hand, so you'll have a chance to learn foxtailing tips and techn=
iques
from the very best. Positions on ARDF Team USA to next year's World
Championships in the Czech Republic are open, so perhaps you can earn a s=
pot
for yourself. We're looking for good candidates in all age/gender catego=
ries,
so encourage your kids and grandkids to give it a try.

For the most intense experience, stay in the dorms at Miami University of=
Ohio,
in close contact with the other competitors. But space is limited, so no=
w is
the time to make plans. You can stay elsewhere nearby if you like. In e=
ither
case, time is getting short, so get registered at the Championships Web s=
ite:=20
www.ardfusa.com That's ardfusa.com

For lots more on foxhunting, including equipment ideas and techniques, go=
to
www.homingin.com. Read about past USA Championships and get a link to th=
is
year's. That's one word "homingin" --- homingin.com.

>From southern California, where there's some kind of transmitter hunt alm=
ost
every weekend, this is Joe Moell, Kay-zero-Oscar-Victor, for Amateur Radi=
o
Newsline.

--

Don=E2=80=99t worry if you missed those websites Joe mentioned. You will=
find them I
the print edition of this weeks Amateur Radio Newsline report. (K0OV,
ARNewsline=E2=84=A2)

**

You got it to work outside so the reciever is good. If your not near a repeater, you may have a problem in the apartment. Make sure your SAT and TER plugs are hooked up properly. Take a look around at other houses and take notice of which way their DirecTV and/or Dish Network antennas are pointed. Your XM anttenna should face the same general direction plus it's designed for use with a reflective ground plane (the metal roof of your car). Get tin foil or any 2ft x 2ft piece of metal behind the antenna and point it at the satellite arc and it will kick in. Good Luck!

967. 'The Translator Boom of 2003'.

Newsgroup: rec.radio.broadcasting
Date: 2003-05-20 16:05:54 UTC
From: jander7@hotmail.com
Message-ID: <badjp2mhq1@xuxa.iecc.com>
Source record: 8096

I'm sure some of you noticed this last week, more will be coming up about this for sure, but here goes....

It looks like there are some 13,000 applications for translators, all of which were filed between March 10th and 17th of this year during a filing window for an auction of frequency space for FM translators.

I mentioned that here in Utah, Brigham Young University is asking for them in five cities, and found they applied for multiple frequencies so they could get one if they had any that did not prove to be mutually exclusive for any reason.

KBYU, a 24-hour classical music station, was one of the small ones in this. The vast majority of these apps were filed by and large by religious networks. The three largest that I can tell were Educational Media Foundation (K-Love/Air1), CSN Internationsl, and a new one known as 'Radio Assist Ministries'. There were some more regionalized ones, and some others that while they did not blanket the place they still loaded up on applications all the same.

The religious ones use satellites to feed the translators, and that I thought was supposed to only help colleges, universities, and other community organizations get a good signal out a good distance in some areas (like Utah, for example) to their translators, thus saving on costs, etc., in serving their areas. This because of problems in getting public radio service to hard-to-reach communities otherwise, because of mountains, etc. Commercial stations do not have this, so they don't usually go out much farther than maybe a couple hundred miles in utilizing translator services to extend their reach and service.

This also could trash the LPFM service by making it next to impossible to put one in where it is badly needed, either for format diversity reasons or community needs reasons. The large religious networks rarely provide local info if at all to listeners in the more distant areas. A couple provide time for a local weather forecast and maybe a couple of announcements for their full-power O&O's and affiliate stations, but darn little is ever heard otherwise.

So what do you all think regarding the translator land rush of 2003?

Hello,

I have XM radio in the car. If I buy the receiver and boom box for my home,
can I have the xm on at home while my wife is driving the car?

Thanks,

Kenny

> get all the games like on satellite TV?

No. The NBA has an exclusive deal with Sirius for several games a night during the regular season, but neither MLB or the NFL (or the NHL, for that matter) is doing any business with XM. Baseball coverage on satellite radio is limited to ESPN Radio's Sunday night games, playoffs and World Series.

I believe we are confusing some statistical terms here. There is a difference between the median and the average. The median separes one half from the other in a population. If you count the number of members of a population, and divided the result in half, you would find the median. The average is a figure applying to the whole population. If you added the IQ scores of every member of a population, and divided the result by the number of members in it, you would find the "average IQ." The resulting number will not necessarily split the population in equal halves, although proponents of the "bell curve" swear it will. I find it quite improbable that the bell curve could be made to accurately represent the IQ of a population. It would mean that there are the same number of mentally retarded individuals as there are intelligent ones. If this were so, the population of the mental retardation centers would greatly surpass that of the universities, as students are transient while mentally retarded individuals remain in specialized care all their lives.

There are lies, dammed lies, and then there are statistics.

Richard Branson's Radio Radio company operated as the super station
broadcasting overnight on ILR stations across the UK. Can't remember how
long ago this was but in the last year or two it was based at Piccadilly Key
103 until EMAP took over everything in the North of England!

Has anyone used a Pogo Ripflash Trio with a Macintosh (preferrably
running OSX)?
It could be a useful device for recording discussions, using an external
mic, and then downloading the encoded Mp3 files to my Mac via USB.
(http://www.pogoproducts.com/ripflash_trio.htm)

At least until the Marantz PMD-670 solid state recorder becomes
available.

Wating for MP3-recording to arrive :-)

Note that "Radio Assist Ministries" office address is in Twin Falls, Idaho - same city as CSN. Now, that's not much evidence<grin> - but I have heard it suggested there is a relationship. Interesting to note that all the Radio Assist Ministries applications around here specify secular commercial stations as the station to be relayed. Causes me to think they don't want anybody to know who they *really* intend to rebroadcast. It's easy to change the "primary" after getting a license.

Satellite feed is available to all non-commercial stations regardless of the nature of the ownership. My understanding is that Moody Bible Institute was responsible for getting it approved (though they haven't taken much advantage of it!) and college/university stations aren't doing a whole lot of it either.

> This also could trash the LPFM service by making it next to impossible

> couple of announcements for their full-power O&O's and affiliate
> stations, but darn little is ever heard otherwise.

My understanding is that translators are allowed only to originate 60 seconds per hour of fundraising, everything else must be relayed verbatim from the primary.

Interesting incident a few years back. While travelling in an unfamiliar area, a good program on 88.1 ended and I started tuning up the dial in search of something else to listen to. A bit higher in the 88-92 band, my attention was grabbed by someone transmitting the EAS data bursts. The bursts ended, and I heard "The National Weather Service has issued a Severe Thunderstorm Warning for Marin County in Northern California".

Problem is, I was in Meridian, Mississippi at the time! (no, there was *not* a super multi-hop sporadic-E opening in progress...) It was a

translator of a San Francisco religious station.

I use an old RipFlash (128mb), actually five of them, to record various Imus feeds every day, without a computer (no OS, no USB port), and then just play the audio from them into RealEncoder, which the computer does have, to save them if I want. That works okay, better than tape.

The RipFlash devices are temperamental however; I've had 2 of the 5 back on warranty (replaced one, repaired one which apparently only needed reformatting, which you could do yourself if you had the computer they envisioned you having).

The audio jack is one weak point; the other is buggy software that doesn't like fast button pushes. Wait until it processes one button push before trying another.

Used with great care, they're terrific. One holds about 19h of pretty good quality voice at 16kbs.

Later models claim more hours in a different format, and may for all I know have solved the difficulties.

You can write Pogo Products! and they respond to email, if you have questions about what computer and OS.

I find them worthwhile or I wouldn't have gotten up to five of them. You have to treat them very well, is all.

The censor assigned to the military unit that Rivera was broadcasting from was standing right next to him. Since he was with a unit and discussing material from the unit, military regulations required the censor. Censors have long been used, whether or not a reporter is 'embedded.' And nobody was harmed or put in danger as a result of the broadcast. If you missed it that Sunday night, it really wasn't much at all. Afterwards the anchor quipped that they didn't need a screenwriter anymore.

[personal attack on Rivera snipped for brevity]

Attention:
Do not listen to B101 Fm-WBEB Philadelphia because...

1)They do not care at all about their listeners.
2)Their morning show team refuses to answer the phones even while a contest is in progress and they have no winner.
3)Their telephone lines, both local and toll-free, are disconnecting callers if nobody picks up within 2 minutes, which makes it impossible to get through to station. Yet they do not care to do anything about it.
4)Their morning show team misleads and deceives listeners as well as disrespects and insults their intelligence.

Actually, by the time Dick Orkin got around to "The Tooth Fairy," he had not been with WCFL for several years. Dick was one of the many people Ken Draper had brought in in 1965 to turn the sleepy "Voice of Labor" into a powerhouse Top 40--his title was "director of creative programming," which allowed him to go into many areas, the most famous of which was "Chickenman." He followed that up in 1967 with another serial called "Amazon Ace," which ran 26 weeks. In 1968, Draper was fired by the Chicago Federation of Labor because he supposedly spent too much money on the station with unacceptable results (as in, they weren't kicking WLS' butt, although they'd become very competitive with 'LS--Draper also did on-air editorials that were strongly anti-Vietnam, another sore point with the hawkish, Mayor Daley-supporting Federation). Although most of the DJs did stick around for a while, a lot of the behind-the-scenes people at the station either quit or got fired along with Draper, including Orkin.

He then started his famous commercial production business and eventually decided to develop "The Secret Adventures of the Tooth Fairy" for national syndication. WLS was the flagship station for the show, and it aired exclusively on Larry Lujack's morning drive show. However, Lujack supposedly got tired of the show and took it off before the series had come to its completion--at least so I've believed.

The disadvantage is real-time transfer, ie one hour recording takes one
hour again to transfer :-(
>

I did: Unfortunately the only answer is to buy Virtual PC, an emulator
for a PC. While this works well (the Virtual PC in some respects is
better than an actual PC), it costs money and I do not like the overhead
(paying Microsoft dollars, that is).
And the machine needs a program, you cannot connect it like a USB memory
stick and copy the files, unfortunately.

>
> I find them worthwhile or I wouldn't have gotten up to five of them.

This statement is false. There were no censors. His broadcast was
not stopped. He was not censored.

> Since he was with a unit and discussing material from the unit,
>military regulations required the censor.

Again, this statement is false. To quote from the official DoD
guidance on embedded reporters, paragraph 3 (R), "there is no general
review process for media products." Paragraph 6 (A) states, "media
products will not be subject to security review or censorship except
as stated in paragraph 6 (A)(1)." That paragraph states, "prior to
allowing access" to sensitive information about troop movements and
the like, the commander will "take prudent precautions to ensure the
security of that information. The primary safeguard will be to brief
media in advance about what information is sensitive and what the
parameters are for covering this type of information. If media are
inadvertently exposed to sensitive information they should be briefed
after exposure on what information they should avoid covering." The
guidance goes on to permit commanders to allow access to sensitive
information if the reporter voluntarily agrees to a security review,
but then states that such a review "will not involve any editorial
changes." Paragraph 6 (A)(2) states, "Media products will not be
confiscated or otherwise impounded." These regulations clearly
preclude censorship in the generally-understood sense of that word.

The policy used in this war was "security at the source," which in
plain English means if a commander doesn't want something reported, he
should not reveal the information. There was also a detailed and
explicit list of guidelines to which reporters were to agree in
advance, which Geraldo clearly violated. But the penalty for such
violations was not censorship, it was expulsion. After Geraldo's
live, uncensored broadcast, the commander ordered his expulsion. But
Geraldo did not leave, instead filing yet another report the next
morning.

> Censors have long been used

In previous wars, true.

> And nobody was harmed or put in danger as a result of the
>broadcast.

A point I never disputed.

986. The Great Media Gulp

Newsgroup: rec.radio.broadcasting
Date: 2003-05-22 12:59:21 UTC
From: Steve Fleckenstein <spfleck@zzcitlinkzz.net>
Message-ID: <baihj9dqg1@xuxa.iecc.com>
Source record: 7964

May 22, 2003
The Great Media Gulp
By WILLIAM SAFIRE

WASHINGTON

The future formation of American public opinion has fallen into the lap of an ambitious 36-year-old lawyer whose name you never heard. On June 2, after deliberations conducted behind closed doors, he will decide the fate of media large and small, print and broadcast. No other decision made in Washington will more directly affect how you will be informed, persuaded and entertained.

His name is Kevin Martin. He and his wife, Catherine, now Vice President Dick Cheney's public affairs adviser, are the most puissant young "power couple" in the capital. He is one of three Republican members of the five-person Federal Communications Commission, and because he recently broke ranks with his chairman, Michael Powell (Colin's son), on a telecom controversy, this engaging North Carolinian has become the swing vote on the power play that has media moguls salivating.

The F.C.C. proposal remains officially secret to avoid public comment but was forced into the open by the two commission Democrats. It would end the ban in most cities of cross-ownership of television stations and newspapers, allowing such companies as The New York Times, Washington Post and Chicago Tribune to gobble up ever more electronic outlets. It would permit Viacom, Disney and AOL Time Warner to control TV stations with nearly half the national audience. In the largest cities, it would allow owners of "only" two TV stations to buy a third.

We've already seen what happened when the F.C.C. allowed the monopolization of local radio: today three companies own half the stations in America, delivering a homogenized product that neglects local news coverage and dictates music sales.

And the F.C.C. has abdicated enforcement of the "public interest" requirement in issuing licenses. Time was, broadcasters had to regularly reapply and show public-interest programming to earn continuance; now they mail the F.C.C. a postcard every eight years that nobody reads.

Ah, but aren't viewers and readers now blessed with a whole new world of hot competition through cable and the Internet? That's the shucks-we're-no-monopolists line that Rupert Murdoch will take today in testimony before the pussycats of John McCain's Senate Commerce Committee.

The answer is no. Many artists, consumers, musicians and journalists know that such protestations of cable and Internet competition by the huge

dominators of content and communication are malarkey. The overwhelming amount of news and entertainment comes via broadcast and print. Putting those outlets in fewer and bigger hands profits the few at the cost of the many.

Does that sound un-conservative? Not to me. The concentration of power - political, corporate, media, cultural - should be anathema to conservatives. The diffusion of power through local control, thereby encouraging individual participation, is the essence of federalism and the greatest expression of democracy.

Why do we have more channels but fewer real choices today? Because the ownership of our means of communication is shrinking. Moguls glory in amalgamation, but more individuals than they realize resent the loss of local control and community identity.

We opponents of megamergers and cross-ownership are afflicted with what sociologists call "pluralistic ignorance." Libertarians pop off from what we assume to be the fringes of the left and right wings, but do not yet realize that we outnumber the exponents of the new collectivist efficiency.

That's why I march uncomfortably alongside CodePink Women for Peace and the National Rifle Association, between liberal Olympia Snowe and conservative Ted Stevens under the banner of "localism, competition and diversity of views." That's why, too, we resent the conflicted refusal of most networks, stations and their putative purchasers to report fully and in prime time on their owners' power grab scheduled for June 2.

Must broadcasters of news act only on behalf of the powerful broadcast lobby? Are they not obligated, in the long-forgotten "public interest," to call to the attention of viewers and readers the arrogance of a regulatory commission that will not hold extended public hearings on the most controversial decision in its history?

So much of our lives should not be in the hands of one swing-vote commissioner. Let's debate this out in the open, take polls, get the president on the record and turn up the heat.

i've been sick lately, so imagine my surprise when i checked my email today and discovered that Brave New Waves emailed me yesterday to let me know they were going to play a song from my Interim EP... *last night!*. if i had known, i would have attempted to break out of my sickly state long enough to tune in. they said it would be in the first 15 minutes of the show. i just need to know, in case anyone was listening and remembers, or even better if someone taped it (the may 20th show), which song did they play, and what did they say about it? i've been dreaming of being played on BNW for ages, and now that it's become a reality, i missed it! any info would be appreciated, thank you.

> Must be a Clear Channel station-:)

No, it is one of the very, very, very few remaining major market locally owned independent stations in the US. And its owner is one of the most progressive, involved broadcasters in the country.

It just might be, since the station is generally #1, that they get more calls than a couple of people can possibly answer.

To counter the ready-fire-aim post above, here is a profile from
Broadcasting Magazine of one of the radio industry's finest operators.

"Jerry Lee

wbeb(fm) Philadelphia

Staff
Broadcasting & Cable
9/18/2000
Jerry Lee's goal in life is not merely to serve the listeners of his
radio station, Philadelphia ratings leader WBEB(FM). He's intent on ridding
the city of crime and poverty. And while he's at it, he just might change
the rest of the world.

Lee is well known for his generosity to his community, academia and
the broadcasting industry. "Jerry Lee is one of the most forward-thinking
owners in radio," says Eddie Fritts, chairman of the National Association of
Broadcasters. "His station combines cutting-edge technology with a strong
commitment to community service, and his track record of success speaks for
itself."

Indeed, Lee led the station to No. 1 among Philadelphia listeners age
12 and older this past summer, according to Arbitron. [wbeb took first place
overall in the market for the first time in spring 1999, when the soft
rocker finally topped arch-rival kyw(am).]

When it comes to cash, wbeb is No. 3 in Philly, with $24 million in
estimated 1999 revenue, according to BIA Research. Nationally, the station
ranks 66th. But Lee is fond of pointing out that Bala Cynwyd, Pa.-based wbeb
is the only non-corporate-owned FM among the 66.

Lee is not shy about using his position to pursue his social goals. His philosophy is to "serve the community off the radio station." And "because I have a radio station, I'm able to pick up the phone and make things happen."

For example, while wbeb offers the typical slate of PSAs and Sunday-morning public-affairs shows, Lee takes community service further. The station has been honored for its outreach, including a "Kids for Kids Holiday Stocking Program" and Kindervision, which teaches children to protect themselves from random abduction.

Lee is "a visionary-type person. He's always way out in front of everybody else. He always sets big goals," says wbeb's founder and 51% owner Dave Kurtz. Kurtz brought Lee in as sales manager two weeks before the station went on the air in 1963. But because he couldn't afford to pay Lee his full salary, he gave him interest in the station, which amounts to 49% today.

With the proceeds of their success, Lee and Kurtz jointly fund the Jerry Lee Foundation, which provides software and teacher training to help some 10,000 Philadelphia students improve their reading skills. The foundation also helps fund "The Philly Project," which works to reduce prison recidivism.

Lee himself donated $25,000 in 1997 to create "The Jerry Lee Online Archive" of historic radio and TV photographs at the University of Maryland, according to the university's Web site. And last year, the foundation launched an annual program to award $2,500 in cash to the radio or TV station with the best news series, PSA or community program addressing local crime. The second winner is to be announced on Friday.

The Jerry Lee Foundation also funds programs at UM, where Lee chairs the advisory board of Maryland's Crime Prevention Effectiveness Program. The foundation pays for a "Jerry Lee Research Professor of Criminology" and two assistant research professors in the university's Department of Criminology and Criminal Justice. And it supports the new Washington office of the University of Pennsylvania's Fels Center of Government.

Although Lee declines to disclose specifics of his wealth, UM says it has received $100,000 to $500,000 from the foundation.

On Dec. 5, Lee plans to unveil what may be the culmination of his life's work. A foundation endowment "in the seven figures" will create the Jerry Lee Center of Criminology at a major university, which he declines to name as yet (see Airtime, page 85). Lee is one of the last of the independent broadcasters who not only take an interest in their communities but also strive to improve them.

Besides Lee, there are only three "non-group" owners in Philadelphia. Of the city's 28 radio stations, there are just 13 separate owners. Clear Channel dominates with six stations, followed by Infinity with five (including kyw) and Greater Media with four.

While the number of independent stations dwindles, Lee crows that wbeb "couldn't be No. 1 today without consolidation."

That's because, as big companies rack up huge debt to buy more stations, wbeb is debt-free. And because of that, Lee says, he can spend whatever it takes to keep the station on top. "It's suicidal to try to come up against us. I'm willing to spend now to get the payoff down the line."

Although he has had offers for wbeb—a recent one was for $250 million, he says—he refuses so vociferously that would-be buyers generally leave him alone. He did sell wbeb sister WBEB(AM) to Salem Communications in 1993, netting $4 million.

Lee opts to spend most of wbeb's money on research and promotion. "We research out every song that we play against [wbeb's] target" audience of women age 25-54. (Advertising is likewise studied for its effects on that group.) Using the results, wbeb refines its 400-song playlist. That doesn't sound like much music, but "people never get tired of hearing their favorite songs."

Lee got his first taste of broadcasting while organizing dances at Ohio's Youngstown University. After graduating in 1960 with a BA in economics, he turned to management consulting in an effort "to go straight," he jokes. But, "I hated it."

He ran into a college friend who owned a radio station near Akron, Ohio. The friend needed a sales rep for his early version of syndicated programming, a precursor of the Beautiful Music format. The problem then was, "nobody [had] ever heard of a program service," Lee says. "Nobody would buy it." He was fired after nine weeks.

He surfaced as manager of WAQE-FM (now wlif) Baltimore, one of the stations that had rejected his pitch for the service. But Kurtz, who also had declined to be Lee's customer earlier, had a hankering to start a 24-hour stereo station in Philadelphia.

Four months after going on the air, the FM, then known as wdvr and playing Beautiful Music, was ranked No. 1 in the market. One reason for the rapid success, he remembers, was that, "in those days, everyone [else] went off the air at midnight." Wbeb was Philadelphia's 24-hour FM.

Anyone hoping to launch a successful operation like wbeb today had better start in a much smaller market, Lee advises. "Single stations cannot survive in a major market with debt." Better yet, "if you really want to start a radio station, start an Internet radio station." He considers wbeb's Web site "an extension of my radio station.—The Internet is going to make me a fortune."

Thanks for info - actually I have episode 0 - 166 of Tooth Fairy, here is the problem. Episode 166 has Tooth on his Molarcycle going to DC to meet the pres and also acquire the first tooth convention site. Episode 166 has the Molarcycle breaking down on the way to DC and a "helpful" citizen willing to help - after the Tooth Fairy exposes his financial situation (bags of coins). This is the last OTR show I can find, but I would swear I remember shows after this - but it has been a LONG time ago when I listened to these as "new" shows.

Are there episodes after 166 that at least conclude this segment? Is my memory totally wrong to think I heard episodes after this segment? Could be wishful thinking I guess and bad memory at this point.

Secret Adventures of the Tooth Fairy? What was this?

Any help appreciated.

Am not familiar with Amazon Ace - will check into it.

Story Lady was also good though :-)

Free Speech forgotton in Iraq
by By YOCHI J. DREAZEN 8:12am Thu May 22 '03 article#30903

MOSUL, IRAQ -- The U.S. Army issued orders for troops to seize this city's only television station, leading an officer here to raise questions about the Army's dedication to free speech in postwar Iraq, people familiar with the situation said. The officer refused the order and was relieved of duty.

Army Orders Troops to Seize
TV Station in Northwest Iraq

A Major Balks at Directive
And Gets Relieved of Duty

By YOCHI J. DREAZEN
Staff Reporter of THE WALL STREET JOURNAL

MOSUL, IRAQ -- The U.S. Army issued orders for troops to seize this city's only television station, leading an officer here to raise questions about the Army's dedication to free speech in postwar Iraq, people familiar with the situation said. The officer refused the order and was relieved of duty.

The directive came from the 101st Airborne Division's commander, Maj. Gen. David Petraeus, who has ultimate authority in Mosul and the rest of northwest Iraq, the people familiar with the matter said. They said it was aimed at blocking the station from continuing to broadcast the Arabic news channel al-Jazeera.

The order has not yet been publicized in Mosul, which has no radio station or newspaper, and Army officials here said they had no plans to do so. Late Wednesday night, it wasn't clear whether soldiers who had been on the grounds of the station, which is near the city's university, had moved into the station building itself and taken control.

The incident may add fuel to suspicions in the Arab world about the Bush administration's promises to bring open elections and other Western-style freedoms to Iraq. The move also could further strain the already-tense relations between the Pentagon and al-Jazeera, a satellite channel based in Qatar that is the most popular source of news throughout the Mideast. Pentagon officials have long accused al-Jazeera of being biased against the U.S. and criticized it for broadcasting material such as bloody images of civilians killed or maimed by U.S. bombs. Al-Jazeera's Baghdad office was unintentionally shelled by the U.S. on April 8, killing one journalist.

The order to seize the station, which had been under the unofficial control of a local Iraqi militia leader, was discussed at a contentious meeting among American officials based in a former hospital here. During the two-hour meeting last night, the head of the Army public-affairs office in Mosul, Maj. Charmaine Means, said she could not agree to seizing the station and posting troops there. She argued that the presence of armed soldiers would intimidate the station's Arab employees into airing only programming produced by, or acceptable to, the American military.

Maj. Means was told to pick up a nearby telephone. On the other end, Col. Thomas Schoenback, chief of staff of the division, ordered her to go along with Gen. Petraeus's plan to take the station, according to people familiar with the matter. When she again refused, he relieved her of her duties. A short time later, she was told that she would be flown out of Mosul on an Army helicopter early Thursday morning.

Neither Gen. Petraeus nor Col. Schoenback could be reached for comment. In Washington, the Pentagon could not immediately confirm the order to seize the station.

Officers familiar with the matter said military officials were uncomfortable with the station's programming. They wanted to apply a U.S. military formula for gauging the station's accuracy, balance and trustworthiness, and if the programming fell short, the station would be shut.

As word of the decision filtered through the main American base in downtown Mosul, several officers condemned it. The officers said they were particularly incensed that the military had allowed the Iraqi militia leader, Meshaam Jabori, to broadcast political messages for weeks without interference, only to seize it Wednesday after it occasionally showed al-Jazeera programming. The station also airs programming from other Arabic news channels, as well as from NBC. Mr. Jabori couldn't be reached for comment.

Huh? It's a function of $$$. Each receiver costs $129 retail, or $70
for the XMPC. Each subscription is $9.99 for the first and $6.99 for
2-4. Each cradle is $60 and the boom box is $99.

You can move either the Sky-Fi receiver from the boom box to the
cradle, or get the XMPC for home with a $60 set of speakers and you're
good to go.

The Bush administration has stepped up anti-Castro propaganda with radio and TV broadcasts beamed to Cuba from an aircraft.

The island's Communist government condemned the campaign as a "vulgar provocation".

A US official says the United States broadcast on three new radio frequencies, two short wave, one medium wave and one VHF TV channel to Cuba for four-hours by using a C-130 aircraft for the first time.

"Is this another blatant and vulgar provocation against Cuba?" the ruling Communist Party daily Granma said in a front-page editorial.

Havana also accuses Washington of allowing a Miami exile group to beam television signals from a small plane flown 20 kilometres offshore in violation of international broadcasting rules.

The broadcasts were part of a stepped-up campaign by the Bush administration to bombard Cuba with information, and support dissidents seeking democratic reforms under President Fidel Castro's one-party state.

Broadcasts by Radio Marti, named after Cuba's independence hero, began in 1983 during the Reagan administration and are listened to in parts of the island.

TV Marti, also funded by US taxpayers and begun in 1990, was successfully jammed by Cuba.

On Tuesday night, Radio and TV Marti broadcast President George W Bush's message to Cubans on the anniversary of Cuba's 1902 birth as an independent nation.

Mr Bush denounced President Castro and said he hoped his 44-year rule would soon end.

Washington also initiated a three-day test by beaming TV Marti via the DirecTV digital satellite service.

US officials say there are between 10,000 and 15,000 DirecTV satellite dishes in Cuba, which are difficult to jam.

Some Cuban exiles in Miami believe that a media blitz will do more to bring about political change in Cuba than the economic sanctions Washington imposed after Castro's 1959 revolution.

Amateur Radio Newsline™ Report 1345 - May 23, 2003

Amateur Radio Newsline report number 1345 with a release date of Friday, May 23 2003 to follow in 5-4-3-2-1.

The following is a Q-S-T. Hello and welcome to a very special Amateur Radio Newsline being recorded live in the closing hours of Hamvention 2003. I'm Don Wilbanks, AE5DW at the combined RAIN, Amateur Radio Newsline and WA0RCR booth in Hara Arena in Trotwood Ohio. Trotwood is a suburb of Dayton for those of you not familiar with the area. With me are Newsline's Producer Bill Pasternak, WA6ITF, RAIN Producer Hap Holly -- and a host of other people -- most probably wondering what we are up to.

Its now just a bit after 10 a.m. on Sunday May 18th. Bill has been out in the crowd with his tape recorder. So tell me, what have you been seeing and hearing.

--

(This is an audio only report at http://www.arnewsline.org)

--

I guess we all agree that its been a fun weekend and we will have more on Hamvention 2003 next week. But there lots of other news including a new ham radio allocation at 5 MHz and a proposed New Jersey law that could bring a ban on operating a two way radio -- or even changing a station on a car radio. We will have that and more, after this. (ARNewsline™)

**

Break 1

>From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the Southern California Amateur Radio Transmitting Society net in San Dimas California

(5 sec pause here)

**
RADIO RULES: FCC SAYS PARTIAL YES AT 5 MHZ

The FCC has granted hams five discrete 2.8-kHz-wide channels in the vicinity of 5 Mhz. This, in a Report and Order issued on Wednesday May 14th. But, says an ARRL Bulletin, the Commission has has declined to grant amateurs any allocation at 136 kHz at this time.

In its Notice of Proposed Rule Making a year ago, the FCC appeared inclined to go along with both requests which had come from the American Radio Relay

League. But opposition arose along the way with power companies fearful of interference to their operations at 136 kHz. The National Telecommunications and Information Administration filed against the 5 Mhz grant based on a possible need for the requested band by federal government users. The five channels granted the Amateur Service are seen as a compromise.

The FCC did agree to elevate the Amateur Service, but not the Amateur-Satellite Service, to primary status at 2400 to 2402 MHz. The changes to the Part 97 go into effect 30 days after publication in The Federal Register. (FCC, ARRL)

**

RADIO LAW: N.J. MAY BAN “EVERYTHING” WHILE DRIVING

New Jersey state lawmakers are proposing a wide ranging law that would not only ban the use of cellular telephones in motion, it might also ban just about anything else a person might do while driving a car including sipping coffee or changing a radio station.

According to the May 11th Ocean County Observer, the state Assembly Transportation Committee has released a bill to better define what is and what is not considered to be reckless driving. Proponents of the measure call it an effort to reduce motor vehicle accidents caused by driver distraction.

The proposed legislation says distracting behavior includes the use of communication technology such as cellular telephones, pagers, fax machines, locating devices, video players, two-way dispatch and citizen band radios. Also on the list is the normal AM/FM radios found in most vehicles along with compact disc and tape players.

The bill also defines a variety of things that have been labeled as distracting behavior. On this list are such activities as personal grooming, consuming food or beverages, reading and tending to unsecure pets. All would be considered as reckless driving.

State Representative John Wisniewski of Middlesex is chairman of the Transportation Committee and the primary sponsor of the bill. He says that giving the police a clear mandate to stop motorists who drive inattentively is logical way to stem the tide of roadway crashes and fatalities. And while Amateur Radio is not specifically mentioned it could easily fall under the two-way radio portion of the measure if it becomes state law. (W2CE)

**

RESCUE RADIO: NHC TO PERFORM 2003 HURRICANE TEST

Mark June 1st for the National Hurricane Center's Amateur Radio station WX4NHC to conduct its 2003 hurricane season on-the-air station test. According to an ARRL bulletin the station will take to the airwaves on Sunday, June 1st from 13:00 to 22:00 U-T-C.

Coordinator John McHugh, KU4GY, says the purpose of the annual test is to check out all of the WX4NHC radios, computers and antennas using as many modes and frequencies as possible. Some R-F-I monitoring also will be done.

Listen for WX4NHC on HF worldwide and VHF and UHF in South Florida. Anyone making contact is asked to provide a signal report, location and brief weather report. QSL cards are available via W4VBQ. Please be sure to include a self addressed stamped envelope with any QSL requests.

The event will mark the first time the National Hurricane Center will use its new call sign for this event. In years past it operated as W4EHW. (ARRL)

**

RESCUE RADIO: HAM RADIO RESPONSIBLE FOR TORNADIO WARNING SYSTEM

An interesting side note to our coverage of this years tornado season and the role that ham radio is playing in storm spotting and relief efforts. We recently learned that one Kentucky city has ham radio to thank for its early warning system.

The ham responsible is retired ARRL president George Wilson, W4OYI. Wilson suggested the installation of the system following a twister that hit Brandenburg, Kentucky in April of 1974. Wilson learned that it had taken more than 40 minutes for severe weather alerts to reach Owensboro from the National Weather Service in Evansville Indiana, about 40 miles away. Thanks to the efforts of W4OYI, a month later local warnings were coming from a NOAA weather radio monitoring system installed in Owensboro. (ARNewslime™)

**

NAMES IN THE NEWS: KB2GSD BACKS AWAY FROM WJMK

Former CBS News anchor Walter Cronkite, KB2GSD, has severed his agreement with a Florida production company. This, after having signed to host for a series of corporate-sponsored videos, resembling news reports, that are broadcast on public television stations.

The New York Times reports that a production company called WJMK had recently hired Cronkite and Cable News Network anchorman Aaron Brown to replace Morley Safer of "60 Minutes" as hosts of a series called “American Medical Review.” After it was learned that pharmasutical manufacturers and other health care companies pay WJMK about $15,000 each to have their products featured in the videos the high profile hosts began to drop away. Brown backed out of his agreement with WJMK on Wednesday May 7th with Cronkite following on Thursday May 8th.

Marlene Adler who is Walter Cronkite's chief of staff, said that the retired newsman had agreed to become a host after being assured that the videos would be educational. She said he had now concluded that WJMK was using the videos, at least in part, for commercial promotion, adding that "Mr. Cronkite does not do product endorsements, and will not."

This is not the first time Cronkite has had a a problem with others using his voice or likeness. Back in January Cronkite's Attorney, Ronald S. Konecky, demanded that Glenn Baxter, K1MAN, immediately cease using a previously recorded station ID made by Cronkite several years ago. He also told Baxter to desist from the use of Cronkite's name and likeness, in any medium, and on any basis whatsoever. (ARNewsline™ and published news reports)

**

NAMES IN THE NEWS: N1SS ON W4BW

Peter Hurd, N1SS, says over the QCWA remailer that he is writing an article for publication as a tribute to the late A. Prose Walker, W4BW and is asking for your help. If you have any recallections about the A. Prose Walker that you are willing to share, please contact Hurd by e-mail to n1ss@ ainop.com or write him at PO Box 1005 Houlton Maine 04730. (QCWA Remailer)

**

HAM RADIO ON THE WEB: THE NCG REFLECTOR

Do you own an NCG radio. Looking for the latest information? Then listen up. KU4QD says that there is now an Internet a reflector for folks who have, or are just curious about, NCG gear. It also covers National brand transceivers sold in Japan that weren't imported to the U-S-A. The new group is on Yahoogroups. Go to www.yahoogroups.com and search for NCG. (VHF Reflector)

**

CONVENTIONS AND HAMFESTS: LIMARC - NEW YORK - IN JUNE

The Long Island Mobile Amateur Radio Club annual hamfest will be held Sunday, June 8 th. The venue is at Briarcliffe College in Bethpage New York from 9 a.m to 1 p.m. local Eastern time. Briarcliffe College is located at 1055 Stewart Avenue in Bethpage. For more information please visit www.limarc.org on the World Wide Web.
(K2EPM)

ON SAFARI: A DX’PEDITION WITH A NEW TWIST

A major Dxpedition is coming up but this one is rather different. Amateur Radio Nerwsline’s Norm Seeley, KI7UP, has the details on this rather unique operation:

--
IN3QBR, IN3ZNR and AA4NN are teaming up to go on the air as the "African Double Jump Dxpedition from South Africa, Lesotho and Botswana starting at the end of June. According to their Web page, the team will meet with ZS6WPX, who will become their tour guide. Between June 28th and July 1st, the team will go on a Safari. There is a possibility they may do some operating using callsigns portable Zed S, but on July 2nd, they head to Gaborone City Botswana where they plan to erect their antennas and operate from their hotel that day. Callsigns mentioned so far are A25NN and A25ZNR.

They will leave for the town of Rustenburg on July 5th, and will travel to Sun City, South Africa. There "MAY" be some activity portable Zed S and early July 7th, they will leave for Lesotho and expect to be there late afternoon. Expected callsigns will be 7P8JB and 7P8NR. Activity will last until July 11th. They depart for Johannesburg on July 12th and expect to leave for home July 13th.

EMERGING TECHNOLOGY: INTERNET LINKING BREAKS 2000

Ian Abel, G3ZHI, reports that the total number of amateur radio repeater and simplex internet gateways now exceeds 2,000. This includes nodes on the three major linking systems, IRLP, EchoLink and eQSO. (G3ZHI)

**

INTERNATIONAL-AUSTRALIA: NEW IRLP LINKED REPEATER

And speaking about Internet based repeater linking, Q-News reports that the VK4RXG repeater on 438.500 Mhz is now up and running from a new location. This Australian repeater is linked to the IRLP network giving its users world-wide access, and the rest of the world’s hams access to VK. (Q-News)

**

EMERGING TECHNOLOGY: EUROPEAN TV LOVES SMS

Unforeseen by most media analysts, European TV networks started using short message services as an interactive channel in the late 90's. Today, many of them have embraced SMS text messaging-interactivity as a revenue-generating feature in some form, whether it be chats, voting, comments, reminders, and many other things. And believe it or not, hardly an hour of the broadcast day goes by without some channel encouraging the viewer to send messages. (Media Network)

**

INTERNATIONAL - CANADA: VE3CDM TO CANADIAN AMATEUR RADIO HALL OF FAME

Tom Atkins, VE3CDM, has been elected to the Canadian Amateur Radio Hall of Fame. This, for his extensive contribution over many years to Canadian and International Amateur Radio activities through his active involvement in numerous organizations including Radio Amateurs of Canada and the CNIB Amateur Radio Society for blind radio amateurs.

Atkins retired as President of IARU Region 2 in 2001 after having served in all of its Executive positions for eighteen years. And during this time was a member of the IARU Administrative Council and is currently serving as an IARU Expert Consultant. (RAC)
**

INTERNATIONAL - U.K.: PROPAGATION BEACONS OFF THE AIR

GB2RS reports that the two GB3BUX beacons located near the city of Buxton in the U-K are temporarilly off the ait. One operates on on 50.00 MHz and the other on 70.00 MHz in the U.K. only 4 meter band. Both have been switched off due to intermittent problems and it is believed that the repairs will take some time to complete. (GB2RS)

**

INTERNATIONAL - EUROPE: INTERNATIONAL MUSEUMS WEEKEND

The third annual International Museums Weekend will take place on the 14th and 15th of June. The event begins at midnight UTC Friday and ends at midnight UTC Sunday. Those wishing to take part should please insure they have registered via the form on the International Museums Weekend website nat www.ukradioamateur.org/imw (GB2RS)

**

ON THE AIR: W8RMR FROM THE UNSINKABLE AIRCRAFT CARRIER

The Motor City Radio Club will sponsor the 4th annual Grosse Ile Islandfest special event station from U.S. Island MI005R. Located 20 miles south of Detroit, the island was named "The Unsinkable Aircraft Carrier" back when the Naval base was active.

Listen for W8MRM operating from the hanger of the old Naval station from 14:00 UTC on May 31st to 21:00 UTC on June 1st on 28.375, 21.375, 14.244 and 7.244 MHz SSB. There may also be some CW operation, and AM with vintage gear. For a commemorative certificate send a QSL with an SASE to MCRC PO Box 337, Wyandotte, Michigan, 48192. Any question? Please e-mail K8CBS@arrl.net or visit this web site: www.w8mrm.org/k8cbs Again the call sign to be used is W8MRM. (Via press release)

**

DX

In D-X, word that G3LIV, will be active stroke 9M2 from Penang Island through the 30th of May and from Langkawi Island from May 30th to the 9th of June. He will mainly be on CW with some PSK31. (GB2RS)

And RSGB reports that K4VUD is active from Thailand again as HS0ZCW. He will be there until the middle of June. QSL as directed on the air. (RSGB)

Lastly word that MM0OKG will be on a trekking holiday in Peru and Bolivia through the 25th of May and plans to be active on 20 meter S-S-B using a Yaesu FT-817 and dipole antenna. He will operate portable from locations higher than 3500 meters above sea level. Look for him calling on 14.280 MHz, plus or minus about 10 kHz. (GB2RS)

**

THAT FINAL ITEM: THE EVER CHANGING BRAIN

Finally this week, if you have ever taken a taxi in a major city you may have wondered how the taxi drivers know how to reach even the most obscure destination without a street map or a hint from their passengers. Well, a new study indicates cabbies are working their brains so hard that they become enlarged in the zone associated with navigation.

According to the study published in the journal Proceedings of the National Academy of Sciences, the drivers' brains adapted to help them store a detailed mental map of the city. This, by shrinking in one area to allow growth in another called the rear hippocampus.

In the latest study, researchers at University College, London University compared the brains of 16 male taxi drivers with those of 50 other men of a similar age. They found that among the cabbies, the back of the hippocampus, the part of the brain associated with spatial memory, was larger than it was in the comparison group.

Scientists had previously reported differences in the structure of the brain between musicians and non-musicians. Researchers say that evidence that the brain is physically able to change according to the way it is used could be important in understanding human development. (Science Today)

Hello all. I stumbled across your group while searching for information about applying for an LPFM license for a community in rural upstate NY.

I apologize if this is an oft asked question, but could someone tell me when the next (or rumored next) filing window might be?

I'd also really appreciate pointers to helpful web resources (aside from the obvious FCC pages, which I've bookmarked) for LPFM issues.

Thanks very much in advance.

Bill Fredette

Do you have call letters to his station? Any slogans would be welcome. I have been in Macon since 1966. I would advise floating it past the older stations such as WMAC (US Broadcasting). Do these call letters ring a bell? WNEX, WQBZ, WMAZ, WAYS, WRBN, WIZY, WDEN, WCRY, WBML, WPGA, WMRW and a few others from the past ten years when stations changed call letters like crazy.
Thanks
Ken

Yes, Sirius uses live announcers to into the music. It's very quick
and too the point. Certainly refreshing after hearing all those car
commercials here at home. I'd suggest Sirius because they are
commercial-free and the audio is truly excellent quality!

I think you are impatient and don't understand that a station with a half
million listeners may on occasion get so many calls they can not answer them
all.

Actually I'm 40 miles away. The question also is who is the audience for
this? Somebody tuned to a vacant frequency who comes up on it?

No, it has to be somebody tuned to Imus.

A ``don't litter'' loop played over and over is a bureaucrat's idea.
``Intra-system goals come first'' when you're part of a bureaucracy.

The correct arrangement of government is the reverse: microphones on the
outside of the building and speakers on the inside, instructing the
bureaucrats. Put a bureaucrat in charge and this is what you get.

It's a situation repeated across the country on your own favorite station, with
the gravel and tar department's instructional igneous-rock-is-your-friend
audio loop.

I can see the FCC not protecting stations far away, but it's not-protecting
them against competing things you might want to listen to, not bureaucrat drivel.

For sale:

(The "Radio Crazy", it's back!)

Partial interest (Joint venture) in 1 KW fulltime AM
in Southern Georgia.

On the air since 1955. Full asking price is $75,000
without real estate, $150,000 with real estate. Rent
is $400.00 a month in first case.

Active or inactive investors with at least $10,000
each are welcome. Prefer active investors with at
least one of the following skills: Sales, Engineering,
Programming.

All investors would be on the board with full voting
rights if desired. No individual can hold over 49
percent and that includes me!

Tel: (478)741-1710 in Macon, GA.

Please contact via tel. or email.

"AM bashers" or other "negative nabobs" are not
welcome. Yes, I don't know what the hell a "nabob" is
either! HI!

73,

Meyer Gottesman, W6GIV

I think you are attempting to make excuses for WBEB's obvious total
disregard for its listeners. I think having only 2 minutes to stay on
a line to get through to the station, when in 30 minutes they can't
even pick it up is inexcusable. Go back, re-read my total message
about the station, all of my points are appropriate and justified.

A few months ago, FCC took its "LPFM Channel Finder" off their web site, saying "there are no LPFM filing windows in the forseeable future." I know that is not good news for you.

If you are not aware of it, try this site:
http://www.recnet.com/lpfm/

It can tell you if a station might be possible in your area.

For LPFM Discussion, you may find "The Grapevine" to be helpful at:
http://www.frn.net/vines/

Not culture, not truth, just the same music over and over and lots of strident commercials filling the airwaves up to 22 minutes an hour!

Commercial Radio Rules

Source: National Public Radio (the good radio)

Local hosts who may be hundreds of miles away, identical playlists from town to town ... critics say radio just isn't what it used to be. Join host Neal Conan for a look at changes in technology and media ownership, and what it means to your radio dial.

Harry - 02:42pm May 27, 2003 EDT (#1 of 14)
You can't stop the wars. You can't make the old younger. You can't lower the price of bread. - Sinfonia (Berio)
Limbaugh haters - here's your chance.

BryanDuffey - 03:11pm May 27, 2003 EDT (#2 of 14)

I don't think this has much to do with "Limbaugh haters". In my opinion, the real tragedy is the "bland"isation of the airwaves. Consolidated control means less new content, less innovative content and more "dumb" content. What this means to my radio dial is that it either stays off or tuned to the local college station. I won't vouch for the politics but the music is far more diverse and just plain better than what Clear Channel is feeding us.

Nils Ohlson - 03:17pm May 27, 2003 EDT (#3 of 14)

Actually, the real issue is the changes in media ownership rules that Michael Powell, chair of the FCC, is trying to foist on us (links courtesy of MoveOn.org):

FCC CLOSE TO EASING MEDIA CAPS GIANT FIRMS WANT TO OWN MORE OUTLETS San Francisco Chronicle, May 12, 2003 http://www.commondreams.org/headlines03/0512-01.htm

F.C.C. PREPARES TO LOOSEN RULES ON MEDIA OWNERSHIP New York Times, May 12, 2003 http://www.nytimes.com/2003/05/13/business/media/13FCC.html

A NEW ERA FOR MEDIA FIRMS? PUBLIC, PRIVATE INTERESTS CLASH AS REVISION OF OWNERSHIP RULES NEARS Washington Post, May 12, 2003 http://www.washingtonpost.com/wp-dyn/articles/A47349-2003May12.html

---

Ivan Mikailovich Veritas - 03:27pm May 27, 2003 EDT (#4 of 14)

The first guest discussing Commericial Radio on TOTN show of 27 May 2003 proclaimed that radio today is more diverse in its programming than ever before.

I maintain this is patently false. Example: Jazz. Only nine 24-hr Jazz Stations exist in the nation today; certainly a drastic decrease over earlier times. And the treend there is towards zero.

In my opinion, unregulated uommercialism is ruining the diversity of choices of the US radio-listening public.

Ivan Mikhailovich Veritas Denver, Colorado

Queen Autumn - 03:28pm May 27, 2003 EDT (#5 of 14)

I am a dj at an independent radio station in Eugene, Oregon. I fully disagree with every single one of Field's remarks. There has been no contact, and no interest in of our local bands from ANY of the national radio stations. There is no interest in local events, concerts, news etc from corporate radio and there is a reason for this...Why would they care about anything other than money from advertising? One case in point, local bands here like the Courtesy Clerks, the Hunches, the Rock and Roll Soldiers, and the Pass Out Kings received coverage in Rolling Stone, and Mojo Magazine...and not a single call, play, or tip of the hat from major radio. These bands blow our local listeners away!

I would like to ask David if he has heard of bands like the Faint (Omaha, Neb.) or the High Violets (Portland, Or.). I would bet that he has not heard of these wonderful bands, because his station is only interested in promoting corporate artists that sell corporate products like Britney Spears (Pepsi). When Pepsi can promote the artist on a radio station with not only paid advertising, but by promotion of the artist itself, there is no interest in talent, promotion of local artists or anything else.

The station I work for (KWVA Eugene 88.1 FM) plays independent bands that are not played at the stations that are owned en masse. Many towns and cities quite unfortunately do not have the opportunities to listen to either local music, or other independent artists because the stations have all been bought out by these corporate giants. This is scary.

How will a small town with one radio station owned by one of these corporate giants know when a local disaster is hitting...if the radio station transmits from hundreds of miles away? The answer is...they will not. Our station has djs on the air 24 hours a day, 7 days a week. People can call us, communicate with us...and let us know what is going on. We announce this information. Corporate radio does not offer this freedom of information, organization, or promotion...unless

the dollar is involved.

Clear Channel and Cumulus...among others...must be stopped from buying all of the airwaves for their advertising, and control of information!

Autumn DePoe KWVA Radio 88.1 FM Eugene

---

d.k. wyatt - 03:31pm May 27, 2003 EDT (#6 of 14)

I am going back to college for broadcasting and I hope to work at a college station because commercial radio is nothing more than a meat market. Clear Channel and other companies that own multi-stations care about the stock holders and not the mass audience. Keep up the good work NPR.

---

zonker01 - 03:45pm May 27, 2003 EDT (#7 of 14)

Lack of diversity in music programming is merely irritating; what's frightening is that deregulation is allowing increasingly one-sided news and political reporting, i.e. Rupert Murdoch of Fox controlling larger segments of media with "neo-Conservative" views

---

Mark Buckner - 03:59pm May 27, 2003 EDT (#8 of 14)

With all due respect to the difficulty of local station fundraising, what justification does NPR rely on in its decision to preclude broadcasting of Morning Edition and All Things Considered via the two feeds on Sirius Satellite radio? I understand that this is to give the local stations an "exclusive". Can't the local affiliates share in the satellite revenue?

Mark Buckner, St. Louis

Jim verdolini - 04:05pm May 27, 2003 EDT (#9 of 14)

In the abstract, this is nothing different than the nation wide change in bookstores from mom and pop shops to megastores all with the same books and the same feel. I didn't like that and I don't like megastations. When I get to the specific, however, I like the idea of conservative talk radio as a counter to liberal TV network news.

This, and not any degredation of the content, is what is causing all the stir. If NPR was expanding, there would be no comment at all.

Bill Chaisson - 04:21pm May 27, 2003 EDT (#10 of 14)

Am I being incorrigibly idealistic when I think that local media should provide leadership in a community? To me providing leadership means, at least in part, both reinforcing a community's identity and providing a vision of what the community should evolve into. My

problem with franchised radio is that it has no interest in making a community self-conscious. On the contrary it would be much easier for them if the audiences of various communities converged on the playlists of MTV or VH-1.

Bigger cities like Seattle or Pittsburgh might be able to preserve some measure of their identity, but smaller cities like Rochester, NY, where I live, do not seem to have the critical cultural mass to survive the homogenizing influence of national franchising.

The guy talking right now is so proud that his station is getting local bands national recording contracts just doesn't get it. That station is really not helping to build the local music scene. It is widely acknowledged that big label attention and national media scrutiny usually destroys local music because as soon as the spot light is on them, they start to cater to what they perceive to be a broader taste to improve their marketability.

Phil Stinson - 04:49pm May 27, 2003 EDT (#11 of 14)
Carpe Carpium

I am a dj at an independent radio station in Eugene, Oregon. I fully disagree with every single one of Field's remarks. There has been no contact, and no interest in of our local bands from ANY of the national radio stations. There is no interest in local events, concerts, news etc from corporate radio and there is a reason for this...Why would they care about anything other than money from advertising? These bands blow our local listeners away!
As a local musician, I agree completely with this paragraph. The advent of Clear Channel and other mega owners is spelling a death knell for local musicians whose music doesn't fit the narrow playlists designated by large conglomerates. Now Clear Channel and others are buying out the small and medium club venues and tours. The 6 or so record companies who control the music biz work hand-in-hand with the radio Corporations to effectively end the possibility of airplay from unknown groups by local stations and DJ's.

Now the deregulation will go further? Of course it will. The owner of Clear Channel is a Republican friend of Bush. The FCC is happily bending over backwards to help.

Queen Autumn - 05:13pm May 27, 2003 EDT (#12 of 14)

In response to: "If NPR was expanding, there would be no comment at all."

If all of the stations aired NPR, you bet I'd cause a stink.

The problem is, there are even fewer stations that broadcast other forms of news and information. Only one station in Oregon broadcasts "Democracy Now". There may also be only one or two that broadcast Pacifica or Free Speech Radio News. Do you have access to these programs in your area? How much of your radio is being catered toward demographic marketing areas...rather than you need for information.

When only a handful of corporations (dependent upon advertisers) control your every means of getting information (and we have seen that they don't just stick to radio...venues, newspapers, tv stations, magazine etc. are becoming equally controlled by fewer corporations), you become...stupid.

I don't want to be stupid. Therefore, I do not support the deregulation of radio!

Michael Altarriba - 05:19pm May 27, 2003 EDT (#13 of 14)

The owner of Clear Channel is a Republican friend of Bush. The FCC is happily bending over backwards to help.
Bending over forwards is more like it.
It is profoundly unhealthy for a Constitutional Republic like ours to have its media outlets owned by a few, centralized megacorps. Voters make their decisions based on the information they receive, and on their own beliefs and judgements... which are also a function of what they hear. I don't relish a time when we only get to hear (whether it be via radio, TV or newspapers) what Rupert Murdoch or Ted Turner deign to allow us to hear. It isn't a question of ideology - I don't want Ralph Nader owning them all, either.

ok, call it what you want, it is accurate and nails the bee down for
what it is, pathetic. to reinterate:

Attention:

Do not listen to B101 - WBEB Philadelphia because...

1)They do not care at all about their listeners.

2)Their morning show team refuses to answer the phones even while a
contest is in progress and they have no winner.

3)Their telephone lines, both local and toll-free are disconnecting
callers if nobody picks up within 2 minutes, which makes it impossible
to get through to the station. Yet they do not care to do anything
about it.

4)Their morning show team misleads and decieves its listeners as well
as disrespects and insults their intelligence.

Thank you.

The current AM service will be retained providing service to those
listeners unable to tune in to the FM band.

They could cut costs by leaving the FM spectrum for other
broadcasting/broadcasters and go AM Stereo on their current AM
frequencies.
AM Stereo would be cheaper,has great quality and older people that
don't care about FM or the likes can listen on their current AM radios
as of before and the coverage of AM is superior also National radio is
am stereo ready.
So AM Stereo would be the way to go.

Michael

Well you won't get an argument from me. WTMD here in Baltimore is trying out a new AAA format. So far it's the most listenable music I've heard in years.

Here in Jacksonville NC earlier "today" (May 27, 2003,) while we
were watching a couple of area stations reporting a tornado about one
county over and headed our way, Time-Warner's auto-alert thing that's
supposed to interrupt with National Weather Service bulletins went off
and as usual instead of actually putting the message on the air it
just "blue-screened" every channel for several minutes. As long as
TWC is around there will always be rabbit ears for sale.

Are you hearing Radio Landfill while in an area within WRDW's
licensed coverage area? If so, sic the FCC on 'em. If not, try
convincing one of your local stations that people in the area can no
longer pick up Imus on an out of market station and that this gives
them an opportunity to offer him in that market.

It has no effect on the market for Imus; nobody would listen to a
distant station to get what they can get locally unless the local
offering is screwed up of course, say they can't handle the breaks.

Radio Landfill I think it probably illegal based on what they're
broadcasting, but as the contact person pointed out, they have no
obligation to protect WRDW. I agree; but it's still stupid, a
bureaucrat gone postal over his own importance. The public that is
driving along listening to an empty channel (he has to assume) want
to hear about the importance of the Central Ohio Solid Waste Authority,
that I take it is looking to protect its budget.

Here's their current loop:
http://rhhardin7.home.mindspring.com/trash2.ra

The messages: littering is illegal; recycling is good.

The latter is a political position, the other side is not given
that would come from economists, namely that recycling is wasteful.
They're absolutely not allowed to broadcast advocacy.

Murder is illegal too; I don't know why they want to appear to support
murder. If you see somebody murdering somebody, get his license
number and call the police. I add that message of my own, and wonder
why they didn't think to include it, if it's supposed to be a public
service announcement.

I'm exactly 26 miles away and lose the entertainment I used to have;
that's a more than 2000 square mile urban area that they're hitting with
this message promoting their budget allocation, against which
a genuine audience for what was there loses their programs, on
WRDW or KCJJ depending on which way you aim your radio.

WRDW is actually some other call but they ID with WRDW on 1630.

I imagine the local stations don't care or favor it, as it increases
their own audience, but probably a minute effect.

On your 5/19/03 1322GMT post, you stated that Geraldo was not an embedded reporter so embedded rules did not apply. Now you are making a case against Geraldo using the rules for embedded reporters.

> The policy used in this war was "security at the source," which in
> plain English means if a commander doesn't want something reported, he
> should not reveal the information. There was also a detailed and

> explicit list of guidelines to which reporters were to agree in
> advance, which Geraldo clearly violated.

How could Geraldo have violated anything since "if a commander doesn't want something reported, [the commander] should not reveal the information?" If there was a security at the source policy as you stated, then it would have been impossible for Geraldo to know any unreportable information, let alone broadcast it.

> But the penalty for such
> violations was not censorship, it was expulsion. After Geraldo's
> live, uncensored broadcast, the commander ordered his expulsion. But

Perhaps I should clarify my point: Students in universities are of above-average IQ. Clients at mental retardation centers are of lower than average IQ. Let us, for argument's sake, assume the average lifespan of a person to be sixty years. Students remain in college an average six years, or 10% of their lives. The mentally retarded never "recover", thus needing care an average forty years, or 67% of their lives. If the bell curve theory held, at any given moment, colleges would have 10% of one-half, or 5% of the population, while mental retardation centers would have 67% of one-half, or 34% of the population. I would find it hard to believe that mental retardation centers hold 6.8 times as many individuals as colleges. Of course, this is a gross statistical look at avery complex issue.

Proponents of the bell curve theory would justify their "findings" by applying racial generalizations, such as African-Americans, Orientals and Hispanics hovering below average IQ, while Caucasians being above average IQ. People have gone to ridiculous extremes to prove this. Chinese and Mexican immigrants in the West and Southwest were at a time administered "IQ tests" in English, thus assuring low scores. Likewise, scores of tests administered to poor rural African-American children were compared one-for-one with those of middle-to-upper class white children. We are lucky to have left those times in the distant past. My maternal grandfather was ruled an "idiot" (old term for a degree of mental retardation)on the basis of one such test. Years later, he graduated Cum Laude from Columbia University.

OK, I don't have major arguments with most of the programming ideas you have collected. But I do have two very important questions for you to consider:

1) At what point does a free speech issue become commercial speech issue? Don't these stations have a right to broadcast generic drivel if they don't feel like taking a chance on some relatively unknown bands?

2) Should radio broadcasting LEAD or FOLLOW the society it lives in? Should our society tell them which they ought to do?

If you can form a cogent argument around these questions, I'll pay attention. If you can't, you're just ranting. My solution? I have a CD player in my truck. I use it. The radio stays off most of the time, unless I'm station surfing.

Note to advertisers: Not only do I surf right past lame programs, I also surf right past the ads too.

No, you were the one who asserted that he was embedded and therefore
subject to censorship. I merely quoted chapter and verse of the
regulations to prove that your assertion is false. Even if I'm wrong
and he WAS embedded (and the accounts of various publications do
conflict on that point), he wasn't censored.

I'm not going to change your opinion about Geraldo, and you're not
going to change mine. But he wasn't censored, and there was in fact
no censorship system in place. He said and did what he wanted, and
only after the fact were there consequences. That was, and is, my
point.

It doesn't really matter anyway. Geraldo's stories are always, at
their core, about Geraldo. For him, everything else is set dressing.

I just traded cars and had to endure two weeks of New York area radio. (my old radio had an XM converter)

First problem: no country stations in NY or NJ (that's why I bought XM), Second problem:. 10 minutes of stupid morning DJ chatter followed by 5 minutes of commercials, then again followed by 10 more minutes of chatter. No music. Certain morning programs like Howard Stern hardly have any content other than commercials. Then news/traffic/weather. This pattern repeats every half hour. I spend 3 hours a day in my car commuting and a lot of time in NJ/NY traffic.

If I had to listen to regular radio one more week I'd be suicidal. I had switched to audio books borrowed from the local library, to kill the traffic time.

XM is a good value for the money. Few if any commercials, excellent sound quality (it makes FM sound like AM), and a large variety. The new family plan further reduces the monthly charge from $9.99 to $6.99 for each additional radio.

How many people thought that they would ever pay for TV?

Last week I strung out a 125 foot long wire antenna and attached it to an old Kenwood amateur transceiver I had restored.

End result. I found a couple of stations I'd be willing to listen to during the work day. All were outside the NYC contours

Well you got one thing right, he wasn't censored. Nor was there need to. Yeah some brass
probably asked some questions afterwards until he realized that Geraldo hadn't been allowed
to
say anything damaging. (Which of course Geraldo could not have even if he wanted to, due to
the
"security at the source" policy you pointed out.) Once common sense resumed, Geraldo was
back
with the 101st Airborne.

> It doesn't really matter anyway. Geraldo's stories are always, at

That may or may not be the case, but that does not pertain to the subject that was being
discussed.

Some more 'food for thought'...

"Culture is bastardized and prostituted when business takes an
interest in it. Even Beethoven knew that...."

Local hosts who may be hundreds of miles away, identical playlists
from town to town ... critics say radio just isn't what it used to be.
Join host Neal Conan for a look at changes in technology and media
ownership, and what it means to your radio dial.

(14 previous messages)

Nils Ohlson - 06:38pm May 27, 2003 EDT (#15 of 140)

Jim V.,

I can understand your feeling that this is a tempest in a teapot,
because if one doesn't live in one of the increasingly few areas that
HAVE local radio programming, one doesn't have any idea of what you
may be missing, and how precariously narrow is your contact with the
range of views and news that a citizen needs to make informed
decisions. Ironically it was an attempt to impose something very like
NPR programming on the Pacifica network, that woke a number of us up
to what was happening nationwide.

There is very little standing between you and the sort of complete
information control that that constitutes a totalitarian state.
Pacifica Radio, Democracy Now!, and a few other sources provide
national news that counters the accepted mid-to-right wing range that
constitutes the vast majority of air time.

When 3 companies own all the media in the nation save a few tiny
outlets, you won't even know that the water is coming to a boil. Time
to jump now, froggies!

You can't stop the wars. You can't make the old younger. You can't
lower the price of bread. - Sinfonia (Berio)
Jay Andres - Hell, I used to listen to him a long time ago. Remember
WBBM American Airlines' Musical Flight 'Till Dawn?

Now I have something called internet radio that gives me more
programming choices than I ever had, even before Clear Channel
existed.

JBW - 06:44pm May 27, 2003 EDT (#17 of 140)

My commercial radio listening is pretty much limited to baseball broadcasts.

Up to this year the Seattle Mariners, my team, were broadcast here in Portland OR on the local sports talk radio station which goes by the oh-so-imaginative title of "The Fan". You must understand there are two main sports topics here in Oregon, by far the largest is the Portland TrailGangstas...err...Jailblazers....ah..I mean Trailblazers, followed by the Oregon Ducks football team. (The Ducks?...but I digress...) As such the local sports talk knuckleheads know Basketball really well (I guess...actually I detest basketball, know next to nothing about it, and so am hardly a competent critic on the level of knowledge) and college football. I'm much more knowledgeable about football....but hardly an expert. They knew, and this I know very well, nothing about baseball. They had no inkling, for example, as to how amazing the M's 2001, 116 game winning season was. Anyway, when it was announced that they were moving stations last year I exclaimed "Hurrah! No more sports talk geeks who don't know the difference between a "cutter" a "splitter" and a knuckleball.

Boy was I wrong.

The station which picked them up goes by the title "Hot Talk". Oh boy. I don't listen to anything else but the Mariners games on this station but during the games I am subjected to the ads for their innane programming. If this is what the American people listen to and find amusing and interesting I have vastly overestimated the intelligence of my fellow Americans all these years. The three big shows they host are Tom Liekis (sp?), Rick Emmerson and Don Imus. Each ad for them makes me cringe out of embarassment.

If anybody reading this actually listens to and enjoys any of the shows I mentioned above I have but one comment...you are stupid.

I never thought I'd say this...I wish the Mariners would move back to their old affiliate.

JBW - 06:51pm May 27, 2003 EDT (#18 of 140)

When I was in High School in the early 80s I deejayed a night time indie rock show on a local public radio station.

It was a hellova lot of fun. I got to play what I felt like, parts of the soundtrack from "The Good, The Bad, and The Ugly", the Minutemen, DOA, Butthole Surfers, the Arnold Schwartzeneggar Work Out Record, a Chopin prelude, you name it. (Ok I didn't stick to format, strictly) I had people of all ages (and states of inebriation) calling me requesting stuff. (unlike most places the DJ actually answered the phone....'sept the nights a friend tagged along to see the glamorous world of showbiz...heh heh heh.) It was a lot of fun.

Yeah, commerical radio does suck.

Harry - 07:02pm May 27, 2003 EDT (#19 of 140)
You can't stop the wars. You can't make the old younger. You can't
lower the price of bread. - Sinfonia (Berio)
Try this or this or this or this etc etc etc

Rick - 07:30pm May 27, 2003 EDT (#20 of 140)
"The more you explain it, the more I don't understand it." -Supreme
Court Justice Jackson

It is profoundly unhealthy for a Constitutional Republic like ours to
have its media outlets owned by a few, centralized megacorps.
That's why the Internet is so healthy, and its regulation dangerous.

JBW - 07:31pm May 27, 2003 EDT (#21 of 140)

Harry,

I clicked on your links. Some of the stations do look interesting and
most of them are not the big commerical outfits.

These are reasonable alternatives for when I am on-line and on my
computer. For the rest of my time however......

JBW - 07:33pm May 27, 2003 EDT (#22 of 140)

Rick,

The only regulations I see on the internet are those which local
censors are trying to impose on public library access of the internet.

Those things which are, and should be, illegal to sell "over the
counter", are still illegal to sell over the net too.

What regulation are we talking about here?

Harry - 07:45pm May 27, 2003 EDT (#23 of 140)
You can't stop the wars. You can't make the old younger. You can't
lower the price of bread. - Sinfonia (Berio)
He's saying, users of the internet must remain forever vigilent. Big
gov't and big business would like to crush it.

You can't stop the wars. You can't make the old younger. You can't
lower the price of bread. - Sinfonia (Berio)
JBW,

Technology and comparison shopping will let you download streams/mp3s,
and take them with you at a very reasonable cost.

Queen Autumn - 07:54pm May 27, 2003 EDT (#25 of 140)

Too bad I can't get internet radio in my car...

Phil Stinson - 08:18pm May 27, 2003 EDT (#26 of 140)
Carpe Carpium
Exactly. The discussion is about the vanishing independence of radio stations, not intenet radio.

JBW - 08:20pm May 27, 2003 EDT (#27 of 140)

Harry,

"He's saying, users of the internet must remain forever vigilent. Big gov't and big business would like to crush it."

Harry for once we are on the same page.

JBW - 08:28pm May 27, 2003 EDT (#28 of 140)

Phil has a very good point, however.

How many of us have computers?....Ok I sell all of us with our hands up. Very good. How many of us have radios? Again, most if not all of us.

Now, here is the rub, how many of the people who listen to radio have computers? Ah! Problem. Far more people listen to radio than have access to internet radio so the issue is for the majority who don't have access to the internet, what alternatives exist for them?

Think back to the DJ in NY who locked himself into a booth and played Buddy Holly and the Crickets again and again and again because he LOVED their music and knew that others would too...if only they could HEAR it. That is the role of the whacky local DJ, be he or she on commercial or public radio...to play their fave music, not the music the corprate sales reps decide will most reliably target an audiance. In the end they will do better by allowing the fans of music, such as that whacky local DJ, to pick the music other fans will probably like and will tune in for.

Stable demographics is the bugbear of broadcasting. Take a chance. It might pay off. Isn't that the spirt of the free exchange of ideas?

I'd rather listen to Phil's band between innings of the M's games I listen to. I bet a whole heckoova lot of others would too. Only nobody will ever know because nobody will take the chance.

JBW - 08:34pm May 27, 2003 EDT (#29 of 140)

Harry,

Look you must cringe when you see Brittney Spears, just like I do...and probably for much the same reasons.

She is a product of the way the music biz is done today. Creative, innovative and intelligent music/musicians don't stand a chance. Rap is sold by how many acts of violence, acts of sexual depravity and times the word "bitch" is used. Artists like Public Enemy, or BDP, will never get a chance on "Contemporary Urban" stations. Hacks like J-Lo represent "Latin" music while talented hard working bands like Los Lobos labor on in anonomyity...just making damn fine music, thank you very much. Boy bands? Yech.

What drives the music biz? Radio play. Heavy rotation radio play. Now that it is all programmed in a central contol room and beamed out over sattelite, the heavy rotation is the same nationwide. McMusic for the masses. (or really stoop low and beam out some talk radio dunderhead in lieu of ANY artistic content at all...)

Culture is bastardized and prostituted when business takes an interest in it. Even Beethoven knew that....

You're sure about that? Can you document it or is this just a typical
internet unsupported accusation?

>2)Their morning show team refuses to answer the phones even while a
>contest is in progress and they have no winner.

Are you sure? Do you know that they're not talking to other callers
before the allotted lines are busy?

>3)Their telephone lines, both local and toll-free are disconnecting
>callers if nobody picks up within 2 minutes, which makes it impossible
>to get through to the station. Yet they do not care to do anything
>about it.

Are you sure it's their fault? In New York an unanswered call will
stop ringing after a set number of rings. The station has no control
over it.

>4)Their morning show team misleads and decieves its listeners as well
>as disrespects and insults their intelligence.

Are you sure? From your postings it would seen very hard to insult
your intelligence.

WCBN - 30 Years of Freeing Your Mind - Listen to us online!
=20
WCBN is the University of Michigan student-run community freeform radio
station in Ann Arbor, Michigan. We broadcast at 200 watts to the
University and its surrounding communities from the basement of the
Student Activities Building in downtown treetown. We have been
broadcasting a genre-less overview of music, news, and public affairs
for 30 years.

WCBN's musical format is freeform, with some specialty shows. Freeform
involves all different kinds of music, including jazz, reggae, blues,
hip-hop, country, rock, and just about everything else under the sun.
Instead of telling our DJs what to play, we allow them to select their
own recordings from our vast and unique library. It is their
responsibility to mix together many different kinds of music in an
intelligent fashion, and show links between musical genres.
=20

From: zupreme@hotmail.com
Message-ID: <bb7j84fpk1@xuxa.iecc.com>
Source record: 8030

Who is "The EVEL"?
I have some of their stuff and it is the hottest new rap group that I have heard. They are signed to this label called Magnitude Records in Chicago.
One of them is straight New York, the other has a Dirty South sound.

If anybody knows anything about them, Where they're from, if they have a CD out, ANYTHING, let me know! I've tried to reach their label for info, but it's very hush-hush, so far.

If you want any of their mp3's, email me at zupreme@zeaun.com or zupreme@hotmail.com!! These guys are hot!

Well I certainly can't argue with the above. The amount of commercials
is WAY the hell out of hand. Stern, Imus, they are all popular so they
have SHITLOADS of commercials and it's really pissing *me* off and I live
upstate 65 miles. I used to love listening to Stern but now it's all
lesbians shit and naked lady shit. I'm all for that but NON STOP? He used
to be good, lots of funny skits, song parodies, etc. Also, since Jackie
left the show has just sucked out loud IMHO. Jackie helped make that show
AFAIC.

> If I had to listen to regular radio one more week I'd be suicidal. I had

Agreed!

> quality (it makes FM sound like AM), and a large variety. The new family
> plan further reduces the monthly charge from $9.99 to $6.99 for each
> additional radio.

I'm still not ready to fork out money for regular radio, I think it's
rediculous personally. I listen more to shortwave now.

> How many people thought that they would ever pay for TV?

That's pissing me off too. I have 80 some channels and only 10 are worth
a shit. The rest suck. I'm paying $43 a month for it. Yeah, I need 3
freaking shopping channels, the spanish channel, 10 different sports
channels, etc.,etc. Absolutely rediculous. It's a freaking rip off IMHO.
I'm close to going satellite which I said I wouldn't do a few years ago.
If cable goes up to what satellite costs I may make the move. But then
I'll have over 200 channels that aren't worth shit instead!

America, ya gotta love it huh?

Gimme a break! NPR competes with commercial radio. How many cities can you live in at one time? I'll bet I can go from city to city and hear "All Things Considered" in every one of them. How is that different from similar playlists?

It's always fun to watch competing media "objectively" criticize their competition.

Gimme a break! I was one of the people involved in the very early experiements between WGBH and WETA that turned into NPR. I think NPR is terrific but not so pure that it can criticize its competition and be taken seriously.

Rich

1052. Pirate radio: who's hot in London right now?

On 29 May 2003 14:27:37 GMT, Stephanie Bauer <steph_72@hotmail.nospam> wrote:

>"I am right and even if I'm wrong, I'm right." Ok. :)

Precisely. You asserted that what Geraldo did was okay because a "military censor" was standing next to him and did nothing. I proved to you by quoting the actual directive to commanders that there was no censor because there was no censorship, not because anybody in the military okayed what Geraldo did. So if I was wrong about him not being embedded, he couldn't have been censored, and if I was right about him not being embedded, he couldn't have been censored. Yes, indeed, either way I'm right and you're wrong about the censorship issue.

I believe I have made myself perfectly clear, and I am finished with this discussion.

Mark Howell

1054. Geocasting

Hi everybody,

I'd like to know if the idea of geocasting (sending a broadcast to all the mobile devices in a particular region) is only a research idea or there are some implementations, techniques, etc., and where I could get information about this.

Any idea or hint is appreciated.

I apologize in advance if this newsgroup is not the most suitable for this question.

Thanks in advance

Network programming isn't "similar playlists." Other than ATC and ME,
few NPR stations will be playing the same thing at the same time. (WNYC
doesn't even carry TOTN, but I found it on WNYE.) Some are talk, some
are classical, some are jazz, etc.

Whilst it makes the phone ring there are some topics that are
delicate.Better I think to embrace all races as australians in a
multiracial country than constantly highlight and inflame the
differences ?
what do you think ?

they want to ban easter buns and ham sandwiches may make good copy
however
giving airtime to bad behaviour by middle eastern youth reinforces
their
isolationist road warrior cult mentality. Better I think to blame the
parents
and leaders than their out of control kids

you will get no shortage of callers about how bad they are cause they
are

the islamic religious and community leaders and parents have to get
their kids
into line ?

someone print an USA flag sticker with the words USA first
in arabic under neath ... real quick
---
radio works ....

In a chilling reminder of how Rwandans were incited to commit genocide
in 1994, an ethnic militia group in the northeastern Democratic
Republic of Congo began broadcasting hate messages yesterday.

Candip Radio said Hema militia will use force to dislodge civilians
seeking refuge in the UN mission in the regional centre of Bunia,
where fighting between Hema and Lendu ethnic groups has left hundreds
dead and driven thousands from their homes.

The broadcast recalled how Hutu extremists in Rwanda used Radio Mille
Collines to urge the slaughter of the country's minority Tutsis,
resulting in 800,000 mainly Tutsi deaths.

WARNING ******* arabs in particular are motivated by radio ******

keitha

ps I am not a racist and there is not one race or group of people
that I dislike.
I think of a person as an individual and judge him only by his
actions; not by the characters and actions of a collective of his

ancestors. People are individuals; they are not interchangeable ciphers in an amorphous group.

i pray to hear more talkback announcers just saying this ....and things like

" americans of middle eastern extraction ? god they are a beautiful people.. and dont they make great americans?"

Competition implies two or more stations offering similar services to
the same listenership...if one does it a bit better, they get the
higher numbers. In this sense, what on commercial radio "competes"
with NPR? AFAICT, nothing.

> How many cities can
> you live in at one time? I'll bet I can go from city to city and hear

The paragraph above yours says "identical playlists" not "similar
playlists".

Did you listen to the program? Though I'm no fan of Neal Conan in
general, it was entirely balanced in this case. I have no idea after
listening to it where Neal Conan stands on the issue of deregulation,
and he brought intelligent guests to the program to argue both sides
of the issue. I doubt one could find anything similiar on any
commercial radio or television station.

Rich, if your last line was n insult I'll let it go, I'm just here to
elicit a change in this station. I also am here to show others how
pathetically they are conducting business and how they could care less
about you or I, the public.
I am positive they had no winner for forty minute segments on a number
of occasions, I sat on line for 30 minutes plus, nobody picked up. The
disconnection problem is their fault because they have a say of
whether the phone company institutes it on the line. And they claimed
the phone company was all to blame and told me to call their phone
company to resolve it, how ridiculous and negligent on WBEB's part.

The phone company told me they are responsible and if one of their execs. would just give them a call they would fix it. And furthermore the disconnection thing was something that was just implemented a month ago, before that it never happened on their toll-free line, they could at least own up to having a say with it. It didn't just magically get there. So stop supporting radio stations that don't support you. You know many people are quick to respond to stuff like what I'm posting with foolish negativity. I have good reason to expose these guys for what they are. Yet people always want to dispute and take the other side, when if you were their listener you would see they couldn't give a shit about you. Let's say you wanted to comment on the show or request a song, you'd have a better chance of getting hit by lightning then the dj's picking up a phone to talk to you.

> bands?

They could (probably) legally broadcast a 1000-hertz sine wave all day.
(In fact one public-radio station did in the late 70's and called it
"avant garde music" but I digress....)

Commercial stations (in particular) broadcast what they think will
keep people listening to the station, so that they can sell ads that
hopefully will be listened to as well. It's not about music appreciation
education, or promoting a bunch of unknown bands....now, that's not to
say that a format built around lesser known songs absolutely can't work...

>
> 2) Should radio broadcasting LEAD or FOLLOW the society it lives in?
> Should our society tell them which they ought to do?

"Society", such as it is, already "tells them what to do" by
a. (for commercial stations) filling out Arbitron books and sending them
back
b. (for public radio stations, some religious programs, etc.) sending in
contributions
c. other indirect support (word of mouth, etc)

The broad masses of people out there (who, by the way, tend not to post
in online discussion forums and complain about the radio/music etc.) are
pretty complacent in their listening habits anyway. They like the oldies
they heard in high school and college, or perhaps some MOR in the office,
some Top-40 while on the road, a little "light jazz" before retiring in
the evening, etc. They're not *actively* seeking out radically different
stuff (although I think they can have their listening habits gently
"stretched" by competent programmers).

1065. For sale: Part interest in 1 KW fulltime AM in Georgia.

Newsgroup: rec.radio.broadcasting
Date: 2003-05-31 13:29:30 UTC
From: Meyer Gottesman <wrecktech@yahoo.com>
Message-ID: <bbaanq$e4b$1@xuxa.iecc.com>
Source record: 8041

For sale:

The "Radio Crazy" is back!

Still looking for investors/partners for fulltime AM
in Southern GA. 1490 KHz, 1 KW. On the air since the
50s of the last millenium, silly!

Joint venture: Active or inactive investors with at
least $10,000 each are welcome. I prefer active
investors with at least one of the following skills:
Sales, engineering, programming.

No individual can own over 49 percent. This rule
applies to me too!

No "AM bashers" or other "negative nabobs" are
welcome. I don't know what the hell a "nabob" is
either! Do you?

The total asking price is $75,000 with NO repeat NO
real estate. However the total rent is only $400.00
per month and the real estate would be available for
about $75,000 additional. Studios and transmitter are
under one roof.

My tel. is: (478)741-1710 in Macon, GA.

I am former Chief Engineer for a 5 KW fulltime AM in
New York City. In 1977-78 I was an International
Transmitter (radio) Field Service Engineer for Harris
Corporation. So the "Radio Crazy" ain't that crazy!
HI!

73,

Meyer Gottesman, W6GIV

If you still think an A/C station like WBEB takes requests, especially from
men, there is nothing more to talk about.

I agree fully.....objective reporting on Reichwing Goerbbell's Radio
is an impossiblity.

--
Lutheran minister and German war veteran Martin Niemoller: "First they
came for the Communists, and I didn't speak up, because I wasn't
a Communist. Then they came for the Jews, and I didn't speak up,
because I wasn't a Jew. Then they came for the Catholics, and I
didn't speak up, because I was a Protestant. Then they came for
me, and by then there was no one left to speak up for me."

My station's research finds that listeners to our country format also listen to a number of other formats, including public radio, talk, rock, religious, adult contemporary, even "smooth jazz." This is what listeners tell us. We also know that some of our listeners do not come to us for our music at all, but prefer our news coverage to that available elsewhere.

Many people listen to more than one type of programming because they choose the station offering what meets their needs or fits their moods at the time. Many people like several kinds of music, and will tune to a completely different format if the station to which they are listening plays a song they don't like.

I view every entertainment and information alternative from NPR to reality TV to video games as "competition." It is competition for the attention of the audience.

I recently gutted a working Gates Studioette 80 Mono console... I am putting my own power supply and stereo circuitry inside - I'm basically using only the case and part of the original shielded harness. But that's another story...

Anyway, on the main circuit board is a strange looking part, soldered near the rectifier dioides. It appears similar to a glass-tube neon pilot lamp, but I don't believe that's what it is - at least it never lit up when it was operating.

I'm venturing a guess here, but could this be a simple vacuum/gas spark arrestor by chance?

1072. Call to Action: Fire Michael Powell from the FCC Chairman job!

FCC vote may prove to be a windfall for media giants
BY DICK POLMAN
Philadelphia Inquirer

In a historic decision that could dramatically affect what Americans see, hear, and read, a federal agency controlled by free-market Republicans is poised Monday to loosen or scrap longstanding rules that prohibit corporate media concentration.

Led by Michael Powell (son of Colin), who was named chairman in 2001 by President Bush, the Federal Communications Commission is expected to approve - on a 3-2 vote, along party lines - the most sweeping reforms affecting the American media since the heyday of free network television.

Powell and his allies plan to shelve the 28-year-old rule that bars joint ownership of a newspaper and TV station in the same city; the rule that bars any network from owning TV stations with a combined reach of more than 35 percent of the U.S. viewing audience (by raising the bar to 45 percent); and the rule which says that a company can own only two TV stations in the largest cities.

Monday's decision could trigger a financial windfall for the big media conglomerates that lobbied hardest: Rupert Murdoch's News Corp. (Fox), Viacom (CBS), Disney (ABC), AOL Time Warner, NBC, Gannett, and the Tribune Co.

And they'll apparently get their wish, despite vocal opposition from critics, ranging from Ted Turner to the leaders of the National Rifle Association, who believe that unshackled companies would be bad for democracy, imperiling the public's right to "the widest possible dissemination of information from diverse and antagonistic sources," as decreed by U.S. Supreme Court Justice Hugo Black in 1945.

The media firms, in their filings to the FCC, declare: "(T)here is no longer any public interest need served by the commission's media ownership rules." They say that "market forces" would guide their corporate behavior and "ensure diversity, competition, and localism."

Powell, who says that his critics sound like "Chicken Little," says in his speeches that the FCC's rules are obsolete in the modern era, and that media companies - faced with competition from a range of new information sources, including the Internet - should have far more flexibility to buy and sell properties as they please, thereby allowing them to "adapt, respond, and survive."

Powell's detractors charge that he is essentially reducing the diversity of media voices, condoning the homogeneity of news and entertainment, and indulging the biggest firms in their desire to maximize profits with scant regard for the common good.

In essence, this is about a clash of philosophies, and opposing takes on what constitutes the "public interest." The Powell camp believes that unfettered capitalism will ultimately deliver whatever media consumers want most; the regulation camp says government should enforce rules to guarantee a broad range of media firms and a multiplicity of voices.

It's also a very public clash, unusual for an agency that normally toils in the shadows. The Democratic commissioners have been so incensed by Powell's move that they have held public hearings without him. In a speech last month, commissioner Jonathan Adelstein, declared: "We're likely to witness a tsunami of mergers. . . . We have in our hands a lit match, and we're moving close to a powder keg of public anger that may be about to explode."

Mergers may indeed occur - one consumer activist says that 140 media markets are vulnerable - but critics don't foresee any major deals in Philadelphia. Each of the city's four TV stations is already owned by one of the four networks, and the FCC won't allow one network to buy another. In addition, Knight Ridder, which owns the Philadelphia Inquirer and the Daily News, no longer owns any TV stations and has no plans to purchase any.

Nevertheless, former Fox TV senior executive Sandra Ortiz, who now directs the University of Southern California's Center for Communication Law & Policy, said the other day that: "this FCC decision is a watershed event, in terms of reshaping the media landscape. The potential consequences are so dangerous to a functioning democracy.

"Will the 'free market' encourage the media owners to behave in the public interest? We have no control over that situation, and it feels scary to me. We're at their mercy."

Actually, the deregulation of broadcasting isn't new. The FCC has been easing away from oversight since the 1980s, when Ronald Reagan appointee Mark Fowler declared that broadcasting should be treated like any other business, that TV was just "a toaster with pictures." More recently, the FCC has granted waivers allowing a single company to run a newspaper and a TV station in 23 cities (examples: Gannett in Phoenix, the Tribune Co. in Los Angeles).

But critics say that Powell's move is a virtual blank check for media consolidation. They just wish the FCC would take a hard look at what has happened to radio, as a cautionary lesson. In 1996, federal rules favoring small, local radio station owners were relaxed. The result: a mass buying spree. Today, two companies, Clear Channel and Viacom, own stations that reach 42 percent of U.S. listeners. Playlists have been

homogenized, and the size of the average local radio news staff is down 47 percent since 1994.

Eleventh-hour petitions, and emails running 97 percent against media concentration, have failed to dent Powell's resolve. The critics, at this point, are resigned to defeat. Andrew Schwartzman, who runs the Media Access Project, a public interest law firm, said: "We don't have the votes. All we can do is quibble. This cake is baked."

But Powell's supporters say the critics deserve to fail. Former FCC attorney Randolph May, a communications specialist at the Progress and Freedom Foundation, a free-market think tank, said: "Their arguments have an air of unreality, a failure to acknowledge how much the world has changed. The FCC restrictions are so outdated that they're irrational."

Decades ago, he said, Americans got most of their information from three TV networks and the local paper; with so few media voices, Washington might have been justified in preventing the biggest firms from dominating too much. But with today's cacophony of voices, he said, "there's no need for government to dictate (ownership) decisions to media companies."

Besides, May said, media companies have First Amendment rights, just like citizens: "Government-dictated ownership rules run up against the constitutional right of companies to speak out, through the outlets that they choose to own."

Rob Frieden, a telecommunications lawyer and former FCC staffer, said, "Powell sorely underestimated the political fallout. For a lot of people, this decision doesn't pass the smell test. But he's a true believer in the market, and I think it's a courageous move."

Frieden isn't perturbed by the big-media dominance of radio since deregulation was enacted (no company owned more than 40 stations in 1990; today, Clear Channel owns more than 1200). He said that, with so many information options today, any smart consumer can avoid bland programming.

"I'm a world beat, ska, reggae kind of guy," he said, "and I can get all of that off the net."

The critics, however, see that argument as an excuse for monopolization. Robert McChesney, a communications expert and author of "Rich Media, Poor Democracy," said that the Republican FCC commissioners aren't really interested in true free-market competition; rather, they practice what he calls "crony capitalism."

He said: "This decision is a corporate welfare gift. These are companies that rely on government-granted monopolization privileges. This is deregulation on behalf of commercial interests with no pretense of serving the public."

But the conglomerates firms say they're serving the public well. Murdoch's company said in FCC documents that its Fox TV outlet in Philadelphia, WTXF, aired 24.5 hours of news each week in 2002 - an increase of 250 percent since the station was purchased in 1995. This controversy won't cease with the FCC vote, however. On Capitol Hill, lawmakers in both parties, who have complained that Powell has been moving too quickly, are planning to hold new hearings on media consolidation Andrew Schwartzman, the foe of big media, said, "Congress will have a lot to say. That's the next act."

But Robert Thompson, a Syracuse University expert on TV and popular culture, said that the conglomerates will be tough to beat: "They have a concise argument - 'the marketplace.' They know what they want, and they know how to get it."

1073. Bud Cort's readings of "The Catcher in the Rye" and "Conversations with Capote"

Newsgroup: rec.radio.broadcasting

I hope that someone can help me out with this...I am trying to track down 2 radio programs that Bud Cort did: J.D. Salinger's "The Catcher in the Rye" (a reading done during the late 1970's) and Lawrence Grobel's "Conversations with Capote" (an adaptation of his stage play, done around 1990). Would you know if they are still being aired on public radio either nationally or for the L.A., C.A. area, or if there is a way to find a copy of them for sale?

I have been having a hard time finding out when or if one of both programs are still being broadcast, or where I can find such information, but have read, in the case of "Catcher" anyway, that it still is played on an L.A.-area public radio station.

I would greatly appreciate ANY information regarding those programs. Please respond to this inquiry at any time. (Or year).

That ain't commercialism, that's survival because the government doesn't have the money to fund the arts--which, of course, it's not anywhere near a priority. In Europe, on the other hand, you get pure non-commecial classical radio in every country. They must be 'communist'...

I hate to jump into a thread late, esp. one crossposted to 4 groups,
but in this case I'll test the waters with a toe.

It's interesting that you mention WNYC and WNYE. NYC has an AM and FM
frequency. Have you noticed how often you can hear the same program --
even at the same TIME -- on 2 of these three freqs? (If not 3?)

Since I found this post in the s/w list, I'll also point out that on
some of these stations, they have stopped repeating their own content
late at night in order to rebroadcast the BBC, which is easily
available on its own freq's.

Add to this NPR's shameful attacks on true alternative programming
(e.g., LPFM), and there is little difference between their approach
and commercial radio. The quality of the content is much better on
NPR, but the approach is pretty much the same. NPR wants to BE a "big
boy" network, not compete against them.

I'll leave now.

Rich I listened to the show and unlike your Reichwing Radio Network, they
do allow callers to bring up the very point you have.

Many slammed NPR as "national/bland" - just as they did your commercial
global fodder.

No mention of micro/pirate/free radio and only a 20-second remark on
LPFM.....neglecting to mention NPR ruled against it until one
of the hosts informed Neil of this ommited fact.

NPR is better than REich radio....but still sad compared to a real
freemarket with local ownership and content.

I wonder if this guy actually bothered to talk to power up front, or just used quotes from other interviews.. On the morning talk shows today, Powell pointed out that the old media ownership restrictions were tossed out by the courts. Very roughly paraphrased, he indicated that there are effectively no regulations in place at this point in time. They've been studying for more than 20 months, and had a requirement to act, and even with that, they are months behind the time limit that they had been given at the start of the process.

I'm not in favor of huge media buying up all the local TV stations, but this sounded rather one sided...

Never. WNYE doesn't carry ATC or ME, and WNYC doesn't carry TOTN or
Diane Rehm.

All three do have Fresh Air, but not at the same time; WNYE has Tavis
Smiley, apparently live at 9 am ET, and WNYC-AM has him on in the
evening (he's been at several different times).

WNYC has been simulcasting their local "news and information"
programming from 10 am to 2 pm since they got their FM capability back
in April 2002; before then they were (for unfathomable reasons) putting
everything onto WNYE as well as WNYC-AM (I'd never known WNYE existed,
so it's their own fault that I tune away to it for TOTN and sometimes
even WBEZ (Chicago)'s Odyssey just before it.)

> Since I found this post in the s/w list, I'll also point out that on

[I'm in r.m.c. and don't know why this thread is even here. The
paragraph beginning "Network programming" is mine, though my attribution
has disappeared.]

WNYC-AM used to rebroadcast their morning shows in the evening; in 2001
they got a bunch of pretty dull syndicated stuff and moved the repeats
to the wee hours; then during the Iraq "war" they had BBC World Service
practically around the clock (which is worse than CNN at repeating and
repeating and repeating), but now they're back to normal, except an hour
of BBC at 9 am on FM, while ATC continues on AM.

> Add to this NPR's shameful attacks on true alternative programming
> (e.g., LPFM), and there is little difference between their approach
> and commercial radio. The quality of the content is much better on
> NPR, but the approach is pretty much the same. NPR wants to BE a "big
> boy" network, not compete against them.

"Shameful attacks"?? When TOTN has done a few segments on the topic --
they don't even give a full hour to one topic any more -- the host never
ever ever expresses an opinion, however idiotic the guest's position is.

Someone pointed out, during that incessant BBC deluge, that their
reporters are far more aggressive than any US reporters. They're
constantly asking leading questions -- the kind that are prefaced with
"Isn't it true that ..." and the interviewee really does squirm.

(When Mara Tapp, formerly of WBEZ, used to do that, the answer was
usually, "Well, no"; since she was not looking for information or
opinion but providing her own.)

1080. US to loosen media ownership reins

Newsgroup: rec.radio.broadcasting
Date: 2003-06-02 12:15:12 UTC
From: lookaboutsearch@yahoo.com.au
Message-ID: <bbff4g$qi9$1@xuxa.iecc.com>

US to loosen media ownership reins

The head of the Federal Communications Commission says US regulators will vote to loosen rules on media ownership today.

FCC chairman Michael Powell says the moves will pass, despite a wave of criticism that the changes could wipe out independent voices.

"There is no doubt. There will be a vote tomorrow," Mr Powell told ABC America's This Week program.

The widely leaked proposals would allow a single group to own television stations with 45 per cent of the national audience, up from the current 35 per cent cap.

Limits on cross-ownership of newspapers and radio and TV stations would be lifted, as would the constraints on networks' ability to buy up local TV stations.

Opponents of the proposals say they would unleash a bout of merger mania that would sound the death knell for small, independent media groups and result in a dangerous monopoly over news dissemination.

Mr Powell defended the changes and said he believed that they would not result in massive media mergers.

"I think you'll see some restructuring," he said.

"But I happen to personally believe not nearly as much as some of the alarmist rhetoric would suggest.

"Just because somebody can buy something doesn't mean it makes strategic or financial sense to do so.

"It is not the elimination of rules, it's the modification of rules. Indeed, some of the rules won't be eliminated at all," he said.

"One of the rules is probably going to be actually tightened. And the remaining rules are going to be modified to reflect the modern media marketplace."

Congress loosened rules on ownership of broadcast stations in 1996 and ordered that the FCC review its other rules every two years.

The proposed changes come under the latest review, which is already months overdue.

Critics of the proposals, who range from rock stars to the National Rifle Association to CNN founder Ted Turner, fear that more

consolidation among media companies would reduce the number of independent voices, thereby harming US democracy.

The bass player with rock band REM, Mike Mills, said: "If the FCC gives a monopoly on all news and entertainment programming to a handful of big corporations, then we also lose the diversity of ideas that makes democracy work."

Mr Turner wrote in Friday's Washington Post that the rules would "stifle debate, inhibit new ideas and shut out smaller businesses trying to compete".

"If these rules had been in place in 1970, it would have been virtually impossible for me to start Turner Broadcasting or, 10 years later, to launch CNN," he said.

Mr Turner is a major shareholder in AOL Time Warner, one of the five largest US media companies.

Senator John McCain, who heads the Senate Committee on Commerce, Science and Transportation which covers telecommunications issues, says he believes the new rules could be justified despite fears of losing independent voices.

"Exactly where that line is is something that's very difficult to determine," he told US Meet the Press.

"But I do believe there is a situation of continued consolidation within the media which may, over time, deprive Americans of the news and information that they need."

What the courts have told the FCC is that they must either provide a compelling justification for the existing rules, or they need to develop rules that they can justify.

The fact that public comments on this proceeding are something like 99% opposed to any further deregulation might make a part of a compelling justification of the existing rules -- were the Powell FCC inclined to even make the attempt.

So, yeah...the issues are more complex than the article indicates -- but Chairman Powell isn't telling the full story, either.

1086. For sale: Part ownership in really cheap AM station.

Newsgroup: rec.radio.broadcasting
Date: 2003-06-02 12:15:32 UTC
From: Meyer Gottesman <wrecktech@yahoo.com>
Message-ID: <bbff54qpv1@xuxa.iecc.com>

For sale:

This is a "new" deal from the "Radio Crazy". It has never been offered before on airwaves.

Part interest in daytime AM in S. Georgia with some night power. 1 KW days, 500 watts PSA and 43 watts at night. Single tower. Consultant says it can probably go to 5,000 watts days and still remain non-directional!

Real estate IS INCLUDED in this cheapie. Building, land and tower. Studios and transmitter under one roof.

Asking price is $90,000 cash or $100,000 on terms with $25,000 down and seller financing.

Joint venture. I seek investors with at least $10,000 each. Prefer active with one or more of the following skills: Sales, programming and engineering.

All investors would be on the board with full voting rights if desired.

This station is the only AM in town and probably the only AM in that county. The FM licensed to same community has moved far away and is licensed only in name. This is the ONLY LOCAL RADIO precese in a community of close to 5,000.

The station is "dark" now for the past few mos. but the FCC license is intact. It first went on the air in 1960.

My tel. is: (478)741-1710 in Macon, GA. I am a semi-retired radio engineer and a ham since 1950. Age 68. Active and healthy.

Despite the "nasties" on this forum, the "Radio Crazy" is not only NOT a scam artist but worked for the US Dept. of Defense in a sensitive position and held a SECRET level security clearance!

The "Radio Crazy" was Chief Engineer for a NYC 5 KW fulltime AM in 2001. The "Radio Crazy" was the past President and founder of a non-commercial FM (KPOO)in San Francisco, CA. It is on the air since 1973.

73,

Meyer Gottesman, W6GIV
ala "The Radio Crazy"

They most certainly do take requests, all stations do. Whether they
choose to play the song is another story. But the issue is not that,
it's that you don't even have a snowball's chance in hell of even
connecting to the d.j.

> More government funded obscenity!!

That's right, isn't it an obscenity thay while America spends money on
convincing the Cuban people that 'America is #1,' the public radio
stations go begging for money?

International Broadcasting Operations (IBO) and Broadcasting to Cuba:

The FY 2002 request of $428.2 million for International Broadcasting
Operations will provide funding to continue U.S. Government
non-military international broadcasting operations consolidated by the
International Broadcasting Act of 1994. These operations are under the
auspices of the independent Broadcasting Board of Governors and
include the International Broadcasting Bureau (IBB), the Voice of
America (VOA), Radio Free Europe/Radio Liberty (RFE/RL), and Radio
Free Asia (RFA).

The IBO request will enable IBB, RFE/RL, and RFA to continue base
level operations, including salary and inflation increases. The
request includes an additional $5 million to enhance VOA broadcasting
to the Middle East, with a focus on diversifying both programming and
transmission media.

Broadcasting to Cuba:

The FY 2002 request of $24.9 million funds base level operations for
both Radio Marti and TV Marti, including salary and inflation
increases. The request includes full funding to support OCB
transmission requirements in FY 2002.

A bit lopsided though. There are 25 stations to two public ones... If
there were more of the latter and one specialized in country music,
then you would have to offer fewer commercials and/or better quality.

Act Now: Visit the FCC Action Center.

"Monopoly is a terrible thing until you have it." • Rupert Murdoch
-- The Electronic Republic by Lawrence Grossman

"A consolidation of power the likes of which this country has not seen since William Randolph Hearst." • Senator John McCain (R-AZ) reacting to News Corp's $5.3 billion acquisition of Chris-Craft Industries and its TV stations.

"[M]urdoch has created a personal media empire before which even Citizen Kane would tremble. But, his many detractors would say, Murdoch's success has resulted in the dumbing down of the media, with quality entertainment and journalism replaced by mindless vulgarity. Beyond this, they mutter darkly about his emergence as a voracious political wheeler-dealer." • BBC News, "Rupert Murdoch: Bigger Than Kane" July 31 2002

"[A] media mogul who has singlehandedly lowered the standards of journalism wherever he has gone. His New York Post and his Fox News Channel are blatantly political, hardly confining Murdoch's conservative political ideology to editorials or commentary but infusing it into the news coverage itself." • Richard Cohen, "A Media Empire's Injustices," Washington Post April 22,2003.

Fox is "for the first time in the history of television, a competitive fourth network that provides a uniquely diverse voice in American political discourse•" • FCC Chairman Michael Powell, Memorandum Opinion and Order approving Murdoch's acquisition of Chris-Craft Industries.

Perhaps no one person or company so exemplifies the dangers of media concentration as 72-year-old Keith Rupert Murdoch, an Australian by birth, now a U.S. citizen, who owns media properties in 52 nations, and is reportedly worth $7 billion.

In the United States, Murdoch's empire includes not only a TV network, but also cable outlets, a publishing company, a movie studio, a newspaper. Murdoch has aggressively sought government approval of his acquisitions, and has played hardball to get it.

What Rupert Owns in the United States:
Murdoch and his family own about 29 percent of News Corporation, which he chairs.
In the United States News Corporation owns:
Major publishing houses: HarperCollins; William Morrow; Avon
Television Network: Fox Broadcasting Company
34 Fox Television Stations
Fox Sports
Fox News Channel
TV Guide (part owner)
The Weekly Standard
New York Post
Twentieth Century Fox
TheStreet.com (part owner).
Los Angeles Dodgers

Cities Where Fox Owns Two TV Stations:
New York City;
Los Angeles;
Chicago;
Minneapolis;
Dallas;
Phoenix;
Orlando;
Houston

He Gets What He Wants

In 1995, the FCC was considering whether Murdoch, an Australian native who became a U.S. citizen, broke the rules and lied to the FCC by contriving to buy U.S. TV stations even though federal law restricts foreign ownership of TV and radio stations. While Murdoch was a U.S. citizen, the FCC determined that News Corp, an Australian corporation, was the true owner of the Fox U.S. stations, violating a federal law that states that foreign companies may own no more than 25 percent of a US TV or radio station. While the FCC was weighing action against Murdoch, Murdoch and his lobbyist paid a visit to then House Speaker Newt Gingrich (R-GA). Weeks later, Murdoch's publishing company signed a $4.5 million book deal with Gingrich. The public outcry led Gingrich to give up his advance. There was talk in Congress about passing legislation to permit foreigners to own TV stations. The FCC, acting against the recommendations of FCC staff, and under pressure from Republicans in Congress, took no action against Murdoch, ruling that his starting a fourth TV network was in the public interest.

In 2001, the FCC approved Murdoch's $5.4 billion acquisition of Chris-Craft Industries and its ten local TV stations. The FCC approved the merger, even though it meant that News Corp would own stations that reached about 41 percent of the U.S. television audience, exceeding the current 35 percent cap on audience reach, and despite the fact that News Corp is an Australian company . Then FCC

Commissioner Gloria Tristani sharply criticized the FCC ruling. "The transfer of these television station licenses violates the Communications Act and raises serious concerns regarding the ongoing concentration in the ownership of television stations and other media," she wrote, adding that the decision "further diminishes the marketplace of ideas." She added:. "This decision also shows the lengths the Commission will go to avoid standing in the way of media mergers." Powell defended the decision by praising the Fox Network's role in providing "a uniquely diverse voice in American political discourse."

In 2002, the FCC which Tristani accused of never standing in the way of media mergers had a change of heart, when EchoStar attempted to acquire DirecTV, thwarting Murdoch's bid to buy the satellite broadcasting company. For the first time in 36 years, the FCC decided against the corporate merger because of concerns about competition, refusing EchoStar time to negotiate with the Department of Justice and possibly work out some concessions. FCC Chairman Powell said that the "combination of EchoStar and DirecTV would have us replace a vibrant competitive marketplace with a regulated monopoly." The FCC's decision came after a Murdoch lobbying campaign to derail the EchoStar acquisition. According to The Wall Street Journal, Murdoch attended a conference of the National Religious Broadcasters in February 2002 in Nashville. Murdoch promised that he would give them more religious and family programs if News Corp bought DirecTV. Later, Christian activists reportedly sent a petition with several hundred thousand signatures to the Department of Justice urging officials to oppose the EchoStar acquisition. The same month that Murdoch was courting religious broadcasters, Focus on the Family, the National Association of Evangelicals, Morality in Media, the Christian Coalition, the Family Research Council and the American Asssociation of Christian Schools asked the FCC to investigate Murdoch's Fox Network for violating FCC decency regulations.

Murdoch now is lobbying Congress and the FCC to approve his $6.6 billion acquisition of DirecTV. Writing in USAToday, David Lieberman likened the merger to allowing a major food company to buy a grocery store chain. Will Murdoch give priority to Fox programs on his satellite company, will he hike DirecTV's rates? Others worry that he'll extort cable operators by threatening to pull his programs from their networks unless they pay high fees to him, and will force program suppliers to sell their material cheaply so that they can be carried by DirecTV. Nevertheless, the expectation is that the FCC won't block this merger. The Federal Trade Commission, whose bipartisan Commissioners might have given the deal greater scrutiny, will not be reviewing the deal and media observers believe that the Department of Justice is more likely to approve it. "Despite our best efforts, this administration will approve the deal," Jeff Chester, executive director of the Center for Digital Democracy, told TelevisionWeek. "Murdoch gives to the Republican Party and the Republican Party is going to give him DirecTV."

Part interest in daytime AM in S. Georgia with some night power. 1 KW days, 500 watts PSA and 43 watts at night. Single tower. Consultant says it can probably go to 5,000 watts days and still remain non-directional!
>>

Probably.

And, can probably add night power at about 500 watts, using a pattern somewhat similar to the old WNML.

Sadly, the present Tx site is on the wrong side of town for that pattern to work, but I'd bet real estate on the west side of town is reasonably affordable.

I'd probably go with a two-site operation at first, then after I got a license to cover the night operation, I'd probably abandon the present day site (or sell it to a wireless company).

One of your most interesting "deals" to date, Meyer.

Still, at $90,000, cash, this one is not as attractive as the mid-band ND Class B I found for nearly half that price.

Hmmm... most gas regulators I've ever seen, such as the OA2, emit a reddish-blue glow when operating, and also require a filament to fire the gas. This is merely a very small bulb-looking thing, about 1/4" x 1" in size. There is (was) no glow to it at all, nor is there any silver-looking "gidder" inside it, like a vacuum tube has. It's perfectly clear, like a lamp. It has only 2 leads and inside, just a very small fixed gap. It is mounted parallel to the circuit board. with a small jumper securing the nipple end to the board.

I've seen some pretty strange looking parts in broadcast gear before, but this is a new one on me!

Between 9/12/01 and April 2002, WNYE simulcast at first all, and then most of WNYC's programming. When WNYC-FM got back on the air, they went their separate ways and the only duplication I know of is Fresh Air and Tavis Smiley (though not at the same times).

BTW AFAIK "Performance Today" isn't available anywhere in NYC, and if Schickele Mix is any more (not that I was a fan), I don't know where. And don't get me started on Whad'ya Know.

Dear Peter:

Thanks for the email and your sage comments. It is
WNGA, Nashville, Georgia.

On the air since 1960.

Sure, with it being directional it can probably go
with much higher power at not but is it really worth
the expense of at least one more tower, assuming there
is even enough acreage for another tower. Of course an
(expensive!) self-supporting tower could be used with
a much smaller "footprint".

I was once offered a chance to buy KMBL in Junction,
TX for $55,000 with $7,500 down. What was interesting
was that it also included the building PLUS a nice
home next door! It was on 1450, 1 KW, class "C".
Fulltime of course. The only station in that county.

This was in 1972. I was Chief Engineer for KRBE FM in
Houston at the time. Class "C" FM. Now one of the top
rated FMs in Houston!

But I got paid $9000.00 a year in Houston so could not
come up with the down payment.

Tell me more about that cheap TX AM. I promise to stay
out of the deal. Just curious.

If you want to invest, I will see to it that you own a
larger than proportinate amount of stock for being FS
(First sucker! HI!)

I live in Macon, GA about 2 hours drive away and can
manager and engineer the station.

73,

Meyer Gottesman

> choose to play the song is another story. But the issue is not that,
> it's that you don't even have a snowball's chance in hell of even
> connecting to the d.j.

Many stations do not take requests; lots of stations don't even answer the phone. Listeners who call in are perhaps 15 of the total listenership, and probably not like the passive 99%.

You seem concerned that your call was not answered. The typical studio has maybe 5, 10, even 15 lines. Even during a morning show, there are perhaps 2 or 3 persons to answer. If the people on the phone get tied up with an important call, or are busy prepping their next segment, they are not going to answer every call. Many will be dropped.

In case you were not aware of it, stations program via computer all their music in advance so that they can achieve the difficult to obtain elements of balance, artist separation, flow, tempo control, rest, etc. Most PDs are not going to let an anonymous caller whose only qualification is having a phone take over their station. Requests may be registered just as a second level confirmation of other research, but they are essentially meaningless sin an adult radio station.

Morning shows selectively harvest useful calls, whether they be to participate in the show or to win in a contest. They can not answer every call... at this station or any other one with hundreds of thousands of listeners in a major market.

Try to understand this.

You probably won't win the lottery this week, either.

OK. I can picture it now, and you're probably right about it being a
surge protector. I've seen something similar, but can't remember where or
what it was used for.

I think though radio gets through, but TV doesn't.

Would you believe that they are actually very cultural? Could they
afford to sound stupid to the Cuban people?

What a contrast with Miami's commercial radio. A cultural wasteland.

But I don't think the point is not so much to subvert Cuba, as to
Americanize it.

1111. 710 WOR... now in "High Definition" Radio!

Newsgroup: rec.radio.broadcasting

Since the beginning of last week, 710 WOR in New York City has not been transmitting an IBOC/"HD Radio" digital signal. In its place, they have been broadcasting a regular analog AM signal, with the audio bandwidth thankfully no longer cut in half.

Thus, although it's not in AM Stereo, we now finally get to hear "High Definition" radio from WOR -- and it's not through any kind of digital signal! Alas, here's an example of what 710 WOR now sounds like, on a good ol' GE Superadio III -- a high fidelity AM/FM radio that has been in production for over a decade and can be bought in most Sears stores for $49.99:

ftp://ftp.amstereoradio.com/uploads/710wor.mp3

This is an actual, unretouched recording of WOR received on a Superadio III, about 25 miles away from their transmitter site, as recorded on Sunday, June 1st.

Now, if *all* AM radios and stations sounded this good -- without any of IBOC's swishy, gritty, wishy-washy digital artifacts -- would we even be bothering about any kind of digital signals on AM?

Analog AM radio may be an 85-year-old technology, but when done right, it can still hold its own against any of today's super-hyped digital techniques.

It's only 15% of the market, fuckwit. You're a moron. It's your
legacy. Deal with it.

New Rules Give Big Media Chance to Get Even Bigger

Reuters
Howard James of Eagle, Colo., protested the changes in rules for media companies like the radio giant Clear Channel Communications.
By DAVID D. KIRKPATRICK

As consumer advocates deplored yesterday's changes to media ownership rules as a blow to democracy, investors bought up shares of the biggest media companies.

Both advocates and investors agree that the latest rule changes are likely to let media leviathans like the News Corporation and Viacom fortify their positions while increasing the odds against newcomers and small fry.

The changes mainly loosen restrictions on the ownership of local television stations. But even in the one area the radio industry where the Federal Communications Commission tightened the rules on media consolidation, the changes will have the unintended effect of making it more difficult for smaller rivals to challenge the dominance of the industry giant, Clear Channel Communications.

To curtail the swift consolidation of radio broadcasting since its deregulation in 1996, the commission set new limits on the maximum number of stations one company can own in certain cities and towns. The new rules will impede Clear Channel's future expansion. But at the same time, the commission let Clear Channel keep its clusters of stations that exceed the new caps, preventing its smaller competitors like Cumulus Media and Citadel Broadcasting from ever catching up.

Citadel had sought rules that would force it to sell some of its approximately 200 stations, in the hopes of forcing Clear Channel to shed some of its 1,200.

"Whether you call it revolution or evolution, the big companies now have the opportunity to be even bigger and stronger," said Blair Levin, a former top official for the commission who is now an analyst at the investment bank Legg Mason.

"Everyone in the business has to wake up tomorrow and ask, Do I want to be a buyer or a seller? In a relatively condensed time frame three or five years there will be a pretty large turnover in the way the map looks," Mr. Levin said.

Together with recent deals like News Corporation's proposed acquisition of the satellite broadcaster DirecTV, the changes may create opportunities and pressures for more mega-mergers.

In a little-noticed shift, the commission declined to reinstate a rule that blocked cable companies from owning local television stations.
